*The Nature
of
Geomorphology*

METHUEN LONDON AND NEW YORK

Contents

<i>Acknowledgements</i>	vi
<i>Preface</i>	viii
1 Scientific context of geomorphology	1
Introduction	1
Implications of recent changes of emphasis in geology	2
Divergence between geomorphology and certain emphases in geology	6
Geographical characteristics of geomorphology	8
Implications of changes of emphasis in geography	13
Statistics and geography	18
The fourth dimension	21
Conclusion	24
2 The nature of geomorphology	26
Description and interpretation	26
Process and form	41
Qualitative and quantitative aspects	49
Laboratory and field work	56
The role of geomorphology	61
3 Basic postulates	66
Catastrophism and Uniformitarianism	66
The Cycle of Erosion	74
Climatic geomorphology	82
Stillstands and the mobility of earth structures	93
Structure, process and stage	100
The necessity for simplification of geomorphological complexity	110
<i>Glossary</i>	119
<i>Bibliography</i>	126
<i>Index</i>	153
