Preface	xi
1 The philosophy of underpinning	1
S. Thorburn	
1.1 General description	1
1.2 Investigation works	20
1.3 Serviceability limits	28
1.4 Litigation	30
1.5 Historical background	34
References and further reading	38
2 Simple methods of excavation	40
J.F. Hutchison	
2.1 Introduction	40
2.2 Shoring	41
2.3 Simple underpinning	47
2.4 Case study	54
References	59
3 Conventional piles in underpinning	60
K.W. Cole	
3.1 Connecting piles to the structure	60
3.2 Conventional piles	63
3.3 Designing piles	66
References	82
4 'Pali radice' (root piles) and 'reticulated pali radice'	84
F. Lizzi	
4.1 Man and his construction problems	84
4.2 The problem of underpinning old buildings subject to settlement	84
4.3 The state of the art in underpinning before the introduction of pali radice (1950)	85
4.4 The 'palo radice' (root pile)	87
4.5 Case histories of underpinning	93

4.6	Reticulated pali radice (RRP)	100
4.7	The design problem of an RRP structures	113
4.8	The problem of stability of a tower	129
4.9	Special case histories	141
5	Micropiling	152
	F. Lizzi	
5.1	The diffusion of pali radice	152
5.2	Steel pipe micropiles, cemented into the soil	152
5.3	The preloading on micropiles	154
5.4	Recent types of pali radice	155
5.5	Micropiles for new foundations in difficult soils	158
6	The Pynford underpinning method	162
	J.F.S. Pryke	
6.1	Introduction	162
6.2	Design	164
6.3	The Pynford underpinning method	167
6.4	Case studies	172
	<i>Case Study no. 1: Underpinning at Imperial College, London</i>	172
	<i>Case Study no. 2: Underpinning a house at Wimbledon, London</i>	188
	<i>Case Study no. 3: St Nicholas' Church, Charlwood, Surrey</i>	191
	<i>Case Study no. 4: Beam and pile underpinning for a factory near Nottingham</i>	195
	<i>Case Study no. 5: Pynford beam used for shoring a brick pier</i>	196
	<i>Case Study no. 6: Redeveloping major retail premises, Oxford Street, London</i>	200
	<i>Case Study no. 7: Pynford beams used for shoring</i>	202
	<i>Case Study no. 8: Strengthening medieval stonework at Winchester Cathedral</i>	206
	<i>Case Study no. 9: Strengthening medieval stonework, Cathedral Close, Winchester</i>	211
	<i>Case Study no. 10: Altering a Tudor structure—Trinity College, Cambridge</i>	213
	<i>Case Studies nos. 11–13: Moving buildings</i>	217
	References	221
7	Ground freezing	222
	J.S. Harris	
7.1	Introduction	222
7.2	The method	222
7.3	Methods of refrigeration	225
7.4	The properties of frozen ground	227
7.5	Design	232
7.6	Applications	233
7.7	Examples	234
7.8	Summary	241
	References	241

8 Underpinning by chemical grouting	242
G.S. Littlejohn	
8.1 Historical introduction	242
8.2 Ground investigation	248
8.3 Principles of injection	248
8.4 Grout systems	253
8.5 Grouting operations	265
8.6 Applications	266
8.7 Conclusions	271
References	273
9 Soil improvement by jet grouting	276
A. Perelli Cippo and R. Tornaghi	
9.1 Introduction	276
9.2 Jet grouting techniques	277
9.3 Drilling and grouting equipment	278
9.4 Design criteria	278
9.5 Controls during the work	289
9.6 Performance records	290
References	292
Index	293
