PROCEEDINGS OF THE FIFTH INTERNATIONAL CONFERENCE ON NUMERICAL  
METHODS IN GEOMECHANICS/NAGOYA/1-5 APRIL 1985

# Numerical Methods in Geomechanics Nagoya 1985

*Edited by*

T.KAWAMOTO & Y.ICHIKAWA

*Nagoya University, Japan*

*VOLUME ONE:*

*Main lectures*

*1 Numerical techniques and programming*

*2 Constitutive laws of geotechnical materials and interfaces*

*3 Flow and consolidation*

*Published on behalf of the International Committee for Numerical Methods in Geomechanics  
and Department of Civil and Geotechnical Engineering, Nagoya University*

A.A.BALKEMA / ROTTERDAM / BOSTON / 1985

## Contents of volume I

Preface	IX
<i>Main lectures</i>	
Finite layer analysis of settlement creep and consolidation using microcomputers <i>J.R. Booker &amp; J.C.Small</i>	3
Constitutive modelling for geological materials <i>C.S.Desai, G.Frantziskonis &amp; S.Somasundaram</i>	19
Dynamic effective stress response of soil structures: Theory and centrifuge model studies <i>W.D.Liam Finn</i>	35
Some remarks on back analysis and characterization problems in geomechanics <i>Giancarlo Gioda</i>	47
Numerical testing of constitutive relations for soils <i>G.Gudehus &amp; D.Kolymbas</i>	63
Applications of boundary integral equation method to geomechanics <i>S.Kobayashi</i>	83
Recent experience with numerical analysis of mining engineering related problems <i>J.L.Meek</i>	93
Consolidation of soils under static or dynamic loading <i>J.H.Qian</i>	105
Evaluation of plastic zone around underground openings by means of displacement measurements <i>S.Sakurai, N.Shimizu &amp; K.Matsumuro</i>	111
Dynamic analysis applied to rock mechanics problems <i>S.Valliappan &amp; K.K.Ang</i>	119
<i>1 Numerical techniques and programming</i>	
Dynamic analysis of non-homogeneous ground movements by the boundary integral equation - finite element hybrid method <i>S.Kobayashi &amp; T.Kishima</i>	135
Three dimensional analysis of ground motion by integral equation method in wave number domain <i>Y.Niwa &amp; S.Hirose</i>	143
Some axisymmetrical boundary element approximations for deep cavity problems <i>M.Okabe</i>	151
Boundary element solutions for some problems in soil dynamics <i>O.Tullberg &amp; N.-E.Wiberg</i>	157

An elastoplastic analysis for post-failure behaviors of strain softening rocks <i>H.K.Lee, H.S.Yang &amp; Y.Mizuda</i>	165
Three-dimensional elasto-plastic FEM analysis in discontinuous rock masses <i>Gen Keqin &amp; Lu Jiayou</i>	173
A numerical approach to the solution of elastoplastic soil problems <i>K.W.Lo</i>	179
Rigid plastic finite element method for soil structure <i>T.Tamura, S.Kobayashi &amp; T.Sumi</i>	185
Introduction of crack strain to the analysis of a discontinuous body <i>T.Tanabe, M.Iwata &amp; H.Yoshikawa</i>	193
Assessment of the numerical performance of quadratic isoparametric joint elements <i>J.V.Simmons</i>	199
Numerical analysis of cracked and jointed rock mass <i>R.Hamajima, T.Kawai, K.Yamashita &amp; M.Kusabuka</i>	207
Elasto-plastic, dynamic response analysis based on the Rigid-Body-Spring-Model for earth structure <i>K.Suzuki, M.Sugimoto, M.Kakurai, K.Yamashita, M.Ueda &amp; T.Kawai</i>	215
A coupled finite element finite layer formulation for analysis of foundation problems <i>S.K.Parikh &amp; S.P.Pathak</i>	221
Three-dimensional 'infinite domain' elements and their application <i>Ge Xiurun, Gu Xianrong &amp; Feng Dingxiang</i>	229
The stress analysis of tunnel surrounding rock by the method of weighted residuals <i>Xu Wen-Huan, Chen Qiu &amp; Tu Shugen</i>	239
Automatic finite element meshing for geomechanical problems by formex formulation <i>N.Tokashiki, T.Oshiro &amp; T.Kawamoto</i>	245
 <b>2 Constitutive laws of geotechnical materials and interfaces</b>	
Descriptive accuracy of several existing constitutive models for normally consolidated clays <i>T.Adachi, F.Oka &amp; M.Mimura</i>	259
An anisotropic hardening bounding surface constitutive model for clays <i>A.Anandarajah &amp; Y.F.Dafalias</i>	267
Representation of soft clay behavior based on minimization of dissipated energy <i>K.Arai</i>	277
Two- and three-surface models of plasticity <i>K.Hashiguchi</i>	285
An elasto-plastic constitutive equation of geologic materials with memory <i>F.Oka &amp; T.Adachi</i>	293
Application of deformation model with no yield surface to various over-consolidated geologic materials <i>T.Okamoto</i>	301
Prediction of the behaviour of natural clay deposits <i>A.S.Stipho</i>	309
Finite element analysis using an elasto-plastic anisotropic hardening model <i>K.Suzuki &amp; C.S.Desai</i>	317
A consideration of elasto-plastic constitutive equation for three dimensional deformation analysis of soil and its application <i>Masami Ueno &amp; Hiromi Izumi</i>	325

