LIST OF TABLES vi

LIST OF FIGURES viii

CHAPTER

I. INTRODUCTION 1

1.1 Background 1
1.2 Objective and Scope 2
1.3 Need for New Formulations 3

II. LITERATURE REVIEW 10

III. THEORETICAL BASIS AND SOLUTION STRATEGY 14

3.1 Governing Equations and Hypotheses 14
3.2 Iterative Coupled Approach 18

IV. CRITICAL ASSESSMENT OF MATHEMATICAL FORMULATION OF SEDIMENT-TRANSPORT PROCESSES 24

4.1 Introduction 24
4.2 Sediment Discharge by Size Fraction 25
4.2.1 Background 25
4.2.2 Review of Previous Work 26
4.2.3 The Proposed Models 29
4.2.4 Evalution of the Proposed Models 33
4.3 Determination of Critical Shear Stress 51
4.4 Sorting and Armoring Procedures 56
4.4.1 Introduction 56
4.4.2 Review of Previous Work 57
4.4.3 The Proposed Model 59
4.4.4 Additional Remarks on the Adopted Procedures . . 61

V. COMPUTATION OF STEADY AND UNSTEADY FLOW IN MULTIPLY CONNECTED CHANNEL NETWORKS 63

5.1 Introdution 63
5.2 Node Continuity 64
5.3 Discretization of Equations 66
5.3.1 Quasi-Steady Model (Energy Equation) 66

Page

5.3.2 Unsteady Model (Continuity and Momentum Equations) 69
5.4 Formulation of Nodal Matrix Equation 70
5.4.1 Quasi-Steady Model 70
5.4.2 Unsteady Model 73
5.5 Solution Strategy in One Iteration 77
5.6 Inversion of Nodal Coefficient Matrix 78
5.7 Weir-Equivalent Flow Equation 78
5.8 Flow Stablization Procedure for Unsteady Model 79

VI. COMPUTATION OF BED EVOLUTION 82

6.1 Introduction 82
6.2 Sediment Continuity in Fluvial Reaches 82
6.3 Upstream Boundary Condition for Sediment 83
6.4 Sediment Continuity at Nodes 89
6.5 Computation of Sorting and Armoring 91
6.5.1 The Mixed Layer 91
6.5.2 Bed-Material Composition 92
6.5.3 Armoring of Bed Surface 92

VII. ASSESSMENT OF MODELLING TECHNIQUES THROUGH APPLICATION TO A COMPLEX PROTOTYPE EXAMPLE 96

7.1 Introduction 96
7.2 Rigidity of Quasi-Steady Model 98
7.3 Dry-Bed Procedures 100
7.4 Modelling Techniques for Upstream Boundaries 103
7.5 Bed Evolution at Nodes 105
7.6 Solution Stability 108
7.7 Conclusions 111

VIII. CASE STUDIES 113

8.1 Application to Missouri River 113
8.1.1 Introduction 113
8.1.2 Data Set 115
8.1.3 Test Conditions 122
8.1.4 Analysis of Results 123
8.1.5 Conclusions 131
8.2 Application to Cho-Shui River 132
8.2.1 Introduction 132
8.2.2 Data Set 135
8.2.3 Test Conditions 144
8.2.4 Analysis of Results 145
8.2.5 Conclusions 151

Page

IX. DESCRIPTION OF NEW COMPUTER CODES 155

9.1 Introduction 155
9.2 Program Structure 156
9.3 Memory and Time Requirements 158
9.4 Input Data Needs 161
9.5 Simulation Output 162

X. CONCLUSIONS AND SUGGESTIONS FOR FURTHER RESEARCH 163

REFERENCES 166
