

PROCEEDINGS
of the
TENTH
WORLD
CONFERENCE

on

EARTHQUAKE
ENGINEERING

19-24 July 1992

Madrid

Spain

Organized by

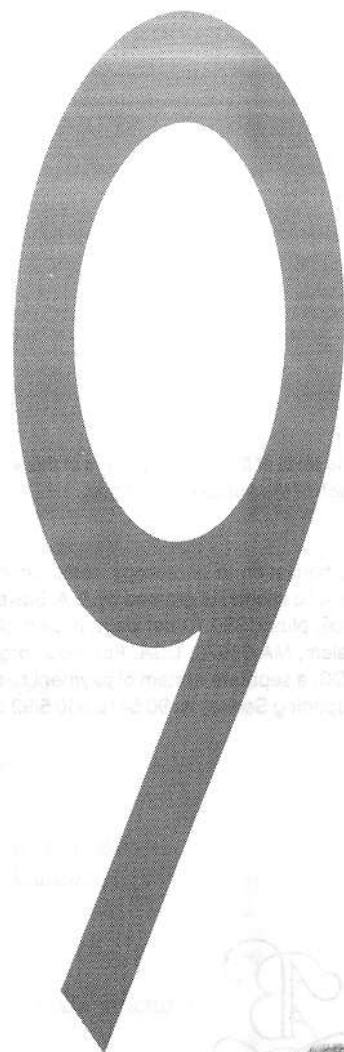

Asociación Española de Ingeniería Sísmica

Sponsored by

International Association for Earthquake Engineering

Published by

A.A.Balkema / Rotterdam / Brookfield / 1992

Contents of Volume 9

11 Special structures and industrial facilities

11.4 Nuclear power plants

Seismic analysis and design of nuclear power plants <i>A.C.Pal</i>	4911
Seismic safety against ultimate failure of nuclear containment structures <i>J.Mizuno & A.H.-S.Ang</i>	4917
Simulation analysis of vertical response of a nuclear reactor building <i>T.Watanabe, M.Hasegawa, Y.Hayashi, N.Kataoka & M.Mashimo</i>	4921
Vertical response characteristics of a nuclear reactor building during earthquakes <i>H.Morishita, M.Hirota, M.Mashimo, M.Hasegawa, Y.Hayashi & N.Kataoka</i>	4927
Study on failure mode of seismic isolated reactor building <i>M.Kato, Y.Watanabe & A.Kato</i>	4933
Study on construction system using PCa composite members for large scale structures <i>K.Sekiguchi, Y.Matsuzaki, S.Hashimoto & H.Kimura</i>	4939
Guidelines for seismic evaluation of nuclear facilities <i>C.J.Costantino, C.A.Miller, T.Cheng & G.Bagchi</i>	4945

11.5 Tanks

Behavior of reinforced concrete water towers during Manjil-Roudbar earthquake of June 1990 <i>A.M.Memari, M.M.Ahmadi & B.Rezaee</i>	4953
Seismic response characteristics of transmission towers <i>T.Suzuki, K.Tamamatsu & T.Fukasawa</i>	4961
Study of the vibratory characteristics of unanchored cylindrical liquid storage tank models <i>G.C.Manos</i>	4969
Fluid-structure interaction analysis for spent fuel storage structures <i>C.-B.Yun, Y.-S.Kim, J.-M.Kim, J.-W.Kim, J.-M.Seo & Y.-S.Choun</i>	4975
Dynamic buckling analysis for cylindrical shell due to random excitation <i>K.Fujita, T.Ito, K.Baba, M.Ochi & K.Nagata</i>	4981

