# PROCEEDINGS of the TENTH WORLD CONFERENCE

## on EARTHQUAKE ENGINEERING

19-24 July 1992  
Madrid  
Spain

**Organized by**  
Asociación Española de Ingeniería Sísmica

**Sponsored by**  
International Association for Earthquake Engineering

**Published by**  
A.A.Balkema / Rotterdam / Brookfield / 1992

For Volume 1, ISBN 90 5410 071 0  
For Volume 2, ISBN 90 5410 082 8  
For Volume 3, ISBN 90 5410 089 9  
For Volume 4, ISBN 90 5410 088 1  
For Volume 5, ISBN 90 5410 080 2  
For Volume 6, ISBN 90 5410 087 3  
For Volume 7, ISBN 90 5410 085 5  
For Volume 8, ISBN 90 5410 084 8  
For Volume 9, ISBN 90 5410 083 1  
For Volume 10, ISBN 90 5410 081 3

© 1992 A.A.Balkema  
Printed in the Netherlands

## Contents of Volumes 1-10

### VOLUME ONE

#### 1 Damage in recent earthquakes

##### 1.1 General damage assessment

- The Spitak, Armenia earthquake – Why so much destruction? 5  
*A.H.Hadjian*
- The Mont Chenoua (Algeria) earthquake of October 29th, 1989: Damage assessment and distribution 11  
*M.N.Farsi & M.Belazougui*
- The Boca del Tocuyo earthquake of April 30, 1989 in Venezuela 15  
*A.Malaver*
- Observations and lessons learned from recent earthquakes in Greece 21  
*V.A.Lekidis, N.P.Theodulidis, V.N.Margaris & D.I.Papastamatiou*
- The seismic microzoning of source region based on the seismic intensity of 1990 Philippine earthquake (M = 7.8) 27  
*T.Mochizuki, N.Abeki, T.Enomoto, H.Ishida, H.Takida, Y.Saito, Y.Nakajima, T.Kobayashi, R.G.Valenzuela, N.H.Angeles, B.D.Verdejo, A.G.Lanuza & N.R.Soqueño*
- Microtremor measurements in the disastrous areas by the 1990 Philippine earthquake 33  
*M.Hayashi, T.Nishikawa, K.Saimi, Y.Miyauchi & K.Kasai*
- Engineering analysis of earthquake damage in catalogue-like form: Case-study of Eastern Kazakh earthquakes of 1990 39  
*A.S.Taubaev, E.T.Kenjebaev, E.Hampe, H.-G.Schmidt & J.Schwarz*
- ##### 1.2 Structural damage
- Collapse assessment of a tall steel building damaged by 1985 Mexico earthquake 51  
*J.-F.Ger & F.Y.Cheng*
- Behaviour of old historical buildings during August 21, 1988, Bihar-Nepal earthquake 57  
*S.K.Thakkar & D.K.Paul*
- Analysis of the collapsed Armenian precast concrete frame buildings 63  
*L.A.Wyllie Jr*

Post earthquake damage studies on the performance of buildings during Bihar (India)-Nepal earthquake on 21st August 1988 <i>V.Thiruvengadam &amp; J.C.Wason</i>	67
Correlation between recorded building data and non-structural damage during the Loma Prieta earthquake of October 17, 1989 – Selected case studies <i>S.S.Rihal</i>	73
Response of an unreinforced masonry building during the Loma Prieta earthquake <i>A.Tena Colunga &amp; D.P.Abrams</i>	79
Performance of high technology industries in the Loma Prieta earthquake <i>M.T.Phipps, J.O.Jirsa, M.Picado &amp; R.Karp</i>	85
Structural damage from Manjil-Iran earthquake of June 1990 <i>M.Molavi &amp; S.Eshghi</i>	91
Civil engineering features of damage on June 20, 1990 Manjil-Rudbar earthquake, Iran <i>F.Jafarzadeh</i>	99
Investigation of damages on reinforced concrete buildings caused by the 1990 Philippine-Luzon earthquake <i>K.Kusukawa, T.Nishikawa, M.Umeda, N.Nagata, M.Taga &amp; M.Nakanishi</i>	103
Evaluation of the failure of the Hotel Las Olas building as a consequence of the 22nd of April earthquake in Costa Rica <i>A.I.Uzcategui &amp; E.D.Thomson</i>	109
Special structures, damage report of the Manjil earthquake on June 21, 1990 <i>K.Bargi</i>	115
 <b>1.3 Damage induced by liquefaction</b>	
A case history of liquefaction from the Chibaken Toho-Oki earthquake of December 17, 1987 <i>T.Mase &amp; K.Wakamatsu</i>	123
On the earthquake induced liquefaction in Astaneh, Iran <i>S.M.Haeri &amp; M.R.Zolfaghary</i>	129
Liquefaction-induced damage, and geological and geophysical conditions during the 1990 Luzon earthquake <i>H.Kojima, K.Tokimatsu &amp; A.Abe</i>	135
Ground effects caused by the Alto Mayo earthquakes in Peru <i>J.E.Alva-Hurtado, J.F.Meneses, L.Chang, J.L.Lara &amp; T.Nishimura</i>	141
Settlement and inclination of reinforced concrete buildings in Dagupan City due to liquefaction during the 1990 Philippine earthquake <i>T.Adachi, S.Iwai, M.Yasui &amp; Y.Sato</i>	147
Bridge damage caused by liquefaction during the 22 April 1991 Costa Rica earthquake <i>T.L.Youd, K.M.Rollins, A.F.Salazar &amp; R.M.Wallace</i>	153

