

PROCEEDINGS  
of the  
TENTH  
WORLD  
CONFERENCE  
on  
EARTHQUAKE  
ENGINEERING

19-24 July 1992

Madrid

Spain

**Organized by**

Asociación Española de Ingeniería Sísmica

**Sponsored by**

International Association for Earthquake Engineering

**Published by**

A.A.Balkema / Rotterdam / Brookfield / 1992

## Contents of Volume 3

### 5 Dynamic properties and response of soil

#### 5.1 Analysis of soil response

A study on structures of grounds liable to induce earthquake damage <i>M.Nasu</i>	1137
Seismic response analysis of layered ground considering uncertainty of soil parameters <i>T.Ikemoto, M.Kitaura &amp; M.Tsurugi</i>	1141
Study on strengthening of soft soil in physico-chemical treatments <i>Y.Masada, Y.Izumi, T.Niuro &amp; E.Kuribayashi</i>	1145
Seismic earth response considering various mechanical models <i>Gh.Mărmureanu, S.F.Bălan &amp; I.Vasile</i>	1151
An absorbing boundary element for dynamic analysis of two-phase media <i>H.Modaressi &amp; I.Benzenati</i>	1157
Distinct element analysis of sand under cyclic loading using oval elements <i>T.B.S.Pradhan &amp; S.Sawada</i>	1163
Quantification of soil non-linearity in cyclic loading by the use of Fourier components <i>C.Madshus &amp; Y.Kikuchi</i>	1169
Study on the applicability of a numerical analysis based on the effective stress theory <i>I.Kubodera, K.Itoh &amp; Y.Goto</i>	1175
Influence of random mechanical parameter on earthquake response analysis of site <i>T.Li &amp; J.Li</i>	1181
Stochastic seismic response analysis for soil layers with random dynamic parameters <i>Z.Wu &amp; G.Han</i>	1187
Dynamic amplification functions of the surface layer considering the variation of soil parameters <i>S.Suzuki &amp; K.Asano</i>	1193
Soil properties and seismic response <i>M.Vucetic</i>	1199
Dynamic strength and stability of refuse landfills during earthquakes <i>S.Singh</i>	1205

Energy-dissipating ability of sandy soils <i>M.P.Luong</i>	1209
Dynamic characteristics of collapsing loess and its site seismic response <i>X.Luo, Y.Zhang &amp; Q.Tong</i>	1215
Closed-form solutions for SRSS response of shear beams <i>J.Betbeder-Matibet</i>	1221
Study of fracture process of an earthquake fault <i>M.R.Rimal, K.Meguro &amp; H.Higashihara</i>	1227
Distinct element simulation for simple shear test of granular assembly <i>K.Iwashita &amp; T.Kojima</i>	1233
Prediction of shear characteristics of undistributed clays after cyclic loading and consolidation <i>T.Matsui &amp; M.A.Bahr</i>	1239
 <i>5.2 In-situ and laboratory testing</i>	
Observation of earthquake strong-motion with deep borehole – Generation of vertical motion propagating in surface layers after S wave arrival <i>K.Takahashi, S.Ohno, M.Takemura, T.Ohta, T.Hatori, Y.Sugawara &amp; S.Omote</i>	1245
Study on soil properties of ground surface layers and characteristics of incident SH waves into sublayer <i>M.Ichikawa, T.Nishide &amp; S.Sakai</i>	1251
Dynamic properties of Mexico City clay for wide strain range <i>I.A.Díaz-Rodríguez</i>	1257
In-place calibration of USGS pore pressure transducers at Wildlife Liquefaction Site, California, USA <i>B.Hushmand, R.F.Scott &amp; C.B.Crouse</i>	1263
In situ shear wave velocity determination using seismic cone penetrometer for evaluating soil anisotropy <i>J.P.Sully &amp; R.G.Campanella</i>	1269
Field and laboratory determination of dynamic properties of natural soil deposits <i>K.D.Pitilakis, A.Anastassiadis &amp; D.Raptakis</i>	1275
Engineering properties of undisturbed gravel sample <i>Y.Suzuki, M.Hatanaka, T.Konno, K.Ishihara &amp; K.Akino</i>	1281
Dispersion analysis using strong motion data <i>S.Chávez-Pérez, C.Calderón-Macías, E.Romero-Jiménez &amp; J.M.Gómez-González</i>	1287
Interpretation of in situ dynamic soil testing <i>P.Jouanna, J.P.Touret, M.Mabsout &amp; M.S.El Youssoufi</i>	1293
Model tests of embankments on liquefiable ground using dynamic centrifuge <i>Y.Koga, J.Koseki &amp; A.Takahashi</i>	1299
Torsional tests on large in-situ soil columns <i>A.Tateishi, T.Takayanagi, K.Ishihara, M.Hayashi, S.Iizuka &amp; S.Suzuki</i>	1305

