

PROCEEDINGS

of the

TENTH

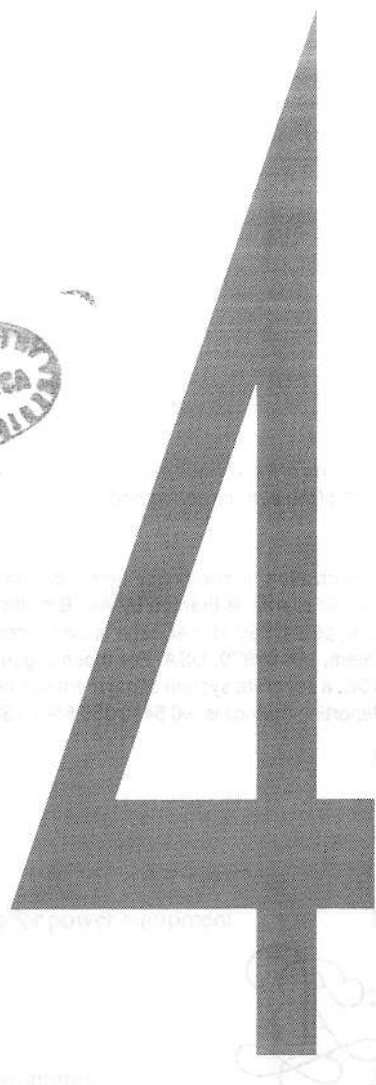

WORLD

CONFERENCE

on

EARTHQUAKE

ENGINEERING

19-24 July 1992

Madrid

Spain

Organized by

Asociación Española de Ingeniería Sísmica

Sponsored by

International Association for Earthquake Engineering

Published by

A.A.Balkema / Rotterdam / Brookfield / 1992

Contents of Volume 4

7 Seismic isolation

7.1 Fundamentals of seismic isolation

Developments in understanding, analysing and designing structures with aseismic isolation <i>R.I.Skinner, G.H.McVerry & W.H.Robinson</i>	1977
Base isolation: Fresh insight <i>V.Shustov</i>	1983
Screening of surface waves by composite wave barriers <i>E.N.Its & J.S.Lee</i>	1987
Optimum damping in base-isolated structures <i>J.A.Inaudi & J.M.Kelly</i>	1993
Theoretical study and development of new base-isolation systems for power equipment <i>H.Suzuki, N.Kaizu, M.Takeuchi & K.Takahashi</i>	1999
Study on soft-landing mechanism in base-isolation device <i>T.Nakamura, T.Tsunoda, A.Teramura & M.Ohhira</i>	2005
Seismic response of equipment in resilient-friction base isolated structures <i>K.-M.Lei & A.G.Hernried</i>	2013
The effect of vibroreplacement and efficiency of the base-isolation sliding-bearing system <i>L.Sh.Kilimnik & N.V.Bryantseva</i>	2019
Comparative study of isolated structures <i>S.E.Ruiz, A.Sosa & R.González-Alcorta</i>	2021
Rehabilitation of the Mackay School of Mines, Phase III, with base isolation <i>D.Way & J.Howard</i>	2027
Base-isolation: Reliability for different design criteria <i>P.E.Pinto & I.Vanzi</i>	2033
Applications of seismic isolation in the USSR <i>J.M.Eisenberg, A.M.Melentyev, V.I.Smirnov & A.N.Nemykin</i>	2039