## 2 Earthquake observation and data processing

### 2.1 Instrumental developments and record processing

- A performance review of digital solid state accelerographs vs analog film recording accelerographs 163  
*R.A. Merrill & A. Reyes*
- A technical review of modern strong motion accelerographs 169  
*J.G. Diehl & W.D. Iwan*
- Development of stationary and mobile automatic stations for engineering seismometric stations 177  
*A.M. Kakhnovskiy, L.Sh. Kilimnik, E.B. Egorov & V.A. Nesterov*
- Instrument correction for a coupled transducer-galvanometer system 181  
*E.I. Novikova*
- Correction of data obtained from digital accelerographs 187  
*A. Kumar, S. Basu & B. Chandra*
- Influence of system initial conditions on elastic and inelastic response spectra 195  
*C.E. Ventura & R. Blázquez*
- Foundation effect in accelerograms of small earthquakes 201  
*S. Aoyama*
- An earthquake strong-motion databank and database 207  
*J.J. Bommer & N.N. Ambraseys*

### 2.2 Array observation

- Design and implementation of strong-motion instrumentation arrays in dams 213  
*G.R. Darbre & H. Pougatsch*
- Characteristics of long-period ground motions in the Tokyo metropolitan area based on seismometer array with broad period band 219  
*K. Wakamatsu, A. Nobata, O. Kurimoto & Y. Yasui*
- Observation of ground strains during earthquake 225  
*S. Morichi, Y. Imamura & K. Taga*
- Array observation system for aseismic design of Akashi Kaikyo bridge 231  
*M. Yasuda, K. Izuno & S. Nakanishi*
- Dense strong motion accelerometer array at site with different topographic and geographic conditions 235  
*T. Kashima, I. Okawa & Y. Kitagawa*
- Strong seismic ground motion array layout for source studies: Three attempts 241  
*M. Iida*
- Estimation of effects of subsurface structure on ground motions using 3-D array data 247  
*T. Iwata, K. Irikura & J.-C. Gariel*
- Determination of shear wave velocity structures from spectrum analyses of short-period microtremors 253  
*K. Tokimatsu, Y. Miyadera & S. Kuwayama*
- Identification of site response using 3-D array records 259  
*C. H. Loh & C. S. Yeh*

### 3 Seismic risk and hazard

#### 3.1 Seismicity and attenuation

Cases of RIS in the Brazilian Amazon area <i>J.A.V.Veloso</i>	269
Seismic surveillance of the Blåsjø reservoir <i>A.Dahle, H.Bungum, J.Havskov &amp; B.Aspen</i>	275
Earthquake pattern in Central Europe <i>D.Procházková</i>	279
An investigation of the seismicity applying the method of extreme values <i>L.B.Pekevski</i>	283
Non-stationarity of historical seismicity in China <i>R.K.McGuire, G.R.Toro, D.Veneziano, C.A.Cornell, Y.X.Hu, Y.Jin, Z.Shi &amp; M.Gao</i>	287
A generalized semi-Markov process for spatially and temporally dependent earthquakes <i>K.A.Lutz &amp; A.S.Kiremidjian</i>	293
Anelastic attenuation and pseudoacceleration relations in eastern Iberia <i>V.Vives &amp; J.A.Canas</i>	299
Determination of intensity attenuation of earthquakes based on probability approach <i>L.S.Timiovska</i>	305
On the reliability of the size assigned to historical earthquakes <i>G.A.Papadopoulos &amp; A.Vrachimopoulos</i>	311
An invariance problem in probability assignment of recurrence time for next earthquake <i>V.Solana &amp; J.L.Cervera</i>	315
Crustal model and local magnitude at El Cbril (Spain) <i>A.Bernal, F.Vidal, F.de Miguel, F.Torcal, I.Serrano &amp; P.Martín Bourgón</i>	321

#### 3.2 Seismic hazard methodology

Seismic risk assessment of residential building <i>G.Yabe</i>	329
Calibrated expert judgement in seismic hazard analysis <i>G.Woo</i>	333
Seismic hazard prediction using neural nets <i>F.S.Wong, A.T.Y.Tung &amp; W.Dong</i>	339
For an adequate use of intensity data in site hazard estimates: Mixing theoretical and observed intensities <i>M.Mucciarelli, L.Magri &amp; D.Albarello</i>	345
Probabilistic treatment of uncertainties from incomplete knowledge in SHA <i>Y.Hu &amp; H.-Y.Chen</i>	351
A general algorithm for geometry probability $P(Y > y   E, m)$ in the seismic hazard analysis <i>S.Huang &amp; J.Zhu</i>	357