Prototype cyclic torsional cylindrical shear tests <i>W.Henke &amp; R.Henke</i>	1311
Shaking table tests of embankment models reinforced with geotextiles <i>S.Tani, Y.Takano &amp; Y.Yokota</i>	1317
Cyclic undrained shear behavior of sand under surface wave stress conditions <i>T.Sugano &amp; E.Yanagisawa</i>	1323
Uniform strain series equivalent to seismic strain <i>H.Matsuda &amp; E.Hoshiyama</i>	1329
 <b>5.3 Liquefaction</b>	
Earthquake induced groundwater changes and liquefaction <i>R.Muir Wood &amp; R.S.Steedman</i>	1337
A study of damage to sandy soil due to liquefaction induced by earthquakes and of methods for predicting liquefaction <i>T.Ito, A.Asada, T.Konno, M.Kurihara &amp; A.Hotta</i>	1343
Liquefaction analysis of stratified soil layers: A verification of coupled stress-flow approach <i>K.Arulanandan &amp; T.M.Majid</i>	1349
Liquefaction zones predicted by the type of stresses induced by the ends of fault segments <i>L.E.Vallejo</i>	1355
Two dimensional liquefaction analysis for ground with embankment <i>H.Abe</i>	1361
Evaluation of a liquefaction criterion for a loose sand <i>J.Canou, A.Bahloul, A.Attar &amp; L.Piffer</i>	1367
Numerical simulations of sandy soil deposit liquefaction during earthquakes <i>K.Hayashi, N.Ohbo, K.Ueno, J.H.Prevost &amp; R.Popescu</i>	1373
The mathematical model for liquefaction induced slip <i>S.Şener &amp; Z.Hasgür</i>	1379
Evaluation of liquefaction due to surface wave prospecting and its application <i>T.Takaya, T.Imasato &amp; S.Hattori</i>	1383
Application of strain approach for investigation of post-initial liquefaction behaviour of soils <i>K.V.Talaganov</i>	1389
Settlement characteristics of sandy ground improved by gravel drain system during earthquakes <i>M.Yoshida, M.Miyajima &amp; H.Oishi</i>	1395
Evaluation of lateral ground deformation using sliding block model <i>M.H.Baziar, R.Dobry &amp; M.Alemi</i>	1401
Earthquake induced displacements of soil-structures systems <i>P.M.Byrne, F.Salgado &amp; H.Jitno</i>	1407
Sand behaviour under irregular loading <i>X.Zhang &amp; Y.Li</i>	1413