The application of the Mohr-Coulomb yield surface smoothed at the corners <i>Xiang Jiannan</i>	333
Symmetric formulation of tangential stiffnesses for non-associated plasticity <i>W. Xiong</i>	341
On a constitutive description of the cyclic behaviour of clays <i>F. Darve, E. Rojas &amp; E. Flavigny</i>	349
Dynamic analysis of level ground by an elastic-plastic constitutive model <i>H. Hirai &amp; M. Satake</i>	365
Modelling of stress-strain relations of soils in cyclic loading <i>K. Ishihara, N. Yoshida &amp; S. Tsujino</i>	373
A constitutive model of soils for estimating liquefaction resistances <i>H. Matsuoka, H. Koyama &amp; H. Yamazaki</i>	381
Effective stress response analysis for level sand deposits with cyclic mobility <i>K. Nishi, J. Tohma &amp; M. Kanatani</i>	389
Numerical model for liquefaction problem under multi-directional shearing on horizontal plane <i>Fumio Yamazaki, Ikuo Towhata &amp; Kenji Ishihara</i>	399
Elasto/viscoplastic constitutive equation of normally consolidated clays based on flow surface theory <i>T. Matsui &amp; N. Abe</i>	407
Application of rheological models to nonlinear creep properties of rock <i>T. Akagi</i>	415
A viscoplastic constitutive equation for clays including a damage law <i>D. Aubry, E. Kodaissi &amp; Y. Meimon</i>	421
Viscous part for incremental non linear constitutive laws <i>Hervé Di Benedetto</i>	429
Characterization of a diatomaceous mudstone by elasto-viscoplasticity <i>H. Sekiguchi, Y. Nishida, T. Matsumoto &amp; M. Uesawa</i>	437
The model of accelerating creep and the finite element analysis of the process of rheological failure of rock <i>Tao Zhen-Yu &amp; Yu Qi-Hua</i>	445
Incremental theory of plasticity for rock <i>Y. Ichikawa, T. Kyoya &amp; T. Kawamoto</i>	451
Constitutive equation of rock mass including strain softening <i>M. Kusabuka, R. Hamajima, K. Yamashita, T. Kawai &amp; V. Gutierrez</i>	463
A damage mechanics theory for discontinuous rock mass <i>T. Kyoya, Y. Ichikawa &amp; T. Kawamoto</i>	469
Characterization of jointed rock masses by fabric tensor <i>Masanobu Oda &amp; Takuro Maesibu</i>	481
A numerical model for simulating dynamic processes in rocks <i>L. G. Margolin &amp; Barham W. Smith</i>	489
Statistical analysis of the size effect with a strain gradient in the uniaxial compression test <i>Hisataka Tano &amp; Masao Satake</i>	495
Formulation of stress-strain behaviour in work-softening portion of soft rock <i>Ryunoshin Yoshinaka, Teruo Shimizu, Kenichi Abe &amp; Eiji Morita</i>	503
An engineering approach to shear band formation in geological media <i>Roberto Nova</i>	509

Shear-band formation in a fine-grained sand <i>I. Vardoulakis, B. Graf &amp; A. Hettler</i>	517
Modelling soil behavior under principal stress axes rotation <i>I. Towhata &amp; K. Ishihara</i>	523
Sand deformation tests with rotating principal stress directions <i>J. C. Mould Jr., S. Sture &amp; H. Y. Ko</i>	531
Plastic deformation and hardening behavior of a mine tailings material <i>H. J. Siriwardane &amp; S. Z. Ho</i>	539
A Markov model for deformation of particulate material <i>Ryosuke Kitamura</i>	547
Evaluation of continuity of fractures on the basis of two stochastic process theories <i>Kunio Watanabe</i>	555
 <b>3 Flow and consolidation</b>	
Free surface flow in soils <i>A. Burghignoli &amp; A. Desideri</i>	563
A solution of coupled heat-moisture transfer in saturated-unsaturated media <i>M. Geraminegad &amp; S. K. Saxena</i>	567
Numerical analysis of moisture movement in soils during freezing <i>Eiji Yanagisawa, Yie Jeou Yao &amp; Akihiro Kashiwazaki</i>	575
The analysis of multiple-contaminant migration through a homogeneous soil <i>R. K. Rowe &amp; J. R. Booker</i>	581
Multi-dimensional consolidation analysis of clay deposits including unloading-reloading process <i>T. Matsui &amp; N. Abe</i>	589
An application of coupled stress-flow analysis to the field problem <i>Hiroyasu Ohtsu &amp; Katsumi Kamemura</i>	597
Elasto-plastic uncoupled procedure for consolidation analysis and its comparison with coupled procedures <i>T. Yamagami, S. Harumoto &amp; Y. Ueta</i>	605
Consolidation analysis of the soft clay ground beneath large steel oil tank <i>G. X. Zeng &amp; X. N. Gong</i>	613
A new interpretation of oedometer consolidation test <i>A. Asaoka, M. Matsuo &amp; K. Ueda</i>	621
Consolidation behaviour of a single under-reamed anchor <i>I. C. Pyrah, C. C. Hird &amp; Y. Tanaka</i>	629
Dynamic consolidation for a clay foundation with sand package <i>J. H. Qian, W. B. Zhao &amp; Z. Qian</i>	637
Numerical analysis of soft foundation vacuum preloading <i>H. Chen &amp; S. W. Yan</i>	643
Dynamic hole closure behind a deep ocean sediment penetrator <i>Peter T. Dziewlewski</i>	649
