A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 2000

Table of contents

Introduction	IX
 <i>Aggregate properties</i>	
Aggregates resistance to fragmentation, weathering and abrasion <i>G.Bjarnason, P.Petursson & S.Erlingsson</i>	3
Effects of the solid matrix of aggregates on the compression resistance of soil-lime mixtures <i>G.Cerni</i>	13
Influence of clay fraction and moisture on the behaviour of soil-aggregate mixtures <i>T.C.Hopkins & T.L.Beckham</i>	21
On the resilient behaviour of unbound aggregates <i>W.E.I.Khogali & M.Zeghal</i>	29
A study on shape evaluation method of granular material <i>A.Kono, E.Sekine & Y.Kohata</i>	35
Determining the dry density of foundation materials containing oversize particles <i>C.Robert & D.Ouellet</i>	41
European standards for unbound mixtures – A status report <i>D.Rockliff</i>	49
Laboratory testing of aggregates used in forest road construction in Ireland <i>M.Rodgers, C.McGuinness, A.Kielty, J.Keaney & G.Hayes</i>	55
 <i>Hydraulic and other properties</i>	
New apparatus for measuring the drainage properties of unbound aggregates <i>S.A.Tan, T.F.Fwa & Y.K.Guwe</i>	63
Possibilities to achieve a high permeability of unbound aggregates and aspects for testing <i>M.Wolf</i>	69
Response and performance of a test pavement to freeze/thaw cycles in the Danish Road Testing Machine <i>W.Zhang & R.A.Macdonald</i>	77

Alternative materials

- Use of stockpiled asphalt and demolition debris in road construction in Norway 87
J.Aurstad & N.S.Uthus
- Expanded clay used for insulation in pavements – Strength and stiffness properties 93
I.Hoff, A.Watn, K.O.Amundsgård & A.Emdal
- Applicability of industrial by-products in pavement layers – Some research studies in LNEC 101
H.Lima, L.Quaresma & A.Pinelo
- The performance of recycled crushed concrete aggregates 109
A.Nataatmadja & Y.L.Tan
- Weathered basalts, alternative aggregates for thin pavement bases 117
W.P.Núñez, J.A.Ceratti, G.P.Arnold & J.A.de Oliveira
- The effect of compaction on the mechanical behaviour of mix granulate base course materials and on pavement performance 125
A.A.van Niekerk, J.van Scheers, P.Muraya & A.Kisimbi

Cyclic triaxial testing

- Anisotropic characteristics of granular material 139
M.Karavaşin & A.R.Dawson
- Development of a large triaxial cell apparatus with variable deviatoric and confining stresses 145
K.A.Skoglund, S.Hoseth & E.Værnes
- Effects of fines content on the anisotropic response and characterisation of unbound aggregate bases 153
E.Tutumluer & U.Seyhan
- Triaxial testing of coarse grained mix granulates at scaled gradings and smaller specimen sizes 161
A.A.van Niekerk, J.van Scheers & P.J.Galjaard
- Resilient and permanent deformation behaviour of unbound granular materials 171
S.Werkmeister, R.Numrich & F.Wellner

In-situ testing and performance related specifications

- Performance based specifications for road construction and materials 183
G.Arnold
- A comparison of devices for measuring stiffness in-situ 193
P.R.Fleming, M.W.Frost & C.D.F.Rogers
- Comparison of stiffness moduli of secondary road base materials under laboratory and in-situ conditions 201
J.Groenendijk, C.R.van Haasteren & A.A.van Niekerk

Pavement performance related to material properties of unbound layers using FWD deflection testing <i>S.W.Haider & M.A.Kamal</i>	209
Stiffness evaluation of the subgrade and granular aggregates using the portable FWD <i>M.Kamiura, E.Sekine, N.Abe & T.Maruyama</i>	217
Mechanical properties of unbound aggregates from DCP and plate load tests <i>J-M.Konrad & D.Lachance</i>	225
Stiffness behaviour of trial road foundations <i>C.D.F.Rogers, P.R.Fleming & M.W.Frost</i>	231
Experience with various types of foundation tests <i>C.van Gurp, J.Groenendijk & E.Beuning</i>	239
 <i>Granular material models</i>	
System identification method for determining the anisotropic resilient properties of unbound aggregates <i>A.Adu-Osei, R.L.Lytton & D.N.Little</i>	249
Analysis of non-linear models describing the resilient behaviour for soils and unbound materials <i>S.Angelone & F.Martinez</i>	257
An elastoplastic model with kinematic hardening for unbound aggregates in roads <i>C.Chazallon</i>	265
Unbound granular base modeling – Effects on conventional flexible pavement critical responses <i>N.Garg, M.R.Thompson & F.M.Gomez-Ramirez</i>	271
Viscoelastic behaviour of granular materials <i>E.Parhamifar</i>	279
The development of mechanistic-empirical permanent deformation design models for unbound pavement materials from laboratory and accelerated pavement test data <i>H.L.Theyse</i>	285
 <i>Observed performance</i>	
The hydraulic and structural behaviour of unbound granular sub-base layers <i>B.C.J.Chaddock, B.Schoepe & J.Mercer</i>	297
Irish experience in the use of unbound aggregates in roads 1970-2000 <i>S.Davitt</i>	307
Seasonal variation of moisture and bearing capacity on Icelandic test road sections <i>S.Erlingsson, G.Bjarnason & V.Thorisson</i>	317
Mechanical response of an unbound granular base course for a flexible pavement <i>D.M.Smith, R.S.Rollings, J.F.Peters & J.B.Meicalf</i>	325

Aggregates for forest enterprise roads <i>R.W.W.Tyrrell</i>	335
Structural testing and performance of the Danish RTM-2 test pavement <i>W.Zhang & R.A.Macdonald</i>	343
 <i>Pavement analysis</i>	
An improved structural material model for unbound granular bases <i>K.D.Hall & R.P.Elliott</i>	353
Modelling a full scale experiment of two flexible pavement structures with unbound granular bases <i>P.Hornych, A.Kazai & A.Quibel</i>	359
Artificial neural network modelling of granular material behaviour under repeated loading <i>M.Karavaşahin, M.Tigdemir & M.Saltan</i>	369
Prediction of permanent deformation in the unbound aggregate and subgrade soils of a paved roadway <i>S.W.Perkins, Y.Wang, M.Q.Edens & R.J.Fragaszy</i>	377
