

LANDSLIDES

in research, theory and practice

VOLUME 3

Edited by E. Bromhead, N. Dixon
and M-L. Ibsen

Proceedings of the 8th International Symposium on Landslides
held in Cardiff on 26–30 June 2000

Thomas Telford

Contents

Comparison of Strength Parameters Obtained from Back Analyses of a Landslide with Laboratory Tests and with Special Reference to Artesian Pressure R. NAKANO and H. SHIMIZU, Gifu University, Japan	1081
Undrained Behaviour of Loosely Compacted Fills and its Implications on Slope Stabilisation Measures C. W. W. NG and C. F. CHIU, Hong Kong University of Science & Technology, Hong Kong	1087
Influence of Drying and Wetting History on the Stability of Unsaturated Soil Slopes C. W. W. NG, Y. W. PANG and S. S. CHUNG, Hong Kong University of Science and Technology, Hong Kong	1093
Stabilisation and Remediation of a Minor Landslide Affecting the A5 Trunk Road at Llangollen, North Wales D. NICHOL, North East Wales Trunk Road Agency – Geotechnical Group, Wrexham, Wales and R. D. W. LOWMAN, Wardell Armstrong, Newcastle under Lyme, UK	1099
Excavation-Induced Deterioration of Rockslopes D. T. NICHOLSON, A. C. LUMSDEN, School of Earth Sciences, University of Leeds, UK and S. R. HENCHER, Halcrow Asia Partnership, Hong Kong	1105
Earthquake-Triggered Landsliding and Historical Seismicity in Southeastern Sicily: a Discrepancy P. G. NICOLETTI, G. IOVINE and E. CATALANO, CNR-IRPI, Roges di Rende CS, Italy	1111
Eco-Engineering Techniques to Control Landslides at Gasing Hill in Peninsular Malaysia M. T. NORAINI, S. M. LAU, Faculty of Science and Technology, University Kebangsaan Malaysia, D. H. BARKER, Geostructures Consulting, Model Farm, Edenbridge, Kent, UK, N. G. BAYFIELD, Institute of Terrestrial Ecology, Banchory Research Station, Scotland, UK	1117
In-Situ Shear and Pull-Out Testing to Demonstrate the Enhanced Shear Strength of Root Reinforced Soil J. E. NORRIS and J.R. GREENWOOD, The Nottingham Trent University, Nottingham, United Kingdom.	1123
Seismically-induced Reactivation of Lain/Zorten Landslide (Eastern Switzerland) F. NOVERRAZ and CH. BONNARD, Swiss Federal Institute of Technology, Lausanne, Switzerland	1129

- Permeability and Soil Moisture Conditions of Landslides in Clayey Rocks** 1135
J. NOVOTNÝ and J. RYBÁŘ, Institute of Rock Structure and Mechanics, Academy of Sciences of Czech Republic
- Protections of Transportation Systems Against Rockfalls** 1141
C. OGGERI and D. PEILA, Dept. of Georisorse e Territorio, Politecnico di Torino, Torino, Italy
- Excess Pore Pressure Generation of Sandy Soil during Shearing** 1147
Y. OKADA, Kyoto University, Kyoto, Japan, K. SASSA and H. FUKUOKA, Disaster Prevention Research Institute, Kyoto University, Kyoto, Japan
- A Novel Approach to the Modelling of Deep Complex Landslides with Several Sliding Planes** 1153
Ž. ORTOLAN, RNK – Geomod d.d., Zagreb, Croatia
- Erosion Rates From Seismically-Induced Landslides in Irpinia, Southern Italy** 1159
M. PARISE, National Research Council, CERIST, Bari, Italy
- Geomorphic and Sedimentologic Features of Debris-Flow Related Alluvial Fans in the Sila Massif (Southern Italy)** 1165
M. PARISE, National Research Council, CERIST, Bari and D. CALCATERRA, Dept. of Geotechnical Engineering, Section of Applied Geology, Federico II Univ. of Napoli, Italy
- Risk Assessment and Quantification of Slope Conditions Based Upon Site Inspection Surveys** 1171
S. PARKHURST, Allott & Lomax Consulting Engineers, Reading, UK and R. FLAVELL, Hyder, Birmingham, UK
- Typical Kaolin Occurrences in Hong Kong - a Model for their Origin and Implications for Landslide Development** 1177
S. PARRY, S. D. G. CAMPBELL and C. J. N. FLETCHER, Planning Division, Geotechnical Engineering Office, Civil Engineering Department, Kowloon, Hong Kong SAR, China
- The Mineralogy of Clay-Rich Zones within some Weathered Volcanic and Granitic Rocks in Hong Kong.** 1183
S. PARRY and C.A.M. FRANKS, Planning Division, Geotechnical Engineering Office, Civil Engineering Department, Government of Hong Kong, Special Administrative Region, China
- Application of Time Domain Reflectometry (TDR) Technique in Monitoring the Pramollo Pass Landslide (Province of Udine, Italy)** 1189
A. PASUTO, S. SILVANO, C.N.R.-I.R.P.I. Research Institute for Hydrological and Geological Hazard Prevention, Padova, and G. BERLASSO, Regional Head Office for Civil Defence, Friuli-Venezia Giulia Region, Italy

