ABSTRACT	(iii)
ACKNOWLEDGEMENTS	(v)
TABLE OF CONTENTS	(vi)
LIST OF TABLES	(ix)
LIST OF FIGURES	(xi)
LIST OF SYMBOLS	(xiv)
LIST OF UNITS	(xvii)
CHAPTER 1 : INTRODUCTION	1
CHAPTER 2 : BACKGROUND AND LITERATURE REVIEW	5
2.1 The State-of-the-Art in Pipe Network Optimization	5
2.2 Storage Considerations in the Optimization Process	12
2.2.1 Function of Storage Tanks	12
2.2.2 The Pipe-Cost/Storage-Cost Trade-off	13
2.2.3 Numerical Example of Pipe-Cost/Storage-Cost Trade-off	15
2.2.4 Discussion	17
2.3 The WADISO Pipe Network Optimization Model	18
2.3.1 Basic Optimization Procedure	18
2.3.2 Special Features	19
2.3.3 Discussion	21
2.4 Storage Sizing for Pipe Networks	23
2.4.1 Water Demand Characteristics	24
2.4.2 Classification of Pipe Networks	32
2.4.3 Storage Sizing by Extended Period Time-Simulation	34
2.4.4 Storage Sizing by the Critical Period Technique	39
2.5 Overview and Strategy for Research	49

TABLE OF CONTENTS (Continued)

	<u>Page</u>
CHAPTER 3 : DEVELOPMENT OF THE CRITICAL PERIOD TECHNIQUE TANK SIZING ALGORITHM	52
3.1 Basic Design Scenario and Assumptions	52
3.2 An Hourly Peak Factor Curve as Basis for the Critical Period Technique	54
3.2.1 Mathematical Description of the Daily Peak Factor Curve	55
3.2.2 Expanding from a Daily to an Hourly Peak Factor Curve	61
3.2.3 A Function for the Hourly Peak Factor Curve	67
3.2.4 Critical Period Technique Theory using the Inverse Tangent Hourly Peak Factor Function	72
3.3 The Critical Period Technique Applied to Complex Single-Tank Networks	83
3.3.1 Adjustment of Algorithm for Complex Single-Tank Networks	84
3.3.2 Testing of Algorithm for Complex Single-Tank Networks	90
3.3.3 Discussion	96
3.4 The Critical Period Technique Applied to Multiple-Tank Networks	97
3.4.1 Classification of Tanks	98
3.4.2 Reasons for Treating Primary Tanks Differently	99
3.4.3 Factors Influencing the Magnitude of the Additional Volume for Primary Tanks	106
3.4.4 Quantifying the Additional Volume for Primary Tanks	113
3.4.5 Summary and Discussion of Results	121
3.5 Verification of the Critical Period Technique with Realistic Networks	124
3.5.1 Single-Tank Network	125
3.5.2 Three-Tank Network	126
3.5.3 Anytown Network	128
3.5.4 Discussion	128
3.6 Summary and Discussion of the Critical Period Technique	130
3.6.1 Stepwise Summary of the Technique	131
3.6.2 Discussion on the Accuracy of the method	143
3.6.3 Discussion on the Efficiency of the method	148

TABLE OF CONTENTS (Continued)

	<u>Page</u>
CHAPTER 4 : STORAGE CONSIDERATIONS IN PIPE NETWORK OPTIMIZATION	152
4.1 Inclusion of the Critical Period Technique into WADISO	153
4.2 Example Showing the Importance of the Pipe-Cost/Storage-Cost Trade-off	154
4.2.1 Problem Statement	154
4.2.2 Results and Discussion	157
4.3 Sensitivity Analysis	160
4.3.1 Problem Statement and Summary of Results	160
4.3.2 Discussion on the Results	162
CHAPTER 5 : OPTIMIZATION OF ANYTOWN, USA	168
5.1 Problem Definition	169
5.2 Optimization Procedure	176
5.3 Summary of Costs and Discussion	187
CHAPTER 6 : SUMMARY AND CONCLUSIONS	189
LIST OF REFERENCES	196
<u>APPENDICES</u>	
APPENDIX A : Derivation of Equations	200
APPENDIX B : The Node Method for Balancing Flows in a Pipe Network	212
APPENDIX C : Detailed Listing of Comparison of Critical Period Technique and Time-Simulation Results	223
APPENDIX D : Consumption Data Sets	263
APPENDIX E : Comparison of Tank Sizing Results : Fixed Tank Levels vs. Fluctuating Tank Levels	272
APPENDIX F : Numerical Definition of the Graphs for Calculation of δ	277