Shaking table test on liquefaction of artificially cemented sands <i>K.Zen, H.Yamazaki, M.Toriihara &amp; T.Mori</i>	1417
Piezocene testing of liquefaction sites: Normalization of excess pore pressure <i>J.B.Berrill, J.Canou, P.Foray &amp; J.-L.Pautre</i>	1421
Experimental study on reliquefaction potential of saturated sand deposit <i>S.Ôhara, T.Yamamoto &amp; H.Yurino</i>	1425
Simplified method of liquefaction hazard evaluation for subsurface layers <i>J.Kuwano, K.Ozaki &amp; S.Nakamura</i>	1431
Liquefaction at Moss Landing during the 1989 Loma Prieta earthquake <i>L.H.Mejia, D.K.Hughes &amp; J.I.Sun</i>	1435
Soil liquefaction potential evaluation with use of the spectrum at depth <i>D.Benouar &amp; E.Yanagisawa</i>	1441
In situ $V_s$ of gravelly soils which liquefied <i>R.D.Andrus, K.H.Stokoe II, J.A.Bay &amp; T.L.Youd</i>	1447
Liquefaction potential of fine granular soils in Western Andalucía (Spain) <i>G.Armijo Palacio &amp; P.Sola Casado</i>	1453
Evaluation of liquefaction potential in Memphis area, USA <i>H.Hwang &amp; C.S.Lee</i>	1457
Centrifuge tests on improved ground for liquefaction <i>R.Babasaki, K.Suzuki &amp; Y.Suzuki</i>	1461
Effectiveness of top-shaped concrete blocks in reducing settlement in ground liquefied by an earthquake <i>H.Nagase, S.Yasuda, M.Hakuno, S.Kobayashi &amp; T.Yoshida</i>	1465
Appropriate countermeasures against permanent ground displacement due to liquefaction <i>S.Yasuda, H.Nagase, H.Kiku &amp; Y.Uchida</i>	1471
Quantitative evaluation of stone column techniques for earthquake liquefaction mitigation <i>J.I.Baez &amp; G.R.Martin</i>	1477
Protection of buried structures from soil liquefaction hazard by means of cutoff walls <i>Y.Yoshimi, K.Tamaoki, N.Mori &amp; T.Kondo</i>	1485
Liquefaction of granular soils with non-cohesive and cohesive fines <i>K.T.Law &amp; Y.H.Ling</i>	1491
Liquefaction potential evaluation: Under and over-estimation hazards <i>S.M.Simeonov &amp; K.D.Hadjiyski</i>	1497
Spatial characteristics of soil liquefaction and induced behavior of underground pipelines <i>H.Matsumoto &amp; K.Tokida</i>	1503
Experimental study on liquefaction-induced large ground deformation <i>M.Miyajima &amp; M.Kitaura</i>	1511

## 6 Soil-structure interaction: Foundations

### 6.1 Theoretical analysis

Evaluation of Green's function on semi-infinite elastic medium <i>T.Kobayashi &amp; F.Sasaki</i>	1519
A simplified method of obtaining interaction stiffnesses associated with the embedment of structures <i>Y.Ikeda, Y.Shimomura &amp; H.Tajimi</i>	1525
Dynamic response of soil structure interaction – A simple method for calculating the dynamic compliance function of soils <i>H.Yu, H.Sogabe &amp; T.Odaka</i>	1531
Nonlinear vertical vibration of rectangular foundations <i>R.I.Borja, W.-H.Wu &amp; H.A.Smith</i>	1537
Importance of soil damping idealization in soil-structure interaction computations <i>R.Zinn &amp; F.Stangenberg</i>	1543
Radiation damping during in-plane building-soil interaction <i>M.I.Todorovska</i>	1549
Rocking response of arbitrarily shaped rigid bases allowed to uplift <i>K.Imamura &amp; H.Kawakami</i>	1555
Probabilistic seismic response of inelastic building foundation systems <i>E.Bazán-Zurita, J.Bielak, I.Díaz-Molina &amp; N.C.Bazán-Arias</i>	1559
Dam response to incoherent ground motions <i>O.Ramadan &amp; M.Novak</i>	1567
Experimental study of dam-water-foundation interaction <i>Y.Ghanaat, R.W.Clough &amp; B.B.Redpath</i>	1573
Theoretical assessment of soil-structure interaction effect at bridge structure <i>N.Yamashita, T.Harada &amp; T.Wakahara</i>	1579
Dynamic uplift analysis of liquid storage tanks <i>G.Lin &amp; R.Zhang</i>	1583
Nonlinear numerical simulation of two-dimensional soil structure model test by shaking table <i>K.Nishi &amp; M.Kanatani</i>	1589
Analysis/test correlation of a model containment structure subjected to seismic excitation <i>S.N.Dermizakis &amp; M.A.Manrique</i>	1595
Modeling of layered soil-structure interaction by infinite elements <i>F.Medina</i>	1601
Experimental and analytical investigation of Paks NPP building structures <i>T.Katona, L.Turi, A.Halbritter &amp; N.J.Krutzik</i>	1609

