

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON GEOTECHNICAL ASPECTS
OF UNDERGROUND CONSTRUCTION IN SOFT GROUND/LONDON/UK/15-17 APRIL 1996

Geotechnical Aspects of Underground Construction in Soft Ground

Edited by

R.J.MAIR

Geotechnical Consulting Group, London, United Kingdom

R.N.TAYLOR

Geotechnical Engineering Research Centre, City University, London, United Kingdom

A.A.BALKEMA/ROTTERDAM/BROOKFIELD/1996

Table of contents

Preface	XV
Organisation	XVII
<i>Session reports</i>	
Braced excavations and shafts <i>O. Kusakabe</i>	3
Construction aspects of bored tunnels <i>A. Negro Jr</i>	11
Ground treatment for bored tunnels <i>J.N. Shirlaw</i>	19
Modelling and prediction for bored tunnels <i>E. Leca</i>	27
Settlement effects of bored tunnels <i>R.J. Mair</i>	43
 1 <i>Braced excavations and shafts</i>	
Measurement of prop loads in a large braced excavation during construction of the JLE station at Canada Water, East London <i>M. Batten, W. Powrie, R. Boorman & H. Yu</i>	57
The failure mechanism of a trench wall caused by additional soil pressure <i>A. F. Bolt, E. Dembicki & G. A. Horodecki</i>	63
Deep open excavation in soft plastic ground in Salzburg, Austria <i>H. Breymann, M. Fuchsberger & H. F. Schweiger</i>	69
Design of underground structure closed in plan erected with application of the Diaphragm Wall Technique <i>N. S. Bulychev, N. N. Fotieva & A. S. Sammal</i>	75
Jubilee Line Extension, Westminster Station design <i>M. D. Carter, R. P. Bailey & M. P. Dawson</i>	81

Apparent pressure diagram for braced excavations in soft clay with diaphragm wall <i>J.-D.Chang & K.S.Wong</i>	87
Westminster Station – Deep foundations and top down construction in central London <i>J.D.Crawley & C.S.Stones</i>	93
Jubilee Line Extension, Bermondsey Station box: Design modifications, instrumentation and monitoring <i>M.P.Dawson, A.R.Douglas, L.F.Linney, M.Friedman & R.Abraham</i>	99
An underground tunnel beneath Amsterdam Central Station <i>F.de Boer & H.M.van der Eem</i>	105
Evaluation of the performance of a multi-propped diaphragm wall during construction <i>E.K.De Moor & M.C.Stevenson</i>	111
Earth pressure acting on a deep circular shaft wall <i>A.Enami, H.Morishita, M.Ogihara, M.Homma, H.Tezuka & Y.Hiramatsu</i>	117
Case history of a deep ‘stepped box’ excavation in soft ground at the sea front – Langney Point, Eastbourne <i>R.Fernie, P.Kingston, H.D.St.John, K.G.Higgins & D.M.Potts</i>	123
Simplified approach for estimating lateral wall movement of embedded walls in UK ground <i>R.Fernie & T.Sucking</i>	131
Active failure mechanism of a deep circular shaft in dry sand <i>T.Fujii, T.Hagiwara & O.Kusakabe</i>	137
Observation of diaphragm wall movements in Lias Clay during construction of the A4/A46 bypass in Bath, Avon <i>S.Gourvenec, M.Lacy, W.Powrie & M.Stevenson</i>	143
Settlement of soft ground and damage of wooden houses by braced excavation <i>T.Horiuchi & M.Shimizu</i>	149
The cases of measurement of the pressure of the open cut with earth retaining wall <i>T.Ishida, M.Sato, T.Tatsui & Y.Nakagawa</i>	155
Case history of a ruptured multi tied-back retaining wall <i>C.E.M.Maffei, E.Da Silva Guerra & R.L.Leonardo Leite</i>	161
A study of empirical correlation for lateral deflections of diaphragm walls in deep excavations <i>T.Masuda</i>	167
Considerations in shaft excavation and peripheral ground deformation <i>M.Muramatsu & Y.Abe</i>	173
Case history and behavioural analyses of braced large scale open excavation in very soft reclaimed land in coastal area <i>S.Nakagawa, I.Kamegaya, K.Kureha & T.Yoshida</i>	179
Prediction of earth pressure and settlements due to excavation: Influence of wall deflection process and wall friction <i>T.Nakai, H.Kawano & T.Hashimoto</i>	185

