

Geotechnical Engineering for Transportation Infrastructure

Theory and Practice, Planning and Design, Construction and Maintenance

Edited by

F.B.J. Barends, J. Lindenberg, H.J. Luger, L. de Quelerij & A. Verruijt

VOLUME 3

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/1999

Table of contents

Table des matières

Ground improvement Amélioration des sols

Invited papers / Communications sur invitation

Ground improvement – an overview <i>B.S.D. Berggren</i>	1411
New experimental results and site experiences on grouting techniques <i>R. Katzenbach, Y. Iagolnitzer & Chr. Moormann</i>	1419
Design of structures loaded by frost heave or by frost pressures <i>P. Gonze</i>	1433
Soil improvement and environmental protection <i>M. Dysli</i>	1439

Papers / Communications

Effect of repeating process of shrinkage-swelling on behaviour of improved expansive soils <i>A.M. Abu-Bakr Megahed</i>	1445
Design of required surcharge and time for pre-consolidation with vertical drains for ground improvement at New Bangkok International Airport <i>C. Athanasiu, A. Bye & J.A. Finstad</i>	1451
Analysis of full-scale field test results for the design of ground improvement at the New Bangkok International Airport <i>C. Athanasiu, A. Bye & J.A. Finstad</i>	1459
Six rows of high capacity removable anchors support deep soil mix cofferdam <i>A.D. Barley, W.D. Payne & P.L. BcBarron</i>	1465
Mixed-in-place stabilisation of pavement structures with cement and additives <i>H. Brandl</i>	1473
Soft soil improvement by mixing with sand or cement <i>J. Feda & J. Bohá</i>	1483
Synthetic reinforcement in the widening of a road embankment on soft ground <i>J. Forsman & V.-M. Uotinen</i>	1489
Shear strength characteristics of reinforced sand <i>F.A.K. Hassona, M.A. Hassan & M.D. Hashem</i>	1497
Settlement prediction of embankments stabilised with prefabricated vertical drains at Second Bangkok International Airport <i>B. Indraratna, I.W. Redana & A.S. Balasubramaniam</i>	1505
Compaction by blasting <i>N. Jelusic & B.S. Malmborg</i>	1513
Model tests for analysis of the bearing and deformation behaviour of column foundations <i>H.G. Kempfert, M. Raithele & A. Jaup</i>	1521
Interactions in reinforced bearing layers over partial supported underground <i>H.-G. Kempfert, D. Zaeske & D. Alexiew</i>	1527

Deep stabilisation of soft soils - laboratory method for design and development of the dry jet mixing method	1533
<i>S. Larsson, S-E. Rehnman & M. Walter</i>	
Effects of sand compaction pile driving on geotechnical properties of clay layer	1539
<i>H. Matsuda, M. Takada, N. Takatsu & N. Kitayama</i>	
Deformation analysis of the reclaimed marine foundation due to tunnel construction	1547
<i>M. Mimura</i>	
Modelling the effects of surcharge to reduce long term settlement of an embankment on soft alluvium	1555
<i>D.F.T. Nash & S.J. Ryde</i>	
Non-uniform consolidation around vertical drains installed in soft ground	1563
<i>I.C. Pyrah, I.G.N. Smith, D. Hull & Y. Tanaka</i>	
Field performance of staged construction of an embankment	1571
<i>J.M. Sánchez-Alciturri, J. Cañizal & C. Sagaseta</i>	
Modelitation of the settlements of an embankment on a soft soil reinforced with stone columns	1577
<i>L. Sopena Mañas & J. Estaire Gepp</i>	
Preloaded motorway embankments - an environmentally sound solution for soft soil areas	1583
<i>J.S. Steenfelt, M.B. Jørgensen & P.O. Jørgensen</i>	
Effects of fly ash admixture on the mechanical behaviour of silty clay	1593
<i>O. Tan, R. Iyisan & M. Cakir</i>	
Dynamic geotechnic analysis of road irfield constructions	1599
<i>B.B. Teltayev, A.Z. Zhusupbekov & D.A. Idrisov</i>	
Aspects for dynamic compaction of saturated sand	1603
<i>P. Vuola & J. Hartikainen</i>	
A simple 1-D model and solution for foundation and granular base over soft soil with geosynthetic reinforcement	1607
<i>J.-H. Yin & G. Zhu</i>	

