

Geotechnical Engineering for Transportation Infrastructure

Theory and Practice, Planning and Design, Construction and Maintenance

Edited by

F.B.J. Barends, J. Lindenberg, H.J. Luger, L. de Quelerij & A. Verruijt

VOLUME 2

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/1999

Table of contents
Table des matières

<i>Static and dynamic soil-water-structure interaction</i>	
<i>Interaction statique et dynamique sol-eau-structure</i>	
<i>Invited papers / Communications sur invitation</i>	
Static and dynamic soil-water-structure interaction <i>R.J. Jardine</i>	641
Numerical modeling of tunnels for the Copenhagen Metro <i>O. Hededal & S.D. Eskesen</i>	653
IDM for transient problems <i>F.B.J. Barends</i>	659
Behaviour of a dense sand under monotonic and cyclic loading <i>K.H. Andersen & T. Berre</i>	667
<i>Papers / Communications</i>	
Principles of the recommendations: 'Stability of dams for waterways' <i>H. Armbruster, M. Heibaum & B. Schuppener</i>	677
Traffic vibration damage calibrated by pile driving excitation <i>F.B.J. Barends</i>	683
Influence of initial conditions and loading characteristics on stability of undrained behaviour of a loose sand <i>N. Benahmed, J. Canou & J.C. Dupla</i>	687
Large lateral displacements of piles in sand - modelling in centrifuge <i>A. Bouafia</i>	691
The effects of impulsive wave loads and subsoil properties on the dynamic response of vertical breakwaters <i>M. Calabrese, F. Silvestri & G. Sorgenti degli Uberti</i>	699
Piezometric levels in earth breakwaters subject to tidal movement <i>H. Cano, J. Estaire & C. Olalla</i>	707
Anchoring efforts on Osaka quay wall at Le Havre harbour <i>L. Delattre, V. Duca, P. Scherrer & P. Rivière</i>	713
Contact interaction of road surfacing with soil under movable and variable load <i>B.J. Didoukh</i>	719
Analysis of the earth pressure distribution on harbour structures <i>N. Dimitrov, T. Germanov & D. Serafimov</i>	725
Consideration of deformed state of system 'retaining wall - soil media' under static action of soil pressure <i>M.P. Doubrovsky, M.B. Poizner & P.I. Yakovlev</i>	731
Development of the load-deformation curve for bridge piers subjected to ship impact <i>T. Feld</i>	737
Behavior and modelling of an unsaturated compacted loam <i>J.M. Fleureau, D. Maouchi & S. Kheirbek-Saoud</i>	743
Stability of caisson breakwaters under wave impact loading <i>M.B. de Groot, P. Hölscher, P. Meijers & A. Kortenhaus</i>	747