## 6.2 Numerical modelling

- Seismic analysis of rectangular tunnels in soft ground 1619  
*J.Penzi, C.H.Chen, W.Y.Jean & Y.J.Lee*
- A study on impedance functions and input motions of embedded foundations by a hybrid approach 1625  
*I.Takahashi, K.Yoshida & S.Nakai*
- Insights on 2D vs. 3D-modelling of surface foundations 1633  
*J.W.Meek & J.P.Wolf*
- An approximate analysis method of embedded foundations considering backfilled soil 1639  
*K.Yoshida & I.Takahashi*
- Dynamic-stiffness matrix of unbounded soil by finite-element cloning 1645  
*J.P.Wolf & C.Song*
- Soil-structure interaction effects on structural pounding 1651  
*G.Schmid & N.Chow*
- Criteria for the validation of Oasys DYNA3D for the analysis of dynamic soil-structure interaction 1657  
*Z.A.Lubkowski & J.W.Pappin*
- ## 6.3 Embedded and earth retaining structures
- Some remarks on retaining wall design under seismic conditions 1665  
*A.L.Simonelli & C.Viggiani*
- Earthquake response of retaining walls: Full scale testing and computational analysis 1671  
*A.-W.M.Elgamal & S.Alampalli*
- Behavior of the cantilever retaining wall under seismic loadings 1677  
*M.Futaki & O.Sakaguchi*
- Evaluating tilt of gravity retaining walls during earthquakes 1683  
*A.S.Al-Homoud & R.V.Whitman*
- Seismic response of sheet pile walls 1689  
*W.D.L.Finn, G.Wu & N.Yoshida*
- Dynamic behavior of embedded structure on hard rock site 1695  
*T.Inukai, T.Imazawa, K.Kusakabe & M.Yamamoto*
- Experimental study on countermeasures for liquefaction by steel piles with drain 1701  
*H.Kita, T.Iida, M.Nishitani & S.Noda*
- Embedment effects on dynamic soil-structure interaction 1707  
*Y.Ohtsuka, A.Fukuoka, E.Yanagisawa & H.Fukudome*
- Partial embedment effects on soil-structure interaction 1713  
*T.Fujimori, M.Izumi, T.Tsunoda & K.Akino*
- Seismic response characteristics of embedded structures considering cross interaction 1719  
*A.Imamura, T.Watanabe, M.Ishizaki & M.Motosaka*
- Dynamic characteristics of irregularly embedded foundation 1725  
*O.Kurimoto, T.Seki & Y.Omote*

Seismic design of buildings with multi-level basements <i>C.Soydemir &amp; M.Celebi</i>	1731
Study on dynamic earth pressure through observation <i>M.Hirota, M.Sugimoto &amp; S.Onimaru</i>	1735
 6.4 <i>Dynamic analysis of piles</i>	
Pile-soil modeling in liquefied sand layer in aseismic design method <i>K.Kobayashi, N.Yoshida &amp; S.Yao</i>	1743
Dynamic behavior of pile group in liquefied sand deposit <i>Y.Miyamoto, Y.Sako, K.Miura, R.F.Scott &amp; B.Hushmand</i>	1749
Lateral bearing capacity of embedded foundation under sinusoidal excitation <i>N.Taga, K.Imaoka &amp; H.Matsuzawa</i>	1755
Lateral pile response in liquefying sand <i>T.Kagawa</i>	1761
Seismic response analysis of grouped pile embedded foundation by substructure method <i>S.Takano, Y.Yasui &amp; H.Maeno</i>	1767
A simplified estimation of impedances for pile groups under vertical and horizontal vibrations <i>H.No Zoe &amp; T.Fukusumi</i>	1771
Influence of soil liquefaction on dynamic response of structure on pile foundation <i>S.Mori, T.Ikeda, Y.Takimoto, M.Muto &amp; T.To haya</i>	1777
Full scale vibration test on pile-structure and analysis <i>K.Yahata, O.Inada, F.Mori, M.Tuzuki, Y.Naito, K.Urao &amp; T.Nakayama</i>	1781
Field testing and analysis of dynamic loaded pile group <i>M.Tuzuki, O.Inada, M.Yamagishi, K.Yahata, Y.Naito &amp; E.Kitamura</i>	1787
Measured and analytical response of a pile supported building <i>H.Aktan, T.Kagawa, A.Kambhatla &amp; M.Celebi</i>	1791
Vibration analysis of liquid-storage tank-pile-soil under seismic excitation <i>X.Jiang &amp; X.Ding</i>	1797
Dynamic behaviors of a composite foundation <i>K.Urao, K.Masuda, E.Kitamura, Y.Miyamoto &amp; A.Fukuoka</i>	1801
Nonlinear seismic behavior of pile foundation structure systems <i>T.Tazoh &amp; K.Shimizu</i>	1807
Dynamic response of soil-pile-building interaction system in large strain levels of soil <i>S.Tamori &amp; Y.Kitagawa</i>	1811
A practical method of obtaining dynamic interaction of soil and embedded cylindrical structure in consideration of its backfill effects <i>Y.Shimomura, Y.Ikeda &amp; H.Tajimi</i>	1817
Dynamic effects of backfill and piles on foundation impedance <i>H.Mizuno &amp; M.Iiba</i>	1823

