

PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON MICROMECHANICS  
OF GRANULAR MEDIA / CLERMONT-FERRAND / 4-8 SEPTEMBER 1989

# Powders and Grains

*Edited by*

**J. BIAREZ**

*Ecole Centrale de Paris*

**R. GOURVÈS**

*CUST de Clermont-Ferrand*

**A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1989**

## Contents

Preface	XI
An introduction to the study of the relation between the mechanics of discontinuous granular media and the rheological behaviours of continuous equivalent media – Application to compaction <i>J.Biarez &amp; P.Y.Hicher</i>	1
 <b>1 Geometry</b>	
The large disorder of granular matter <i>E.Guyon</i>	17
Plane sections and straight crossings of granular media <i>G.Auvinet</i>	23
Geometric scale effect in granular media <i>G.Auvinet &amp; D.Bouvard</i>	29
Pore size distribution of granular media <i>G.Auvinet &amp; D.Bouvard</i>	35
Prediction of the packing density of granular mixes from its grading <i>F.de Larrard</i>	41
Structure of simulated packed beds containing solid particles of different sizes <i>E.Dickinson, S.J.Milne &amp; M.Patel</i>	47
Some stereological results on grain packings <i>A.Gervois, L.Oger, M.Lichtenberg &amp; J.-L.Bouillot</i>	55
Morphology in particulate media <i>D.A.Grivas &amp; M.M.Skolnick</i>	63
Morphology-based image processing for pavement surface analysis <i>D.A.Grivas &amp; M.M.Skolnick</i>	67
Microdeformation analysis of granular media by holographic interferometry – Method and preliminary results <i>P.Jacquot</i>	75

Speckle photography applied to the detailed study of the mechanical behaviour of granular media <i>M.Monti</i>	83
Dynamic compaction of copper powder <i>T.Thomas &amp; Ph.Bensussan</i>	91
Collective random packing of disk mixtures <i>G.Thomas, J.M.Missiaen &amp; L.Rouillé</i>	99
 <i>2 Grain mechanics</i>	
A fracture mechanics approach to the breakage of agglomerated particulate solids <i>M.J.Adams, M.A.Mullier, J.P.K.Seville &amp; J.G.Williams</i>	105
Uniaxial shear characteristics of powders: Effects of preconsolidation on yield history <i>G.Baluais, M.Delpozo &amp; J.A.Dodds</i>	111
A new probe for the study of intergranular forces <i>F.Delyon, D.Dufresne &amp; Y.E.Lévy</i>	117
Microstructure, compressibility and sinterability of aluminum nitride agglomerates <i>P.Deriu &amp; P.Bernache-Assollant</i>	121
Acoustic analysis of the intergranular failure in the analogical material of Schneeбели <i>M.Gherbi, R.Gourvès &amp; M.C.Reymond</i>	129
Effect of aggregates angularity on granular material behaviour <i>F.Homand-Etienne, Y.Song &amp; H.Rapin</i>	135
A stereological approach of the quasi-static mechanical behaviour of sintered iron <i>L.Ledoux, C.Prioul &amp; D.François</i>	143
Deformation of nickel base superalloy powders during hot isostatic pressing <i>T.C.Lu, Y.Bienvenu &amp; L.Trouilleux</i>	149
Fabric tensor showing anisotropy of granular soils and its application to soil plasticity <i>M.Oda &amp; T.Sudoo</i>	155
Undrained triaxial tests on glass ballotini <i>E.Ovando-Shelley</i>	163
Looking for an intrinsic key for sands <i>D.A.Oyenuga &amp; J.-P.Tisot</i>	171
Intrinsic compressibility of particles during compression of pharmaceutical substances – A phenomenon related to the mechanical strength of tablets <i>G.Ponchel &amp; D.Duchêne</i>	177
 <i>3 Stochastic approach and probability</i>	
Stochastic approach to granular media <i>M.E.Harr</i>	185
Compression of granular media: Effects of disorder <i>M.Ammi, D.Bideau, J.C.Messager, T.Travers, J.P.Troade &amp; A.Gervois</i>	195