The first segmental retaining wall constructed in Turkey: experiences gained and results of measurements <i>E. Güler & O. Pekarun</i>	755
Geotechnical and hydrogeological site characterization for the New Naga Hammadi Barrage on the river Nile, Egypt <i>W. Guth & W. Riemer</i>	761
Toe resistance during pile vibratory penetration <i>A. Holeyman, J.F. Vanden Berghe & S. De Cock</i>	769
Analytical solution for a shock wave in an embedded pile <i>A. Holeyman & X. Bachy</i>	777
Pile group behaviour prediction at El Ferdan - Egypt <i>W.F. Van Impe, L. Maertens & P.O. Van Impe</i>	783
Geotechnical aspects of constructing a new lock system next to an existing lock system <i>J. Kayser, R. Schwab & T. Wachholz</i>	791
Predicting the restraint to Integral Bridge deck expansion <i>B.M. Lehane</i>	797
Check of caisson stability using 3D EE modelling <i>J. Maertens, C. Ramaeckers, G. Buchet & N. Terryn</i>	803
Analysis of pile groups joined by stiffness beams <i>F.F. Martins, J.B. Martins & A.P.F.A.A. Duarte</i>	811
Model testing of geosynthetics in reinforced soil <i>M. Mulabdić, A. Szavits-Nossan & M.S. Kovačević</i>	817
Effect of soil improvement on liquefaction of man-made island <i>F. Oka & A. Yashima</i>	823
The design of the stability of revetments of waterway against rapid draw down of water level <i>W. Richwien, A. Wittkop & H.-G. Schoen</i>	829
A soil mechanical design approach for permeable revetments on inland waterways <i>H. Schulz & H.-J. Köhler</i>	835
Development of Port-Kavkaz on Tamansky peninsula, Russia <i>K.Sh. Shadunts & V.V. Podtelkov</i>	845
Influence of the seepage forces on the passive earth pressures <i>A.-H. Soubra, R. Kastner & A. Benmansour</i>	851
Performance of Rinnio bridge embankment during the 1995 Kozani-Grevena earthquake <i>Th.E. Tika & K.D. Pitilakis</i>	857
Laboratory studies of dynamic shaft resistance response of a vibrodriven model pile in granular soil by varying the relative density <i>K. Viking & A. Bodare</i>	863
Three-dimensional settlement computation for a lock <i>R. Wunsch</i>	871
<i>Dredging and transport by pipelines</i>	
<i>Dragage et transport hydraulique</i>	
<i>Invited papers / Communications sur invitation</i>	
Predicting the behavior of disposed dredging soils <i>D. Znidarcic</i>	877
Can dredging industry rely on geotechnics? <i>G.H. van Raalte</i>	887
Soil resistance against pipelines in jetted trenches <i>T.J. Kvalstad</i>	891
Some geotechnical and geothermal pipeline surprises <i>H.J. Luger</i>	899
<i>Papers / Communications</i>	
Cement-based solidification of dredged sludge <i>M. Boutouil, D. Levacher & P. Sanson</i>	903

Geotechnical aspects of the construction of the integrated harbour sludge management system in Bremen-Seehausen <i>P. Boyken, E. Biener, T. Sasse & J. Arnold</i>	909
Reliability of the elevation of high spots in seabed models <i>H. Kryger Hansen</i>	915
Fluidisation and deformation of submerged soil due to fluctuating water level <i>H.-J. Köhler, H. Spies, O. Beringer & H. Hausbecker</i>	921
Planning of a new major harbour for Helsinki <i>J. Korpi</i>	929
Deformation of the underground pipeline under action of a seismic wave <i>L.V. Nikitin & A.N. Tyurekhodzhaev</i>	935
New methods of computation the reinforced and thermally strengthened soil bases of pipeline transport objects <i>Y.I. Spector, O.L. Denisov, I.B. Abdullin, V.V. Lyubushkin & K.A. Abzalov</i>	941
Re-use of dredgings for infrastructure development <i>D.M. Tonks</i>	949
Highways and airports Autoroutes et aéroports	
<i>State of the art lecture / L'Etat des connaissances</i>	
Highways and airports : the trends of year 2000 <i>J.-P. Magnan</i>	959
<i>Special projects / Projets spéciaux</i>	
Special project lecture: Motorway Helsinki – Lahti <i>O. Arkima</i>	975
Geotechnics of the Austrian-Hungarian highway A4 <i>D. Adam</i>	987
Hong Kong International Airport <i>G.W. Plant</i>	1001
<i>Behaviour of soft soil</i>	
<i>Comportement de sols mous</i>	
<i>Invited papers / Communications sur invitation</i>	
Modelling for radial consolidation <i>E. Imre & P. Rózsa</i>	1017
The use of direct simple shear test for the design of a motorway on peat <i>E.R. Farrell, S.K. Jonker, A.G.M. Knibbeler & R.B.J. Brinkgreve</i>	1027
Some experience in the construction of embankments on soft soils <i>A. Gaberc</i>	1035
<i>Papers / Communications</i>	
Settlement behaviour of an off-shore airport KIA <i>K. Akai & Y. Tanaka</i>	1041
An analytical creep model <i>C.G. Alén</i>	1047
Improvement of shear box apparatus and methodology of test <i>A. Alikonis, J. Amsiejus & V. Stragys</i>	1053
A six years survey with vane test and cone penetrometer to test cohesion value of a soft clay soil during road embankment construction <i>P. Berthelot & F. Durand</i>	1059

