

PROCEEDINGS
of the
TENTH
WORLD
CONFERENCE
on
EARTHQUAKE
ENGINEERING

19-24 July 1992
Madrid
Spain

Organized by
Asociación Española de Ingeniería Sísmica

Sponsored by
International Association for Earthquake Engineering

Published by
A.A.Balkema / Rotterdam / Brookfield / 1992

Contents of Volume 5

8 Constitutive modelling under earthquake loading

8.1 Soils

- A constitutive model for sand based on the non-linear kinematic hardening rule and its application 2529
F.Oka, A.Yashima, M.Kato & K.Sekiguchi
- Soil liquefaction and failure under earthquake loading 2535
M.Pastor, O.C.Zienkiewicz & G.D.Xu
- The dynamic constitutive model of loess under irregular seismic loading 2543
L.Wang, Z.Zhang & J.Wang
- A multiple shear mechanism model for sand 2549
S.Iai, Y.Matsunaga, T.Kameoka & T.Inatomi
- Incremental constitutive law for sand: Anisotropic and cyclic effects 2555
H.Di Benedetto, O.Hameury & G.B.Cazacliu
- Numerical simulation of a cyclic pressuremeter test 2561
A.Saitta, J.Canou, L.Dormieux & K.Sab
- A constitutive model for Champlain Sea clay under cyclic load 2567
X.Y.Wu, K.T.Law & A.P.S.Selvadurai

8.2 Concrete and masonry

- A predictive model for hysteretic failure parameters 2575
W.C.Stone & A.W.Taylor
- Finite element analysis of shear resistance of masonry wall panels with and without confining frames 2581
P.B.Shing, H.R.Lotfi, A.Barzegarmehrabi & J.Brunner
- Dynamic analysis of a strain softening bar 2587
Pankaj & S.Parkash
- A damage model for the seismic analysis of building structures 2593
S.Oller, A.H.Barbat, E.Oñate & A.Hanganu
- Compressive test on high-strength R/C columns and their analysis based on energy concept 2599
Y.Itakura & A.Yagenji

Lateral pressure requirement for compressive concrete <i>S.Hatanaka & Y.Tanigawa</i>	2603
Strength and ductility of confined high strength concrete <i>D.Galeota, M.M.Giammatteo & R.Marino</i>	2609
Rotative behavior at a discrete section in RC members caused by opening and closing behavior of cracks under reversed cyclic loading <i>H.Fukuyama & Y.Matsuzaki</i>	2615
Behaviour of composite members subjected to earthquake loading <i>A.Y.Elghazouli & P.J.Dowling</i>	2621
Modelling anchorage slip for dynamic analysis <i>J.M.Alsiwat & M.Saatcioglu</i>	2627

9 Experimental methods of structure and elements, benchmarks and databanks

9.1 Experimental techniques and equipment

Development of a compact, experimentally testing system for active control algorithms of building vibration <i>E.Tachibana, Y.Inoue & Y.Yamada</i>	2637
A one-well device for dynamic soil testing <i>J.P.Touret, A.Montiel & P.Jouanna</i>	2643
Development of accurate pseudodynamic test method for R/C structures <i>A.Machida & H.Mutsuyoshi</i>	2647
Testing of full scale shear wall structures under seismic load <i>A.Igarashi, F.Seible & G.A.Hegemier</i>	2653
Experimental study of shear wall and infilled frame on shake-table <i>T.C.Liau & A.K.H.Kwan</i>	2659
Response measurements of a tall building under seismic excitation <i>N.Rodríguez-Cuevas</i>	2665
On the use of free vibration procedures for dynamic properties evaluation <i>C.Genatios, M.Lafuente & M.Lorrain</i>	2673
A new experimental set-up for high shear loading of reinforced concrete walls <i>M.S.Lopes & A.S.Elnashai</i>	2679
Signal reproduction fidelity of servohydraulic testing equipment <i>D.A.Kusner, J.D.Rood & G.W.Burton</i>	2683
Dynamic characterization of Talvacchia dam: Experimental activities, numerical modeling, monitoring <i>M.Fanelli, G.Giuseppetti, A.Castoldi & P.Bonaldi</i>	2689
Full-scale dynamic testing of the second Bosphorus suspension bridge <i>J.M.W.Brownjohn, A.A.Dumanoglu & R.T.Severn</i>	2695
Experimental analysis of one-tenth scale reinforced concrete model of a ten storey building <i>P.Bonelli & R.Tobar</i>	2701