Kinematic Features of Earthflows in Southern Italy	1195
A. PELLEGRINO, M. RAMONDINI, Dip. di Ingegneria Geotecnica, Università di Napoli "Federico II", C. RUSSO, Servizio Nazionale Dighe, Servizi Tecnici Nazionali, Roma and G.URCIUOLI, Dip. di Ingegneria Geotecnica, Università di Napoli "Federico II", Italy	
The Development of a Landslide Hazard Assessment Scheme for a Mountainous Area in E. Taiwan	1203
D. N. PETLEY and W. MURPHY, Centre for Geohazard Research, School of Earth, Environmental and Physical Sciences, University of Portsmouth, Burnaby Building, Portsmouth, UK	
Specific Character of the Multistory Landslide Mechanism	1209
L. P. PETROVA-JASJUNAS, Russian State Open Technical University of Railway Transport, Moscow, Russia	
Practical Method for Estimating General Stability of Structures under Seismic Loads	1215
M. B. POIZNER, R & D Institute of Marine Transport "ChernomorNIiproekt", 12, Shevchenko Ave. Odessa, 65058, Ukraine, M. P. DOUBROVSKY, 34, Mechnikova Str., Odessa 65029, Ukraine, and A.I. GURIN, R & D Institute of Marine Transport "ChernomorNIiproekt", 12, Shevchenko Ave. Odessa, 65058, Ukraine	
Rainfall as a Landslide Triggering Factor: An Overview of Recent International Research	1219
M. POLEMIO, CNR CERIST, Bari, Italy, and O. PETRUCCI, CNR IRPI, Cosenza, Italy	
Linear Versus Non-linear Failure Envelopes in LEM and FEM Slope Stability Analysis	1227
M. POPESCU, University of Civil Engineering, Bucharest, Romania, K. UGAI, Department of Civil Engineering, Gunma University, Japan, and A. TRANDAFIR, University of Civil Engineering, Bucharest, Romania	
The Role of Stress-Strain State Changes of a Slope in the Formation of a Deep Block-Type Landslide and Deformation of Constructions Interacting with it	1235
G. P. POSTOYEV, All-Russian Research Institute for Hydrogeology & Engineering Geology (VSEGINGEO), Moscow, Russia	
Feedback Effects of Rainfall-Triggered Shallow Landsliding	1239
N. J. PRESTON, Geographische Institute, Universität Bonn, Germany	
Realignment of Priory Corner, Isle of Portland, Dorset	1245
R. S. PUGH, K. R. GABRIEL, WEEKS, Maidstone, W. G. JENKINS, Dorset C.C. and E. N. BROMHEAD, Kingston University, UK	
Slope Disintegration in South China	1253
S. J. QIU, South China Normal University, P.R. China	

Landslide Hazard, Vulnerability and Risk Assessment

1257

A. L. RAGOZIN, Institute of Environmental Geoscience (IGE RAN), Russian Academy of Sciences, Moscow and I. O. TIKHVINSKY, Production & Research Institute for Engineering Construction Survey (PNIIS), Moscow, Russia

Some Aspects of Landslides in the Himalayas: a Case Study of Jammu and Kashmir Himalayas (India)

1263

NATER SINGH RAINA, Govt. Degree College Kathua, J & K state, India

The Detection of Relict Landslides using Airborne Thematic Mapper Imagery

1269

M. F. RAMLI, D. N. PETLEY, W. MURPHY, Geohazards Research Centre, School of Earth, Environmental and Physical Sciences, University of Portsmouth, Burnaby Building, Burnaby Road, Portsmouth, UK and R. J. INKPEN, School of Geography, Buckingham Building, Lion Terrace, Portsmouth, UK

