

# LOOSE BOUNDARY HYDRAULICS

2nd Edition

BY

A. J. RAUDKIVI

*Professor of Civil Engineering,  
University of Auckland, New Zealand*

PERGAMON PRESS

OXFORD • NEW YORK • TORONTO  
PARIS • SYDNEY • FRANKFURT

## CONTENTS

Preface	vii
List of Symbols	viii
1. Introduction	1
2. Sediment Properties	3
2.1. Particle size, shape and density	3
2.2. The fall velocity	5
2.3. Effect of viscosity	15
2.4. Colloids and flocculation	16
3. Threshold of Particle Transport	23
4. Sand Transport by Air	46
4.1. The surface creep	47
4.2. Effects of sand movement on wind	47
4.3. Instability of a flat sand surface	49
4.4. Ridges and dunes	51
5. Sediment Movement in Water	54
5.1. Bed features and meanders	54
5.2. Analytical models	79
5.3. Stresses in flow of fluid—solid mixtures	91
6. Channel Roughness and Resistance to Flow	101
7. The Sediment Load	137
7.1. Bed-load formulae	137
7.2. Suspended sediment	158
7.2.1. The diffusion approach	160
7.2.2. The energy approach	177
7.2.3. Statistical models	183
7.2.4. Discussion	184
7.2.5. The suspended sediment load	193

7.3. The total sediment load	205
7.4. Calculation	222
7.5. Comparison of the transport formulae	224
8. Stable Channel Design	235
8.1. The empirical stable channel design	235
8.2. Tractive force method of stable channel design	245
8.2.1. Drag distribution and resistance to motion	247
8.2.2. Design values for boundary shear	250
8.2.3. The stable cross-section	250
8.2.4. Design by tractive force method	254
9. Cohesive Soils	262
10. Erosion, Deposition, Scour	282
11. Dimensional Analysis and Similitude	307
12. Transport in Pipelines	314
12.1. Homogeneous suspensions in horizontal pipe	317
12.2. Heterogeneous suspensions in horizontal pipe	319
12.3. Non-horizontal pipeline	328
13. Movement of Sediment by Waves	331
13.1. A few elements of wave theory	331
13.2. Theoretical models for sediment motion	342
13.2.1. Formulation of the analytical model	342
13.2.2. Threshold of sediment motion	346
13.2.3. Established sediment motion	351
13.2.4. The sediment transport rate	358
13.3. The beach profile	361
13.4. Longshore movement of beach material	367
13.5. Sediment sorting	375
13.6. Coastal and bed features	378
13.7. Scour and siltation	379
