

NONLINEAR EARTHQUAKE-RESPONSE ANALYSIS OF EARTH DAMS

AHMED-WAEIL METWALLI ELGAMAL

**DISSERTATION PRESENTED TO
THE FACULTY OF PRINCETON UNIVERSITY
IN CANDIDACY FOR THE DEGREE
OF DOCTOR OF PHILOSOPHY**

**RECOMMENDED FOR ACCEPTANCE
BY THE DEPARTMENT OF
CIVIL ENGINEERING**

DECEMBER 1984

TABLE OF CONTENTS

CHAPTER 1	GENERAL INTRODUCTION.....	1
1.1	General Objectives of this Study.....	1
1.2	Earth Dams and Earthquakes.....	1
1.3	Methods of Dynamic Analysis.....	4
1.4	Brief Literature Survey.....	5
1.5	Procedures Incorporating Attempts to Model Dam-Material Nonlinear Behavior.....	9
1.6	Organization of the report.....	10
	References of Chapter 1.....	14
CHAPTER 2	GENERAL FORMULATION OF THE NONLINEAR PROBLEM.....	20
2.1	Introduction.....	20
2.2	Formulation.....	20
	2.2.1 Equation of Motion.....	20
	2.2.2 Weak Form.....	23
	2.2.3 Galerkin Equation.....	23
2.3	Time Integration.....	27
	References of Chapter 2.....	33
CHAPTER 3	ELASTO-PLASTIC CONSTITUTIVE MODELLING OF SOILS UNDER DYNAMIC LOADING.....	34
3.1	Introduction.....	34
3.2	Review of Constitutive Models.....	35
3.3	Elasto-Plastic Constitutive Model for Soils Under Seismic Loading Conditions.....	44
3.4	Specification of Model Parameters Using Dynamic Full-Scale Testing.....	59
	References of Chapter 3.....	66
	Appendix 3.1.....	70
CHAPTER 4	ELASTO-PLASTIC EARTHQUAKE SHEAR-RESPONSE OF ONE-DIMENSIONAL NONHOMOGENEOUS EARTH DAM MODELS	76
4.1	Introduction.....	76
4.2	Analysis.....	79
	4.2.1 Equation of Motion.....	79
	4.2.2 Eigenfunctions of the Linearized Problem...	82
	4.2.3 Solution of the Equation of Motion.....	86
4.3	Application; Numerical Examples.....	92
	4.3.1 The Earth Dam.....	92
	4.3.2 Input Ground Motions and Periodic Excitations.....	94
	4.3.3 Constitutive Models.....	94
	4.3.4 Response to Periodic Excitations.....	97
	4.3.5 Earthquake Excitation with Different Intensities.....	102
	4.3.6 Response to Moderate Shaking.....	104
	4.3.7 Response to Strong Shaking.....	110

4.3.8	Comparison with Makdisi-Seed Iterative Procedure.....	116
4.3.9	Comparison with the Finite Element Method..	122
4.4	Summary and Conclusions.....	127
	References of Chapter 4.....	129
	Appendix 4.1.....	133
CHAPTER 5	ELASTO-PLASTIC EARTHQUAKE SHEAR-RESPONSE OF TWO-DIMENSIONAL NONHOMOGENEOUS EARTH DAM MODELS.....	151
5.1	Introduction.....	151
5.2	Analysis.....	153
5.2.1	Equation of Motion.....	153
5.2.2	Eigenfunctions of the Linearized Problem...	156
5.2.3	Solution of the Equation of Motion.....	160
5.3	Application; Numerical Examples.....	170
5.3.1	The Earth Dam.....	170
5.3.2	Input Ground Motion.....	172
5.3.3	Constitutive Model.....	175
5.3.4	Comparison Between One- and Two-Dimensional Analyses.....	175
5.3.5	Influence of Modal Expansion, Modal Coupling, and Material Nonhomogeneity on the Response.....	182
5.3.6	Characteristics of Hysteretic Response and Stress Path.....	195
5.3.7	Effect of "Equivalent" Dam Length on the Response.....	201
5.3.8	Comparison with Finite Element Models.....	219
5.3.9	Summary and Conclusions.....	225
	References of Chapter 5.....	228
CHAPTER 6	ELASTO-PLASTIC EARTHQUAKE RESPONSE OF THREE-DIMENSIONAL NONHOMOGENEOUS EARTH DAMS.....	230
6.1	Introduction.....	230
6.2	Equation of Motion.....	234
6.3	Solution of the Problem.....	239
6.3.1	Spatial Modal Discretization.....	239
6.3.2	Constitutive Assumption.....	241
6.3.3	Time Integration.....	241
6.4	Numerical Example.....	243
6.4.1	Dam Description and Geometric Modelling....	243
6.4.2	Material Properties.....	244
6.4.3	Mode Shapes and Numerical Integration.....	248
6.4.4	Input Ground Motion.....	254
6.5	Dynamic Response of the 3-D Model.....	254
6.5.1	Time Histories of Response and Comparison with the Finite Element Results.....	254
6.5.1.1	Displacements.....	256
6.5.1.2	Accelerations.....	268
6.5.1.3	Strain and Stress Time Histories..	273

	6.5.1.4 Contour Lines of Peak/Residual Stresses and Strains.....	281
6.6	Computational Expenses.....	307
6.7	Summary and Conclusions.....	307
	References for Chapter 6.....	316
