

PROCEEDINGS OF THE FIFTH INTERNATIONAL CONFERENCE ON NUMERICAL
METHODS IN GEOMECHANICS/NAGOYA / 1-5 APRIL 1985

Numerical Methods in Geomechanics Nagoya 1985

Edited by

T.KAWAMOTO & Y.ICHIKAWA

Nagoya University, Japan

VOLUME TWO:

4 Rock hydraulics

5 Soil-structure interaction

6 Earth structures and slopes

7 Tunnels and underground openings

*Published on behalf of the International Committee for Numerical Methods in Geomechanics
and Department of Civil and Geotechnical Engineering, Nagoya University*

A.A.BALKEMA / ROTTERDAM / BOSTON / 1985

Contents of volume 2

4 Rock hydraulics

Fundamental study on permeability and dispersion in double porosity rock masses <i>Kuniaki Sato, Teruo Shimizu & Yo Ito</i>	657
A three-dimensional hydraulic fracture propagation model <i>J.H.Curran, L.Vandamme & T.D.Wiles</i>	665
Finite element analysis of seepage flow in regularly jointed rock mass <i>Y.Ohnishi, H.Shibata & M.Nishigaki</i>	673
Application of the dynamic relaxation technique to coupled stress-flow problems in fractured media <i>E.do A.Vargas Jr.</i>	681
Finite element modeling of flow in a coal seam with burn cavities <i>Dinshaw N.Contractar & Shahriar Eftekhazadeh</i>	689
Simulation of the effects of water flowing beneath an arch dam and its influence to the effective stress state in the jointed rock foundation <i>R.Promper</i>	695
Rock mass behaviour considering water flow and heat transfer <i>M.Sato & K.Kamemura</i>	703
Coupled analysis of flow and heat around a high-level nuclear waste repository <i>Yoshizo Utsugida</i>	711

5 Soil-structure interaction

Finite element analysis of certain aspects of shallow anchors in cohesive soil medium <i>D.M.Dewaikar</i>	719
A deep excavation in soft clay – Performance of an anchored diaphragm wall <i>S.Hata, H.Ohta, S.Yoshida, H.Kitamura & H.Honda</i>	725
Subgrade moduli for shallow foundations and piles <i>G.Gudehus, Th.Schlegel & W.Schwarz</i>	731
Finite element calculation and experimentings on the Saxe-Gambetta Station <i>J.Monnet, R.Kastner, P.Laréal & C.Bouyat</i>	747
Three-dimensional analysis of pile group foundation and anchor-soil system <i>A.Muqtadir, C.S.Desai & F.Scheele</i>	755
Analysis of earth pressure problems considering the influence of wall friction and wall deflection <i>T.Nakai</i>	765

