

PROCEEDINGS OF THE SEVENTH INTERNATIONAL SYMPOSIUM ON LANDSLIDES
COMPTE RENDU DU SEPTIÈME SYMPOSIUM INTERNATIONAL SUR LES GLISSEMENTS
DE TERRAIN/ 17-21 JUNE 1996/ TRONDHEIM/ 17-21 JUIN 1996

Landslides

Glissements de terrain

Editor/Rédacteur

KAARE SENNESET

*Department of Geotechnical Engineering, The Norwegian University of Science and Technology,
Trondheim, Norway/Norvège*

VOLUME 2

- 4 *Landslide investigations; 5 Slope instability in seismic areas; 6 Slope instability in tropical areas;
7 Stability analyses and geotechnical parameters*

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/1996

Table of contents

4 Landslide investigations

Synsedimentary landslides and present-day problems of stability – The slide at Ravel near Boule (Drôme, France)	593
<i>P.Antoine, B.Gardavaud, A.Giraud & H.Evrard</i>	
Slope Engineering Toolbox, a multi-purpose system for slope engineering problems	599
<i>J.P.Asté & N.Badji</i>	
3D.BLOC: Photogrammetry, block theory and cliff equilibrium, some recent developments	605
<i>J.P.Asté, Th.Asté & N.Badji</i>	
Environmental factors in triggering slope failures	611
<i>S.W.C.Au & R.Y.C.Suen</i>	
A contribution to a geotechnical knowledge of the Varicoloured Clays of Italy's Basilicata Region, with specific reference to a test slope	617
<i>G.Baldassarre, B.Radina, F.Robotti & M.Cortelazzi</i>	
Landslide phenomena during the extreme meteorological event of 4-6 November 1994 in the Piemonte Region in N. Italy	623
<i>S.C.Bandis, G.Delmonaco, F.Dutto, C.Margottini, G.Mortara, S.Serafini & A.Trocciola</i>	
The history of slope instability of an embankment in County Durham, England	629
<i>D Beaumont & R.A.Forth</i>	
The Pietermaritzburg shale: An illustration of its instability	637
<i>F.G.Bell & R.R.Maud</i>	
Geophysical and hydrochemical investigation of a complex large-scale landslide in southern France	643
<i>T.A.Bogaard & Th.W.J.van Asch</i>	
Residual characteristics of the Sahelian marls of Algiers (Algeria)	649
<i>A.Bouazza, M.Bouteldja & W.F.Van Impe</i>	
Valley-blocking landslide dams in the Eastern Italian Alps	655
<i>E.N.Bromhead, L.Coppola & H.M.Rendell</i>	
The Caramanico landslide (Abruzzo, Italy)	661
<i>M.Buccolini & N.Sciarra</i>	

