

PROCEEDINGS OF THE FIFTH INTERNATIONAL CONFERENCE ON NUMERICAL
METHODS IN GEOMECHANICS/NAGOYA / 1-5 APRIL 1985

Numerical Methods in Geomechanics Nagoya 1985

Edited by

T.KAWAMOTO & Y.ICHIKAWA

Nagoya University, Japan

VOLUME THREE:

- 8 *Dynamics and earthquake engineering problems*
- 9 *Mining applications*
- 10 *Interpretation of field measurements*
- 11 *Use of microcomputers*

*Published on behalf of the International Committee for Numerical Methods in Geomechanics
and Department of Civil and Geotechnical Engineering, Nagoya University*

A.A.BALKEMA / ROTTERDAM / BOSTON / 1985

Contents of volume 3

8 Dynamics and earthquake engineering problems

Computation of the Green's functions of elastodynamics for a layered half space through a Hankel transformation – Applications to foundation vibration and seismology <i>F.Chapel & C.Tsakalidis</i>	1311
Reservoir induced seismicity: Assessment of a mathematical model <i>A.M.Ger & S.K.Saxena</i>	1319
Numerical methods of solution of some regional and global problems of geomechanics <i>V.I.Kondaurov, Sh.A.Mukhamediev & L.V.Nikitin</i>	1325
Numerical investigations of stresses in rock structures with deformations beyond the elastic limit due to seismic waves <i>A.P.Sinitsyn & V.V.Samarin</i>	1329
Nonlinear dynamic analysis considering viscoplasticity <i>Takashi Yoshikityo & Franklin Y.Cheng</i>	1337
Local amplification of a seismic incident field through an elastoplastic sedimentary valley <i>D.Aubry, D.Chouvet, H.Modaressi & P.Mouroux</i>	1343
The effects of underlying bedrock topography on earthquake ground motion <i>Hao Xiansheng, Peng Yimin & Wang Zhiliang</i>	1351
Liquefaction potential of ash dam foundations <i>V.Chandrasekaran, I.K.Lee, S.Valliappan, W.White & G.Coulter</i>	1359
Pore pressure response analysis for earthquakes <i>Ashok K.Chugh & J.Lawrence von Thun</i>	1367
Effect of surface wave on the liquefaction potential of saturated sandy deposits <i>Susumu Nakamura, Kanehiro Ishihara, Yoshio Tabita & Eiji Yanagisawa</i>	1379
Analysis of liquefaction and deformation of Douhe earth dam during Tangshan earthquake <i>Z.J.Shen, J.D.Huang & Z.N.Wang</i>	1387
Application of numerical method on liquefaction problems <i>T.Shiomi, S.Yamamoto & T.Matsumoto</i>	1393
Prediction of pore water pressure based on internal state variables of sand under cyclic stresses <i>Toyotoshi Yamanouchi & Akira Sakai</i>	1401
Dynamic responses of buried pipelines in a soil liquefaction environment during earthquakes <i>Yaw-Huei Yeh & Leon Ru-Liang Wang</i>	1409
Simplified dynamic analyses of embankments <i>T.Sato, Y.Sunasaka & T.Shibata</i>	1425