Otira Gorge Rock Avalanche

1275

G. RAMSAY, Beca Carter Hollings and Ferner Ltd, New Zealand

Rockfalls and Slides in a Limestone Massif (Portugal), Spatial Assessment, Control and Triggering Factors

1281

M. L. RODRIGUES, Centre of Geographical Studies, University of Lisbon, Portugal

Aptitude of Slopes to Stability Failure in the Neovolcanite Region of České Středohoří Mountains (Czech Republic)

1285

J. RYBAR, J. STEMBERK and J. SUCHY, Institute of Rock Structure and Mechanics, Academy of Sciences of the Czech Republic, Prague, CZ

Estimation of the Next Happening of a Landslide by Observing the Change in the Groundwater Composition

1289

HIROYUKI SAKAI and HISASHI TARUMI, Railway Technical Research Institute, Hikan-cho 2-8-38, Kokubunji, Tokyo, Japan

Study of a Relict Landslide on the Foothills of the Belluno Prealps (Belluno, Italy)

1295

L. SALT, M. C. TURRINI and E. SEMENZA, Dipartimento di Scienze Geologiche e Paleontologiche, Corso Ercole I D'Este 32, 44100 Ferrara, Italy

Slope Stability Analysis in Soft Rocks

1301

R. T. SANCIO, University Simon Bolivar, Caracas, Venezuela; R. B. SANCIO, University of California at Berkeley, USA and S. C. HOLTZ, Jacobs Associates, San Francisco, California, USA

Risk Assessment of Potential Landslide Dams in the Valleys of La Veveyse and Veveyse de Fegire, Switzerland

1309

S. SARKAR, Scientist, Central Building Research Institute, Roorkee, India, CH. BONNARD and F. NOVERRAZ, Scientific Deputy, Swiss Federal Institute of Technology, Lausanne, Switzerland

Mechanical Model of Shear Deformation of a Steep Sandy Slope due to Rainfall

1315

K. SASAHARA, Public Works Research Institute, Ministry of Construction, Tsukuba, Japan

Geophysical Method Contribution to the Super Sauze (South France) Flowslide Knowledge	1321
M. SCHMUTZ, CEREG, Université Louis Pasteur, Strasbourg, R.GUERIN, DGA, Université Pierre et Marie Curie, Paris, J. J. SCHOTT, EOST, Université Louis Pasteur, Strasbourg, O. MAQUAIRE, CEREG, Université Louis Pasteur, Strasbourg, M. DESCLOITRES and Y. ALBOUY, LDG, ORSTOM, Bondy, France	
Impact of Rockfalls on Soft Water Saturated Floodplain Sediments, Three Examples from the Swiss Rhone Valley	1327
P. SCHOENEICH, Institute of Geography, Lausanne, Switzerland	
Early Holocene Damnation Creek Landslide Dam, Washington State, U.S.A.	1333
R. L. SCHUSTER, U.S. Geological Survey, Denver, Colorado, J. L. RIEDEL, National Park Service, Marblemount, Washington and P. T. PRINGLE, Washington Department of Natural Resources, Olympia, Washington, U.S.A.	
Rigid Formations Over Plastic Substratum: Modelling of a Lateral Spread in Central Italy	1339
N. SCIARRA, Department of Earth Science, Chieti University -Campus Universitario - Madonna delle Piane, 66013 - Chieti, Italy	
Instability Phenomena and Remedial Measures for a Landslide in Clay Shales	1347
A. SCIOTTI and G. CALABRESI, DISG, University of Rome "La Sapienza", Italy	
Analysis of Instability Phenomena Affecting a Cut Slope in Unsaturated Pyroclastic Soils	1353
A. SCOTTO di SANTOLO, M. VALERIO NICOTERA, M. RAMONDINI, Dipartimento di Ingegneria Geotecnica – Università di Napoli Federico II Napoli Italy	
Ground Models for the Coastal Landslides at Lyme Regis, Dorset, UK	1361
M. SELLWOOD, High-Point Rendel, London, G. DAVIS, West Dorset District Council, Dorset, D. BRUNSDEN, Consultant, Dorset and R. MOORE, Halcrow Asia, Hong Kong (formerly with High-Point Rendel)	
Landslide Classification Based on the Property of Slip Surface	1367
H. SHUZUI, Research and Development Centre, Nippon Koei Co. Ltd., Japan	
Methods for General Stability Analysis	1373
A. D. W. SPARKS, Department of Civil Engineering, University of Cape Town, Rondebosch, South Africa	
Post Failure Behaviour of Landslide Bodies	1379
G. SPILOTRO, L. COVIELLO, Dipartimento di Strutture, Geotecnica e Geologia Applicata. Università della Basilicata. Potenza, R. TRIZZINO, CNR - Centro di Studio sulle Risorse Idriche e la Salvaguardia del Territorio. Bari, Italy	
Coastal Erosion and Landslides, Rockland, Maine, U.S.A.	1387
J. F. SPLETTSTOESSER, Polar Consulting, Spruce Head, Maine, USA	