Landslide hazard mapping in the Algarve, Portugal <i>D.A. Butcher, R.C. Senior, R.A. Forth & F.S.F. Marques</i>	667
Subsidence investigation for reservoir <i>S.Cavounidis, P.Marinos & T.Papadopoulos</i>	675
The progressive development of a failure slip surface in over-consolidated clay at Selborne, UK <i>M.R. Cooper</i>	683
Geotechnical characteristics of old landslides in Belgrade area <i>S.Ćorić, D.Božinović, V.Vujanić, M.Jotić & B.Jelisavac</i>	689
Landslide at Olivares, in Granada, Spain <i>E.Dapena, S.Uriel, A.Garcia-Yagüe & F.Giron</i>	695
The Coledale Mudslide, New South Wales, Australia – A lesson for geotechnical engineers <i>W.N.Davies & H.D.Christie</i>	701
Case study of a landslide in heavily overconsolidated lacustrine clay <i>A.J.Esser</i>	707
The 1973 Attachie Slide, Peace River Valley, near Fort St. John, British Columbia, Canada: A landslide with a high-velocity flowslide component in Pleistocene sediments <i>S.G.Evans, X.-Q.Hu & E.G.Enegren</i>	715
The role of swelling marl in planar slides in the Langhe region <i>F.Forlati, R.Lancellotta, A.Osella, C.Scavia & F.Veniale</i>	721
Response of Clyde Slide, New Zealand, to toe inundation <i>P.F.Foster, B.W.Riddolls & D.F.Macfarlane</i>	727
Landslip investigation of a failed cut slope with complex geology <i>C.A.M.Franks, W.K.Pun & K.C.Yeo</i>	733
Induced streaming electrical potential and water flows through landslides <i>J.C.Gress & R.M.Faure</i>	739
The 1989 Saint-Liguori flakeslide: Characterization and remedial works <i>G.Grondin & D.Demers</i>	743
Soil suction measurements in a landslide involving weathered gneiss <i>G.Gulla' & G.Sorbino</i>	749
A landslide in the Murree area, Pakistan <i>T.M.Hayat & B.Masud</i>	755
Block-type creep movements and landslides in the flysch complex of the Moravskoslezské Beskydy Mountains <i>J.Heiland</i>	761
Developed characteristic and genetic mechanism of Zhengzhuba landslide in Jingsha River <i>X.W.Hu, M.D.Chen, H.C.Liu & K.W.Li</i>	767

Morphological studies at the Dranglung valley in the Tsergo Ri landslide deposit area (Langthang Himal, Nepal)	773
<i>H.J.Ibetsberger</i>	
The role of Quaternary geology in stability of the slopes in the Nuorgam-Pulmanki region, North Finland	779
<i>P.E.Ihalainen & R.P.J.Uusinoka</i>	
Slope movements and tectonics in North-Eastern Calabria (Southern Italy)	785
<i>G.Iovine, M.Parise & C.Tansi</i>	
Recognition of hidden boulder terrains by seismic methods – A case study from Sri Lanka	791
<i>U.de S.Jayawardena</i>	
Analysis of a liquefaction flow failure in a compacted till	797
<i>J.-M.Konrad & A.Yashima</i>	
Landslide along the Danube Bank at Novi Sad, Yugoslavia	803
<i>P.Lokin, M.Vasić, S.Saković & M.Petričević</i>	
The time-dependent behaviour of sagging of mountain slopes ('Talzuschübe')	809
<i>M.Moser</i>	
Rockfall and debris flow as evolutionary phenomena of a high rock cliff (Friuli, Italy)	815
<i>A.Nosetto, G.Polloni, G.Crosta & G.Giurlani</i>	
Sagging or deep-seated creep: Fiction or reality?	821
<i>F.Noverraz</i>	
Impact of precipitation and evapotranspiration to water saturation of landslides in claystones	829
<i>J.Novotný & J.Rybář</i>	
Geotechnical descriptions of landslides during the 1993-1994 floods in Northern Italy	835
<i>C.Oggeri</i>	
Case study of a colossal rock mass slide along discontinuity surface	841
<i>H.Ohta, K.-i.Tokida, R.Tsunaki, K.Ohmori & H.Ozou</i>	
Landslide hazard and critical rainfall in Southern Italy	847
<i>M.Poleonio & F.Sdao</i>	
Studies of the geological model and formation mechanism of Xikou landslide	853
<i>Huang Runqiu</i>	
Colluvial landslides in weathered sedimentary rock terrain	861
<i>B.E.Ruth & L.K.Moulton</i>	
A variety of information obtainable from specific chemical contents of groundwater in landslide area	867
<i>H.Sakai, O.Murata & H.Tarumi</i>	
Earth movements caused by rain infiltration along a slope in overconsolidated clayey soils	871
<i>E.Sakellariadi, G.Scarpelli & M.Pigliapoco</i>	
Shear deformation characteristics of sandy soil in steep slope landslides	877
<i>K.Sasahara & R.Tsunaki</i>	