Seismic interaction of imperfectly bonded soil-pipeline system <i>T.Akiyoshi & K.Fuchida</i>	1433
Dynamic analysis of prismatic structures embedded in infinite soil medium <i>Cao Zhiyuan & Y.K.Cheung</i>	1441
Pile driving analysis: A computer program for frictional driven piles <i>D.R.Levacher</i>	1449
A new approach to one dimensional pile driving analysis <i>H.A.Simons & M.F.Randolph</i>	1457
Pseudo-three dimensional seismic analysis of soil-foundation-superstructure system <i>H.Takemiya & K.Uotani</i>	1465
Dynamic analysis of machine-pile foundation-soil systems <i>N.S.V.Kameswara Rao</i>	1471
Dynamic response of axially loaded piled foundations <i>Y.K.Chow</i>	1485
Simplified analysis of dynamical ground compliance for arbitrary-shaped rigid foundation <i>Hideji Kawakami & Shinichi Tasaki</i>	1493
Dynamic stiffness under rigid rectangular foundations resting on an elastic two-layered medium <i>Y.Kitamura & S.Sakurai</i>	1499
Loss mechanism of earthquake motion on the foundation <i>Y.Sawada, T.Ueshima, H.Yajima & A.Sakurai</i>	1505
Finite ground strains induced during earthquake for application to seismic design of underground structures <i>Tadashi Arakawa, Kazuhiko Kawashima & Keiichi Tamura</i>	1513
Earthquake-resistance analysis by finite element-boundary element hybrid method <i>K.Goto, M.Matsumoto & M.Urayama</i>	1519
Earthquake observation and BIE analysis on dynamic behavior of rock cavern <i>Masanori Hamada, Michihiro Kitahara, Katsuya Nakagawa & Yoshimi Muranishi</i>	1525
Data reduction method for forced vibration tests – System parameters identification using Newton method <i>K.Hanada, T.Iwatate, K.Andoh & H.Ezure</i>	1533
Application of factor analysis procedure to inverse problem of dam vibration <i>Tatsuo Ohmachi & Shun-ichi Kataoka</i>	1541
 9 Mining applications	
Error analysis and design of a large-scale tabular mining stress analyser <i>J.A.Ryder & J.A.L.Napier</i>	1549
The application of the boundary element method (BEM) to mining engineering of Golden River Underground Phosphorus Mine <i>Jinshou Huang, Zuyin Yang & Guang Ma</i>	1557
Numerical modelling of shale hanging walls at Mount Isa Mine, Australia <i>G.Beer, R.Cowling & S.Bywater</i>	1565
Numerical modelling and interpretation of the peculiarities of geomechanical processes in mining of deposits in tectonically stressed massifs <i>G.A.Markov, S.N.Savchenko, D.M.Kazikaev & A.M.Grigorjev</i>	1575
Numerical analyses of diaphragm yield mechanisms during cut-and-fill mining <i>J.V.Simmons, R.P.Seville & M.F.Lee</i>	1581

Applications of the finite element analysis to the ground control problems associated with mining of a steeply inclined chromite orebody in Turkey <i>G.Once</i>	1589
A numerical procedure for prediction of subsidence caused by longwall mining <i>H.J.Siriwardane</i>	1595
Pre-calculation of surface subsidence due to coal mining <i>K.Sugawara, Y.Wang, Y.Obara & H.Okamura</i>	1603
 10 Interpretation of field measurements	
Piecewise linearization of elasto-plastic consolidation behavior <i>A.Asaoka, M.Kodoi & K.Misumi</i>	1613
Calibration of a rheological material model on the basis of field measurements <i>A.Cividini, G.Gioda & G.Barla</i>	1621
The interpretation of pressuremeter tests – Time effects for fine-grained soils <i>I.C.Pyrak, W.F.Anderson & F.Haji Ali</i>	1629
Observational prediction of settlement using Kalman filter theory <i>A.Murakami & T.Hasegawa</i>	1637
In-situ deformability test on soft rocks <i>N.Matsumoto, T.Ikeda & Y.Yamaguchi</i>	1645
Interpretation of field measurements under consideration of the three-dimensional state of stress, the viscoelasticity of shotcrete, and the viscoplastic behaviour of rock <i>G.Swoboda</i>	1651
Ground-support interaction at the Kuehtai shaft power station Prediction, monitoring and back-analysis <i>R.Widerhofer & W.Pircher</i>	1659
A scanning method for properties of natural soil <i>Eiichi Kuribayashi, Makoto Kawamura, Akiyoshi Yamaguchi, Yozo Yui & Atsushi Takada</i>	1667
 11 Use of microcomputers	
Interactive computer graphics in 3-D nonlinear geotechnical FEM analysis <i>Fred H.Kulhawy, Anthony R.Ingraffea, Tao-Yang Han & Yih-Ping Huang</i>	1673
The use of microcomputers to solve problems in geomechanics using finite layer methods <i>J.R.Booker & J.C.Small</i>	1683
Upper bound mechanisms for undrained axisymmetric problems <i>A.M.Britto & O.Kusakabe</i>	1691
Finite element analysis of subsidence problems by a personal computer <i>Antonio Di Molfetta, Gian Paolo Giani & Raffaele Romagnoli</i>	1699
Analysis and design of pile groups using a microcomputer <i>M.F.Randolph</i>	1707
Computer aided soil investigations with drilling parameters <i>P.Pfister & J.-P.Hamelin</i>	1715
Computer aided system for instrumentation, arithmetic analysis and control system in the application of shield tunnel excavation <i>Tetsushi Sonoda</i>	1721
