

ROCKFILL DAMS

FINITE ELEMENT ANALYSIS TO DETERMINE STRESSES AND DEFORMATIONS IN MEMBRANE TYPE ROCKFILL DAM

Sponsored by Ministry of Water Resources

Central Board of Irrigation and Power Malcha Marg, Chanakyapuri New Delhi-110021

Contents

Foreword		v	
Preface		vii	
List of Figur	res	xv	
List of Table	25	xxiii	
Chapter 1	Introduction and Scope		
1.1	Introduction		
	1.1.1 Definition and History of Rockfill Dam 11.1.2 Types of Rockfill Dams 2		
1.2	Problems of High Impervious Face Rockfill Dam	4	
	1.2.1 Problems with Face—Membrane Type Rockfill Dam 4		
	1.2.2 Settlement of Rockfill and Deformation of	5	
	Rockfill Dam 5		
1.3	Design of Face Dam-A Review		
	1.3.1 General 6		
	1.2.2 Existing Design Practice 8		
	1.3.3 Present State of Knowledge of the Design of Face Dam 11		
1.4	Finite Element Method (FEM)	13	
1.5	Objectives		
1.6	Cethana Dam	16	
	1.6.1 Cethana Dam Section 16		
	1.6.2 Instrumentation 16		
	1.6.3 Construction and Filling Programme 18		
1.7	Cases Studied	18	
1.8.	Scope of Thesis	20	
	References	20	
Chapter 2	Linear Elastic Analysis		
2.1	Introduction	22	
2.2	Finite Element Formulation	23	
	2.2.1 General 23		
	2.2.2 Basic Steps of Finite Element Method for Linear Problems 24		
	2.2.3 Displacement Function 25		

2.2.4 Stress-Strain Relationships 25

C

	0 0 F			
	2.2.5	Equilibrium Equations 26		
2.2	2.2.6 Numerically Integrated Elements 26			
2.5	Formu	lation of Parabolic Element	28	
2.4	Joint P	sement	22	
2.5	Increm	Election Application	22	
2.6	Linear	Elastic Analysis	38	
	2.6.1	General 38		
	2.6.2	Linear Elastic Constants 38		
	2.6.3	Discretization 39		
	2.6.4	Cases Studied 39		
2.7	Result	s and Discussion	39	
	2.7.1	Deflection of Face Membrane under Reservoir Full Condition 39		
	2.7.2	Slope Stress in Face Membrane under Reservoir Full Condition 43		
	2.7.3	Membrane Normal Deflection for Reservoir Full		
		Condition for Cethana Dam Sections of Different Height 43		
	2.7.4	Horizontal and Vertical Displacements of Rockfill		
	it Date	Embankment Section for the Reservoir Full Condition 45		
2.8	Conclusions			
	2.8.1	Effect of Smoothness of the Face Slab-Rockfill		
	202	Membrane Slone Stress 40		
	2.0.2	Normally Deflected Drofile of Face Membrane 41		
	2.0.5	Displacements in the Deskfill Emberlyment		
	2.0.4	Section 49		
	Refere	nces	49	
hapter 3	Nonlin	lear Analysis	51	
3.1	Introdu	action	51	
3.2	Consti	tutive Relationships	52	
	3.2.1	Factors Controlling Stress-Strain Behaviour 52		
	3.2.2	Tests for Determination of Stress-Strain		
		Relationships and Their Limitations 52		
	3.2.3	Formulation of Constitutive Laws 53		
	3.2.4	Constitutive Relationships for Joint Element 61		
3.3	Solutio	on Algorithm	65	
	3.3.1	General 65		
	3.3.2	Sequential Construction 67		
	3.3.3	Sequential Layer-wise Linear Approach 68		
	3.3.4	Sequential Nonlinear Approach 68		
	3.3.5	Necessity for Modification to Solution		
		Algorithm 69		

3.3.6 Residual Force Approach 70

		3.3.7	Residual Force Method—The Procedure in	
		220	Stages 12 Conversioned with Basidual Forma Approach 72	
	2.4	5.5.8	Convergence with Residual Porce Approach 75	75
	3.4	Cases		15
3.5		Results	and Discussion	11
		3.5.1	Rockfill Dam Cross Section—Analysis for End	
			of Construction Condition //	
		3.5.2	Rockfill Dam Cross Section—Analysis for	
		2.012	Reservior Full Condition 82	
		3.5.3	Cross Valley Transverse Dam Section—	
			Analysis for End of Construction and Reservoir	
		30.2	Full Condition 92	
		3.5.4	Membrane Normal Deflection and Displacement	
			of Downstream Face 104	
		3.5.5	Membrance Stress in Slope Direction for	
			Different Stages of Reservoir Filling 104	
		3.5.6	Membrane Deflection in Slope Direction for	
			Different Stages of Reservoir Filling 107	
		3.5.7	Membrane Deflection in Normal Direction for	
			Different Stages of Reservoir Filling 109	
	3.6	Conclu	sions	109
		3.6.1	Rockfill Dam Cross Section 109	
		3.6.2	Cross Valley Transverse Dam Section 109	
		3.6.3	Membrane Normal Deflection and Displacement	
			of Downstream Face 111	
		3.6.4	Membrane Stress in Slope Direction for Different	
			Stages of Reservoir Filling 111	
		3.6.5	Membrane Slope Deflection of Different Stages	
			of Reservoir Filling 111	
		Referen	ices	112
Chapt	ter 4	Nonline	ear Analysis Including Time Dependent	114
		Creep and Softening of Rockfill		
	4.1	Introdu	ction	114
		4.1.1	Necessity of Creep Analysis 114	
	4.2	Creep-	-Time Dependent Strains	117
	4.3	History	Dependence of Creen Viscoelasticity	118
		4.3.1	General 118	
		4.3.2	Rehological Behaviour 118	
		4.3.3	Creep Compliance and Relaxation Modulus 120	
		4.3.4	Integral Representation of Constitutive Equations	
			of Viscoelastic Solids-Hereditary Integral 121

6.2.8 Paucity of Material Data 310

- 6.3 Points for Further Research Work
 - 6.3.1 Inclusion of Foundation in the Analysis 310
 - 6.3.2 Improved Stress-Strain Model 310
 - 6.3.3 Stress Path Dependency—Differences in Stress-Strain Properties under Loading and Unloading Conditions 310
 - 6.3.4 Three Dimensional Analysis 311
 - 6.3.5 Dynamic Analysis 311
