Exeter, Exeter EX4 4RJ, UK*

Proceedings of the symposium held at Porto Alegre, Brazil, 11-15 December 1988. The symposium was organized by the International Association of Hydrological Sciences (IAHS) and the Brazilian Ministry of Education, represented by the Institute of Hydraulic Research (IPH) of the Federal University of Rio Grande do Sul (UFRGS)

IAHS Publication No. 174

# Contents

Preface	by Marc Bordas & Des Walling	v
<b>A Physical Processes</b>		
Sediment losses from cropland furrows	Carlos V. Alonso, L. Donald Meyer & William C. Harmon	3
Sedimentation of four reaches of the Mississippi and Illinois Rivers	Nani G. Bhowmik, J. Rodger Adams & Misganaw Demissie	11
Puissance hydraulique et dépôt de sédiments en eaux courantes	M. P. Bordas, A. L. de O. Borges & P. Medeiros	21
Gullyng in the southeastern Brazilian Plateau, Bananal, SP	Ana L. Coelho Netto, Nelson F. Fernandes & Carlos Edegard de Deus	35
Mathematical model for reservoir silting	P. R. J. Cogollo & S. M. Villela	43
Model experiments on bed load transport in the variable backwater zone of a reservoir	D. Fang, Y. X. Chen & J. Y. Chen	53
Expression générale du début d'érosion d'un fond mobile non-cohésif	G. K. Gadjev	63
The silting of Moroccan dams	Abdelhadi Lahlou	71
Effects of slope length, slope gradient, tillage methods and cropping systems on runoff and soil erosion on a tropical Alfisol: preliminary results	R. Lal	79
Hydrological characteristics as a determinant of sediment delivery in watersheds	Anne M. Matherne & Karen L. Prestegard	89
Transport of suspended sediment in ephemeral channels	M. Nohh	97
Methods of estimating bed load transport rates applied to ephemeral streams	M. Nohh	107
Suspended sediment routing along a reservoir	Jesus Gracia-Sanchez	117
Some factors affecting erosion of bed channels protected with riprap	E. C. Teixeira & S. M. Villela	125
Analytical evaluation of bed load transport in a river subject to backwater effect: the case of the River Trombetas	L. C. Veiga Pires, Lucio O. Ribeira & A. R. S. R. Coimbra	133
The cropping pattern and its role in determining erosion risk: experimental plot results from the Mugello valley (central Italy)	C. Zanchi	139

**B Sediment Monitoring**

A monitoring programme of sediment transport in Norwegian rivers	<i>Jim Bogen</i>	149
Choix de bassins représentatifs et expérimentaux pour l'étude de l'érosion sur le plateau basaltique sudaméricain	<i>A. L. de O. Borges &amp; M. P. Bordas</i>	161
A method for determining sediment budgets using caesium-137	<i>B. L. Campbell, R. J. Loughran &amp; G. L. Elliott</i>	171
A strategy for organizing a sediment data collection network based on the available hydrological records for a catchment in Kenya	<i>S. H. Charania</i>	181
Evaluation of long term suspended sediment records for selected Canadian rivers	<i>T. J. Day</i>	189
Assessing sediment sources in a small drainage basin above the timberline in the Pyrenees	<i>Juan-Carlos Diez, Bernardo Alvera, Joan Puigdefàbregas &amp; Francesc Gallart</i>	197
The nature of coarse material bed load transport	<i>Peter Ergenzinger</i>	207
Development and flume calibration of a new type of near-streambed suspended load sampler	<i>D. Fang &amp; G. D. Wang</i>	217
Estimating erosion using caesium-137: I. Measuring caesium-137 activity in a soil	<i>D. J. Fredericks, V. Norris &amp; S. J. Perrens</i>	225
Estimating erosion using caesium-137: II. Estimating rates of soil loss	<i>D. J. Fredericks &amp; S. J. Perrens</i>	233
On identification of sources of sediment transport in small basins with special reference to particulate phosphorus	<i>B. Hasholt</i>	241
La gestion du bassin versant expérimental de Draix pour la mesure de l'érosion	<i>R. Mura, J. P. Cambon, F. Combes, M. Meunier &amp; J. Oliver</i>	251
An examination of the role of sampling strategies in the study of suspended sediment transport	<i>L. J. Oliver &amp; W. A. Rieger</i>	259
Techniques for establishing suspended sediment sources in two drainage basins in Devon, UK: a comparative assessment	<i>M. R. Peart &amp; D. E. Walling</i>	269
La production de sédiments sur les versants et leur transport à l'échelle du km <sup>2</sup> en savane humide, Côte d'Ivoire	<i>Olivier Planchon</i>	281
Preliminary estimate of bed load using mean grain size distribution data	<i>F. R. Semmelmann, M. P. Bordas &amp; A. E. Lanna</i>	293
Analysis of the quality of suspended sediment data	<i>F. R. Semmelmann &amp; A. E. Lanna</i>	301
Erosion studies in Sumé, a semiarid region in the northeast of Brazil	<i>V. S. Srinivasan, H. P. Gomes, J. C. Leprun &amp; I. G. Silva</i>	307

