

Geomechanics 91

Edited by

ZIKMUND RAKOWSKI

Mining Institute of Czechoslovak Academy of Sciences, Ostrava, Czechoslovakia

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1992

Table of contents

Preface	IX
Conference organization	X
1 Stability of underground openings	
Main lecture: Rock testing – Deficiencies and selection <i>I.W.Farmer</i>	3
Main lecture: Stability of coal-mine gateroads – A dynamic approach <i>A.Kidybiński</i>	9
Main lecture: Stability of underground mine openings at great depth <i>T.R.Stacey</i>	17
An analysis of the behavior of roadway under high in-situ stresses <i>A.Wahab Khair</i>	27
A consideration on the local instability of large underground openings <i>T.Kawamoto, Ö.Aydan, S.Tsuchiyama & T.Akagi</i>	33
Determination of longwall face advance limitation by forefield roadway stability <i>P.Konečný & J.Sliva</i>	43
Stability assessment of underground excavations in jointed rock <i>N.S.Bulychev</i>	49
Analysis of roadway supports deformations caused by rock bursts <i>G.Takla & J.Ptáček</i>	53
The underground investigations of dynamic loads of a shield support <i>S.Szweda</i>	57
Stability of steel roadway support under dynamic loading <i>P.Horyl, R.Šňupárek & F.Bláha</i>	61
Stability of supported mine galleries <i>S.Galczyński, M.Leszczycyński & A.Wojtaszek</i>	67
Designing principles of LP arch support <i>S.Galczyński, M.Leszczycyński & A.Wojtaszek</i>	73

Analysis of unitary lining load distribution at a longwall-gallery crossing based on underground investigations <i>J. Markowicz</i>	79
Geomechanical substantiation of extraction of undermined copper ore deposit <i>V.A. Shalaurov, S.N. Popov & I.L. Boltenhagen</i>	83
Geotechnical anomalies in shaft sinking in Czechoslovakia <i>K. Exner & J. Aldorf</i>	89
Ground behaviour in vertical narrow vein mining <i>P. Ramirez, J. Bernaola, R. Lain & G. Moreda</i>	93
The influence of time-dependent deformation properties of concrete on load and loading capacity of support of underground working <i>J. Aldorf</i>	99
The electroresistance method as a part of the stability monitoring system <i>L. Trávníček & E. Kuba</i>	103
Natural dynamic stress concentrators in rock material <i>J. Frank, J. Maisler & V. Roček</i>	111
 <i>2 Numerical methods in geomechanics</i>	
Main lecture: Damage tensor theory and its application to tunnelling <i>G. Swoboda, Han Beichuan & M. Stumvoll</i>	123
Main lecture: Inelastic analysis for rock with account for gas sorption and desorption phenomena <i>Z. Mróz & A. Zacharski</i>	131
Main lecture: Joint network modelling and some scale effects in rock masses <i>P.H.S.W. Kulatilake</i>	139
A thin-layer element to model soil-reinforcement interaction <i>E. Handel & H.F. Schweiger</i>	153
On the genesis of the transverse channel wave <i>J. Nedoma</i>	159
Domain decomposition and structured grids for solution of geomechanics problems <i>Z. Dostál, A. Kolcun & J. Malík</i>	167
Fast iterative methods for the solution of problems with nonlinear behaviour of materials <i>R. Blaheta & R. Kohut</i>	173
A FEM-postprocessor based on a query language <i>O. Jakl</i>	181
Numerical solution of contact problems <i>J. Horák</i>	187

Application of the finite element method to shallow tunnelling in soft ground using pressurized shields <i>M.Boumahdi, I.Shahrouf & A.Verdier</i>	193
Iterative solutions of nonlinear layered subsoil – structure interaction <i>V.Kolář</i>	197
 3 Water jet cutting	
Main lecture: Properties and parameters of water jets <i>M.M.Vijay</i>	207
Main lecture: Water jet cutting of rock, concrete and steel – Trends for the future <i>D.A.Summers</i>	223
Main lecture: Mechanical rock excavation with water jet assistance <i>R.J.Fowell</i>	233
Review of recent development in cavitation research <i>R.Kobayashi</i>	243
Coal and minerals excavation and disintegration by high pressure waterjet <i>M.Mazurkiewicz</i>	249
Assistance for the application of abrasive water jets <i>N.S.Guo, A.Laurinat, H.Louis & G.Meier</i>	259
Hydrodynamic properties of a cutting jet <i>K.Majka</i>	265
Influence of jet-forming device parameters upon dynamic characteristics of high velocity water jets <i>V.E.Baftalovsky & I.A.Kouzmich</i>	273
Jet energy requirements for deep kerfing of rocks <i>M.Agus, A.Bortolussi, R.Ciccu, P.P.Manca & G.Massacci</i>	277
Water-jet assisted drilling technique for gas outburst prevention <i>K.Ohga & V.Joseph Hucka</i>	283
Preliminary researches into mining with high-pressure water jets carried out on a test stand installed at the University of Mining and Metallurgy in Cracow <i>A.Klich & K.Kotwica</i>	289
Results of experimental research of destruction of rocks by mechanical hydraulic cutters <i>V.A.Brenner, A.B.Zhabin, M.M.Miller & N.N.Katagarov</i>	295
Monitoring of the rock strength characteristics in the course of fullface driving process <i>F.Sekula, V.Krúpa, F.Krepelka, J.Bejda & M.Koči</i>	299
Aspects of effective concrete removing using plain water jets <i>A.Momber</i>	305
Rehabilitation of concrete structures using high-pressure water jet <i>Z.Jeřábek</i>	311

Why research water jet hard rock disintegration in Czechoslovakia <i>J.Vašek</i>	317
Experimental research of rock and similar materials cutting using high pressure water jets <i>J.Foldyna</i>	331
Physical description of high energy liquid jet interaction with material <i>L.Hlaváč</i>	341
Mathematical modelling of rock cutting <i>J.Horák</i>	347
Mineralogical properties of abrasive minerals and their role in the water jet cutting process <i>P.Martinec</i>	353
High pressure water jets application in dam rehabilitation <i>I.Wolf, J.Foldyna & J.Vašek</i>	363
Expansion of high pressure water jet technology in CSFR <i>J.Novák</i>	367
Author index	371
