## Vibrations of Soils and Foundations

F. E. Richart, Jr. J. R. Hall, Jr. R. D. Woods

PRENTICE-HALL INTERNATIONAL SERIES IN THEORETICAL AND APPLIED MECHANICS N. M. Newmark / editors / W. J. Hall

## CONTENTS

I	Introduction I	
	1.1 Design Criteria	2
	1.2 Relations Between Applied Loads and Quantities which Govern Criteria	2
	1.3 Evaluation of Soil Properties	3
	1.4 Design Procedures	3
z	Vibration of Elementary Systems 5	
	2.1 Vibratory Motion	6
	2.2 Vector Representation of Harmonic Motion	10
	2.3 Single-Degree-of-Freedom Systems	11
	2.4 Phase-Plane Analysis of Single-Degree-of-Freedom	
	Systems	32
	2.5 Systems with Two Degrees of Freedom	48
	2.6 Natural Frequencies of Continuous Systems	57
3	Wave Propagation in an Elastic,	
	Homogeneous, Isotropic Medium 60	
	3.1 Waves in a Bounded Elastic Medium	60
	3.2 Waves in an Infinite, Homogeneous, Isotropic Elastic	
	Medium	75
	3.3 Waves in an Elastic Half-Space	80

vii

4	Elastic Waves In Layered Systems		93	
	4.1	Distribution of Wave Energy at Boundaries		93
	4.2	Elements of Seismic Methods		100
	4.3	Steady-State Vibration Techniques		111
5	Pro	pagation of Waves in Saturated Media	121	
	5.1	Introduction		121
	5.2	Compression Waves in Ideal Fluids		123
	5.3	Wave Propagation in Porous Saturated Solids		132
	5.4	Effect of Water Table on Wave Propagation in Soils		136
	5.5	Summary		139
6	Beh	avior of Dynamically Loaded Soils	40	
	61	Introduction		140
	6.2	Rehavior of Elastic Spheres in Contact		141
	63	Behavior of Soils Under Small-Amplitude Vibrat	orv	
	0.5	Loading		151
	6.4	Behavior of Soil Under Large-Amplitude Loading		170
7	The Ela:	oories for Vibrations of Foundations on stic Media	191	
	7.1	Introduction		191
	7.2	Lamb (1904) and the Dynamic Boussinesq Problem		192
	7.3	Vertical Oscillation of Footings Resting on The Surf	face	
		of The Elastic Half-Space		194
	7.4	Torsional Oscillation of Circular Footings on the Ela	stic	~ ~ ~
	1	Half-Space		213
	7.5	Rocking Oscillation of Footings Resting on the Ela	STIC	216
		Half-Space	the	210
	7.6	Sliding Oscillation of a Circular Disk Resting on	the	221
	77	Geometrical Damping Associated with Vibrations	of	441
	1.1	Rigid Circular Footings on the Elastic Half-Space	U1	224
	7.8	Coupled Rocking and Sliding of the Rigid Circu	ılar	
	7.0	Footing on the Elastic Half-Space		227
	7.9	Oscillation of the Rigid Circular Footing Supported	by	
		an Elastic Layer		230
	7.10	Vibrations of Rigid Foundations Supported by Piles	or	
		Caissons		235
