

PROCEEDINGS OF THE SIXTH INTERNATIONAL SYMPOSIUM ON
GROUND FREEZING / BEIJING / 10-12 SEPTEMBER 1991

Ground Freezing 91

Edited by

YU XIANG & WANG CHANGSHENG

Central Coal Mining Research Institute, People's Republic of China

VOLUME 1

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1991

Table of contents

Committees	IX
Acknowledgements	X
Foreword	XI
1. Heat and mass transfer	
Interpreting unconfined unfrozen water content <i>P.B.Black</i>	3
Prediction and control of frost damage to engineering projects in seasonally frost regions <i>Chen Xiaobai & Wang Yaqing</i>	7
Water and ion migration of frozen soils in open system <i>E.D.Ershov, I.U.P.Lebedenko, Xu Xiaozu, Deng Yousheng & Zhang Lixing</i>	11
Thermomechanical modelling of freezing soil <i>M.Frémond & M.Mikkola</i>	17
Results of the heat transfer analysis compared to thermal measurements made in an arcuate heater-LNG inground storage system <i>Sadao Goto, Sadato Takagi & Toru Komatsubara</i>	25
Regulation of ice liner freezing of deep underground storages <i>I.E.Guryanov & N.I.Votyakova</i>	33
Effects of temperature on swelling of coal shale <i>S.L.Huang, R.C.Speck & Z.W.Wang</i>	41
Assessment of frost susceptibility of soils <i>K.Kujala</i>	49
Factors governing a frost heave ratio <i>Y.Miyata & S.Akagawa</i>	55
Transport of water through frozen soils <i>Yoshisuke Nakano</i>	65
Influence of freezing and thawing on suction of unsaturated soils <i>S.Ogawa, T.Nishimura & M.Fukuda</i>	71

A model coupled heat, moisture and stress field of saturated soil during freezing <i>Peng Xuming, Chen Xiaobai & Wang Yaqing</i>	77
Determination of unfrozen water content of an overconsolidated clay down to -160°C by sonic approaches – Comparison with classical methods <i>J.Fr.Thimus, J.Aguirre-Puente & Fr.Cohen-Tenoudji</i>	83
Thaw-consolidation process and calculation of frozen clayly soil <i>Wu Qingbai & Tong Changjiang</i>	89
Water and solute migration of freezing soils in closed system under temperature gradients <i>Xu Xiaozu, Deng Yousheng, Gao Weiyue & Wang Fenge</i>	93
Heat conduction analysis around cooled underground opening using the finite divided element method <i>Yao Yi Jiu, S.Kadota, S.Koga & M.Kamata</i>	99
Heat and moisture exchange for freezing and thawing grounds <i>Yu.S.Danielyan & P.A.Yanitsky</i>	105
The law of unfrozen water content change in frozen saline (NaCl) soils <i>Zhang Lixin</i>	113
 2. Mechanical properties	
Water content effect of the thawing clay soils on shear strength <i>G.I.Bondarenko & A.V.Sadovsky</i>	123
Temperature effects on mechanical characteristics of an artificially frozen typical clay under triaxial stress conditions <i>Chen Xiangsheng, Li Kun & Zhang Yunli</i>	129
Strength of frozen soil under a combined stress state <i>Anatoly M.Fish</i>	135
The progress of the method of static sounding in the investigation of geotechnical properties of frozen soils <i>O.N.Isaev, V.V.Shvarev, A.V.Konstantinov, C.M.Tichomirov & A.V.Sadovsky</i>	147
Mechanical properties of synthetic cometary nucleus material <i>H.L.Jessberger & M.Kotthaus</i>	155
Experimental study of shear creep of frozen fine sand <i>Mi Haizhen, Wu Ziwang, Ma Wei & Xian Congde</i>	163
Experimental studies on frost heaving force and adfreeze frost heaving force on short concrete piles <i>Seigo Sawada & Teruyuki Suzuki</i>	169
A numerical simulation of frost heave under overburden stress <i>Sheng Yu & Chen Xiaobai</i>	175
Rheological behaviour of overconsolidated clay measured by creep test – Application to cryogenic storage <i>J.Fr.Thimus, G.Henriet, P.Colin & Th.You</i>	181

