PREFACE	xi
CHAPTER 1. SEDIMENTATION IN HORIZONTAL SETTLING TANKS.	1
Sedimentation of Individual Particles	1
Sedimentation of Suspended Matter in Restrained Conditions	7
Effect of Suspension on the Settling Process of Suspended Matter	10
Sedimentation of Polydispersed and Coagulated Suspension	13
CHAPTER 2. PECULIARITIES OF STRUCTURAL SOLUTIONS AND METHODS OF DESIGN- ING HORIZONTAL SETTLING TANKS	20
Peculiarities of Structural Solutions	20
Methods of Design	22
CHAPTER 3. SEDIMENTATION IN HORIZONTAL SETTLING TANKS WITH SYSTEMS OF SURFACE COLLECTION OF WATER AND HYDRAULIC BOTTOM DISPOSAL OF SLUDGE	37
Construction of Settling Tanks with Water Collection and Sludge Disposal Systems	37
Basis of the Method of Designing New Horizontal Settling Tanks and Systems	53
Sedimentation Process in Settling Tanks with Water-Collection System and Sludge-Removal System	58

Use of Aeration in Dispersed Collection of Water	64
Hydraulics of Flow in Prismatic Ground Disposal System for Sludge during Crowding Motion of Liquid with Variable Discharge	67
CHAPTER 4. METHODS OF STUDYING HORIZONTAL SETTLING TANKS	72
Simulation of Horizontal Settling Tanks	72
Investigation of a Model of a Common Horizontal Settling Tank	80
Tests on Model Horizontal Settling Tank with Systems of Surface Collection of Water and Ground Hydraulic Sludge Disposal	98
Simulation by Method of Electro-Hydrodynamic Analogy of Working of Horizontal Settling Tank with Dispersal Pipe- Type Water Collection System	103
Study of Hydrochemical Properties of Water and Physico- Mechanical Properties of Sludge	106
Determination of Sludge Contours and Concentration of Suspension	107
Determination of Flow Velocities	112
CHAPTER 5. STUDY OF OPERATING CONDITIONS OF HORIZONTAL SETTLING TANKS	115
Stages of Investigation	115
Tests on Conventional Settling Tanks	117
Comparative Characteristics of Operating Conditions of Common and Modernized Sections of a Settling Tank	119
Operating Conditions of KVS Settling Tanks after Regulation of Severskii Donets	130
Analysis of Operation of Horizontal Settling Tanks at Kochetok Waterworks	135
Analysis of Working of Settling Tanks at Kaidak Waterworks	143
Analysis of the Working of Settling Tanks of the Dnepr Waterworks	159

CHAPTER 6. DESIGN OF HORIZONTAL SETTLING TANKS WITH SYSTEMS FOR THE DISPERSED COLLECTION OF CLEAR WATER AND BOTTOM SLUDGE REMOVAL	165
Theoretical Basis for New Settling Tanks	165
Law of Sedimentation and Formation of Clear Zone	173
Method of Designing for Flow Movement and Settling of Particles	179
Design of Settling Tanks on Basis of Results of Studies on Sedimentation Process	184
Design of Surface Dispersed System for Collection of Water	192
Design of a Hydraulic Bottom Sludge Removal System	205
Analytical Explanation of the Effect of Aeration for Technological Working Conditions of Purification Devices	206
Economic Justification for Introducing New Horizontal Settling Tanks	222
REFERENCES	225