Observed heave and swelling beneath a deep excavation in Gault clay <i>D.F.T.Nash, M.L.Lings & C.W.W.Ng</i>	191
Manezhnaya Square Project – Geotechnical aspects <i>V.I.Resin, L.A.Bibin, V.A.Ilyichev, S.B.Ukhov, S.F.Pankina, I.V.Kolybine, V.G.Lerner, G.V.Trusov & M.S.Rudiak</i>	197
Reinforcement effect of composite earth retaining wall system on releasing strut <i>S.Saji & K.Numakami</i>	203
Earth and water pressures acting on the excavation side of a braced wall in soft ground <i>T.Tamano, S.Fukui, S.Mizutani, H.Tsuboi & M.Hisatake</i>	207
Undrained shear strength for passive earth pressure in an excavation of soft clay <i>H.Tanaka</i>	213
Prismatic failure – A new method of calculating stability against boiling of sand within a cofferdam <i>T.Tanaka, E.Toyokuni & E.Ozaki</i>	219
Failure characteristics of a sheet pile wall in centrifuge tests <i>Y.Toyosawa, N.Horii, S.Tamate & N.Suemasa</i>	225
In situ monitoring and analysis of a cut-and-cover tunnel on the Bay-Shore Route <i>H.Ueki, S.Moue, S.Kobayashi & K.Sekiya</i>	231
Earth pressures acting on flexible circular shafts in sand <i>K.Ueno, Y.Yokoyama, A.Ohi & T.Fujii</i>	237
 2 Construction aspects of bored tunnels	
CATSBY: Collapse real-time prevention system for slurry tunnel boring machines in soft ground <i>P.Aristaghes, F.Berbet & P.Michelon</i>	245
Design of twin-tube tunnel through soft rock <i>C.T.Chang, M.C.Lee & P.C.Hou</i>	251
Design and installation of special tunnel rings to monitor long term ground loading <i>H.R.Davies & K.H.Bowers</i>	257
Tunnel construction in Stuttgart: Problems of settlements and swelling rock <i>P.Egger</i>	263
Geotechnical aspects of the construction of the Heathrow Transfer Baggage System tunnel <i>W.J.Grose & C.M.Eddie</i>	269
Experiences from the construction of the Athens Metro <i>M.Kavvas, L.R.Hewison, P.G.Laskaratos, C.Seferoglou & I.Michalis</i>	277
Driving control and ground behaviour of triple circular face shield machine <i>T.Kuzuno, H.Takasaki, M.Tanaka & T.Tamai</i>	283
Geotechnical aspects of the L.A. Metro Red Line Contract C0331 – North Hollywood tunnel <i>D.A.Louis</i>	289