Highway embankment construction on contaminated ground <i>F. Callanan & M. Long</i>	1065
A closed-form solution for consolidation analysis in two-three-dimensional conditions <i>F. Castelli & M. Maugeri</i>	1071
Development of a highway slope manual for Hong Kong <i>R.K.S. Chan, P.L.R. Pang & B.N. Leung</i>	1077
Analysis of settlements of stage constructed embankments on estuarine alluvium <i>M.J. Creed</i>	1083
Settlement calculations of a highway embankment on soft ground <i>I. Herle, V. Herle, I. Novotná, C. Karcher & K. Nübel</i>	1089
Verification of soil models for geotechnical calculations of embankments on peat and organic soils <i>H.L. Jansen, M.Th.J.H. Smits & E.J.A. Bijlsma</i>	1095
The undrained anisotropy of K_0 consolidated sediments <i>R.J. Jardine & C.O. Menkiti</i>	1101
Unsaturated condition below the ground water table and its effect on pore pressure, soil and structure deformation <i>H.-J. Köhler, I. Feddersen & R. Schwab</i>	1109
Stability problems of road embankments in the north of Siberia <i>Yu.M. Lvovitch & A.G. Polunovsky</i>	1117
Creep of soft soils under embankments and shallow foundations <i>J.-P. Magnan, J.P. Breton, J.P. Rajot & H. Tar</i>	1121
Settlements of a reservoir founded on bored piles <i>B. Marić & V. Szavits-Nossan</i>	1127
Embankment widening with the Gap-method <i>A.N.G. van Meurs †, A. van den Berg, A.A.M. Venmans, M.A. Van & C. Zwanenburg</i>	1133
Influence of coefficient of stresses concentration in Fröhlich's formula upon calculating the settlement of weak layer in stratified soil <i>Z. Meyer & R. Bednarek</i>	1139
Instrumented piles subjected to combined vertical & lateral loads <i>B.M. Lehane, D.M. Phillips, T.S. Paul & E. Horkan</i>	1145
A precision triaxial apparatus using small size specimens and strength properties of soft clay <i>T. Shogaki, Y. Maruyama & S. Shirakawa</i>	1151
Assessing deformation modulus from dilatocone and seismic cone tests results <i>W. Tschuschke, Zb. M³ynarek & J. Wierzbicki</i>	1159
The estimation of the time-settlement behaviour of road embankment by the pixel soil layer model <i>P. Vepsäläinen, M. Lojander, K. Saarelainen & J. Törnqvist</i>	1169
The Vigner tunnel: Determining contact laws from static load tests on piles <i>L. Vulliet & A. Meyer</i>	1175
<i>Maintenance and durability</i>	
<i>Entretien et durabilité des ouvrages</i>	
<i>Invited papers / Communications sur invitation</i>	
Maintenance and durability aspects in geotechnical engineering for transportation infrastructure <i>A. Loizos</i>	1185
Low height reinforced embankments supported on piles: application, design and reliability – a panel report <i>M. Topolnicki</i>	1191
Continuous quality control in the construction process <i>H.F. Thurner</i>	1195
<i>Papers / Communications</i>	
The use of synthetic materials in the highway engineering in the Urals <i>A.A. Bartolomey, V.I. Kleveko, V.G. Ofrikhter, A.B. Ponomaryov & A.N. Bogomolov</i>	1197
Ballistic soil nailing for slope maintenance <i>M.J. Bastick, B. Myles & A. Guilloux</i>	1203

