

Landslides

Glissements de terrain

Editor/Rédacteur

KAARE SENNESET

*Department of Geotechnical Engineering, The Norwegian University of Science and Technology,
Trondheim, Norway/Norvège*

VOLUME 3

*8 Early warning, monitoring and instrumentation; 9 Stability analyses and performance of open
pit mine slopes; 10 Stabilization and remedial works; 11 Analysis of landslide inventories*

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/1996

Table of contents

8 *Early warning, monitoring and instrumentation*

Hydrologic response of a steep tropical slope to heavy rainfall <i>S.A.Anderson & L.K.Thallapally</i>	1489
Long-term monitoring and remedial measures in a coastal landslide (Central Italy) <i>M.-G.Angeli, F.Pontoni & P.Gasparetto</i>	1497
Long term behaviour of a natural soil slope excavated at the toe <i>J.Barradas</i>	1503
Instrumental prediction of a high cut stability in a jointed o.c. clay <i>P.Bertuccioli, B.D'Elia & F.Esu</i>	1509
Rain triggered slope movements as indicators of landslide dynamics <i>R.K.Bhandari & A.A.Virajh Dias</i>	1515
Geoacoustic method and slope deformations <i>P.Bláha</i>	1521
Long-term movements of substabilized versants and climatic changes in the Swiss Alps <i>Ch.Bonnard, F.Noverraz & H.Dupraz</i>	1525
Slope monitoring and early warning systems: Application to coastal landslides on the south and east coast of England, UK <i>A.R.Clark, R.Moore & J.S.Palmer</i>	1531
Continuous monitoring of the slope above an excavation within a marginally stable landslide <i>D.H.Cornforth & P.E.Mikkelsen</i>	1539
Some aspects of landslide prediction using satellite remote sensing data <i>K.Fujita, S.Obayashi & K.Kasa</i>	1545
Time prediction of rock slope failures based on monitoring results <i>U.Glawe & M.Lotter</i>	1551
Monitoring strategy and performance of instrumentation in the Clyde Power Project landslides, New Zealand <i>D.F.Macfarlane, P.K.Silvester, J.M.Benck & N.D.Whitford</i>	1557

Long-term performance of instrumentation at Dutchman's Ridge <i>K.M.Meidal & D.P.Moore</i>	1565
Geotechnics of claystone hillslopes - Properties of weathered claystone and formation of sliding surfaces <i>K.Rentschler & M.Moser</i>	1571
Monitoring of surface movements in excavated slopes <i>C.A.Reyes D. & L.C.Fernández P.</i>	1579
A micro processor controlled landslide early warning system <i>D.Tien, A.Nio, K.Tan, C.Wong, C.Pang, L.Oh, S.Achim & Y.Wong</i>	1585
A neural network based landslide warning system <i>D.Tien</i>	1589
Monitoring and determination of landslides' depth <i>I.O.Tikhvinsky</i>	1593
Recent development of time prediction for landslide in China <i>Liao Xiaoping, Xu Junling, Li Hesheng & Wang Gongxian</i>	1599
 <i>9 Stability analyses and performance of open pit mine slopes</i>	
In situ DMT testing and observations in landslide areas in overconsolidated jointed clays <i>B.D'Elia, F.Esu, S.Marchetti & G.Totani</i>	1607
Risk assessment of operating slope stability at Loy Yang Coal Mine overburden dump <i>S.Kacavenda & J.Z.Zou</i>	1613
Landslides in the Tertiary coal bearing basin of Kosovo <i>R.Pavlovic, M.Markovic & S.Radovanovic</i>	1619
Slope stability at Mae Moh Open Cast Mine, Northern Thailand <i>N.Phienwej & N.Comviravong</i>	1625
Stability research and treatment of high and steep open-pit slope <i>Tang Ping & Dianji Zhang</i>	1631
A geotechnical investigation and instability assessments of quarry slopes in heavily jointed porphyry rock mass <i>R.N.Singh, R.Khanlari, R.N.Chowdhury & J.Shonhardt</i>	1635
ROXIM: A computer program to simulate rockfall <i>J.M.Wilson</i>	1643
 <i>10 Stabilization and remedial works</i>	
Landslide stabilisation of a mill tailing disposal by a drainage tunnel at the uranium ore mine Žirovski vrh, Slovenia <i>T.Beguš, I.Buser, F.Čadež & S.Vidmar</i>	1651
Shilongmiao landslide and its treatment <i>Shi Bin & Li Shenglin</i>	1657

Stabilization of multiple progressive slope failures <i>H.Brandl</i>	1661
Surfacial investigations as determinant tools to reduce high risk of rockslide <i>R.N.d' Orsi & C.Amaral</i>	1667
Geotechnical design for a socketed pile wall for support of two unstable railway embankments <i>W.N.Davies</i>	1671
Ongoing requirements for monitoring and maintaining a large remediated rockslide <i>E.G.Enegren & A.S.Imrie</i>	1677
Investigation of highway cut slope movements <i>J.Farkas & M.Kovács</i>	1683
Slip at a major cut for a motorway in the Austrian Alps – A case history of its cause and its stabilisation <i>M.Fuchsberger & G.Mauerhofer</i>	1687
Stabilisation of Cairnmuir Landslide <i>M.D.Gillon & G.J.Saul</i>	1693
Effectiveness of antilandslide retaining structures <i>L.K.Ginzburg</i>	1699
Dewatering a landslip through siphoning drains – Ten years of French experience <i>J.C.Gress</i>	1705
The behavior of stabilizing piles installed in slopes <i>W.P.Hong & J.G.Han</i>	1709
Slope stabilization by micropile reinforcement <i>I.Juran, A.Benslimane & D.A.Bruce</i>	1715
Slide on a sewage sludge ground storage <i>J.Kayser, W.Rodatz & W.Oltmanns</i>	1727
'Lightweight Pneusol', the stability of slopes and recovering the residual value of industrial byproducts <i>N.-T.Long</i>	1733
Stabilisation and performance of No. 5 Creek Slide, Clyde Power Project, New Zealand <i>D.F.Macfarlane & D.G.Jenks</i>	1739
The performance of landslide stabilisation measures, Clyde Power Project, New Zealand <i>D.F.Macfarlane & M.D.Gillon</i>	1747
Stage 1 – Remedial measures for stabilizing landslide at Beragala on Beragala Haliela Road <i>D.P.Mallawaratchie, M.Thuraisamy, J.Jayamanne & A.M.L.Attanayake</i>	1759
A major rock slide and its impact on 1500 MW Nathpa Jhakri Hydel Project in northwest Himalaya, India <i>G.S.Manhas & A.Kumar</i>	1765