Correlations for granular media, classification logic and connections between classes <i>J.Biarez, J.L.Favre, P.Y.Hicher &amp; A.Rahma</i>	201
On the diffusional propagation of horizontal displacements in a granular material <i>W.Brząkała</i>	211
Statistics of glass sphere avalanches in a partly filled rotating cylinder <i>P.Evesque &amp; J.Rajchenbach</i>	217
The stochastic model of stress transmission in granular materials: Two-dimensional theory <i>J.M.Golden</i>	225
Probabilistic equations for flowing particulate solids <i>Y.Molodtsov</i>	233
Characterization of the sampling of granular mixtures with a view to study phenomenons of mixing <i>P.Robin, J.-L.Gourdon &amp; J.-P.Muzeau</i>	241
Criticality in the elastic and geometrical properties of loose packings of particles <i>S.Roux &amp; A.Hansen</i>	249
 <i>4 Mechanics of the continuous equivalent media</i>	
Micromechanical modeling of granular materials with the assistance of experiments and numerical simulations <i>J.T.Jenkins, P.A.Cundall &amp; I.Ishibashi</i>	257
Application of micromechanics to incrementally nonlinear constitutive equations for granular media <i>J.P.Bardet &amp; J.Proubet</i>	265
Analysis of the Satake- and Cundall-parameters of granular materials in non-linear state-changing processes <i>I.Bojtár &amp; K.Bagi</i>	275
Micromechanical simulation for ceramic powder compaction <i>D.Bortzmeyer &amp; M.Abouaf</i>	279
Micromechanical modelling of the densification of metal powder at high temperature <i>D.Bouvard</i>	287
Application de la théorie continue des dislocations à la mécanique des poudres <i>D.Bovet</i>	295
A microstatistical approach of failure surface and global behavior in a granular medium <i>B.Cambou &amp; A.Al-Mansouri</i>	303
Constitutive modelling of granular materials as generalized continua with non-linear kinematic fields <i>C.S.Chang</i>	311
Evolution of elastic moduli in a deforming granular assembly <i>P.A.Cundall, J.T.Jenkins &amp; I.Ishibashi</i>	319

Computer analysis of dissipation mechanism in granular media <i>Y.Kishino</i>	323
Modelling powder consolidation <i>L.T.Kuhn, R.M.McMeeking &amp; F.F.Lange</i>	331
A general failure criterion and constitutive relation for granular materials to metals <i>H.Matsuoka, T.Hoshikawa &amp; K.Ueno</i>	339
Contribution of micromechanics to modelling the behaviour of granular materials response of Schneebeli's material to a cyclic isotropic loading <i>G.Olivari</i>	347
Micromechanical ideas in constitutive modelling of granular materials <i>L.Rothenburg, R.J.Bathurst &amp; M.B.Dusseault</i>	355
 <i>5 Industrial aspect for the powder and grain</i>	
Elasto-plastic behaviours in the production of sintered alloys <i>G.P.Brunel &amp; M.Eudier</i>	367
Mechanical behaviour of carbon agglomerates in relation to the mechanics of discontinuous media <i>J.Biarez &amp; E.Bard</i>	377
Influence of water negative pore pressure on the flow of granular materials in silos <i>J.Biarez, J.M.Fleureau, Indarto, S.Taibi &amp; M.I.Zerhouni</i>	385
Investigation of some characteristics of the Goodman-Cowin equations of granular media flow <i>O.Cohen &amp; R.Y.Qassim</i>	393
Determination of sand grain angularity from a flow test <i>J.De Jaeger</i>	397
Uniaxial compression as a model for studying the shaping of food powders <i>F.de Monredon</i>	405
Relevance of various mechanical strength measurements of pharmaceutical compressed tablets <i>E.Doelker, D.Mordier &amp; S.Kopp</i>	411
Creep behaviour of spray ice <i>L.Domaschuk, D.Shields, R.Frank &amp; E.Funegard</i>	417
Filtration of a granular medium by textiles <i>Y.H.Faure &amp; P.Gendrin</i>	425
On the rheology of metal powder during cold compaction <i>J.Gollion, D.Bouvard, P.Stutz, H.Grazzini, C.Levailant, P.Bauduin &amp; J.P.Cescutti</i>	433
Influence of granulometry cut on rheology of aluminium alloy powders during forging <i>H.Grazzini, C.Levailant &amp; B.Munar</i>	439
Analysis of physical phenomena in a silo <i>Y.Hatamura &amp; T.Takeuchi</i>	445

Theoretical and experimental studies of stresses in full scale silos at the Chartres experimental base <i>A.Khelil &amp; J.C.Roth</i>	453
Analysis of the flow of granular materials whilst gravitationally emptying a silo – A study of the experimental and theoretical velocity fields <i>A.Khelil, D.Weisse &amp; J.C.Roth</i>	461
Flow properties of powders as determined by a triaxial cell <i>L.Lancelot, J.C.Robinet &amp; N.G.Stanley-Wood</i>	469
Centrifuge modelling of the flow of a granular medium <i>P.Lepert, D.Ranaivoson &amp; J.L.Gourdon</i>	477
Flowability of stored granular food products <i>M.P.Luong</i>	485
Propriétés mécaniques du sel meuble <i>J.Ouellet, R.F.Chapuis &amp; D.E.Gill</i>	493
Heat transfer influence on the behaviour of a wall-granular medium interface – Application to granular products stored in silos <i>L.Thibaud &amp; J.P.Maye</i>	501
Segregation in slugging gas fluidized beds <i>C.M.van den Bleek, J.C.Schouten, P.J.M.Valkenburg &amp; H.A.Masson</i>	507