Characterization of skin friction at the pile-soil interface by inverse analysis of stress waves <i>Y.Nishida, H.Sekiguchi, T.Matsumoto & T.Fujino</i>	773
Horizontal behavior of pier foundations in a shearing type ground model <i>Kazuma Uto, Hiroshi Maeda, Yukio Yoshii, Mikio Takeuchi, Kohji Kinoshita & Akira Koga</i>	781
Analysis of interaction between space shear wall structure and supporting soil <i>Zai Jinmin, Zhang Wenqing & Zhao Xihong</i>	789
Finite element analysis for retaining structure with anchor slabs <i>Z.S.Zhang</i>	797
Soil-structure interaction analysis and its application to foundation design in Shanghai <i>Zhao Xihong, Cao Mingbao, I.K.Lee & S.Valliappan</i>	805
An assessment of the effects of structure/raft/soil interaction <i>Z.E.Yao & J.R.Zhang</i>	813
Stresses and displacements in an anisotropic soil produced by a ring foundation <i>D.M.Milovic & T.Todorovic</i>	821
Bearing capacity of a circular footing on a Coulomb medium <i>P.De Simone</i>	829
Numerical modelling of interfaces using conventional finite elements <i>D.V.Griffiths</i>	837
Torsion of flexible piles embedded in elastic soil media <i>R.K.N.D.Rajapakse & A.P.S.Selvadurai</i>	845
Studies of the limit state of a concrete gravity dam on rock foundation <i>Yu.B.Mgalobelov & A.V.Nefedov</i>	853
Soil structure interaction during strong motion for bridge piers with base isolators and energy dissipators <i>M.P.Ardhanareeswaran, M.M.Zaman & L.R.L.Wang</i>	861
3-D analysis of a group of piles in a multilayered soil submitted to a seismic field – Comparisons with experiments <i>F.Chapel & J.M.Crépel</i>	867
Dynamic response of offshore cylindrical shell tank on uneven elastic foundation <i>K.Ninomiya, S.Baba & T.Kajita</i>	875
A method for time-domain analysis of semi-infinite foundation-structure-water systems <i>Hiroo Shiojiri & Tomoyasu T.Nakagawa</i>	883
The strip method for soil-structure interaction problems <i>D.P.Thambiratnam & T.Balendra</i>	889
6 Earth structures and slopes	
Effective stress finite element analysis of embankment dams for static and dynamic loading <i>D.W.Harris</i>	899
A non-linear finite element analysis of reinforced embankments under external loading <i>G.E.Bauer & Y.M.Mowafy</i>	905
Finite element analysis of pore pressure behavior of rockfill dam <i>K.Nakagawa, H.Komada & K.Kanazawa</i>	919
A computerized construction control system and its application to an excavation <i>M.Tominaga, H.Uchiyama, T.Koseki & M.Fukuwaka</i>	927
Numerical analysis of bearing capacity of soft soil with a frozen top layer <i>G.L.Fisenko, Yu.S.Kozlov & A.B.Fadeev</i>	935

An analysis of structural stability of mole drains <i>Pratap N. Singh</i>	941
New applications of classical numerical techniques in slope analysis <i>V. U. Nguyen</i>	949
Numerical analysis of anisotropic slopes' stability <i>J. Pastor, S. Turgeman & J. P. Boehler</i>	959
Stability of natural slopes subject to progressive failure <i>D. A. Grivas & C. Souflis</i>	967
Stability and progressive failure of natural slopes – A simple approach <i>Peter Hansbo, Nils-Erik Wiberg & Kenneth Runesson</i>	973
Elasto-plastic finite element analysis of rock slopes <i>K. G. Sharma, T. Ramamurthy & O. P. Ailawadi</i>	981
Some considerations on the seismic stability of large slopes, by model tests and numerical analysis <i>Hiroshi Ito & Toshiyuki Watanabe</i>	989
Two key problems of the finite element analysis in open-pit slope stability <i>Ji-na Tao & Lei Gao</i>	997
Statistical and probabilistic approach for design of discontinuous rock slopes against sliding <i>Kunio Kawamura & Kiyotada Honda</i>	1005
A probabilistic analysis of the Vajont slide <i>F. Oboni & P. Egger</i>	1013
Reliability approach to stability analysis of soil/rock slopes <i>K. Ramachandran & I. A. Hosking</i>	1019
 7 Tunnels and underground openings	
A software system for numerical analysis of underground structures by the finite element method <i>O. N. Zolotov</i>	1031
Towards a theory of tunnels in heterogeneous formations Numerical analysis of some cases of heterogeneity around tunnels <i>Pierre Duffaut & Bernard Feuga</i>	1039
Numerical analysis of viscoelasticity using combined finite and boundary element methods <i>Noriyoshi Kaneko, Toshio Shinokawa, Nozomu Yoshida & Mutsuto Kawahara</i>	1049
Elasto-plastic analysis of underground openings by BEM and FEM <i>Zhu Keshan, Zhu Jingmin, Pan Wenho & Fan Zebao</i>	1055
Analysis of underground openings by FEBEM <i>A. Varadarajan, K. G. Sharma & R. B. Singh</i>	1063
An analysis of fracture propagation from the roof of a rectangular opening <i>Koji Matsuki</i>	1071
Numerical methods of analysis of underground constructions <i>K. A. Ardashev, B. Z. Amusin & V. F. Koshelev</i>	1077
A numerical analysis for underground rock cavern in Samrangin pumped-storage powerplant project <i>Chung-In Lee & Yeon-Joon Park</i>	1085
Some aspects of underground structure mechanics in the finite element method analysis <i>S. A. Yufin, O. K. Postolskaya, I. R. Shvachko & V. I. Titkov</i>	1093
Calculation of country rock stress and loose pressure of the excavation in the elastic rock mass of alternate joints <i>L. Y. Ling</i>	1101

