Contents

Abstract	iii
Acknowledgements	iv
Table of Contents	v
1 Introduction	1
2 Unsteady Flow Modeling of River Hydraulics	8
2.1 Background	8
2.2 Mathematical Formulation	11
2.2.1 Continuity Equation	11
2.2.2 Momentum Equation	14
2.3 Numerical Scheme	15
2.3.1 Finite Difference Formulation	15
2.3.2 Nodal Equations	23
2.3.3 Boundary Conditions	24
2.3.4 Initial Conditions	24
2.4 Method of Solution	25
2.4.1 Newton-Raphson Iteration	25
2.4.2 Partial Derivatives for Jacobian Matrix	26

2.5	Computer Program	31
2.5.1	River Network Configuration	32
2.5.2	Computation of Cross Section Properties	35
2.5.3	Transverse Flow Distribution	36
2.5.4	Computational Alogrithm	38
3	Water Temperature and Ice Concentration Distribution	42
3.1	Heat Exchange Processes	42
3.1.1	Short Wave Radiation Computation	44
3.2	Transport Equations for Water and Ice	49
3.3	Two Layer Model for Ice Transport	51
3.3.1	Background	51
3.3.2	Water Temperature Distribution	55
3.3.3	Ice Production and Transport	56
3.3.4	Melting and Decay of Ice	59
3.3.5	Undercover Ice Transport	61
3.3.6	Shore Ice Effect on Ice Transport	63
3.3.7	Skim Ice Run	65
3.4	Semi Analytical Solution Scheme	68
3.4.1	Water Temperature	69
3.4.2	Surface Layer	70
3.4.3	Suspended Layer	78
3.5	Computational Procedure	79
3.5.1	Interpolation Scheme	86
3.5.2	Application to Channel Networks	88
3.5.3	Computer Program	93
3.6	Applications of Two Layer Model	94

4	Initial Ice Cover Formation and Progression	115
4.1	Border Ice Growth	115
4.1.1	Description of Phenomena	115
4.1.2	Computational Procedure	116
4.2	Dynamic Ice Cover Formation	122
4.2.1	Initiation of Ice Cover	122
4.2.2	Modes of Ice Cover Formation	122
4.3	Computation of Initial Ice Thickness	126
4.3.1	Background	126
4.3.2	Mathematical Formulation	127
4.3.3	Computational Algorithm	133
4.4	Stability of Ice Cover	135
4.5	Analysis of Ice-Water Interaction	137
4.6	Ice Cover Progression	155
4.6.1	Computational Procedure	161
4.6.2	Notes on Computer Program	164
5	Undercover Deposition and Erosion	166
5.1	General Description	166
5.2	Mathematical Formulation	168
5.2.1	Ice-Water Interaction in Deposition and Erosion	168
5.2.2	Transverse Distribution of Undercover Accumulation	172
5.2.3	Deposition and Erosion Underneath Shore Ice	173
5.3	Computational Procedure	174
5.3.1	Computer Program	175
6	Thermal Growth and Decay of Ice Cover	178
6.1	General	178

6.2	Simulation of Thermal Growth and Decay	181
6.2.1	Surface Heat Exchanges	182
6.2.2	Growth of Black Ice	183
6.2.3	Decay of Ice Cover thickness	186
6.2.4	Effect of Frazil Ice on Ice Cover Thickness	187
6.2.5	Formation of White Ice	188
6.3	Computer Program	190
7	Model Development and Application	193
7.1	Development of the Computer Model	193
7.1.1	Computational Algorithm	193
7.1.2	Input data Requirements	197
7.2	Application of the Model	199
7.2.1	Description of the Study Reach	199
7.2.2	Calibration of the Model	202
7.3	Results and Discussion	229
7.4	Conclusion	267