High speed railways and subways Lignes ferroviaires à grande vitesse et métros

State of the art lecture / L'Etat des connaissances

High speed railways and subways : geotechnical aspects of tunnels and track foundations	1617
<i>E. Leca & A. Guilloux</i>	

Special projects / Projets spéciaux

The tunnels of the highspeed railway line from Cologne to Frankfurt	1639
<i>W. Wittke</i>	
Geotechnical aspects of the Jubilee Line Extension, London	1653
<i>L.F. Linney</i>	
Experiences from the construction of the Athens Metro project	1665
<i>M.J. Kavvadas</i>	

Railway foundations

Fondations de lignes ferroviaires

Invited lectures / Communications sur invitation

Railway foundations: Discussion paper	1679
<i>J.A. Lord</i>	
Improvement of transition zones for high velocity railroad lines	1693
<i>V. Cuéllar</i>	
Status of existing Railway Foundations and measures to handle increase in load and speed	1699
<i>P.-E. Bengtsson</i>	

Embankment design for high speed trains on soft soils <i>R.F. Woldringh & B.M. New</i>	1703
<i>Papers / Communications</i>	
High speed train X2000 on soft organic clay – measurements in Sweden <i>K. Adolfsson, B. Andréasson, P.-E. Bengtsson & P. Zackrisson</i>	1713
Numerical modeling of contact interaction of bases with dredging wells of bridge piers <i>S.M. Aleynikov & S.V. Ikonin</i>	1719
Two layer ballast beds as railway track foundations <i>W.F. Anderson & A.J. Key</i>	1725
Modeling of ballast behaviour in railway track <i>D. Aubry, A. Baroni, D. Clouteau, A. Fodil & A. Modaressi</i>	1733
Modulus for remoulded undisturbed soils in the range of 10^{-5} to 10^{-1} , used for rail track and pavements foundations <i>J. Biarez, Z. Bougriou, T. Fayad, I. Hammoud, H. Liu & A. Gomes Correia</i>	1737
TGV train: Waremme viaduct foundation problems <i>M. Bustamante, L. Gianceselli & H. Salvador</i>	1743
Soil-binding agent affinity in soil stabilisation with cement and/or lime <i>T. Casagrande, V. Misano, M. Cupo Pagano & F. Sferra</i>	1749
TGV Méditerranée high-speed rail viaducts near Avignon: efficiency of pressuremeter methods for foundation investigations <i>M. Cassan & G. Chaillot</i>	1755
Vibro-replacement and static pre-loading of fine-grained granular soils: comparison and importance of in-situ control testing methods <i>J.M. Debats, P. Savasta & M. Gambin</i>	1761
No-Recess test site Hoeksche Waard (Netherlands) <i>J.D. van Duijvenbode, R.F. Woldringh & A.M.M. Venmans</i>	1765
The effect of 1995 Dinar Earthquake on soil underlying railway <i>A. Erken, E. Togrol & A.M. Ansal</i>	1773
Reliable foundations for railway bridges with drilled steel pipe piles <i>P. Korkeakoski, S. Eronen & J. Heinonen</i>	1779
Numerical analysis of collapsibility of a loess <i>B. Gattmiri & P. Delage</i>	1783
Full scale experimentation of discontinuous subsidence for railway and motorway embankments <i>J.P. Gourc, P. Villard, H. Giraud, J.C. Blivet, M. Khay, B. Imbert, A. Morbois & Ph. Delmas</i>	1789
Theoretical and experimental aspects concerning the anti-vibration isolation of foundations by screening <i>P. Pantea & V. Haida</i>	1795
Prediction of frequency content in train induced ground vibrations based on a beam-on-Winkler-foundation model <i>L. Hall & A. Bodare</i>	1803
Transient effects of high speed trains crossing soft soil <i>M.E. Heelis, A.C. Collop, A.R. Dawson, D.N. Chapman & V.V. Krylov</i>	1809
Simulation of the long-term behaviour of the track in model scale tests <i>R. Katzenbach, U. Arslan & S. Heineke</i>	1815
Prediction on the long-term behavior of subsoils under high-speed railways <i>H.-G. Kempfert & Y. Hu</i>	1823
Dynamic ground interaction; a critical issue for high speed train lines on soft soil <i>C. Madhus & A.M. Kaynia</i>	1829
Ground vibration from rail and road traffic; a new Norwegian national standard <i>C. Madhus & L. Hårvik</i>	1837
Prediction of settlement due to cyclic loads <i>K. Mallwitz</i>	1845
Design of an high speed railway line: controversial settlement analysis <i>R. Marchisella, S. Sdoga & G. Varosio</i>	1853