## 6.5 Experimental techniques and verification

- Earthquake observation of deeply embedded building structure 1831  
*M.Watakabe, H.Matsumoto, K.Ariizumi, Y.Fukahori, Y.Shikama, K.Yamanouchi & H.Kuniyoshi*
- Seismic analysis of nonlinear soil-structure interaction systems using a hybrid experiment 1839  
*K.Toki & J.Kiyono*
- Development of hybrid experiments for nonlinear seismic soil-structure interaction 1845  
*M.Yoshikawa, G.Nozar Kishi & M.Arano*
- Static tests of concrete block on gravel deposits 1853  
*K.Mori, N.Hayashi, T.Kishimoto, Y.Kiyota, S.Nakayama & A.Enami*
- Dynamic tests of concrete block on gravel deposits 1859  
*S.Uchiyama, Y.Suzuki, T.Konno, S.Iizuka & A.Enami*
- Shaking table test and 2D nonlinear analysis for sand-structure system 1865  
*A.Ohtsuki, K.Yokoyama, M.Sato & K.Fukutake*
- Cyclic deformation properties of gravel deposits 1873  
*K.Muroi, M.Nakamura, S.Uchiyama, K.Kitazawa, Y.Suzuki, M.Yamamoto, T.Shimizu, K.Nagai, K.Akino & M.Watabe*
- Tests on dynamic interaction between foundations 1879  
*R.Shohara, Y.Shinozaki, D.Sakamoto & I.Kurosawa*
- On identification of soil-structure interaction from recorded motions of buildings 1885  
*E.Şafak*
- Concrete frame under incident seismic wave 1891  
*W.Sarfeld, S.Savidis & C.Vrettos*
- Sway-rocking model for simulating nonlinear response of sandy deposit with structure 1897  
*K.Ishimura, A.Ohtsuki, K.Yokoyama & Y.Koyanagi*
- Soil-structure interaction effects in a building 1905  
*D.Murià-Vila, R.González Alcorta & J.M.Espinosa Aranda*
- Partial-embedment test on soil-foundation interaction 1911  
*K.Moriyama, T.Minami, T.Taira & H.Hibino*

## 6.6 Foundation analysis and design

- Dynamic characteristics of steel pipe piled well foundations 1919  
*K.Uno, T.Aso, H.Tsutsumi, S.Kitagawa & T.Morikawa*
- Seismic analysis of circular foundation plates of variable thickness 1923  
*E.B.Koreneva*
- In-situ vibration tests and numerical analysis of embedded foundations 1927  
*S.Katano & T.Ogawa*
- Effect of friction and restitution on rocking response 1933  
*H.W.Shenton III & N.P.Jones*
- Seismic analysis of underground structures 1939  
*C.Navarro*

Improvement of plastic deformability of high-strength prestressed concrete piles under axial and lateral forces <i>M.Horii, S.Hayashi &amp; S.Kokusho</i>	1945
Seismo-isolating supports for dwellings <i>A.M.Kurzanov &amp; N.N.Skladnev</i>	1951
Lateral resistance of standing pipes <i>T.Niuro, E.Kuribayashi &amp; H.Komatsu</i>	1955
Vibration test of bridge pier with large-scale group-pile foundation and analysis <i>Y.Fuse, E.Ashihara, T.Kikuchi &amp; Y.Goto</i>	1961
Impedance functions of strip foundations on fluid-saturated porous media <i>A.M.Kaynia &amp; A.R.Khoei</i>	1967
Author index for Volume 3	1973