7.2 Control systems

- A study of structural control using viscoelastic material 2047
A.Kirekawa, Y.Ito & K.Asano
- Modal seismic response control of high-rise building by active tuned mass damper 2055
H.Abiru, M.Fujishiro & T.Matsumoto
- Design and analysis of a tall building with an active mass damper 2061
H.Kitamura, T.Fujita, T.Teramoto & T.Yamane
- Control devices optimal installment for the new vibration control system of multi-structure connection 2069
J.Teng & J.Liu
- Active mass damper using multistage rubber bearing and hydraulic actuator 2073
T.Fujita, T.Kamada, N.Masaki & Y.Suizu
- Mass damper with convertible active and passive modes for response control of buildings 2079
T.Fujita, S.Takanashi, K.Matsumoto, M.Kinoshita & H.Miyano
- Predictive control of structures with reduced number of sensors and actuators 2085
F.López-Almansa, R.Andrade & J.Rodellar
- Active vibration control for high-rise buildings 2091
T.Suzuki, M.Kageyama, A.Nohata, K.Yoshida & T.Shimogo
- Development of high damping rubber damper for vibration attenuation of high-rise buildings 2097
S.Fujita, T.Fujita, O.Furuya, S.Morikawa, Y.Suizu, T.Teramoto & H.Kitamura
- Effectiveness of realized AMD response-control system 2103
Y.Ikeda, T.Kobori, K.Yamada & N.Koshika
- Frequency-response functions on uniform building with seismic response active control using the hybrid system 2109
T.Arakawa & T.Koh
- New methods in the intelligent control of building structures subjected to strong earthquake ground motion 2113
F.E.Udwadia
- Hybrid control of sliding structures 2119
S.M.Qureshi, H.Tsutsumi, S.Kitagawa, S.Adachi & Y.Fujio
- A study of applicability of vibration control to nonlinear structure for seismic excitation 2125
S.Shimada, S.Noda, T.Fujinami, S.Nakanowatari & S.Jodai
- Full-scale implementation of active structural control 2131
T.T.Soong, A.M.Reinhorn, Y.P.Wang, R.C.Lin & M.Riley
- Effects of soil-structure interaction on the seismic response of structures subjected to active control 2137
H.L.Wong & J.E.Luco
- Active control of the seismic response of tall non-uniform buildings 2143
J.E.Luco & A.Mita
- Reliability problem of active control algorithms caused by time delay 2149
Z.Hou & W.D.Iwan

Optimal adaptive and predictive control of seismic structures by fuzzy logic <i>A.Tani, H.Kawamura & Y.Watari</i>	2155
A study on inter-building coupling behavior with link-members <i>K.Sera, T.Nagao, S.Sudo, Y.Kitakawa & Y.Matsusima</i>	2161
Optimum design of connecting elements in complex structures and its application to aseismic design of boiler plant structures <i>E.Nishida, K.Suzuki, T.Yasuda & Y.Ohwa</i>	2167
Seismic response control of a piping system using a semiactive damper with piezoelectric actuators <i>H.Shimoda, K.Ohmata & F.Okamoto</i>	2173
Modeling unknown structural systems through the use of neural networks <i>A.G.Chassiakos & S.F.Masri</i>	2179
Advanced control for a super high rise building <i>H.Kanoh, N.Abe, T.Arakawa & T.Koh</i>	2185
Direct output feedback control for multiple-degree-of-freedom seismic structures <i>C.C.Lin, S.Y.Chu & L.L.Chung</i>	2191
7.3 Isolation techniques in civil engineering	
Seismic isolated bridges structures in Italy <i>M.Mezzi & A.Parducci</i>	2199
Seismic verification of foundation blocks in bridge structures <i>A.Ercolano & N.M.Auciello</i>	2205
Seismic response control of RC bridges with isolation and energy absorption elements <i>V.Micov, D.Ristic & J.Petrovski</i>	2209
Seismic protection of bridges by the viscoelastic technique <i>A.Grenier</i>	2215
Development of knock-off abutment for base isolated bridges <i>Y.Goto, T.Kikuchi & Y.Ina</i>	2221
The evolution of seismic devices for bridges in Italy <i>R.Medeot & L.Albajar</i>	2227
Substructured hybrid loading tests of high-damping rubber seismic isolators for inelastic earthquake response of bridge structures <i>W.Tanzo, Y.Yamada, Y.Uno & S.Nakamura</i>	2233
Test and analysis of bridge vibration isolation <i>W.Zhao, K.Qi, W.Zhang & Z.Fu</i>	2237
Seismic response of offshore platform with TMD <i>K.Kawano, K.Furukawa & K.Venkataramana</i>	2241
A seismic isolation measure for dams <i>L.Li</i>	2247
Foundation work for reduction of earthquake response <i>K.Miura, Y.Kiyota, Y.Suzuki, M.Nagano & K.Ishimura</i>	2251