A sensitivity analysis for seismic hazard estimation <i>T. Annaka &amp; H. Ohki</i>	363
Velocity of seismic damage <i>G.R. Saragoni &amp; H. Díaz</i>	369
On the intensity measure of strong motions related to structural failures <i>K. Matsumura</i>	375
Demonstrative evaluation of variables indicating severity of earthquake applicable to earthquakes sensors for control <i>T. Iwata, H. Nakane, T. Tazo, K. Shimizu &amp; S. Kataoka</i>	381
Shear strain energy level as sign of seismic hazards <i>I.A. Garagash</i>	387
A technique for uniform hazard spectra estimation in the US <i>S.T. Algermissen &amp; E.V. Leyendecker</i>	391
Fuzzy evaluation and statistical analysis of site intensity <i>H. Shen &amp; M. Yener</i>	399
On the uncertainties of historical data and their effects in seismic hazard assessment <i>C. Margottini</i>	405
<b>3.3 Seismic hazard of specific regions</b>	
Damage assessment for two Icelandic earthquakes <i>H. Thráinsson</i>	413
Seismic hazard and recordings of strong ground motion in Iceland <i>R. Sigbjörnsson &amp; G.I. Baldvinsson</i>	419
Seismic hazard assessment in Greece based on strong motion duration <i>B.C. Papazachos, V.N. Margaris, N.P. Theodulidis &amp; Ch.A. Papaioannou</i>	425
The use of intensity recurrence to investigate regional variation of seismic hazard in the UK <i>J.W. Pappin &amp; T.S. Paul</i>	431
Zoning of the Italian region with synthetic seismograms computed with known structural and source information <i>G. Costa, G.F. Panza, P. Suhadolc &amp; F. Vaccari</i>	435
Regional <i>L<sub>g</sub></i> -wave attenuation and estimation of peak ground acceleration in the Iberian Peninsula <i>M. García-Fernández &amp; J.A. Canas</i>	439
Development of seismic acceleration map for Central Japan <i>K. Ishii, T. Sugiyama, K. Maeda &amp; T. Okumura</i>	445
Seismic hazard and design criteria for Saudi Arabia <i>M. Al-Haddad, G.H. Siddiqi, R. Al-Zaid, A. Arafah, A. Necioglu &amp; N. Turkelli</i>	449
Assessment of seismic hazard in the islands of Guadeloupe and Martinique (Antilles) <i>P. Godefroy, E. Leroi, P. Mouroux, Ch. Paulin, J. Ph. Raçon &amp; B. Sauret</i>	455
Tsunami risk in the city of Arica, Chile <i>J. Monge</i>	461

Preliminary evaluation of seismic risk of earth dams <i>B.Q.Chang, R.F.Chen &amp; P.Wu</i>	467
A probabilistic assessment of seismic hazard in France <i>S.Bottard &amp; H.Ferrieux</i>	471
Seismic hazard-consistent studies for Portugal <i>A.Campos-Costa, C.S.Oliveira &amp; M.L.Sousa</i>	477
Earthquake occurrence and seismic zonation in South Spain <i>D.Muñoz &amp; A.Udías</i>	483
Expected ground motion evaluation for Italian sites <i>A.Tento, L.Franceschina &amp; A.Marcellini</i>	489
<b>3.4 Vulnerability and risk</b>	
Assessment of earthquake vulnerability of buildings <i>S.W.Cochrane &amp; W.H.Schaad</i>	497
Method for evaluation of the seismic resistance of existing reinforced concrete buildings <i>G.S.Necevskaja-Cvetanovska &amp; B.S.Simeonov</i>	503
Evaluation of vulnerability and potential seismic risk level of buildings <i>J.Petrovski, D.Ristic &amp; N.Nocevski</i>	509
A seismic damage evaluation system for buildings <i>Y.Tatsumi, M.Sugimoto &amp; H.Seya</i>	515
Study on the method of seismic PRA model by utilization of observed earthquake data <i>M.Matsubara, M.Takeda &amp; Y.Kai</i>	521
Earthquake damages and characteristics of microtremors at large-scale artificial housing sites <i>Y.Mori &amp; A.Asada</i>	529
Tehran vulnerability analysis <i>M.Ghafory-Ashtiani, M.Hosseini, M.K.Jafari, J.Shadi Talab, S.Eshghi &amp; M.Qureshi</i>	533
Earthquake vulnerability, loss and risk assessment in Turkey <i>P.Gülkan, O.Ergünay &amp; H.Sucuoğlu</i>	539
Seismic vulnerability of Mexico City buildings <i>M.Jara, J.J.Guerrero &amp; J.Aguilar</i>	545
Correlation of ground motion with building damage: The definition of a new damage-based seismic intensity scale <i>R.J.S.Spence, A.W.Coburn, A.Pomonis &amp; S.Sakai</i>	551
Improving earthquake casualty and loss estimation <i>M.E.Durkin</i>	557
Seismic risk: Non-linear MDOF structures <i>P.Bazzurro &amp; C.A.Cornell</i>	563
Author index for Volume 1	569
