The Ice Age

## Jürgen Ehlers

Witzeeze, Germany

## Philip D. Hughes

Reader in Physical Geography, School of Environment, Education & Development, The University of Manchester, Manchester, United Kingdom

## Philip L. Gibbard

Department of Geography, University of Cambridge, Cambridge, United Kingdom

WILEY Blackwell

AC	CKN	OWLEDGEMENTS	xi
AF	BOU	T THE COMPANION WEBSITE	xiii
1.	Intro	oduction	3
	1.1	In the Beginning was the Great Flood	4
	1.2	The Ice Ages of the Earth	14
	1.3	Causes of an Ice Age	18
2.	The	Course of the Ice Age	27
	2.1	When did the Quaternary Period Begin?	27
	2.2	What's in Stratigraphy?	33
	2.3	Traces in the Deep Sea	35
	2.4	Systematics of the Ice Age	43
	2.5	Günz, Mindel, Riss and Würm:	
		Do They Still Apply?	46
	2.6	Northern Germany and Adjacent Areas	58
	2.7	The British Pleistocene Succession	76
	2.8	Quaternary History of North America	86
	2.9	The Course of the Ice Ages: A Global View	w 100
3.	Ice a	nd Water	107
	3.1	The Origin of Glaciers	107
	3.2	Recent Glaciers: Small and Large	113
	3.3	Dynamics of Ice Sheets	121
	3.4	Meltwater	129
4.	Till and Moraines: The Traces of Glaciers		
	4.1	Till of Bescareholstored January 1975 h	137
	4.2	Moraines	172
5.	. Meltwater: From Moulins to the Urstromtal		
	5.1	Fjords, Channels and Eskers	191
	5.2	Outwash Plains and Gravel Terraces	202
	5.3	Ice-dammed Lakes	207

	5.4	Kames: Deposits at the Ice Margin	213
	5.5	Urstromtäler	220
6.	Maps	s: Where Are We?	227
	6.1	Digital Maps	229
	6.2	Satellite Images: Basic Data for	
		Ice-Age Research	236
	6.3	Projections and Ellipsoids	240
7.	Exter	nt of the Glaciers	243
	7.1	Exploring the Arctic by Airship	243
	7.2	Glaciers in the Barents Sea	244
	7.3	Isostasy and Eustasy	246
	7.4	Ice in Siberia?	252
	7.5	Asia: The Mystery of Tibet	258
	7.6	South America: Volcanoes	
		and Glaciers	265
	7.7	Mediterranean Glaciations	269
	7.8	Were Africa, Australia and	
		Oceania Glaciated?	272
	7.9	Antarctica: Eternal Ice?	273
8.	Ice in	the Ground: The Periglacial Areas	277
	8.1	Definition and Distribution	277
	8.2	Extent of Frozen Ground during	
		the Pleistocene	281
	8.3	Frost Weathering	283
	8.4	Cryoplanation	286
	8.5	Rock Glaciers: Glaciers (Almost)	
	it C	Without Ice	288
	8.6	Involutions	291
	8.7	Solifluction	294
	8.8	Periglacial Soil Stripes	296
	8.9	Frost Cracks and Ice Wedges	297
	8.10	Pingos, Palsas and other	
		Frost Phenomena	301

9.	Hippos	s in the Thames: The Warm Stages	311
	9.1	Tar Pits of Evidence	311
	9.2	Development of Fauna	312
	9.3	Development of Vegetation	316
	9.4	Weathering and Soil Formation	324
	9.5	Water in the Desert: The Shifting of	
		Climate Zones	336
	9.6	Changes in the Rainforest	345
10.	The Co	ourse of Deglaciation	349
	10.1	Contribution to Landforms	349
	10.2	Ice Decay	350
	10.3	The Origin of Kettle Holes	354
	10.4	Pressure Release	357
	10.5	A Sudden Transition?	359
	10.6	The Little Ice Age	363
11.	Wind,	Sand and Stones: Aeolian Processes	369
	11.1	Dunes	369
	11.2	Aeolian Sand	378
	11.3	Loess	378
12.	. What Happened to the Rivers?		
	12.1	River Processes and Landforms	383
	12.2	Dry Valleys	386
	12.3	The Rhine: Influences of Alpine	
		and Nordic Ice	387
	12.4	The Elbe: Once Flowed to the Baltic Sea	396
	12.5	The Thames: Influence of British Ice	400

13.	North	and Baltic Seas during the Ice Age	405
	13.1	Development of the North Sea	406
	13.2	Development of the Baltic Sea	414
14.	Clima	te Models and Reconstructions	427
	14.1	Ice Cores	427
	14.2	The Marine Circulation	429
	14.3	Modelling the Last Ice Sheets	431
	14.4	Modelling Glaciers and Climate	442
15.	Huma	n Interference	447
	15.1	Out of Africa: Humans Spread Out	448
	15.2	Neanderthals and Homo sapiens	452
	15.3	The Middle Stone Age	452
	15.4	The Neolithic Period: The Beginning	
		of Agriculture	453
	15.5	Bronze and Iron	454
	15.6	The Romans	455
	15.7	Middle Ages	457
	15.8	Recent Land Grab	457
	15.9	Drying Lakes, Melting Glaciers and	
		other Problems	459
	15.10	The Anthropocene: Defining the	
		Human Age?	465
RE	FEREN	ICES	469