7.4 Isolation methods and devices

- Evaluation of ultimate capacity for seismic isolation layer considering randomness of rubber bearing 2259
K.Hirata, T.Somaki, H.Tomura & K.Shirahama
- Mechanics of elastomeric seismic isolation bearings 2265
R.Shepherd & L.J.Billings
- Shaking table test on ultimate behavior of seismic isolation system 2271
Part 1: Outline of the test and response of superstructure
M.Moteki, N.Kawai, K.Ishida, S.Yabana & O.Nojima
- Failure test of laminated rubber bearings with various shapes 2277
K.Mizukoshi, A.Yasaka, M.Iizuka & K.Takabayashi
- Experimental studies of the mechanical characteristics of three types of seismic isolation bearings 2281
I.D.Aiken, J.M.Kelly, P.W.Clark, K.Tamura, M.Kikuchi & T.Itoh
- Development of seismic isolation system for light equipment using friction pendulum bearings 2287
Y.Morikawa, S.Fujita, S.Nagata & I.Shimoda
- Development of isolation system for ambient micro-vibration and earthquake using multi-stage rubber bearings and high damping rubber damper 2291
H.Yanbe, S.Fujita, N.Masaki & M.Ohta
- Design of 3-D earthquake isolation floor applied to a large room housing computers 2295
H.Sugimoto, K.Naruse & Y.Seko
- Seismic isolation of the ancient Bell-Tower of Melfi 2301
F.Braga & G.Zampino
- Recent developments in seismic isolation in New Zealand 2305
D.J.Dowrick, W.J.Cousins, W.H.Robinson & J.Babor
- Tuned Mass Damper for long-period buildings 2311
Y.Haga, H.Ishibashi, H.Matsuzaki & T.Kato
- Seismic control of multi-storied buildings by means of accelerated liquid mass damper 2319
S.Kawamata
- Effective energy absorbing unit made of natural materials in seismic isolation systems 2325
T.A.Sandovich & I.M.Izenberg
- Development of a lead rubber bearing with a stepped plug 2327
I.Shimoda, Y.Takenaka, A.Yasaka & M.Ikenaga
- Hybrid isolation system using friction-controllable sliding bearings 2333
Part 1: Outline of the system
S.Kawamura, M.Shinozuka, Q.Feng & S.Fujii
- Seismic response control by 'mode(s)-isolation' method 2337
Part II: Control of a tall building by tuned multi-masses damper system
T.Niiya, S.Ishimaru, N.Yamaguchi & T.Hayashida
- Development and application of hysteresis steel dampers 2341
T.Kobori, Y.Miura, E.Fukuzawa, T.Yamada, T.Arita, Y.Takenaka, N.Miyagawa, N.Tanaka & T.Fukumoto