Dynamic large scale test on a concrete track <i>E. Rehfeld</i>	1861
Embankment on soft soil, interaction between embankment, reinforcement and piles. Long term measurement at Urvalla, Sweden <i>S-E. Rehnman, U.B. Eriksson & L. Jendeby</i>	1867
Non-ballasted track in railway tunnels - A cost-effective solution case study - Pannerdensch Kanaal railway tunnel <i>A.J. van Seters, M.Th.J.H. Smits, R.W.G.M. Heijmans & J.A.G. Jansen</i>	1873
Reconstruction of the high-railway embankment on saturated clays <i>M. Slivovský, L. Turinic & R. Baslik</i>	1879
Settlements of railroad high embankments <i>A. Soriano & F.J. Sánchez</i>	1885
Westminster Station, London - Deep excavation below an operational railway; constructing the new Jubilee Line Station interchange hall <i>C.S. Stones & J.D. Crawley</i>	1891
The system of antikerst protection on high-speed railways <i>V.V. Tolmachev, S.E. Pidyashenko & T.A. Balashova</i>	1903
Peculiarities of arrangement of the old bridges' foundations for the Saint-Petersburg - Moscow railway and methods of their strengthening <i>A.M. Uzdin, A.A. Nikitin, V.V. Minkevich, I.O. Kouznetsova, A.A. Dolgaya, N.V. Timofeeva, V.P. Kuzmin & Y.V. Gordeev</i>	1907

Design and construction of tunnels

Conception et construction des tunnels

Invited papers / Communications sur invitation

Design and construction of tunnels in soft ground <i>R.J. Mair</i>	1915
Some considerations on ground inclusions for tunnelling <i>P. Egger</i>	1923
Principles of grain-mechanics around tunnel excavation <i>L. Martak & H. Borowicka</i>	1931
Determination of earth pressure in design calculations of the tunnel lining <i>A. Rymza</i>	1939

Papers / Communications

Evaluation of ground movements of the shallow tunnel of Algiers underground project <i>M. Akchiche & R. Bahar</i>	1945
Construction of the "Karaburma Desni" railway tunnel in saturated sands <i>P. Anagnosti & S. Jovanovic</i>	1951
An analytical model for deep tunnels with radial reinforcement <i>D.N. Antonopoulos, Ch.Th. Papadopoulos & I. Vardoulakis</i>	1955
Large scale tests during design and construction of the highspeed railway-highway crossing at Frankfurt airport <i>U. Arslan, G. Festag & M. Vogler</i>	1963
Extensive independent research programs on second Heinenoord Tunnel and Botlek Rail Tunnel <i>K.J. Bakker, F. de Boer & J.C. Kuiper</i>	1969
Microtunneling in urban areas, 3-dimensional model and measurements <i>P. van den Berg, G.J. Schotmeyer, T. Hashimoto & J. Shirakawa</i>	1979
Emergencies in rock railway tunnels caused by earthquakes <i>K.P. Bezrodny</i>	1987
Additive testing for earth pressure balance shields <i>A. Bezuijen, P.E.L. Schaminee & J.A. Kleinjan</i>	1991
3-D simulations of dewatering in central Copenhagen for the construction of a new metro <i>K. Bitsch, L.M. Markussen, P.G. Jackson & M.A. Gordon</i>	1997

