

The Soil

An introduction to soil study

F M Courtney M.Sc., Cert. Ed.

Education Officer, Avon County Council

S T Trudgill Ph.D.

Lecturer in Geography, University of Sheffield

Hodder & Stoughton

LONDON SYDNEY AUCKLAND

Contents

Preface	iv	6 Soil description	90
1 Soil development	1	6.1 Introduction	90
1.1 Rock and soil	1	6.2 Digging the pit	90
1.2 Agents and processes of rock weathering and soil development	2	6.3 Site location	91
		6.4 Site description	91
		6.5 Soil horizons	91
		6.6 The soil profile	94
		6.7 Example profile descriptions	98
2 Soil components and soil properties	11	7 Soil classification	102
2.1 Soil material	11	7.1 Introduction	102
2.2 Soil mineral matter	11	7.2 Why classify?	102
2.3 Soil texture	13	7.3 The basic unit of classification	102
2.4 Soil structure	17	7.4 Development of soil classification	102
2.5 Soil fabric	18	7.5 The 1940 British classification	103
2.6 Soil organic matter	18	7.6 The 1980 British classification	103
2.7 Soil water	21	7.7 The United States 'Soil Taxonomy' (USDA 1975)	109
2.8 Soil air	23	7.8 The FAO classification (FAO 1974)	109
2.9 Soil organisms	23	7.9 Soil mapping	110
2.10 Soil nutrients	27	7.10 Frameworks for research	112
2.11 Soil acidity or pH	30		
3 Soil types and their development	33	Appendix 1 The analysis of soil for grain size	114
3.1 Soil processes and the development of soil types	33	Appendix 2 The estimation of organic matter by loss on ignition	116
3.2 The time factor in soil development	43	Appendix 3 The measurement of soil moisture content	116
3.3 Soil on slopes	45	Appendix 4 Soil field study on a hillslope in Britain	117
3.4 Case studies of soil development	47		
4 Soils in the ecosystem	50	Further reading	118
4.1 The ecosystem approach	50	Sources	120
4.2 Soil and water	52	Index	121
4.3 Nutrient cycles	57		
4.4 Soil and plants	59		
5 Soil management	63		
5.1 Soil fertility	63		
5.2 Soil structure	67		
5.3 Soil mechanics	72		
5.4 Soil drainage	77		
5.5 Soil irrigation and salinity	78		
5.6 Soil erosion and conservation	80		
5.7 Soil resources	84