An experimental study on the stability of cracked piping system supported by a nonlinear support <i>T.Chiba, H.Kobayashi, N.Ogawa, C.Minowa & H.Shibata</i>	2707
Evaluation of cracked and repaired beams and columns using surface stress waves <i>B.R.Bowen & K.H.Stokoe II</i>	2713
Three-dimensional stress and strain detection by photoelasticity using laser-light-sheet <i>J.D.Ortiz, C.Tamura & K.Konagai</i>	2719
Use of experimental data to develop probable behavior for structural components <i>W.K.Hong & G.C.Hart</i>	2725
Visualization and analysis of dynamic behavior of underwater granular structure models <i>K.Konagai & C.Tamura</i>	2731
Recursive system identification in earthquake engineering <i>M.Shinozuka, R.G.Ghanem & H.Gavin</i>	2737
Comparison of different methods in seismic qualification of electrical equipment <i>K.A.Kleine-Tebbe</i>	2743
The development of a quantitative concrete core tomography protocol for the design of concrete mixes <i>M.S.Agbabian, A.M.Abdel-Ghaffar, R.E.Leahy, S.F.Masri, Z.Zhou & C.E.Synolakis</i>	2749
A scaled-time test method <i>F.J.Molina & E.Alarcón</i>	2755
A new method for seismic analysis of light equipment: The forced structure modes method <i>M.Lebelle</i>	2763
9.2 Shaking table tests	
Shaking table tests of reinforced concrete small scaled model structures <i>F.Kumazawa & T.Okada</i>	2771
Shaking table tests for hydrodynamic pressure acting on double cylindrical caisson type breakwater in deep sea <i>T.Uwabe & M.Osada</i>	2775
Shaking table test of 1/40 scale model of 105-storey Ryugyong Hotel <i>L.Taskov, M.Petkovski, L.Krstevska & L.H.Ryol</i>	2781
Full scale dynamic test of the 105-storey Ryugyong Hotel in Pyongyang <i>M.Petkovski, L.Tashkov & C.S.Bom</i>	2789
Shaking table tests of three four-storey brick masonry models: Original and strengthened by RC core and by RC jackets <i>D.Jurukovski, L.Krstevska, R.Alessi, P.P.Diotallevi, M.Merli & F.Zarri</i>	2795
Shaking table tests for the seismic stability of caisson type quaywalls both in ordinary 1g field and in centrifugal field <i>T.Inatomi, M.Kazama & Y.Murakami</i>	2801
Simulation analyses on the shaking table test of scaled BWR model <i>K.Igarashi, N.Inoue, H.Morishita, N.Nakamura & N.Suzuki</i>	2807

Seismic tests of high voltage equipment in Argentine <i>J.S.Carmona, F.Zabala, J.Santalucía & C.Sisterna</i>	2811
Dynamic response of rigid bodies subjected to horizontal base motions <i>M.Demosthenous & G.C.Manos</i>	2817
Dynamic characteristics of large multiple degree of freedom shaking tables <i>A.J.Clark</i>	2823
Response of infilled frames with brickwalls to earthquake motions <i>P.G.Carydis, H.P.Mouzakis, J.M.Taflambas & E.A.Vougioukas</i>	2829
9.3 Steel members and joints	
Substructured hybrid loading tests of steel box-section columns for inelastic earthquake response of frame structures <i>Y.Yamada, H.Iemura & W.Tanzo</i>	2837
Behavior of the connection of R/C column with steel beams stiffened by reinforced concrete at beam ends <i>K.Watanabe, K.Ishibashi, Y.Nakanishi, A.Kurosawa & K.Kikukawa</i>	2845
Low-cycle fatigue resistance of welded joints of high-strength steel under earthquake loading <i>H.Kuwamura & T.Suzuki</i>	2851
Mechanical properties of welds of high quality steel by various welding methods <i>H.Kamura, H.Yamanouchi & T.Yamasaki</i>	2857
The effect of strain rate in steel structural joints due to high speed cyclic loadings <i>K.Suita, K.Kaneta & I.Khozu</i>	2863
Dynamic response of H-shaped steel beam-columns under two-directional ground motion <i>Y.Uchida, S.Morino, J.Kawaguchi & T.Koyama</i>	2867
Evaluation of the maximum strength of H-shaped steel beam-to-column connections <i>A.Matsuo, Y.Nakamura, R.W.Salib, Y.Mukudai & T.Takamatsu</i>	2873
Very low-cycle fatigue tests of steel angle members under earthquake loading <i>S.Iwai, Y.-S.Park, T.Nonaka & H.Kameda</i>	2879
Cyclic tests on large scale steel moment connections <i>M.D.Engelhardt & A.S.Husain</i>	2885
Local buckling and structural damage in steel members under cyclic loading <i>C.A.Castiglioni & P.L.Losa</i>	2891
Strength and ductility of thin-walled beam-columns with low yield steel and round corners <i>E.Watanabe, K.Sugiura & T.Yamaguchi</i>	2897
Seismic behavior of steel beam-to-box column connections <i>K.C.Tsai, K.C.Lin & M.C.Liu</i>	2903
Model of restoring force characteristics of X-steel braces <i>N.Tanaka, Y.Murazumi, T.Hirotani & M.Kato</i>	2911
Experimental analysis of cold-formed steel beam-to-column joints <i>C.Bernuzzi, F.P.De Martino & R.Zandonini</i>	2917