Tunnelling in São Paulo, Brazil <i>A. Negro Jr, L. E. Sozio & A.A. Ferreira</i>	295
Geotechnical aspects of tunnelling in soft ground in Ireland <i>T.L.L. Orr & E.R. Farrell</i>	301
Some aspects of contact stress measurements around tunnels <i>J. Pacovský</i>	307
Geotechnical experiences from previous tunnel projects in Bangkok soils <i>N. Phienwej</i>	311
Tunnel observations for the Muni Metro Turnback project <i>G. Sherry, R. Castro, D.A. Sutter & C.L. Wu</i>	317
Restoration of a distressed tunnel in the Northern section of the Calcutta Metro construction <i>N.N. Som & A. K. Gupta</i>	323
Slurry penetration into coarse grained soils and settlements from a large slurry shield tunnel <i>W. Steiner</i>	329
Discussion: Observations of lining load in a London clay tunnel <i>K.H. Bowers & J.D. Redgers</i>	335
Discussion: Tunnelling in weathered rock – Rock or soil mechanics approaches? <i>M. Kavvadas</i>	337
3 Ground treatment for bored tunnels	
Application of compensation grouting to the St. Clair River Tunnel project, North America <i>J. Forbes & A.P. Finch</i>	343
Measures to limit structure settlements during construction of the station complex at Southwark <i>M. Friedman & A. McKie</i>	349
Effects of pre-lining methods on the convergence of a tunnel <i>A. Guilloux, S. Bretelle & F. Bienvenue</i>	355
Construction of low-level tunnels below Waterloo Station with compensation grouting for the Jubilee Line Extension <i>D.I. Harris, A.J. Pooley, C.O. Menkiti & J.A. Stephenson</i>	361
Settlement of storehouses during the passage of two parallel shields through soft ground <i>S. Ikeda, T. Saito, Y. Huang & A. Mori</i>	367
Tunnel face reinforcement by bolting: Soil bolts homogenization, strain approach <i>C. Jassionnesse, P. Dubois & A. Saitta</i>	373
Observation and control of movements in works constructed by ground freezing <i>R.H. Jones</i>	379
The NATM and compensation grouting trial at Redcross Way <i>J.P. Kimmance & R. Allen</i>	385

Storebælt Eastern Railway Tunnel, Denmark – Ground freezing for tunnels and cross passages <i>N.Kofoed & S.R.Doran</i>	391
Protection of buildings from tunnelling induced settlement using permeation grouting <i>L.F.Linney & M.Friedman</i>	399
Urban tunnel in beach sand, Bilbao <i>J.R.Madinaveitia</i>	405
Geotechnical aspects related to construction of a 5.5 km tunnel excavated in sedimentary soils of São Paulo Basin <i>C.E.M.Maffei & L.R.Martinati</i>	411
Ground movements and vertical compensation grouting during shaft construction – Jubilee Line Extension, Green Park Station, Contract 101. <i>C.Murugamoorthy, G.S.Murray, P.Ball, A.Bracegirdle & Q.J.Leiper</i>	417
The use of jet grouting to improve soft clays for open face tunnelling <i>G.Pellegrino & D.N.Adams</i>	423
Monitoring during the construction of the Allen Sewer Tunnel, Toronto, Canada <i>J.N.Shirlaw, B.N.Pennington & X.Yi</i>	429
Discussion: Control of ground movements – Risk issues and instrumentation <i>Q.J.Leiper</i>	435
Discussion: Quality control during jet grouting <i>J.R.Madinaveitia</i>	437
 4 Modelling and prediction for bored tunnels	
Twin tunnel construction – Ground movements and lining behaviour <i>T.I.Addenbrooke & D.M.Potts</i>	441
Finite element simulation of shield tunnelling processes in soft ground <i>H.Akagi & K.Komiya</i>	447
Face stability in slurry and EPB shield tunnelling <i>G.Anagnostou & K.Kovári</i>	453
Predictions and a monitoring scheme with respect to the boring of the Second Heineoord Tunnel <i>K.J.Bakker, W.van Schelt & J.W.Plekkenpol</i>	459
Numerical modelling of tunneling in soft soil <i>S.Bernat, B.Cambou & P.Dubois</i>	465
Centrifuge models of tunnel construction and compensation grouting <i>M.D.Bolton, Y.C.Lu & J.S.Sharma</i>	471
Experimental and numerical tests on the excavation of a railway tunnel in grouted soil in Milan <i>G.Canetta, B.Cavagna & R.Nova</i>	479