Stabilization of excavated slopes in basalt <i>E.P. Corona</i>	1771
Landslide remediation through the use of coal combustion by-products <i>R. Payette, H.R. Busby & W.E. Wolfe</i>	1777
Stability analysis and strengthening solutions of sliding slopes <i>F. Roman & D. Cacuci</i>	1783
Traitement et surveillance d'un glissement de terrain à Boulogne-sur-Mer (France) <i>G. Sève, C. Fornallaz & T. Dubreucq</i>	1787
Landslide stabilization based on three-dimensional analysis <i>K. Sh. Shadunts & S.I. Matsiy</i>	1793
Piled stabilization of slopes <i>A. Shmuelyan</i>	1799
Newhaven West Quay strengthening-design and construction <i>H. Sui</i>	1805
Shear characteristics of anchored nails <i>D.S. Tolia, S. Kumar, N.K. Sharma & K. Kumar</i>	1811
Evolution of safety conditions of slopes stabilised by drainage galleries <i>C. Valore & C.A. Farulla</i>	1817
Highway embankment repair and stabilization using power plant waste products <i>W.E. Wolfe, H.R. Busby & S.H. Kim</i>	1823
A method for evaluating anchor forces based on the three-dimensional simplified Janbu method <i>T. Yamagami & O. Yamakawa</i>	1829
11 Analysis of landslide inventories	
The environmental dimensions of mass failure in semi-arid Spain <i>I. Alcántara-Ayala & J.B. Thornes</i>	1837
Analysis of Rio de Janeiro landslide inventory data <i>C. Amaral, E. Vargas & E. Krauter</i>	1843
Role of deep transversal dislocations in development of landslides in the flysch Carpathians <i>M. Bajgier-Kowalska</i>	1847
Problems of landslide hazards in Garhwal Himalayas and its mitigation <i>N.C. Bhagat, G.S. Mehrotra & S. Sarkar</i>	1853
Consideration of landslide geometry and runout in a landslide inventory <i>R.K. Bhandari & W.P.P.K. Kotuwegoda</i>	1859
Delineation of landslide prone zones based on geological analysis of landslide inventories in a part of NW-Himalaya, India <i>P. Chandra</i>	1865

Geomorphological features of the debris flow along the Mukwa river in the Hualien area <i>H.Chen</i>	1871
An inventory of landslides in Alberta, Canada <i>D.M.Cruden</i>	1877
Some results of the WASSS project: The Slope Stability DataBase (SSIDB) <i>R.M.Faure & T.Pairault</i>	1883
Inventory and analysis of landslide determinant factors in Los Guajares Mountains, Granada (Southern Spain) <i>T.Fernández, C.Irigaray & J.Chacón</i>	1891
Inventory and study of landslide hazards in Cundinamarca <i>C.A. Forero-Dueñas & P.E. Caro-Peña</i>	1897
Hazard evaluation of origin and activation of deep landslides in Bulgaria <i>G.Frangov, P.Ivanov & N.Dobrev</i>	1903
Landslide zonation – A review and suggested approaches <i>S.K.Gupta & Y.P.Sharda</i>	1909
Inventory and analysis of determining factors by a GIS in the northern edge of the Granada Basin (Spain) <i>C.Irigaray, T.Fernández & J.Chacón</i>	1915
Data analysis of the landslides in the Republic of Croatia: Present state and perspectives <i>V.Jurak, I.Matković, Ž.Miklin & S.Mihalić</i>	1923
Rainfall induced landslides in Achaia county, Greece <i>G.Koukis, D.Rozos & I.Hadzinakos</i>	1929
Landslides in Greece: Research evolution and quantitative analysis <i>G.Koukis, G.Tsiambaos & N.Sabatakakis</i>	1935
Climatic and environmental controls of cryogenic landslides, Yamal, Russia <i>M.O.Leibman & I.P.Egorov</i>	1941
Studies of landslides and mass movements along M.C.T. zone, in part of Garhwal Himalaya, India <i>A.K.Naithani & C.Prasad</i>	1947
Heavy rain triggered landslides in the Alba area during November 1994 flooding event in the Piemonte region (Italy) <i>G.Polloni, P.Aleotti, P.Baldelli, A.Nosetto & K.Casavecchia</i>	1955
Basic geological structures conditioning evolution of landslide movements – Examples from Czech Republic <i>J.Rybář</i>	1961
Landslides in Niger (Western Africa) <i>P.Schoeneich & I.Bouzou</i>	1967
Fractal structure features of landslide activities and their significance <i>Yi Shunmin & Tang Huiming</i>	1973

Some morphological types of long-runout rockslides: Effect of the relief on their mechanism and on the rockslide deposits distribution	1977
<i>A.L. Strom</i>	
Enigmatic features and mechanism of debris flows and lahars	1983
<i>G.Ter-Stepanian</i>	
Author index	1989