- Stability of Lateritic Profiles in Parts of Western Ghats, India** 1395
S. SREEKUMAR, Christ College, Irinjalakuda, India and R. KRISHNANATH, University of Kerala, Trivandrum, India
- Mechanisms of Failure of Complex Landslides: A Numerical Modelling Perspective** 1401
D. STEAD, University of Exeter, Redruth, Cornwall, B. BENKO, P. Machibroda Engineering Ltd., Chilliwack, British Columbia, Canada, E. EBERHARDT Swiss Federal Institute of Technology (ETH), Zurich, Switzerland and J. S. COGGAN, University of Exeter, Redruth, Cornwall, UK
- Stabilisation of a Landslip near Godstone, Surrey** 1407
M. STEPHEN, Surrey County Council, Kingston-upon-Thames, and D. RENTON-ROSE, Hyder Consulting, Guildford, UK.
- Caldera-like Collapses at the Watersheds in the Central Tien Shan: their Structure and Possible Mechanism** 1413
A. L. STROM, Geodynamic Research Centre, Hydroproject Institute, Moscow, Russia
- The Current State of the Landslide Slope (Central Siberia, The Khakas Republic)** 1419
A. F. SUKHORUKOVA, United Institute of Geology, Geophysics & Mineralogy, Siberian Branch of RAS, Novosibirsk, Russia
- The 2 July 1997 Lai Ping Road Landslide, Hong Kong - Assessment of Landslide Mechanism** 1425
H. W. SUN, K. K. S. HO, S. D. G. CAMPBELL, Geotechnical Engineering Office, Hong Kong SAR, China, and N. P. KOOR, Scott Wilson (Hong Kong) Ltd, Hong Kong SAR, China
- The 2 July 1997 Lai Ping Road Landslide, Hong Kong - Hydrogeological Characterisation** 1431
H. W. SUN, W. H. Y. LAW, Geotechnical Engineering Office, Hong Kong SAR, China, C. W. W. NG, Y. K. TUNG and J. K. LIU, The Hong Kong University of Science and Technology, Hong Kong SAR, China
- A Comprehensive Study on the Stability and Treatment of the Front Region of Huangtupo Landslide in the Reservoir Area of the Three Gorges Project, China** 1437
HUIMING TANG, YOURONG LIU and XINLI HU, China University of Geosciences, Wuhan, CHINA
- Monitoring and Research of Pre-stressed Anchoring for Permanent Shiplock Rock High Slopes of TGP** 1443
TANG PING, LI YIMING and LI DUANYOU, Dam Safety Monitoring Center, Yangtze River Scientific Research Institute, Wuhan 430010, China
- Principal Hazard Factors and Mechanisms Causing Landslides (Georgia as an example)** 1449
Z. K. TATASHIDZE, E. D. TSERETELI, R. D. KHAZARADZE, Vakhushti Bagrationi Institute of Geography, Tbilisi, Georgia and O. V. KUTSNASHVILI, Technical University of Georgia, Tbilisi, Georgia