Induced ground movements by the excavation of an underground line in alluvial soils. EPB method <i>J.J. Celma & F.A. Izquierdo</i>	2003
The effect of new tunnelling works on existing underground structures <i>D.N. Chapman & M.L. Cooper</i>	2009
Light-weight material for fills on soft ground <i>E. Dapena, J. López & I. Gayo</i>	2017
Horizontal CPTs for reconnaissance before the TBM front <i>J.K. van Deen, G. Greeuw, R. van den Hondel, M.Th. van Staveren, F.J.M. Hoefsloot & B. Vanhout</i>	2023
Designing tunnel linings on the base of their application fields determination <i>N.N. Fotieva & N.S. Bulychev</i>	2031
Numerical analyses for Chestfield tunnel, UK <i>D.J. French & W.M. Kilkenney</i>	2037
Modelling soil deformation at a tunnel heading using physical and numerical techniques <i>R.J. Grant, S.E. Stallebrass & R.N. Taylor</i>	2045
Niedernhausen Tunnel – Solution of ground-water problems <i>R. Katzenbach & A. Rückert</i>	2053
Tunnelling under compressed air – The experience on site and a laboratory test <i>G. Kammerer & S. Semprich</i>	2059
Experience gained in Madrid during the construction of tunnels crossing urban fills with T.B.M. <i>M. Melis, M. Arnáiz, F. Mendaña, R. Fernández Reyes & C.S. Oteo</i>	2065
Estimation of surface settlements due to urban tunneling in weak rock conditions <i>I.K. Mihalís & A.G. Anagnostopoulos</i>	2073
Evaluation of some modelling procedures of the grouted arch above an underground tunnel in sand <i>E. Nicolini & R. Nova</i>	2079
Analysis of tunnel lining behaviour in soft soil during the construction stage, Second Heinenoord Tunnel <i>G.P.C. van Oosterhout, C.B.M. Blom & P.S. Jovanovic</i>	2087
Flow of water and air in soils due to tunnelling under compressed air <i>E. Perau</i>	2093
Design and construction of the tunnel between Reichstag-building and the new Parliament-buildings in Berlin <i>H. Quick, H. Hoffmann & U. Behr</i>	2101
Temporary tunnel face stability at M1-A1 link <i>N. Radosevic</i>	2107
Specific measures for the long term stability of a tunnel in anhydrite <i>J. Robert & J. Cortade</i>	2115
Soil deformations due to the excavation of two parallel caverns <i>C. Sagaseta, J.M. Sánchez-Alciturri, C. González, A. López, J. Gómez & R. Pina</i>	2125
Scale effects on modelling of tunnels <i>J.C. Sartoris, P. Chambon & D. König</i>	2133
New National Theatre station - railway tunnel in soft clay <i>A. Schram Simonsen & A. Bye</i>	2139
4 th tube of the tunnel under the river Elbe in Hamburg – On the load carrying behaviour of the segmental lining <i>E.-R. Tirpitz & U. Hestermann</i>	2147
Model for driving a micro-tunnelling-machine in soft soil <i>A.F. van Tol, T.F. Faassen, A. Baldee & G. Arends</i>	2155
The geotechnical basis of microtunneling in urban conditions <i>V.M. Ulitski, V.N. Paramonov & A.G. Shashkin</i>	2163
The stability of pilot tunnels at Xiaolangdi multipurpose dam project <i>Y. Jiang</i>	2169

Special topics / Sujets spéciaux

A few thoughts about ultimate limit states verification following Eurocode 7 <i>R. Frank & J.-P. Magnan</i>	2179
A survey on geotechnical engineering education in Europe <i>I. Manoliu</i>	2185
International Reference Test Procedure for the Cone Penetration Test (CPT) and the Cone Penetration Test with pore pressure (CPTU) <i>Report of the ISSMGE Technical Committee 16</i>	2195
The relation between Eurocode 8 and Eurocode 7 <i>P.S. Sêco e Pinto</i>	2223
Application of Eurocode 7, part 1 in the design procedure of a piled foundation <i>W.J. Heijnen</i>	2229
Geotechnical research & development in Europe <i>A. Jonker, J. Hartlén & J.J.M. Powell</i>	2233
