Contents

| | |
|--|----------|
| Preface | page vii |
| Acknowledgements | ix |
| List of tables | xv |
| List of critical values, useful expressions, etc. | xvii |
| A note on evaluation of expressions | xviii |
| Introduction | 1 |
| 1 Words, numbers and pictures | 7 |
| 1.1 Three definitions | 7 |
| 1.2 Measurement | 7 |
| 1.3 Graphical presentation of data | 11 |
| 2 Coin tossing and stratigraphy | 27 |
| 2.1 A coin-tossing experiment | 27 |
| 2.2 'Small probabilities' and 'rare events' | 31 |
| 2.3 The six steps of hypothesis testing | 33 |
| 2.4 The probability of being wrong | 36 |
| 2.5 The nature of the alternative hypothesis: one-tail and two-tail tests | 38 |
| 2.6 An application in stratigraphy | 38 |
| 3 One- and two-sample testing | 41 |
| 3.1 One- and two-sample tests | 41 |
| 3.2 Polygonal shapes of basalt columns and mud flakes | 42 |
| 3.3 The Kolgomorov-Smirnov 'one-sample' test | 43 |
| 3.4 The Kolgomorov-Smirnov 'two-sample' test | 45 |
| 4 Nominal-scale statistics | 47 |
| 4.1 Nominal scale - further developments | 47 |

| | | |
|----------|--|-----------|
| 4.2 | Contingency tables – independence | 48 |
| 4.3 | Positive and negative association | 50 |
| 4.4 | The ‘chi-squared’ test | 50 |
| 4.5 | Degrees of freedom | 52 |
| 4.6 | The Fisher exact probability test | 54 |
| 4.7 | Discussion | 56 |
| 5 | Theoretical distributions and confidence intervals | 58 |
| 5.1 | The place of theoretically derived distributions | 58 |
| 5.2 | The Gaussian pdf | 59 |
| 5.3 | Testing for Gaussian distribution of an observed variable | 62 |
| 5.4 | Some further applications: z as a test statistic | 64 |
| 5.5 | Confidence intervals – introductory | 65 |
| 5.6 | Student’s t and confidence intervals | 66 |
| 5.7 | Student’s t and the difference between two means | 68 |
| 5.8 | Parametric and non-parametric tests | 68 |
| 5.9 | Estimating proportions by counting – more confidence intervals | 69 |
| 6 | Ordinal-scale methods | 72 |
| 6.1 | Classifying or measuring on two or more scales simultaneously | 72 |
| 6.2 | An example – possible differences between subsamples | 73 |
| 6.3 | The median test | 75 |
| 6.4 | The Wald–Wolfowitz runs test | 76 |
| 6.5 | The Mann–Whitney U test | 78 |
| 6.6 | Kruskal–Wallis one-way analysis of variance | 79 |
| 6.7 | Comparison of parametric and non-parametric tests | 80 |
| 6.8 | Kendall’s τ – a measure of ordinal-scale correlation | 81 |
| 6.9 | ‘Ties’ in ordinal measurement | 83 |

| | | |
|-------------------|--|------------|
| 7 | Correlation and regression | 86 |
| 7.1 | Univariate, bivariate and multivariate populations | 86 |
| 7.2 | Correlation | 86 |
| 7.3 | Regression | 89 |
| 7.4 | Applications and developments | 91 |
| 8 | Two-dimensional orientations | 93 |
| 8.1 | Classes of tests, uniform distribution and preferred orientation | 93 |
| 8.2 | Tests of uniformity | 94 |
| 8.3 | The von Mises distribution | 98 |
| 9 | Three-dimensional orientations | 107 |
| 9.1 | Spherical data and distributions | 107 |
| 9.2 | Point-density contours | 108 |
| 9.3 | Numerical representation of spherical data | 110 |
| 9.4 | The Fisher distribution | 112 |
| 9.5 | The Bingham distribution | 119 |
| 10 | Hypotheses, samples and decisions | 128 |
| 10.1 | A possible route to objectivity | 128 |
| 10.2 | Sampling: introductory, and a cautionary tale | 131 |
| 10.3 | Sampling: possible solutions | 133 |
| Appendix A | Matrix and vector algebra – a glossary | 145 |
| Appendix B | Further exercises | 152 |
| B.1 | Amphibole porphyroblasts in a muscovite schist | 152 |
| B.2 | Orientation of trilobites | 153 |
| B.3 | Sedimentary successions I | 154 |
| B.4 | Sedimentary successions II | 156 |
| B.5 | Dimensions and shapes of some fossils | 156 |
| B.6 | Garnet and biotite porphyroblasts | 157 |
| B.7 | Folded quartzite with lineation | 157 |

| | | |
|--------------|--|-----|
| Appendix C | Numerical accuracy and errors | 159 |
| C.1 | Decimal places and significant digits | 159 |
| C.2 | Rounding off | 160 |
| C.3 | Absolute errors: addition and subtraction | 160 |
| C.4 | Relative errors: multiplication and division | 161 |
| C.5 | Errors in functions | 161 |
| C.6 | Conclusions | 162 |
| C.7 | Rounding errors and computing | 163 |
| Appendix D | Notation | 164 |
| Bibliography | | 166 |
| Index | | 167 |