Measuring sediment yields of storms using PSALT	<i>Robert B. Thomas</i>	315
The use of caesium-137 measurements to investigate sediment delivery from cultivated areas in Devon, UK	<i>D. E. Walling &amp; S. B. Bradley</i>	325
The reliability of rating curve estimates of suspended sediment yield: some further comments	<i>D. E. Walling &amp; B. W. Webb</i>	337
<b>C Sediment Yields and Sediment Budgets</b>		
Periodicity of suspended sediment concentrations in the River Tigris at Baghdad identified using short interval sampling	<i>N. A. Al-Ansari &amp; G. T. Al-Sinawi</i>	353
Evaluation des risques d'érosion et de sédimentation au Brésil à partir de bilans sédimentologiques rudimentaires	<i>M. P. Bordas, A. E. Lanna &amp; F. R. Semmelmann</i>	359
Sediment yield in the Velhas River basin (Minas Gerais, Brazil)	<i>Newton de Oliveira Carvalho</i>	369
Analysis of sediment yields during the historic period in the loess region of the Yellow River basin	<i>Dai Shensheng</i>	377
Suspended sediment at a cross section of the Middle Paraná River: concentration, granulometry and influence of the main tributaries	<i>E. C. Drago &amp; M. L. Amster</i>	381
ETA (Erosion Transport Accumulation) systems, their classification, mapping and managements	<i>G. B. Engelen &amp; R. G. W. Venneker</i>	397
Lake-catchments: an evaluation of their contribution to studies of sediment yield and delivery processes	<i>Ian D. L. Foster, John A. Dearing &amp; Robert Grew</i>	413
Average long-term sediment discharge investigations based on reservoir resurvey data and sediment yield rate factors	<i>E. P. Garcia &amp; F<sup>o</sup> O. Vignoli</i>	425
A comparison of the sediment transport and yield characteristics of two adjacent glacier basins, Val d'Hérens, Switzerland	<i>A. M. Gurnell, J. Warburton &amp; M. J. Clark</i>	431
Exportation de matières en suspension des Andes vers l'Amazonie par le Rio Béni, Bolivie	<i>J. L. Guyot, J. Bourges, R. Hoorelbecke, M. A. Roche, H. Calle, J. Cortes &amp; M. C. Barragan Guzman</i>	443
Simulation model for the computation of sediment yield due to upland and channel erosion from a large basins	<i>V. Hrissanthou</i>	453
Changes in the sediment output of two upland drainage basins during forestry land use changes	<i>R. C. Johnson</i>	463
The US national project to develop improved erosion prediction technology to replace the USLE	<i>L. J. Lane, D. L. Schertz, E. E. Alberts, J. M. Laflen &amp; V. L. Lopes</i>	473
A study of the total load transport by the Yellow River	<i>Lin Binwen &amp; Long Yuqian</i>	483
Modelling sedimentation processes in small watersheds	<i>V. L. Lopes &amp; L. J. Lane</i>	497

Transport de matière sur les grands fleuves des régions intertropicales: les premiers résultats des mesures de flux particulières sur le bassin du fleuve Congo <i>J. Claude Olivry, J. Pierre Bricquet, J. Pierre Thiebaut &amp; Nkamdjou Sigha</i>	509
Uncertainties in defining the suspended sediment budget for large drainage basins <i>Randolph S. Parker</i>	523
Morphological controls on sediment delivery pathways <i>Karen L. Prestegard</i>	533
Channel sediment behaviour as a basis for modelling delivery processes <i>W. A. Rieger, L. J. Olive &amp; C. J. Gippel</i>	541
Estimation of colluvial reservoir life from sediment budgeting, Katorin experimental basin, Kenya <i>R. A. Sutherland &amp; R. B. Bryan</i>	549
Erosion, transport and deposition of sediments by the tropical rivers of India <i>P. Vaithyanathan, Al. Ramanathan &amp; V. Subramanian</i>	561
Sediment yield and availability for two reservoir drainage basins in central Luzon, Philippines <i>Sue White</i>	575
Application of two physically-based sediment yield models at plot and field scales <i>J. M. Wicks, J. C. Bathurst, C. W. Johnson &amp; T. J. Ward</i>	583
