

Janke, Paul Arthur

APPLICATION OF THE MINIMUM RATE OF ENERGY DISSIPATION THEORY
TO GRADUALLY VARIED FLOW IN GRAVEL-BED STREAMS

Montana State University

Ph.D. 1986

University
Microfilms
International 300 N. Zeeb Road, Ann Arbor, MI 48106

TABLE OF CONTENTS

	Page
LIST OF TABLES.....	x
LIST OF FIGURES.....	xii
ABSTRACT.....	xiii
1. INTRODUCTION.....	1
Establishment of the Problem.....	1
Minimum Rate of Energy Dissipation Theory.....	3
Objectives.....	4
2. LITERATURE REVIEW.....	6
Adjustment Time Periods.....	6
Independent Variables.....	7
Water Discharge.....	8
Sediment Discharge.....	10
Dependent Variables.....	12
Functional Relationships.....	13
Cross Sectional Shape.....	15
Depth, Width, and Velocity.....	15
Parameter Value Trends.....	16
Minimum Rate of Energy Dissipation Theory.....	18
Statement for Alluvial Streams.....	18
Application.....	20
Summary.....	22
3. FIELD INVESTIGATION AND MEASURED VALUES...	25
Data Collection.....	27
Independent Variables.....	27
Sediment Density.....	28
Water Discharge.....	28
Man-Made Works.....	28
Dependent Variables.....	29
Method and Equipment.....	29
Mean Sediment Size.....	30

TABLE OF CONTENTS--Continued

	Page
Stream Depth.....	32
Stream Width.....	32
Thalweg Slope.....	32
Presentation and Discussion of	
Measured Values.....	33
Average Measured Values.....	33
Subreaches Not Altered by the	
Culvert.....	36
Subreaches Altered by the	
Culvert.....	37
Pre-Culvert.....	37
Post-Culvert.....	37
Conclusion.....	39
Gradually Varied Flow.....	39
Upstream.....	39
Downstream.....	40
4. MINRED METHOD.....	43
Development.....	43
General.....	45
Preliminary.....	46
Direct Step Method.....	47
Shields Diagram and Raudkivi's	
Graphical Relation.....	49
Shields Diagram.....	50
Raudkivi's Graphical Relation.....	54
Minimum Rate of Energy	
Dissipation Theory.....	59
Description.....	63
D Loop.....	65
DS Loop.....	66
Simultaneous Solution of D Loop and	
DS Loop.....	66
B Loop.....	67
Summary.....	68
5. CALCULATED VALUES.....	71
Application.....	71
Presentation and Discussion of	
Calculated Values.....	72
Slope of the Energy Grade	
Line.....	72
Average Calculated Values.....	73
Summary.....	75

TABLE OF CONTENTS--Continued

	Page
6. RESULTS AND DISCUSSION.....	76
Parameter Changes Between Subreaches.....	77
Measured Value Changes.....	78
Calculated Value Changes.....	78
Literature Predictions.....	80
Results of Comparisons.....	80
Parameter Changes At Subreaches.....	81
Global Minimum Calculated.....	81
Literature Predictions.....	81
Ideal Ratios.....	82
Actual Ratios.....	82
Results of Comparisons.....	84
Global Minimum Not Calculated.....	84
Ideal Ratios.....	85
Actual Ratios.....	85
Results of Comparisons.....	86
Summary.....	86
7. SUMMARY, CONCLUSIONS, AND SUGGESTIONS FOR FUTURE WORK.....	88
Summary and Conclusions.....	88
Assumptions and Approximations.....	89
Assumptions.....	89
Approximations.....	90
Suggestions for Future Work.....	92
REFERENCES CITED.....	94
APPENDICES.....	98
Appendix A - References Consulted but not Cited.....	99
Appendix B - Definition of Symbols.....	103
Appendix C - Development of the Minimum Rate of Energy Dissipation Theory for Alluvial Streams.....	109
Equation of Continuity.....	111
Stress Tensor.....	111
Equation of Motion.....	113
Rate of Energy Dissipation.....	115
Velocity Vector Satisfying the Equation of Motion.....	115

TABLE OF CONTENTS -- Continued

	Page
Velocity Vector Not Satisfying the Equation of Motion.....	120
Velocity Variation Vector.....	122
Hypothetical Velocity Vector.....	123
Statement of the Theory.....	129
Appendix D - Bankfull Discharge.....	132
Appendix E - Measured Values.....	138
Appendix F - Flow Conditions Near Culverts.....	151
Appendix G - Summary of the MINRED Method.....	158
Preliminary.....	159
D Loop.....	159
DS Loop.....	161
B Loop.....	162
Appendix H - Equations for Shields Diagram and Raudkivi's Graphical Relation.....	163
Appendix I - Calculated Values.....	169