9.4 Steel frames

- Bi-component earthquake tests of model knee braced frames 2925
N. Bourahla & A. Blakeborough
- Study on restoring force characteristics of X-steel braces 2931
Y. Takahashi, N. Nakamura, B. Kato & T. Saeki
- Behavior of weak column strong beam steel frames 2937
S. P. Schneider & C. W. Roeder
- Pseudo-dynamic test on full-scale model of first-storey energy-concentrated steel structure 2943
with flexible-stiff mixed frames
S. Mase, Y. Yabe, H. Tsukagosi, T. Terada, T. Hirama & F. Ohtake
- Effect of collapse modes on ductility of steel frames 2949
C. Matsui & J. Sakai
- Analysis and tests of a partially restrained braced frame subjected to seismic loadings 2955
O. S. Bursi, K. H. Gerstle & P. B. Shing
- Inelastic response of steel structure subjected to two horizontal ground motions 2961
I. Kohzu, K. Kaneta, K. Suita & Y. Hyodo

9.5 Reinforced concrete columns

- Effect of external restraint on the behavior of confined concrete columns 2967
S. A. Sheikh
- Experimental studies on seismic behavior of reinforced concrete columns strengthened with NCS 2973
unit
H. Tsubosaki, R. Tamura & H. Tomatsuri
- Study on the formation of plastic hinges and the failure of reinforced concrete columns 2977
Y. Ro, N. Sato, H. Yashiro & T. Yasuo
- Monotonic axial compression test on ultra-high-strength concrete tied columns 2983
T. Nagashima, S. Sugano, H. Kimura & A. Ichikawa
- Axial stress ratio and drift allowed in R/C columns 2989
T. Takasaki & E. Inai
- Vertical splitting failure of high-strength RC columns after flexural yielding 2995
H. Sato & T. Kaminosono
- Experiments on the shear strength of ultra-high strength reinforced concrete columns 3001
H. Kuramoto & K. Minami
- Deformation properties and shear resistance mechanism of reinforced concrete column with high 3007
and fluctuating axial force
B. A. Lejano, N. Shirai, S. Amitu, H. Adachi & A. Ono
- Experimental studies on the collapse of RC columns during strong earthquake motions 3013
I. Kogoma, T. Hayashida & C. Minowa
- Response characteristics of reinforced concrete columns under bi-directional earthquake motions 3019
K. Kitajima, T. Koizumi, H. Akiyama, M. Kanda, M. Nakanishi & H. Adachi

A proposal of new R/C short columns as an aseismic element with high strength and energy absorption capacity <i>K.Kikuchi, K.Yoshimura, S.Ono & N.Yanagisawa</i>	3025
Ductility of reinforced concrete columns with various reinforcing arrangements <i>D.Kato</i>	3029
Dynamic response of circular bridge piers <i>L.L.Dodd & N.Cooke</i>	3035
RC columns in cyclic biaxial bending and axial load <i>S.N.Bousias, G.Verzeletti, M.N.Fardis & G.Magonette</i>	3041
Effect of strain rates on strength and mode of failure of R/C members <i>H.Hosoya, I.Abe, K.Yasui & Y.Funayama</i>	3047
Earthquake damage evaluation of reinforced concrete columns <i>J.Ogawa, J.Shibuya, M.Hoshi & Y.Abe</i>	3053
The effective cross section for strength and ductility <i>T.Hasegawa, E.Watanabe, K.Sugiura & S.Harimoto</i>	3059
Development of a specially designed high-strength transverse reinforcement for square concrete columns <i>M.Shibata, A.Nakazawa, J.Mihara, K.Masuo & K.Minami</i>	3065
Effects of reinforcement continuity and homogeneity lacks on the behaviour of reinforced concrete columns subjected to transverse actions <i>R.Nudo & G.Sara'</i>	3071