Stabilisation of a Large Landslide in Tuen Mun, Hong Kong	1453
G. R. TAYLOR and D. HADLEY, Scott Wilson (Hong Kong) Ltd., Hong Kong SAR, PRC	
A System for Predicting Rock Slope Collapse Using Hydrophones	1461
M. TESHIMA, K. MICHIIHIRO, Faculty of Engineering, Setsunan University, Osaka, Japan, T. YANAGIDANI, Disaster Prevention Research Institute, Kyoto University, Kyoto, Japan, and H. ABOSHI, Aboshi Hisao Research Institute, Hiroshima, Japan	
Transferability and Terrain Reconstruction within a GIS Landslide Hazard Mapping Model: Derbyshire Peak District	1467
N. THURSTON, Halcrow Group Ltd., Burderop Park, Swindon and M. DEGG, Chester College of Higher Education, Parkgate Road, Chester, UK	
Stabilisation of a Complex Landslide in Central Italy	1473
G. TOTANI and P. MONACO, University of L'Aquila, Faculty of Engineering, L'Aquila, Italy	
Landslides in Vietnam	1479
K-T. TRAN, VNU and T. K. DO, NEU Hanoi	
The Importance of Risk in Assessing Slope Stability in a Multilayered Medium	1483
G. TRAPOV, P. STOEVA, P. ZLATANOV, University of Mining and Geology "St. Ivan Rilski", Sofia 1700, Bulgaria	
The Lochiel Landslip, a Mass Movement Developing in 1974 but Originating 600-700 million Years Earlier	1489
C. R. TWIDALE Department of Geology and Geophysics, University of Adelaide, Adelaide, South Australia	
Peculiarities of Landslide Process in Saline Frozen Deposits of Central Yamal, Russia	1495
N. G. UKRAINTSEVA, Moscow State University, Faculty of Geography, Moscow, M. O. LEIMAN, Earth Cryosphere Institute SB RAS, Moscow and I. D. SRELETSKAYA, Moscow State University, Faculty of Geography, Moscow, Russia	
Use of Landslide Hazard Zonation Map in the Evaluation of Slope Instability in the Jiroft-dam Watershed	1501
A. UROMEIHY, Tarbiat Modarres University, Tehran, Iran	
Possibility of Analysis of Landslide's Background by Application of Energy Approach to Particle Crushing	1509
D. A. VANKOV and K. SASSA, Landslide section, Disaster Prevention Research Institute, Kyoto University, Japan	
Inverse Grading in Slopes	1515
L. VULLIET, Soil Mechanics Laboratory, Swiss Federal Institute of Technology (EPFL), CH-1015 Lausanne, Switzerland, M. A. KERN and W. J. AMMANN, Swiss Federal Institute of Snow and Avalanche Research, CH-7260 Davos, Switzerland	

- Coupling Neural Networks and Mechanical Models for a Better Landslide Management** 1521
L. VULLIET and F. MAYORAZ, Soil Mechanics Laboratory, Swiss Federal Institute of Technology (EPFL), CH-1015 Lausanne, Switzerland
- The Effect of a Surface Water Runoff Attenuation Facility on the Stability of a Slope** 1527
H. J. WALBANCKE, Binnie Black & Veatch Ltd, Redhill, M. W. STEVENSON, Southern Testing Laboratories Ltd., East Grinstead and R. H. COE, Binnie Black & Veatch Ltd, Redhill, UK
- Mechanism of a Long Run-out Landslide Triggered by Heavy Rainfall in Fukushima Prefecture, Japan** 1533
F. W. WANG, G. H. WANG, and K. SASSA, Disaster Prevention Research Institute, Kyoto University, Japan
- Effects of Grain Size on Sliding Surface Liquefaction Behaviour of Sands Based on Ring Shear Tests** 1539
G. H. WANG and K. SASSA, Disaster Prevention Research Institute, Kyoto University, Japan
- Rainfall Induced Instability of Partly Saturated Soil Slopes - A Parametric Study of Some Factors** 1545
C. H. WANG and H. R. THOMAS, Geoenvironmental Research Centre, Cardiff School of Engineering, Cardiff University, Cardiff CF24 0YF, Wales, UK
- Observations on the Nature of Landslipped Strata, Folkestone Warren, United Kingdom** 1551
C. D. WARREN and M. J. PALMER, Halcrow Group, Hammersmith, London, UK
- The Effects of Waste Water Disposal on Slope Stability** 1557
P. D. J. WATSON and E. N. BROMHEAD, School of Civil Engineering, Kingston University, Kingston-upon-Thames, U.K
- The Super-Sauze Landslide (Southern French Alps): Contribution of Geomorphology in the Understanding of Flowslides.** 1563
D. WEBER, Centre d'Etudes et de Recherches Eco-Géographiques, Strasbourg, France
- Spectral Properties of Active, Suspended and Relict Landslides derived from Airborne Thematic Mapper Imagery** 1569
M. C. Z. WHITWORTH, D. P. GILES, W. MURPHY and D. N. PETLEY, Geohazards Research Centre, School of Earth, Environmental and Physical Sciences, Burnaby Building, Burnaby Road, University of Portsmouth, Portsmouth, UK
- Quantitative Hazard Assessment: Rainfall-Triggered Landslides** 1575
H. WILSON and M. CROZIER, School of Earth Sciences, Victoria University, PO Box 600, Wellington, New Zealand

