

PROCEEDINGS OF THE FIFTH INTERNATIONAL CONFERENCE ON NUMERICAL
METHODS IN GEOMECHANICS/NAGOYA/1-5 APRIL 1985

Numerical Methods in Geomechanics Nagoya 1985

Edited by

T.KAWAMOTO & Y.ICHIKAWA
Nagoya University, Japan

VOLUME FOUR:

Invited lectures

Late papers

Author index

*Published on behalf of the International Committee for Numerical Methods in Geomechanics
and Department of Civil and Geotechnical Engineering, Nagoya University*

A.A.BALKEMA / ROTTERDAM / BOSTON / 1986

Contents of volume 4

Invited lectures

- The coupled problems of soil-pore fluid-external fluid interaction – Basis for a general geomechanics code 1731
O.C.Zienkiewicz
- The determination of the characteristic line from straight line nomograms 1741
K.Kovári
- Some supporting methods for tunneling in Japan and their analytical studies 1747
T.Adachi
- Applications of finite strip and layer methods in micro-computers 1755
Y.K.Cheung, L.G.Tham & D.J.Guo
- Finite elements for saturated and partially saturated soils 1763
J.Ghaboussi

Late papers:

1 Numerical techniques and programming

- Analysis of undrained cone penetration as a steady flow problem 1767
G.T.Houlsby, A.A.Wheeler & J.Norbury

2 Constitutive laws of geological materials and interfaces

- Introduction of a non-linear incremental constitutive model in a finite element program – Application on circular foundation 1777
I.Shahrour & J.C.Robinet

4 Rock hydraulics

- Influence of seepage and uplift forces on stresses in the rock foundation of arch dams 1787
W.Wittke, C.Erichsen & M.Kleinschnittger

5 Soil-structure interaction

- Evaluation of 'Thin-Layer Element' and modeling of interface behavior in soil-structure interaction 1797
M.M.Zaman
- Application of rigid plastic dilatancy model for prediction of granular pile settlement 1805
H.B.Poorooshasb & Madhira R.Madhav

Nonlinear analysis of contact pressure distribution <i>C.Pietsch</i>	1809
Predicting long-term ground movements caused by shallow trench excavation: A combined finite element and empirical method <i>Provakar Nath</i>	1817
6 Earth structures and slopes	
Non-elastic analysis of rock masses in studies of stability of slopes and underground structures <i>A.L.Goldin, E.A.Freiberg, D.D.Sapegin & V.S.Prokopovich</i>	1835
7 Tunnels and underground openings	
Advanced excavation of the vault according to the NATM <i>W.Wittke, J.Feiser & J.Krieger</i>	1845
A multiple tunnel interaction problem <i>S.L.Lee, K.W.Lo & Y.K.Chow</i>	1851
Finite-element-modelling of stress transfer around large openings in the salt rock <i>W.Hüls</i>	1859
8 Dynamics and earthquake engineering problems	
Modeling of liquefaction and cyclic mobility effects in sand <i>S.Pietruszczak & H.B.Poorooshasb</i>	1867
Dynamic analysis and modeling of ball mill foundations <i>Francisco Medina, A.R.Figueroa & P.M.Acevedo</i>	1875
Earthquake analysis of flexible retaining walls <i>G.Ayala, M.P.Romo & R.Gómez</i>	1881
9 Mining applications	
Application of the 'Displacement Discontinuity' technique to modelling of underground coal mining <i>M.C.Bridges, D.Davidson, M.E.Duncan-Fama & R.G.Friday</i>	1891
Application of three-dimensional boundary element method to modelling of large mining excavations at depth <i>J.O.Watson & R.Cowling</i>	1901
List of participants	1911
Author index	1927