Development of soil fabric by freeze/thaw cycles – Its effect on frost heave <i>Brigitte Van Vliet-Lanoë & André Dupas</i>	189
Influence of freezing-thawing on undrained triaxial compression shear behavior of fibrous peat <i>Hareyuki Yamaguchi, Hitoshi Ikenaga & Shinji Suzuki</i>	197
Displacement and increment in earth pressure in unfrozen soil by frost heave <i>Hideo Yamamoto, Keiji Matsuoka, Hisao Izuta & Takahiro Ohrai</i>	205
Constitutive relations of frozen soil in uniaxial compression <i>Zhu Yuanlin, Zhang Jiayi, Peng Wanwei, Sheng Zhongyan & Miao Lina</i>	211
3. Engineering design	
Stress analysis on freezing pipes by modelling test <i>Cui Guangxin & Yang Weihao</i>	219
Resilient modulus of freeze-thaw or resilient frost heave <i>M.Dysli</i>	225
Towards a three-dimensional model of frost heave <i>J.T.Holden</i>	231
Numerical case studies of ground freezing for the construction of drain pump chambers <i>T.Kunieda, T.Sato, S.Ido, T.Hashimoto, J.Nagaya, F.Oka & A.Yashima</i>	237
Pressure variation on a wellbore casing during permafrost thawing <i>B.Ladanyi & Mu Shen</i>	245
A finite element mechanical model for shaft freeze wall <i>Lou Genda</i>	251
Elastoplastic calculation of bottom heave in artificially frozen shaft <i>Ma Wei & Wu Ziwang</i>	257
Frozen earth cofferdam design <i>Joseph A.Sopko Jr, John A.Shuster & Orlando B.Andersland</i>	263
The application of outer concrete lining with a foam-plastic sheet to frozen shaft and its stress analysis <i>Su Lifan</i>	273
Deformation of ice wall in eastern air shaft, Panji No.3 Mine and its analysis <i>Wang Changsheng</i>	279
Back analysis of measured displacements of freeze wall in shaft modelling <i>Weng Jiajie & Zhang Ming</i>	285
The formation of heterogeneous geocryological structure while ground freezing <i>P.A.Yanitsky</i>	291
Simulation tests and studies of tri-axial creep in frozen walls <i>Yu Chuhou, Yang Ping & Wang Renhe</i>	299

The influence of waterflow in centre pressure relief hole on ice wall formation <i>Yu Xiang, Wang Zhengting & Wu Qijian</i>	305
4. Case histories	
Causes and countermeasures of flooding in shafts constructed by freezing method <i>Chen Wenbao, Tang Zhibin & Li Gongzhou</i>	313
Considerations on the choice among the different freezing methods and competitiveness of the system as compared to alternative solutions <i>F.Gallavresi</i>	319
Ground freezing in Yanzhou mine area <i>Hu Dequan & Cao Jing</i>	325
Directional drilling and its application <i>Liu Min & Lu Jichang</i>	331
Tunnel construction in the protection of a frost shell in partially saturated soil <i>H.Meissner & J.Vogt</i>	337
The construction of East Air Shaft of Panji No. 3 Colliery by freezing method 415 m in depth <i>Pang Rongqing</i>	345
New experience and problems with LIN ground freezing <i>D.Rebhan</i>	351
Soil freezing for the Valencia Underground Railway work <i>J.L.Rojo, A.Novillo & J.R.Alocen</i>	359
Shaft construction by raise boring through artificially frozen ground <i>A.R.Walsh, D.E.Hart & Derek Maishman</i>	369
Ground freezing for driving a slope <i>Wu Qijian, Wang Zhengting & Zhou Xiaomin</i>	379
Technical innovations in freeze shaft construction of Jining No. 2 coal mine, P.R.C. <i>Zhang Chonglin & Hu Dequan</i>	385