Geotechnical aspects on failure of flexible pavements <i>P.P. Biswas & S.C. Das</i>	1207
Improvement of the existing gantry crane tracks foundation <i>A. Bolt, E. Dembicki, M. Byczkowski & A. Kryczka^{33o}</i>	1213
Assessment and prevention of freezing-thawing damages in road engineering <i>H. Brandl</i>	1221
In-ground test for geosynthetic reinforced flexible paved roads <i>A. Cancelli & F. Montanelli</i>	1231
Experimental study on the roads foundation bearing capacity <i>A. Chirica, A. Olteanu, M.S. Serbulea & C. Banciu</i>	1239
Stiffness properties of materials to use in pavement and rail track design <i>A. Gomes Correia & J. Biarez</i>	1245
The influence of geologic-geomorphologic conditions on the maintenance of low-volume roads in Lithuania <i>V. Dvareckas, A.A. Juzėnas, S. Skrinskas & V. Stragys</i>	1251
Geophysical assessment of the condition of highway foundations <i>R.D. Evans & D.M. Hiller</i>	1257
A plastic stability solution for embankment design <i>S.F. (Ozer) Cincioğlu, G. (Yılmaz) Ünal & E. Togrol</i>	1263
Investigation of skidding problems on the streets of Muscat <i>Galal A. Ali, Amer Al-Rawas, S. Al-Kindy & K. Al-Rawah</i>	1269
Nondestructively delineating changes in modulus profiles of road constructions <i>W. Haegeman & W. Van Impe</i>	1281
Cement stabilised laterite. A compaction problem? <i>P.B. Hansen, K. Bech, L. Gredsted & J.B. Andersen</i>	1289
Geotechnical assessment of soil properties used for the road pavement base courses in connection with the development of the Russia method of the flexible road pavement design for strength <i>V.D. Kazarnovsky</i>	1295
Re-use of excavated soil from large diameter tunnels in the Netherlands <i>L.E.B. Saathof & M.B.G. Ketelaars</i>	1301
The effect of loading procedure on the resilient modulus values of pavement materials <i>P. Kolisoja</i>	1309
Extensive mixed in place soil improvement for the Botlekspoortunnel <i>H. de Kruijff & M. Topper</i>	1313
Nonlinear elastic behavior of subgrade soils under traffic loading <i>J. Li</i>	1321
Foundation design approach for a 60km long elevated transportation project in Bangkok <i>B.D. Littlechild, G.D. Plumbridge & A.R. Chodorowski</i>	1329
Finnish experiences in preventing frost damages of roads by using steel meshes <i>H. Mäkelä, J. Lehtonen & V. Kallio</i>	1335
Stability problems in road slope at the South of Spain, dues to the exceptional rains <i>C.S. Oteo</i>	1341
A whole life cost model for earthworks slopes in the UK <i>J.M. Reid & G.T. Clark</i>	1347
Thaw-weakening of frost-susceptible subgrades <i>S. Saarelainen</i>	1353
Finnish frost design concept of roads <i>H. Gustavsson, E. Slunga & S. Saarelainen</i>	1359
Maintenance works for stabilising a natural slope by deep drainage and soil improvement techniques <i>L. M. Sopena Mañas, Carlos de las Heras Meco & José Luis Salinas Rodríguez</i>	1367
The landslide impact on the roads in the North-East of Romania <i>R. Judele, A. Stanciu, P. Raileanu, N. Boti, V. Musat & I. Lungu</i>	1375
The influence of slaking of clayey admixtures on their suitability for cement stabilization <i>E.I. Stavridakis & T.N. Hatzigogos</i>	1383

Stabilisation of a road body shaped in a slope failure <i>K. Ukleja, J. Ukleja & B. Tatarczyk</i>	1391
California bearing ratio tests on helipad materials for national security guard <i>K. Venkatachalam, R.K. Khitoliya & K.L. Kalra</i>	1399
An attempt to prevent a new landslide in Greece <i>G. Vlavianos</i>	1405