The Slumgullion earth flow, southwestern Colorado <i>W.Z.Savage, D.J.Varnes, R.L.Schuster & L.M.Highland</i>	883
Distribution of electrical conductivity at Tsergo Ri landslide, central-north Nepal <i>J.-M.Schramm & J.T.Weidinger</i>	889
Estimation de la contrainte horizontale dans une pente instable <i>G.Sève, J.C.Blivet, P.Pouget, J.Benoît & D.Cransac</i>	895
An eyewitness of highspeed rockslide-debris flow in Northern Sichuan, China <i>Wang Sijing, Ding Enbao & Du Yonglian</i>	901
New core sampler with planet gear for investigating landslide area <i>N.Sugawara, Y.Ito & M.Honjo</i>	907
Analysis of a landslide in a complex formation <i>M.C.Turrini, F.Fiorani & M.Galvani</i>	913
Geostructural classification of rockslides at damsites <i>A.Varga & V.Gorbushina</i>	919
Landslides of the Second Crimean Ridge: Types, age and regularities of development <i>E.A.Voznesensky, E.N.Samarin & N.V.Kumachyova</i>	925
Engineering geology of the Cairnmuir Landslide, New Zealand <i>C.R.Watts & D.F.Macfarlane</i>	931
Analysis of mechanism of landslide based on various surveys <i>N.Yagi, R.Yatabe & K.Yokota</i>	937
The stability investigations of the rock massif Čertova stěna – Devil's Wall <i>P.Zika & B.Košťák</i>	941
5 Slope instability in seismic areas	
A geotechnical appraisal of Chilla landslide, Outer Garhwal Himalaya, India <i>R.Anbalagan & P.Gupta</i>	949
Large scale landslides on active volcanoes in the 20th century – Examples from the Kurile-Kamchatka region (Russia) <i>A.Belousov & M.Belousova</i>	953
Investigation and analysis of seismic landslides in the loessal region of China's Northwest <i>Ding Bo Yang & Zhang Zhengzhong</i>	959
Slope instability in the Bisaccia area (Southern Apennines, Italy) <i>F.Fiorillo, M.Parise & J.Wasowski</i>	965
Rock weathering and discontinuity network in a Sackung in the Aspromonte Massif (Calabria, S. Italy) <i>G.Gulla' & P.G.Nicoletti</i>	971
Landslide hazard zonation and its correlation with coseismic slides during Uttarkashi Earthquake of 20th October, 1991 <i>K.C.Joshi, P.Pande & P.L.Narula</i>	977

Effect of dilation on the dynamic stability of artificial coarse granular slopes <i>K.Konagai & T.Matsushima</i>	983
Earthquake-induced landslides during the great Hanshin Earthquake of January 17th, 1995 (Kobe, Japan) <i>E.Lekkas, H.Kranis, P.Stylianatos & M.Leounakis</i>	989
Crustal adjustments and related landslide hazard <i>P.L.Narula, S.K.Gupta, Y.P.Sharda & J.Singh</i>	995
Four rockslides in an active tectonic region, Central Japan <i>T.Nozaki</i>	1001
Landslides triggered by the 1995 Hyogo-Ken Nanbu Earthquake in the Rokko mountains <i>H.Ochiai, H.Kitahara, T.Sammori & K.Abe</i>	1007
Slope failures during the 1995 Southern Hyogo Earthquake in Japan <i>T.Okimura, T.Yamagami & K.Ugai</i>	1013
Coseismic landslides and fractures induced by Uttarkashi Earthquake (1991): Remedial measures and mitigation efforts <i>P.Pande, K.C.Joshi & P.L.Narula</i>	1019
Inventory of seismically-induced Italian ground phenomena <i>R.W.Romeo & L.Delfino</i>	1025
Estimation of co-seismic sliding of slopes <i>M.Srbulov</i>	1031
Analogy in coincidence of selected geodynamic phenomena in Bohemian Massif <i>J.Stemberk</i>	1035
Landslides and other slope instability occurrences caused by strong earthquakes in Yugoslavia <i>D.Sunarić, S.Nedeljković, O.Paunković & M.Regoje</i>	1041
A transient study on lateral flow on liquefied ground <i>I.Towhata, H.Toyota & W.Vargas-Monge</i>	1047
Mechanism of formation and development of deep seismogeneous landslides due to sudden liquefaction of loessal soils <i>O.V.Zerkal</i>	1055
Influence of neotectonics and earthquakes on landslide development in the Gobi Altay and Khangai (Central Asia) <i>T.Zietara</i>	1061
6 Slope instability in tropical areas	
Establishing new design dynamic modelling criteria for tropical cut slopes <i>M.G.Anderson, D.M.Lloyd, A.Park, J.Hartshorne, S.Hargraves & M.A.Othman</i>	1067
Assessing the stability of a tropical residual soil slope <i>S.A.Anderson & J.H.Zhu</i>	1073