Back analysis of an urban tunnel <i>C.Casarin, A.P.O.Pureza, C.M.A.Prado & L.Tescarolo</i>	485
Numerical modelling of a NATM tunnel construction in London Clay <i>G.R.Dasari, C.G.Rawlings & M.D.Bolton</i>	491
Two- and three-dimensional numerical modelling of a guided pipe-jacking in soft soil <i>R.de Borst, W.L.A.H.van den Broek & A.E.Groen</i>	497
Numerical simulation of a tunnel excavated in a porous collapsible soil <i>M.M.Farias & A.P.Assis</i>	501
Centrifuge modelling of ground movements due to tunnelling in layered ground <i>R.J.Grant & R.N.Taylor</i>	507
Back analysis for shield tunnel using beam-joint model <i>T.Hashimoto, J.Nagaya, T.Tamura, T.Kishio, H.H.Zhu, L.D.Yang & W.M.Cai</i>	513
Ground movements due to tunnelling: Influence on pile foundations <i>H.J.A.M.Hergarden, J.T.van der Poel & J.S.van der Schrier</i>	519
Numerical modelling of the influence of the Westminster Station excavation and tunnelling on the Big Ben clock tower <i>K.G.Higgins, D.M.Potts & R.J.Mair</i>	525
Design and development of underground construction equipment in a centrifuge <i>S.Imamura, T.Nomoto, K.Mito, K.Ueno & O.Kusakabe</i>	531
An improvement of FEM analysis in ground settlement prediction in shield tunnelling <i>A.Inokuma & A.Fujimoto</i>	537
Interaction between closely spaced tunnels in clay <i>S.H.Kim, H.J.Burd & G.W.E.Milligan</i>	543
Numerical modelling of a tunnel in soft porous clay <i>R.Kochen & A.Negro Jr</i>	549
Numerical modelling of the NATM and compensation grouting trials at Redcross Way <i>N.Kovacevic, H.E.Edmonds, R.J.Mair, K.G.Higgins & D.M.Potts</i>	553
Prediction of subsidence above shield driven tunnels in cohesive soils <i>K.-M.Lee</i>	561
Centrifuge modelling of construction processes of shield tunnel <i>T.Nomoto, K.Mito, S.Imamura, K.Ueno & O.Kusakabe</i>	567
The influence of an existing surface structure on the ground movements due to tunnelling <i>D.M.Potts & T.I.Addenbrooke</i>	573
A multi-stage finite element analysis of a complex tunnel section in London Clay <i>D.J.Reddish, A.Benbia & J.F.K.Thompson</i>	579
Analytical and geotechnical consideration on ground settlement induced by tail void closure of shield tunnel construction <i>S.Sakajo, T.Yoshimaru & M.Kamimura</i>	585

The influence of anisotropy on calculations of ground settlements above tunnels <i>B. Simpson, J.H. Atkinson & V. Jovičić</i>	591
A finite element study of ground movements measured in centrifuge model tests of tunnels <i>S.E. Stallebrass, R.J. Grant & R.N. Taylor</i>	595
Design of tunnel liners: How important are bending moments? <i>W. Steiner & M. Meier</i>	601
Soil properties based on in-situ data of the shield driven method <i>M. Sugimoto, N.T.H. Luong</i>	607
Measurement of earth and water pressures acting on the great depth shield tunnel segments <i>M. Suzuki, T. Kamada, H. Nakagawa, T. Hashimoto & Y. Satsukawa</i>	613
Pore pressure generation and equalization around a circular tunnel in soft clays <i>G. Urciuoli, C. Russo, A. Desideri & L. Picarelli</i>	621
Soil loads acting on shield tunnels: Comparison between bedded beam model and finite element calculations <i>J.T. van der Poel, H.J.A.M. Hergarden & H.R.E. Dekker</i>	627
Discussion: Comments on the use of non-linear elastic stiffness <i>K.G. Higgins, D.W. Hight, R.J. Mair, D.M. Potts & R.J. Jardine</i>	633
Discussion: Comments on the numerical modelling of settlements above tunnels <i>M.P. O'Reilly</i>	635
Discussion: Reply to discussion by M.P.O'Reilly <i>R.J. Mair</i>	637
 <i>5 Settlement effects of bored tunnels</i>	
Performance of a shield driven sewer tunnel in the Val-de-Marne, France <i>C. Atahan, E. Leca & A. Guilloux</i>	641
Ground movement over three years at the Heathrow Express Trial Tunnel <i>K.H. Bowers, D.M. Hiller & B.M. New</i>	647
The investigation of acid generation within the Woolwich and Reading Beds at Old Street and its effect on tunnel linings <i>A. Bracegirdle, S.A. Jefferis, P. Tedd, N.J. Crammond, I. Chudleigh & N. Burgess</i>	653
A methodology for evaluating potential damage to cast iron pipes induced by tunnelling <i>A. Bracegirdle, R.J. Mair, R.J. Nyren & R.N. Taylor</i>	659
Ground movements associated with pipejacking operations <i>D.N. Chapman</i>	665
Sudden Valley Sewer: A case history <i>M.R. Dyer, M.T. Hutchinson & N. Evans</i>	671
Hong Kong Island Line – Predictions and performance <i>R.A. Forth & C.B.B. Thorley</i>	677

