

STRATIGRAPHY

Principles and Methods

Robert M. Schoch

Boston University

VAN NOSTRAND REINHOLD

New York

CONTENTS

Preface / v

Chapter 1. The Science of Stratigraphy / 1

- An Overview of the Scope of Stratigraphy / 1
- Subdivisions of the Discipline of Stratigraphy and Types
of Stratigraphic Units / 4
- Historical Perspective on the Origins of Stratigraphy / 7
 - Some Founding Heroes of Stratigraphy / 7
 - The Development of a Standardized Stratigraphic Nomenclature
for Rocks and Time / 21

Chapter 2. Rocks: The Material Basis of Stratigraphy / 27

- Composition and Classification of Rocks / 29
- The Genesis of Rocks Exposed at the Surface of the Earth / 33
 - Sedimentary Rocks / 33
 - Igneous Rocks / 38
 - Metamorphic Rocks / 40
- Basic Data Gathering in the Field / 41
- Geophysical Well Logs / 43
- Seismic Sections / 58

Chapter 3. Some Conceptual Foundations, Bases, and Underpinnings of Stratigraphy / 66

- History / 66
- Convention and Scientific Principle / 69
- Uniformitarianism / 70
- Bedding, Stratification, and Layering of Rocks / 73
- Unconformities / 76
 - Types of Unconformities / 79
 - Relations of Strata to Surfaces of Unconformity / 84
 - Overstep / 86
 - Overlap / 88
 - Use of Unconformities in Dating Geological Events / 89

- Basic Principles of Stratigraphy / 91
- Facies / 95
 - Historical Perspective / 96
 - Walther's Law / 99
 - Weller's Contributions to the Concept of Facies / 101
- Facies Sequences, Facies Models, and Environmental Stratigraphy / 109
- Correlation in Stratigraphy / 111
 - Evidence and Methods of Correlation / 123
 - The Ulrich and Grabau Controversy / 124

Chapter 4. Codes and Conventions of Stratigraphic Nomenclature and Classification / 128

- Stratotypes / 132
- Procedures for the Description of New Stratigraphic Units / 137
- Status and Adoption of Formal Stratigraphic Units / 140
- Global Boundary Stratotype Sections and Points / 142
- Soviet Stratigraphic Classification and Terminology / 144

Chapter 5. Lithostratigraphy and Related Subdisciplines / 152

- Lithostratigraphic Units / 152
- Lithodemic Units / 159
- Formal Nomenclature of Lithostratigraphic and Lithodemic Units / 161
- Parastratigraphic Units / 163
- Lithocorrelation / 164
- Pedostratigraphic Units / 167
- Unconformity-Bounded and Allostratigraphic Units / 168
- Hydrostratigraphy / 173
- Archeological Stratigraphy / 175
- Lunar and Extraterrestrial Stratigraphy / 179

Chapter 6. Biostratigraphy and Magnetostratigraphy / 182

- The Development of Biostratigraphy / 182
- Current Biostratigraphic Units / 189
- Spatial Biostratigraphic Units / 193
- Biostratigraphic Correlation / 194
 - Buckman's Polyhemeral System of Biostratigraphic Correlation / 194
 - Current Methods of Biocorrelation / 197

- Magnetostratigraphy / 205
 - Remanent Magnetism in Rocks / 209
 - Magnetostratigraphic Nomenclature / 210

Chapter 7. Chronostratigraphy and Geochronology / 214

- Chronostratigraphic Units / 214
- Geochronologic and Geochronometric Units / 221
- The Standard Global Chronostratigraphic Scale / 223
- The Controversy Over Chronostratigraphy: Chronostratigraphy and the Nature of Stratigraphic Units / 225
 - Stratotypes / 228
 - Schindewolf's Views on Stratigraphy and Chronostratigraphy / 230
- Chronocorrelation / 232
- Event Stratigraphy / 237
- Chronostratigraphic Significance of Depositional Sequences / 238
- Diastrophism / 241
- Stable Isotope Stratigraphy / 242
- Geochemical Diagenetic Markers / 247
- Sea Level Changes / 248
- Chronocorrelation Based on Position in a Transgressive-Regressive Cycle / 256
- Geologic-Climate Units / 256
- Holocene Chronostratigraphic Units / 257
- Numerical Dating / 258
 - Numerical Ages Based on Sedimentation Rates / 260
 - Dating on the Basis of Physical and Chemical Processes / 261
 - Dating on the Basis of Growth Rates of Organisms / 262
 - Isotopic Dating Methods / 263
 - Radiocarbon / 266
 - Uranium-Lead Dating Methods / 268
 - Rubidium-Strontium Methods / 270
 - Potassium-Argon Dating Methods / 272
 - Other Radioisotopic Dating Methods / 274
 - Fission-Track Dating / 274
 - Thermoluminescence and Electron Spin Resonance / 277
 - Chronometric Calibration of the Geologic Time Scale / 278

Bibliography / 281

Appendix 1: North American Stratigraphic Code (1983) / 319

Appendix 2: The Definition and Concept of Geologic-Climate Units / 357