Application of the active mass driver (AMD) system to structural active seismic response control <i>K.Toyama, K.Ishii, K.Igarashi, M.Sakamoto, N.Koshika, K.Sasaki & T.Kobori</i>	2347
Mathematical modelling of non-linear viscous damping of dashpots used in vibration base isolation <i>O.Mitrovic-Jovanovic & D.Jurukovski</i>	2353
Hybrid mass damper system for response control of building <i>K.Maebayashi, K.Shiba, A.Mita & Y.Inada</i>	2359
 <i>7.5 Experimental and analytical studies</i>	
Experimental and numerical analysis of isolated structures <i>F.Bettinali, M.Forni, A.Martelli & G.Pucci</i>	2367
Seismic analysis of frames with viscoelastic beam-column connections <i>S.Y.Hsu & A.Faftis</i>	2373
Seismic behaviour of base isolated structures with nonlinear behaviour <i>L.M.Guerreiro & J.J.Azevedo</i>	2379
Experiments on seismic isolation bearings <i>A.Martelli, M.Indirli, B.Spadoni, F.Bettinali, G.Bonacina & A.Marioni</i>	2385
Bases of engineering analysis of elastometric seismic insulators <i>M.A.Dashevskiy & Ye.M.Mironov</i>	2391
Dynamic ultimate analysis of base-isolated system <i>J.Suhara, M.Takeda, T.Tamura, T.Mazda, K.Yoshikawa, Y.Takenaka & E.Tanaka</i>	2395
Spectrum analysis of nonlinear isolated structures <i>R.Mirghaderi & F.Behnamfar</i>	2401
Implications of shaking table tests in the analysis and design of base isolated structures <i>G.Serino, G.Bonacina & B.Spadoni</i>	2405
Shaking table test on ultimate behavior of seismic isolation system Part 2: Response behavior of rubber bearings <i>K.Ishida, H.Shiojiri, G.Yoneda & A.Matsuda</i>	2411
Hybrid isolation system using friction-controllable sliding bearings Part 2: Shaking table test <i>S.Fujii & Q.Feng</i>	2417
Seismic response control by 'mode(s)-isolation' method Part I: Control method and its verification experiments <i>S.Ishimaru, T.Niiya, N.Yamaguchi & M.Kawakubo</i>	2421
Base-isolation system using short columns and dampers <i>F.Olariu & I.Olariu</i>	2425
A study on system identification of high voltage circuit breaker and lightning arrester with isolator and their aseismic behavior <i>B.Zhu & X.Xu</i>	2429

Damping effects of a vibration control damper using sloshing of water <i>H.Kosaka, T.Noji, H.Yoshida, E.Tatsumi, H.Yamanaka & A.K.Agrawal</i>	2435
Structural control for seismic load using viscoelastic dampers <i>H.Yokota, Y.Ogawa, M.Saruta, Y.Fujita, Y.Nakamura, N.Satake & K.Okada</i>	2441
 <i>7.6 Base isolation of buildings</i>	
Optimal design of seismic isolation for multistoried buildings <i>F.L.Zhou, J.M.Kelly, K.N.G.Fuller & T.C.Pan</i>	2449
Seismic performance of buildings with energy dissipating systems <i>J.M.Jara, E.Vargas, C.Galindo, R.González & C.Gómez</i>	2455
Analytical model for viscoelastic dampers in seismic mitigation application <i>H.H.Lee & Ch.-S.Tsai</i>	2461
Experimental study and analytical prediction of response of spring-viscous damper isolation system <i>N.Makris & M.C.Constantinou</i>	2467
Dynamic behaviour of isolated buildings <i>F.Vestroni, D.Capecchi, M.Meghella, G.Mazzà & E.Pizzigalli</i>	2473
Experiments of base isolation with full-scale building <i>T.Tanabe, Y.Ebara, T.Matutani, T.Ono, H.Yokoyama, Y.Yamada, A.Fujii, H.Tada & M.Takayama</i>	2479
Relative performance of fixed and isolated structures <i>A.N.Lin, H.W.Shenton III & H.S.Lew</i>	2485
Base isolation response to extreme ground motions <i>T.L.Anderson, R.E.Bachman & P.R.Grant</i>	2491
Development and application of back-up systems for base-isolated buildings <i>Y.Mitsusaka & M.Miyazaki</i>	2495
Research of sliding shock absorbing of multi-storey brick buildings <i>Y.Lou, M.Wang & Z.Su</i>	2499
Design of a base isolated confined masonry building <i>M.Sarrazin & M.O.Moroni</i>	2505
Dynamic characteristics of base-isolated shear buildings <i>T.-C.Pan</i>	2509
Base isolation system for houses <i>K.Hagio, K.Kitazawa & I.Nagashima</i>	2515
Building isolation using the transmitting behaviour of a soil layer <i>N.Chouw & G.Schmid</i>	2519
Author index for Volume 4	2525