Some aspects of ground movement during shield tunnelling in Japan <i>T.Hashimoto, K.Hayakawa, K.Kurihara, T.Nomoto, M.Ohtsuka & T.Yamazaki</i>	683
Field measurements from two tunnels in Shanghai <i>X.Y.Hou, S.Liao & Y.Zhao</i>	689
Pore pressures induced in soft ground due to tunnelling <i>R.N.Hwang, Z.-C.Moh & M.Chen</i>	695
In situ monitoring of the Lyons Metro D line extension <i>R.Kastner, C.Ollier & G.Guibert</i>	701
Observations of deformations created in existing tunnels by adjacent and cross cutting excavations <i>J.P.Kimmance, S.Lawrence, O.Hassan, N.J.Purchase & G.Tollinger</i>	707
Prediction of ground movements and assessment of risk of building damage due to bored tunnelling <i>R.J.Mair, R.N.Taylor & J.B.Burland</i>	713
Movements and stress changes in London Clay due to the construction of a pipe jack <i>M.A.Marshall, G.W.E.Milligan & R.J.Mair</i>	719
Ground movements around tunnels in soft ground <i>Z.-C.Moh, D.H.Ju & R.N.Hwang</i>	725
Some Spanish experiences on measurement and evaluation of ground displacements around urban tunnels <i>C.S.Oteo & C.Sagaseta</i>	731
Monitoring of tunnels, surrounding ground and adjacent structures <i>G.Price, I.F.Wardle & N.de Rossi</i>	737
Ground behaviour and potential damage to buildings caused by the construction of a large diameter tunnel for the Lisbon Metro <i>D.Simic & G.Gittoes</i>	745
The measurement of ground movements due to tunnelling at two control sites along the Jubilee Line Extension <i>J.R.Standing, R.J.Nyren, T.I.Longworth & J.B.Burland</i>	751
Recorded settlements from the DLR tunnels to Bank <i>A.R.Umney & G.R.Heath</i>	757
Discussion: Comments on the risk of damage to structures <i>M.P.O'Reilly</i>	763
Discussion: Reply to discussion by M.P.O'Reilly <i>R.J.Mair, R.N.Taylor & J.B.Burland</i>	765
Discussion: Stability of electrolevels used to monitor movements <i>G.Price</i>	767
Discussion: The effect of ground movements on rigid masonry facades <i>B.Simpson & W.J.Grose</i>	769

6 Overview of the Jubilee Line Extension Project

A collaborative research programme on subsidence damage to buildings: Prediction, protection and repair 773

J.B.Burland, R.J.Mair, L.F.Linney, F.M.Jardine & J.R.Standing

Site investigation for the tunnels and stations of the Jubilee Line Extension, London 779

L.F.Linney & D.Page

Author index 785