- Some Observations on the Geotechnics and Movement of Large Volume Earth Flows in Alpine Regions** 1581
A. J. WILSON, W. MURPHY and D. N. PETLEY, Geohazards Research Centre, School of Earth, Environmental & Physical Sciences, University of Portsmouth, Burnaby Building, Burnaby Road, Portsmouth, PO1 3QL, UK
- Grey System Analysis for Landslide Stability** 1587
H-C. WU, T. BAO, S-L. KONG and Z-H. HUANG, Department of Civil Engineering, Guizhou University of Technology, Guiyang, China
- Information Analysis System for Landslide Hazard Zonation** 1593
Y. WU, Dept. of Civil Engineering, K. YIN, Institute of Environmental Engineering Design, China University of Geosciences, Wuhan, China and Y. LIU, Bureau of Environment, Ministry of National Land Resources, Beijing, China
- Mechanical Characteristics and Countermeasures of Landslides at the Fractured Zone on Median Tectonic Lines** 1599
R. YATABE, N. YAGI, K. YOKOTA, N. P. BHANDARY, Department of Civil and Environmental Engineering, Ehime University, Matsuyama, Japan and Y. MOMIYAMA, Takamatsu Engineering Office, Japan Highway Public Corporation, Japan
- The Fractal Characteristics of the Temporal and Spatial Distribution of the Zameila Mountain Landslide Activities and its Fracture Structure in Tibet of China** 1605
S. YI, R. LI, X. PU and S. FU, State Key Hydraulics Laboratory of the High Speed Flows, Sichuan University, Chengdu, Sichuan Province, People's Republic of China
- A Paleo-Landslide and its Geological Studies in the Reservoir of Three-Gorges, China** 1609
K. YIN, Institute of Environmental Engineering Design, China University of Geosciences, WUHAN, China, Z. LI, Aero Geophysical Survey & Remote Sensing Center, Ministry of National Land Resources, BEIJING, China and Y. WU, Dept. of Civil Engineering, China University of Geosciences, WUHAN, China
- Theory of Geodynamic Field and Landslides Stress Strain** 1615
I. P. ZELINSKY, Odessa State University, Odessa, Ukraine, and D. V. MELKONYAN, Odessa State University, Odessa, Ukraine
- Monitoring of Landslides in the Federal System of Geomonitoring in Russia** 1623
O. V. ZERKAL and A. V. KOMAROV, Federal Centre for Geological Monitoring, Moscow, Russia
- Rainfall Triggering of Landslides in the Area North of Lisbon (Portugal)** 1629
J. L. ZÉZERE, Centro de Estudos Geográficos – Universidade de Lisboa, Portugal
- The Use of Bayesian Probability for Landslide Susceptibility Evaluation. A Case Study in the Area North of Lisbon (Portugal)** 1635
J. L. ZÉZERE, A. B. FERREIRA, G. VIEIRA, E. REIS, and M. L. RODRIGUES, Centro de Estudos Geográficos – Universidade de Lisboa, Portugal

- Landslide Mechanism and Stability Research of the Rock Slope** 1641
ZHANG DIANJI, Department of Civil Engineering, Wuhan Institute of Chemical Technology, Wuhan 430073, TANG PING, Dam Safety Monitoring Center, Yangtze River Scientific Research Institute, Wuhan, China
- Research and Treatment of Shazhou Landslide, Sichuan** 1647
Y. ZHOU, Geobrugg Chendu Co. Ltd., Chuengdu, 610051, Sichuan, P. R. China
- Approach to Fractal Regularity of Rock Rupture and Prognosis of a Landslide** 1653
C. Y. ZHOU, Department of Geosciences, Zhongshan University, Guangzhou, P. R. China, and T. Z. YAN, Faculty of Environmental Sciences and Geotechnics, China University of Geosciences, Wuhan, P. R. China
- Slope Monitoring Applied to Rock Fall Management in NW Bohemia** 1659
J. ZVELEBIL and J. STEMBERK, Institute of Rock Structure and Mechanics, Czech Academy of Sciences, Prague, Czech Republic
- The Innovative Use of Large Diameter Microtunnelling Technique for the Deep Drainage of a Great Landslide in an Inhabited Area: the case of Assisi (Italy)** 1665
M.-G. ANGELI, National Research Council, IRPI Institute, Perugia, Italy, and F. PONTONI, Geoequipe Consulting, Camerino, Italy
