Suspended Matter in the Aquatic Environment

With 135 Figures

Springer-Verlag
Berlin Heidelberg New York
London Paris Tokyo
Hong Kong Barcelona
Budapest

Contents

1 Introduction	1
1.1 Suspended Matter Observations in History	2
1.2 Development of a More Quantitative Approach	4
1.3 Suspended Matter Transport Studies.	5
2 Sources of Suspended Matter	9
2.1 Suspended Matter in Rivers	9
2.1.1 Storage of Sediment	12
2.1.2 Particulate Organic Matter in Rivers	14
2.2 Suspended Matter in Lakes	15
2.2.1 River Supply and Primary Production	16
2.2.2 Calcite Particles	18
2.2.3 Opal Particles	19
2.2.4 Resuspended Particles	19
2.3 Suspended Matter in Estuaries	20
2.3.1 Supply of Biogenic Material	22
2.4 Suspended Matter in the Sea	23
3 Concentration Distribution and Sampling of Suspended Matter	29
3.1 Concentration Distribution	29
3.1.1 In Rivers	29
3.1.2 In Lakes	33
3.1.3 In Estuaries, Tidal Channels, and Coastal Lagoons.	36
3.1.4 In the Sea	38
3.2 Sampling Suspended Matter and Determination of Suspended Matter Concentration	45
3.2.1 Water Sampling and Filtration.	46
3.2.2 Light Scattering and Radiation Measurements.	48
3.2.3 Acoustic Methods.	49
3.2.4 Remote sensing	49
3.3 Sediment Traps	50

4 Particle Composition	52
4.1 Mineral Particles	52
4.2 Biogenic Particles	55
4.3 Adsorbed Elements and Compounds	60
4.4 Stable and Radioactive Isotopes	65
4.5 The Scavenging Process	69
4.6 Determination of Suspended Particle Composition	73
4.6.1 Analysis of Suspended Matter Composition	74
4.6.1.1 Bulk Analysis	74
4.6.1.2 Single Particle Analysis	76
5 Transport of Suspended Matter	78
5.1 Turbulence	78
5.1.1 Statistical Description	82
5.1.2 Size of Turbulent Eddies	82
5.1.3 Diffusion by Turbulence	83
5.2 Transport of Suspended Matter	83
5.2.1 Estimating Suspended Matter Transport	90
5.2.2 Other Approaches to Suspended Matter Transport	93
5.2.2.1 The Energy Model	93
5.2.2.2 The Gravitational Theory	94
5.2.2.3 Stochastic Models	94
5.2.2.4 Three-Dimensional Models	97
5.3 Initiation of Particle Motion (Scour, Erosion, Resuspension)	98
5.4 Transport by Surface Waves	111
5.5 Particle Settling	117
5.6 Particle Deposition	122
5.7 Stratification	124
5.7.1 Density Gradients	125
5.7.2 Internal Waves	129
5.8 Autosuspension	129
6 Particle Size	131
6.1 Flocculation of Suspended Matter	133
6.1.1 Salt Flocculation	138
6.1.2 Particle Collision	140
6.1.3 Floc Formation by Bubbles	143
6.1.4 Coatings	145
6.1.5 Flocculation by Organisms	146
6.1.6 Floc Breakup	147
6.1.7 Floc Structure: Floc Types	150
6.1.8 Final Remarks on Flocculation	152

6.2 Floc Density and Settling Velocity	154
6.3 Grain Size in Relation to Particle Size: Size Sorting . . .	159
6.3.1 Size Spectra in the Ocean	159
6.3.2 Size Spectra of Constituent Grains.	161
6.4 Measuring Particle Size.	164
7 Transport Systems and Fluxes of Suspended Matter.	167
7.1 In Rivers	167
7.2 In Lakes	174
7.3 Transport and Fluxes in Estuaries	180
7.3.1 Constraints on Particle Transport Through Estuaries	181
7.3.2 Saltwedge Estuaries.	185
7.3.3 Tidally Mixed Estuaries	189
7.3.4 Estimates of Particle Flux Through Estuaries from Numerical Models	199
7.3.5 Tracer Studies in Estuaries	201
7.3.6 Sediment Balance Estimates.	203
7.4 Intertidal Areas	211
7.5 Fjords	218
7.6 The Continental Shelf.	224
7.6.1 Dispersal of River-Supplied Suspended Matter . .	228
7.6.2 Dispersal of Suspended Matter from Coasts (Beaches, Inlets, Eroded Coasts)	238
7.6.3 Suspended Matter and Mud Deposits on the Inner and Middle Shelf	239
7.6.4 Suspended Matter on the Outer Shelf.	244
7.6.5 In-Situ Measurements and Modeling	246
7.7 Suspended Matter in Canyons and Along the Continental Slope	248
7.8 Suspended Matter in the Ocean.	251
7.8.1 Particle Transport in the Ocean	253
7.8.2 The Vertical Particle Flux.	256
7.8.3 Particle Fluxes in Relation to Organic Production.	260
7.8.4 Compositional Changes	262
Postscript on Sediments.	264
References	265
Author Index.	300
Subject Index.	308
Index of Geographical Names	313
