EARTHQUAKE ANALYSIS AND RESPONSE OF CONCRETE ARCH DAMS

*University of California, Berkeley*

PH.D. 1985

University  
Microfilms  
International 300 N. Zeeb Road, Ann Arbor, MI 48106

## TABLE OF CONTENTS

ABSTRACT .....	1
ACKNOWLEDGEMENTS .....	i
TABLE OF CONTENTS .....	iii
1. INTRODUCTION .....	1
2. SYSTEM AND GROUND MOTION .....	4
2.1 Arch Dam .....	4
2.2 Foundation Rock .....	4
2.3 Impounded Water .....	8
2.4 Absorptive Reservoir Boundary .....	9
2.5 Ground Motion .....	10
2.6 Morrow Point Dam .....	12
3. RESPONSE ANALYSIS PROCEDURE .....	16
3.1 Outline of Analysis Procedure .....	16
3.2 Evaluation of Hydrodynamic Terms .....	22
3.3 Efficient Evaluation of Hydrodynamic Terms .....	27
3.3.1 Major Computational Steps .....	27
3.3.2 Number of Eigenvectors of the Infinite Channel .....	29
3.3.3 Interpolation of Eigenproperties of the Infinite Channel .....	32
3.4 Interpolation of Frequency Response Functions .....	48
3.4.1 Basic Concept .....	48
3.4.2 Two Mode Approximation .....	48
3.4.3 Selection of Frequencies for Exact Computation .....	51

3.4.4 Summary of Interpolation Procedure .....	55
3.5 Efficient Response Analysis Procedure .....	56
3.6 Computer Program .....	60
4. FREQUENCY RESPONSE FUNCTIONS .....	63
4.1 Introduction .....	63
4.2 System, Ground Motion, Cases Analyzed, and Response Quantities .....	63
4.2.1 Dam-Water-Foundation Rock System .....	63
4.2.2 Ground Motion .....	64
4.2.3 Cases Analyzed .....	64
4.2.4 Response Quantities .....	64
4.3 Hydrodynamic Forces on Rigid Dam .....	67
4.4 Dam-Water Interaction Effects .....	75
4.4.1 Hydrodynamic Effects .....	75
4.4.2 Effects of Reservoir Boundary Absorption .....	81
4.4.3 Influence of Young's Modulus $E_s$ .....	84
4.4.4 Comparison of Responses to Three Ground Motion Components .....	89
4.5 Foundation Flexibility Effects .....	89
4.6 Dam-Water Interaction and Foundation Flexibility Effects .....	95
4.6.1 Hydrodynamic and Reservoir Boundary Absorption Effects .....	95
4.6.2 Influence of Moduli Ratio $E_f/E_s$ .....	102
5. EARTHQUAKE RESPONSE OF MORROW POINT DAM .....	108

5.1 Introduction .....	108
5.2 System and Ground Motion .....	108
5.2.1 Dam-Water-Foundation Rock System .....	108
5.2.2 Ground Motion .....	108
5.3 Response Results .....	109
5.4 Dam-Water Interaction Effects .....	114
5.4.1 Hydrodynamic Effects .....	114
5.4.2 Effects of Reservoir Boundary Absorption .....	125
5.5 Foundation Flexibility Effects .....	129
5.6 Dam-Water Interaction Effects with Flexible Foundation Rock .....	132
5.6.1 Hydrodynamic Effects .....	132
5.6.2 Effects of Reservoir Boundary Absorption .....	140
5.7 Relative Significance of Response to Ground Motion Components .....	142
5.8 Practical Earthquake Analysis of Arch Dams .....	164
6. CONCLUSIONS .....	170
REFERENCES .....	176
APPENDIX A: NOTATION .....	179
APPENDIX B: FLUID EIGENVALUE PROBLEM .....	187
B.1 Fluid Eigenvalue Problem of a Rectangular Section Channel .....	187
B.2 Boundary Condition at the Absorptive Reservoir Boundary of the Fluid Eigenvalue Problem As the Excitation Frequency Tends to Infinity .....	191
APPENDIX C: TWO MODE FREQUENCY RESPONSE FUNCTION FOR THE	

DAM-Foundation System with Incompressible Water ..... 192