Analysis of tunnels in highly jointed rock <i>R.Pöttler</i>	1111
Behavior and simulation of weathered granite tunnel roofed by freezing <i>S.Murayama, K.Ohno, T.Adachi, Y.Iwasaki, T.Tamura & A.Yashima</i>	1119
A viscous elasto-plastic numerical analysis of the underground structure interacted with families of multi-laminate rock mass using FEM <i>J.Sun & Y.S.Lee</i>	1127
Predicted and observed time-dependent deformations around shallow model tunnels in soft clay <i>H.N.Seneviratne & M.J.Gunn</i>	1135
Elasto-viscoplastic finite element analyses of tunnels <i>K.G.Sharma, A.Varadarajan & R.K.Srivastava</i>	1141
Dynamic response of a railway tunnel due to passing trains <i>C.S.Pan & G.N.Pande</i>	1149
Ground movement due to advance of two shield tunnels parallel in vertical plane <i>H.Ohta, H.Kitamura, M.Itoh & M.Katsumata</i>	1161
Finite element analysis of advanced shield tunneling in soils <i>G.Wayne Clough, Takeshi Shirasuna & Richard J.Finno</i>	1167
Practical and theoretical aspects of the three-dimensional analysis of finally lined intersections <i>H.Geisler, H.Wagner, O.Zieger, W.Mertz & G.Swoboda</i>	1175
Three-dimensional behaviour of tunnel intersection <i>K.Takino, H.Kimura, N.Takeda & F.Ito</i>	1185
Three dimensional finite element analysis of branching tunnels <i>D.V.Thareja, K.G.Sharma, K.Madhavan & R.Natarajan</i>	1193
Study on the stability of a group of caverns <i>H.Yoichi & R.Yamashita</i>	1201
The influence of soil strength and water load to the safety of tunnel driving <i>R.Katzenbach</i>	1207
Prediction of tunnelling effect on groundwater condition <i>K.Ueshita, T.Sato & K.Daito</i>	1215
Finite element analysis of tunnel stress due to water load <i>Zhang Youtian & Wang Lei</i>	1221
Stability of underground openings for storage of L.N.G. <i>Y.Inada</i>	1225
Stability analysis of a rock cavern with LPG storage under thermal stresses <i>Y.Ishizuka, N.Kinoshita & T.Okuno</i>	1233
Hydraulic fracturing and stress distribution around a pressure shaft and spheroidal cavern <i>H.Koide & M.Takahashi</i>	1241
Thermomechanical analysis of some proposed schemes for radioactive waste disposal <i>J.P.Carter & J.R.Booker</i>	1249
Lining-ground interaction in circular tunnels <i>F.Rodríguez-Roa</i>	1257
Rock-mechanical discussion for the mechanism of supporting systems in severe swelling rock tunnel <i>Fuminori Kimura, Nobuyuki Okabayashi, Kiyoshi Ono & Toshikazu Kawamoto</i>	1265
Effects of rock bolting in discontinuous rock masses <i>Tatsuo Asai, Masao Nishimura, Toshiaki Saito & Makoto Terada</i>	1273

Load bearing capacity and stress distributions in/along rockbolts with inelastic behaviour of interfaces <i>Ö. Aydan, Y. Ichikawa & T. Kawamoto</i>	1281
The spacing and length of rock bolts for underground openings in jointed rock <i>A. M. Crawford, L. Ng & K. C. Lau</i>	1293
Back analysis for tunnels by optimization method <i>M. Hisatake & T. Ito</i>	1301