A slope instability study of a mudstone in Southern Brazil <i>L.A.Bressani, A.V.D.Bica & C.L.Maciei Filho</i>	1079
Failures in the Amazon riverbanks, Iquitos, Peru <i>A.Carrillo-Gil & L.Dominguez</i>	1085
Slope stabilisation on the hills of the city of Petrópolis <i>F.A.B.Danziger, M.Ehrlich & C.Pereira Pinto</i>	1091
Landslide processes and characteristics from south-eastern Jamaica, West Indies <i>R.J.Maharaj</i>	1097
Some aspects of Colombian landslide research <i>J.Ojeda & E.Velásquez</i>	1103
Stability of residual soil slopes as affected by rainfalls <i>H.Rahardjo, M.F.Chang & T.T.Lim</i>	1109
Erosion induced landslides in tropical environments <i>J.Suárez</i>	1115
Geologic factors contributory to landslides – Some case studies in Malaysia <i>B.K.Tan</i>	1121
Analyses of stability of natural hillslopes in areas of the risk of Guaratinguetá <i>A.M.Tsutiya, A.Tanaka, G.P.Bernardes & S.J.C.Simões</i>	1125
7 Stability analyses and geotechnical parameters	
Finite element analysis of Biot's consolidation in slope excavation based on a constitutive model with strain softening <i>T.Adachi, J.Liu, A.Koike & F.Zhang</i>	1131
Application of a probabilistic approach in slope stability analyses <i>C.Alén</i>	1137
A shear beam model – A proposal for a new slope stability model <i>C.Alén</i>	1143
Influence of degree of mobilization of shear strength on slope stability <i>S.V.Andrei, S.Manea & L.Jianu</i>	1149
Mechanical characteristics and behaviour of a complex formation by landslide investigations and analyses <i>M.Berti, R.Genevois, M.Ghirotti & P.R.Tecca</i>	1155
The landslides on old high cut-offs in the Mediterranean karst <i>T.Roje-Bonacci</i>	1163
Stabilité de la mollasse Astienne d'Alger: Cas du glissement d'El Achour <i>M.Bouteldja, R.Bougdal, G.Cheikh-Lounis & A.Yessad</i>	1169
Some observations on probabilistic approaches for slope stability analysis in typical geomorphological settings of Southern Italy <i>C.Cherubini, C.I.Giasi & F.M.Guadagno</i>	1173

