A. Armanini G. Di Silvio (Eds.)

Fluvial Hydraulics of Mountain Regions

Springer-Verlag

Berlin Heidelberg New York London Paris
Tokyo Hong Kong Barcelona Budapest

Table of Contents

Introduction to the Papers <i>A.Armanini and G.Di Silvio</i>	1
---	---

A Hydrodynamics of Steep Channels and Local-scale Processes.

A1. Flow Resistance over a Gravel Bed: its Consequence on Initial Sediment Movement <i>W.Graf</i>	17
A2. Turbulent Flow with Small Relative Submergence <i>H.Nakagawa, T.Tsujimoto and Y.Shimizu</i>	33
A3. Flow Resistance and Sediment Transportation in Streams with Steep-pool Bed Morphology <i>S.Egashira and K.Ashida</i>	45
A4. Modification of the Transport Rate Formula for Steep Channels <i>L.Suszka</i>	59
A5. Continuous Simulation of Sediment Transport in the Case of Glacierized Watershed <i>F.Schöberl</i>	71
A6. Determination of the Critical Conditions of Incipient Motion of Bed Load in Mountain Rivers <i>W.Bartnik</i>	83
A7. Bed-load Transport in Steep Channels <i>T.Tsujimoto</i>	89
A8. Flume Experiments on Alternate Bars in Unsteady Flow <i>M.Tubino</i>	103
A9. River Bars and Non Linear Dynamics <i>G.Seminara</i>	119

B Sediment Movement in Mountain Streams: Erosion-Deposition Models; Deposition in Reservoirs; Ordinary and Catastrophic Events; Debris Flow; Sediment Control Devices.

B1. Sediment Yield and River Bed Change in Mountain Rivers <i>T.Mizugama</i>	147
B2. A General Model for Intense Sediment Transport of Plane Bed <i>A.Lamberti and L.Montefusco</i>	163
B3. Model Investigations on the Sediment Transport of a Lower Alpine River <i>W.Bechteler, G.Vogel and H.Vollmers</i>	179
B4. Sediment Movement on the Kurobe Alluvial Fan <i>T.Ishikawa</i>	195

B5. Simulation of Reservoir Sedimentation in Mountain Regions <i>M.Fujita, M.Michiae and K.Ashida</i>	209
B6. Sediment Sluicing in Mountain Reservoirs <i>H.Scheuerlein</i>	223
B7. Review of Disastrous Torrent Flood on the Vlasina River on June 26, 1988, Including Analysis of Flood and the Obtained Results <i>Z.Gavrilovic and Z.Matovic</i>	235
B8. Research of Fluvial Processes in Mountains: a Change of Emphasis <i>T.Davies</i>	251
V B9. Mechanics and the Existence Criteria of Various Types of Flows During Massive Sediment Transport <i>T.Takahashi</i>	267
B10. Numerical Analysis of Hillslope-Channel Interaction in First Order Basins <i>P.Ghilardi and G.Menduni</i>	279
B11. Modelling Short- and Long-Term Evolution of Mountain Rivers: an Application to the Torrent Mallero (Italy) <i>G.Di Silvio and M.Peviani</i>	293
B12. Review of Mountain River Training Procedures in Switzerland <i>H.P.Willi</i>	317
B13. From the Check Dam to the Development of Functional Check Dams <i>A.Armanini, F.Dellagiacoma and L.Ferrari</i>	331

C Non-uniformity of Sediment: Grain Sorting; Bed Armouring; Transport of Fine-Sediment Suspensions.

C1. Downstream Variation of Grain Size in Gravel Rivers: Abrasion Versus Selective Sorting <i>G.Parker</i>	347
C2. Morphological Changes and Grain Sorting in Mountain Gravel-bed Streams <i>D.Pianese and F.Rossi</i>	361
C3. Diversion Structure for the "Vallabres" Water Project on the Tinee River - France. Reinterpretation of 1953 Physical Model Studies in Light of Current Knowledge on Grain Sorting <i>M.Bouvard</i>	383
C4. Mobile Armouring of Bed Surface in Steep Slope River with Gravel and Sand Mixtures <i>K.Suzuki and K.Kato</i>	393
C5. Experimental Analysis of Armouring Process <i>A.Lamberti and E.Paris</i>	405
C6. Bed Load Transport and Hyperconcentrated Flow at Steep Slopes <i>D.Rickenmann</i>	429
C7. Experimental Investigations on Bed-load and Suspended Transport in Mountain Streams <i>G. Di Silvio and S.Brunelli</i>	443
C8. Variation of Bed and Transport Mean Diameters in Non-equilibrium Conditions <i>A.Armanini</i>	459
