

Piling and Deep Foundations

Edited by
J.B.BURLAND
Imperial College of Science and Technology, London

J.M.MITCHELL
Ove Arup & Partners, London

VOLUME 1

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1989

Contents

Preface	IX
1. Special foundations	
The merits of polymeric fluids as support slurries <i>J.J.Beresford, P.M.Cashman & R.G.Hollamby</i>	3
American developments in the use of small diameter inserts as piles and insitu reinforcement <i>D.A.Bruce</i>	11
Monitoring and quality control of a 100 metre deep diaphragm wall <i>D.A.Bruce, B.De Paoli, C.Mascardi & E.Mongilardi</i>	23
Recent developments in continuous flight auger piling <i>P.H.Derbyshire, M.J.Turner & D.E.Wain</i>	33
Deep mix-in-place soil/cement stabilisation using hollow stem augers for excavation at Elland, West Yorkshire <i>J.A.Elliott</i>	43
Hand-dug underreamed piles at Embankment Place, London <i>W.J.Grose</i>	51
Design, construction and applications of auger piling system for earth retention and underpinning of structures <i>A.A.Gupte</i>	63
Bearing capacity of nodular piles <i>S.Kanai & S.Yabuuchi</i>	73
Economical piling in soft soils and expansive clays <i>D.Mohan</i>	79
Construction of cast-in-place piles with enlarged bases <i>H.Mori & T.Inamura</i>	85
Large diameter drilling operations of multi head down the hole hammer drill through boulders and granite <i>J.Nakayama</i>	93
Behavior of mini-piles used in foundation underpinning in Beaumont Clay, Houston, Texas, USA <i>M.W.O'Neill & R.F.Pierry</i>	101
Producing sealing walls and sealing slabs by applying the soilcrete process <i>E.W.Raabe & S.Toth</i>	111
High capacity barrettes in a region of old underground quarries <i>F.Schlosser, B.Simon & J.Morey</i>	119
Thornton Road, Listerhills, Bradford <i>B.C.Slocombe</i>	131
Deep vibrocompaction by stone columns and liquefaction investigation <i>P.Ventura</i>	143

Influence lines for the pile loading on bridge pier foundations <i>M.B.Wechsler</i>	149
Small diameter piling system used in Australia <i>P.J.Yttrup, D.A.Cameron & D.L.Stuart</i>	155
2. Maritime structures	
Unusual dolphin monopile structure <i>C.T.Christensen & C.Nielsen</i>	165
Variable inertia elastic piles on elastic plastic soils bearing horizontal forces: A numerical calculation method applied to two examples of structures <i>G.Noce & M.Fedolino</i>	175
3. Basement construction	
Foundations of the 'Kö-Galerie' in Düsseldorf using top/down building technologies <i>P.Arz</i>	185
The use of a reverse circulation diaphragm walling technique to form a plastic cut-off wall around Sizewell B Power Station <i>H.F.Cowie & J.D.Crawley</i>	193
Review of the methods used to construct large diameter bored piles for top down construction <i>J.D.Findlay & G.E.Wren</i>	199
Recent developments in secant bored pile wall construction <i>D.E.Sherwood, C.N.Harnan & M.G.Beyer</i>	211
Little Britain project: Construction of basement <i>R.H.Wright & G.Doe</i>	221
4. Piling problems	
Problems of cast in situ driven piles added to existing piles and built near a standing structure <i>L.F.Albert & L.Trezzi</i>	233
Ultimate uplift capacity of piles and pile groups in granular soil <i>B.M.Das</i>	241
Dynamic stability of an axially loaded pile <i>S.S.Gajin & R.J.Folić</i>	247
On the effects of sand grading on driven pile performance <i>S.R.Hencher & D.J.Mallard</i>	255
Rehabilitation of existing foundation piles of marine structures in New York City Harbor, USA <i>P.B.Kelleher</i>	265
Construction of pile foundation for railway viaducts <i>M.D.Khattar</i>	269
Soil displacement caused by pile driving in clay <i>K.Rainer Massarsch & B.B.Broms</i>	275
Methods of constructing concrete piles on heavily contaminated sites <i>N.C.Matheson & D.E.Wain</i>	283
Impact of environmental regulations on pile foundation design and construction using diesel hammers <i>R.D.Short & M.B.Williams</i>	293
5. Rock sockets	
Large diameter machine bored piles in Australia <i>W.J.Kingwell & F.A.Albrecht</i>	299

Performance of a large diameter drilled pier <i>A.J.Partos, E.J.Sander & U.Hungspruke</i>	309
World Financial Center Foundations, New York <i>G.Tamaro</i>	317
Rock socket piles in the Sherwood Sandstone of central Birmingham <i>L.J.Whitworth & A.J.Turner</i>	327
6. Driven piles	
Instrumented driven steel tube piles at Canary Wharf, London <i>A.R.Gaba</i>	337
Production and testing of 600 reinforced-concrete piles for the Central Bank of Iraq <i>H.Meseck</i>	347
Reanalysis of piles under static and dynamic lateral loads <i>S.Prakash & S.Prakash</i>	355
Bearing capacity of piles in soils with time dependent characteristics <i>M.J.Preim, R.March & M.Hussein</i>	363
Capacity of slender steel piles <i>J.Wennerstrand & A.Fredriksson</i>	371
7. Instrumentation and interpretation	
The effect of vertical pile loading on subsequent lateral behaviour <i>A.Lyndon, G.Price, I.F.Wardle & L.S.Varey</i>	377
Combined loading tests on large diameter piles <i>A.Lyndon & W.G.Mitchell</i>	383
Caisson design and construction, upstream guide wall, locks and dam no. 26 <i>E.C.Demsky & B.H.Moore</i>	389
The Dutch Cone Penetration Test and its use in determining the pile bearing capacity <i>C.Van der Veen</i>	397
8. Pile testing methods	
An innovative approach to load testing of high capacity piles <i>P.Birmingham & M.Janes</i>	409
A simple evaluation of dynamic pile tests <i>D.Kolymbas</i>	415
New device for load testing driven piles and drilled shafts separates friction and end bearing <i>J.Osterberg</i>	421
An improved method for the prediction of pile bearing capacity from dynamic testing <i>R.T.Stain & A.G.Davis</i>	429
9. Base grouted piles	
Vibration-free driven tubular-piles <i>S.Doornbos</i>	437
The effects of changes in effective stress on a base grouted pile in sand <i>V.M.Troughton & A.Platis</i>	445
The design and construction of large diameter base grouted piles in Thanet Sand at Blackwall Yard, London <i>J.A.Yeats & N.J.O'Riordan</i>	455
Base grouted piles in Thanet Sands, London <i>D.E.Sherwood & J.M.Mitchell</i>	463