Développement d'une technique de caractérisation des débris d'écoulements rocheux <i>R.Couture, J.Locat, J.Hadjigeorgiou, S.G.Evans & P.Antoine</i>	1177
The evolutive mechanism of debris flows: Analysis and protection works <i>C.Deangeli & P.Grasso</i>	1183
The influence of pore fluid composition on the residual shear strength of some natural clayey soils <i>C.Di Maio</i>	1189
Geological and geotechnical problems in slopes involved in large old landslides <i>S.Di Nocera, G.B.Fenelli, A.Pellegrino & M.Ramondini</i>	1195
Landslide reactivation in flysch colluvia at the Evinos dam site <i>G.T.Dounias, P.G.Marinou, P.R.Vaughan & P.I.Pantelidis</i>	1201
Three dimensional slope stability by the Perturbation Method <i>R.M.Faure, M.Pham, J.C.Robinson & P.Jolly</i>	1207
A new method for taking into account soil deterioration in pseudo-static slope stability analysis <i>R.M.Faure, T.Bonnaventura, C.Raillat, J.J.Fry & G.Lefèvre</i>	1213
A case history of a translational landslide in the Chiampo Valley (Italy) <i>M.Favaretti, P.Previatello, R.Sedea & M.Soranzo</i>	1219
Residual strength of Israeli cohesive soils <i>S.Frydman, A.Shvarzman & M.Talesnick</i>	1225
Some examples of complex mass movements occurred in stratified slope deposits in Northern Apennines (Tuscany, Italy) <i>C.A.Garzonio</i>	1231
A model for acceleration of slide to slope failure <i>S.Hayashi & H.Kawabe</i>	1237
Back-analysis of the collapse of a Roman wall built on landslip <i>J.N.Hutchinson & E.N.Bromhead</i>	1243
A discussion of the physical parameters that control the flow of natural landslides <i>F.Irgens & H.Norem</i>	1251
Numerical modelling of loess mass saturation influence on slope stability <i>E.V.Kalinin, L.L.Panasiyan & O.V.Zerkal</i>	1257
A simplified method for estimating failure induced deformation in embankments <i>N.Khalili, K.S.Tai & R.Fell</i>	1263
Time-dependent stability of an excavated slope <i>S.Kirkebø, S.Nordal & G.Svanø</i>	1269
The use of finite element computed pore-water pressures in a slope stability analysis <i>J.Krahn, D.G.Fredlund & L.Lam</i>	1277

Appropriate intercolumn force functions and lambda values for three-dimensional slope stability analysis <i>L.Lam & D.G.Fredlund</i>	1283
Time prediction of landslides using Verhulst inverse-function model <i>Tianbin Li, Mingdong Chen, Lansheng Wang & Yingqing Zhou</i>	1289
Plaisancian marls instabilities in Algiers region – Algeria <i>O.Mimouni, K.Terrar & M.Belmokhtar</i>	1295
Advanced total stress analysis method based on the concept of effective total stress <i>A.Mochizuki & M.Mikasa</i>	1299
Slope stability analysis and charts for non-circular slip surfaces <i>P.Montès, V.Silvestri & M.Soulié</i>	1305
Quantifying rockfall risk using a probabilistic toppling failure model <i>A.Moon, M.Robertson & W.Davies</i>	1311
Use of distinct element method in the analysis of deformation mechanism of the Giau Pass landslide (North-Eastern Italy) <i>A.Pasuto & P.R.Tecca</i>	1317
About new position in landslide slopes stability evaluation <i>L.P.Petrova-Jasjunas</i>	1323
Residual strength variations by water content and its relevance to slope stability calculations <i>M.I.M.Pinto & L.J.L.Lemos</i>	1327
The characteristic features of slope unbalance and the landslide formation through compression mechanism <i>G.P.Postoev</i>	1331
Studies on the precursor of slope instability with load-unload response ratio theory <i>Xu Qiang & Huang Runqiu</i>	1335
Slope stability analysis of the heterogeneous coastal cliff by the finite element method (FEM) <i>H.Rahman</i>	1339
Discrete element method for slope stability analysis <i>A.Rodriguez-Marek, B.Muhunthan & C.L.Ho</i>	1345
Seepage process in sloping sand layers and mechanism of landslide – Effects of soil thickness on landslide initiation by laboratory and numerical experiments <i>T.Sammori, Y.Okura, H.Ochiai & H.Kitahara</i>	1351
A method for stability analysis of slopes in anisotropic soils <i>T.Shogaki & H.Moro</i>	1357
Aspects of slope stability and risk analysis <i>A.D.W.Sparks</i>	1363
Stability analysis of a multiple tier slide in Lower Siwalik Formation, Kumaon Himalaya <i>A.K.Srivastava, V.K.Sharma & G.C.Kandpal</i>	1369

Stability analysis of slopes using random search technique for global optimization <i>R.Srivastava, Sandeep & G.S.Mehrotra</i>	1375
Quasi-probabilistic method of slope stability analysis <i>A.Tejchman, K.Gwizdala & T.Brzożowski</i>	1381
On the long-term stability of natural and cutting slopes in Moldova <i>T.A.Timofeyeva & V.A.Polcanov</i>	1387
Rock slides and buckling phenomena on a homoclinal mountain slope in South-Eastern Alps (Italy) <i>P.Tommasi & F.Galadini</i>	1391
Deformation and failure characteristics of vertical slopes in centrifuge tests <i>Y.Toyosawa, N.Horii, S.Tamate & S.K.Ampadu</i>	1397
Landslide analysis by method of slices <i>P.T.Phiet</i>	1403
Mathematical-statistical modelling of landslides parameters <i>Ts.D.Tsenkov</i>	1407
Static and dynamic analyses of slopes by the 3-D elasto-plastic FEM <i>K.Ugai, A.Wakai & H.Ida</i>	1413
The mobility characteristics of the Valette landslide <i>L.P.H.van Beek & Th.W.J.van Asch</i>	1417
Groundwater modelling and the effect of hydrometeorological changes on landslide instability <i>J.M.van Esch, J.A.M.Teunissen & J.D.Nieuwenhuis</i>	1423
A material model to evaluate the seismic stability of slopes on liquefiable soils <i>R.Verdugo & M.Gutierrez</i>	1427
A generalized method for determining the critical slip surface in three-dimensional slope stability analysis <i>T.Yamagami & J.-C.Jiang</i>	1433
Landslide investigation: Reviews in huge slides and formed mechanism <i>T.Z.Yan</i>	1439
A stick-slip shear model of rough joints for rock slope <i>Z.Y.Yang & C.C.Chiang</i>	1445
The analytical method of the slopes stability determination under different geotechnical parameters <i>A.P.Yankovoy</i>	1451
Some landslides triggered typically by impounding of water reservoir in China <i>Du Yonglian, Wang Sijing, Ding Enbao & Wang Jing</i>	1455
The stability evaluation on Xintan Landslide in the Changjiang River Gorges <i>Xia Yuanyou, Li Xinping & Zhu Ruigeng</i>	1463

S-STAB, stability analysis of slopes <i>J.Záleský, J.Starý & J.Laurin</i>	1467
A conceptional phenomenological model to stability interpretation of dilatometric data from rock slope monitoring <i>J.Zvelebil</i>	1473
Improving engineering practice of slope stability analysis for unsaturated soils <i>A.-L.Öberg</i>	1481
Reviews	
Rock mass classification for slope stability analysis and its application to geological engineering problems J.S. Hwang & C.Y. Kim	1493
Geotechnical investigation of rock mass stability and its application to geological engineering problems T. Yamamoto & T.G.Tanaka	1513
Geotechnical methods for rock mass stability analysis in geological engineering J. Rodriguez, M.A. Rodriguez, J.M. Hernandez & C.J. Ho	1525
Geotechnical problems in developing rock masses and its solution by numerical analysis X.Xiaogang & C.C.Guiguer	1537
The effect of jointing on the stability of rock masses under uniaxial loading A method for stability analysis of slopes in anisotropic soils G.Torogolski & H.Murat	1559
Stability of slope cut-offs and their relation to equilibrium between stabilizing and destabilizing factors I.D.W.Spears	1571
Failure analysis of a large-scale landslide in a shielded soft soil trench in northern Taiwan J.K.Srivastava, K.K.Sakurai & L.L.Kang	1583