About the earthquake response of the flexible storage tanks <i>N.Ungureanu & Al.Negoitǎ</i>	4989
Seismic capacity design of vertical pressure vessels <i>N.Shimizu</i>	4995
Earthquake resistant limit state design for cylindrical liquid storage tanks <i>H.Akiyama</i>	5001
Dynamic earth pressures acting on LNG in-ground storage tank during earthquakes <i>K.Koyama, N.Kusano, H.Ueno & T.Kondoh</i>	5005
Dynamic uplift analysis of unanchored cylindrical tanks <i>D.T.Lau, X.Zeng & R.W.Clough</i>	5011
11.6 Special structures and equipment	
Seismic design practices of industries <i>E.Arze L.</i>	5019
Free vibrations of submerged floating cylindrical shells <i>T.Mikami & J.Yoshimura</i>	5025
Dynamic behaviour of super deep vertical shaft during earthquake <i>N.Ohbo, K.Hayashi, K.Ueno & Y.Kaneko</i>	5031
Experimental and analytical studies of a smokestack <i>D.Zhang, Z.Wu, Z.Xiao & S.Wen</i>	5037
Seismic behaviour of tall industrial masonry chimneys <i>A.Ghobarah & T.A.Baumber</i>	5043
Seismic analysis of coke ovens batteries <i>R.Flores A., E.Arze L. & R.Flores C.</i>	5049
Seismic PRA of electric power supply systems <i>J.Tohma & T.Iwatate</i>	5055
Seismic design response of rotating machines <i>M.P.Singh, T.S.Chang & L.E.Suarez</i>	5059
Dynamic discrete modeling and computer simulation of seismic response of concrete stave silos with structural discontinuity <i>Y.Sasaki & J.Yoshimura</i>	5065
Earthquake disaster research of shaft and tunnel engineering in mining area <i>Z.Chen & D.Song</i>	5071
Seismic retrofitting of oil refinery equipment <i>O.A.Lopez, J.Grases, L.Boscan & M.Rojas</i>	5075
Structural reliability of platforms <i>P.M.Quijada, M.E.Martínez & R.González</i>	5079
Dynamic behavior of semigravity type offshore structure <i>N.Kusano, H.Yamamoto, K.Imai & K.Horikoshi</i>	5085
Notes on subsystems sizing criteria in active aseismic protection of strategic buildings <i>A.Carotti</i>	5091

12 Repair and retrofit of structures

12.1 General techniques of retrofitting

- Seismic upgrading of existing structures 5101
V.V.Bertero
- Reinforced concrete jacketing of existing structures 5107
A.Teran & J.Ruiz
- Post-earthquake countermeasures for damaged building in Shizuoka Prefecture 5115
Y.Kamiya, H.Saitou, T.Watanabe, T.Ozawa & Y.Yamazaki
- Strengthening of column splices in infilled shear walls 5121
R.Valluvan, M.E.Kreger & J.O.Jirsa
- Design principles concerning the strengthening of coupling beams 5127
D.F.Tudor & G.C.Ciuhandu
- Mechanical characteristics of steel column-base connections repaired by concrete encasement 5131
S.Nakashima
- Seismic evaluation, upgrading and retrofitting of structures: Recent experiences in Iran 5137
F.Nateghi-A & B.Shahbazian
- Retrofitting techniques used in telephone buildings in Mexico 5143
M.D.Canales, R.Briseño de la Vega
- Analytical study of seismically vulnerable RC buildings and their strengthening 5149
B.Chandra, P.R.Bose & B.C.Nath
- Rehabilitation of buildings using multiple levels of passive control 5155
H.E.Keshkar & R.D.Hanson
- Seismic rehabilitation of a shear wall building by means of base isolation 5159
G.C.Delfosse & P.G.Delfosse
- Seismic response of viscoelastically damped structure under strong earthquake ground motions 5163
S.-T.Oh, K.C.Chang, M.L.Lai & E.J.Nielsen
- Seismic response of steel-frame structures with added viscoelastic dampers 5169
K.C.Chang, T.T.Soong, S.-T.Oh & M.L.Lai

12.2 Reinforced concrete structures

- Retrofitting existing reinforced concrete structures 5177
D.Rodríguez M. & M.León O.
- Design of structural repair schemes for RC structures 5183
K.Pilakoutas & S.Dritisos
- Analysis of reinforced concrete frames retrofitted with steel brace 5187
Y.Yamamoto & H.Umemura
- Experimental study of new seismic strengthening method for existing RC structure 5193
Y.Tagawa, H.Aoki, T.Huang & H.Masuda

Post-tensioned bracing for seismic retrofit of RC frames <i>J.A. Pincheira & J.O. Jirsa</i>	5199
FRP strengthening of RC columns for seismic retrofiting <i>T. Yamamoto</i>	5205
Effective repair with resin for bond failure of RC members <i>A. Tasai</i>	5211
Repair and strengthening of reinforced concrete beams <i>D.P. Singh</i>	5217
Quantification of repair effect for RC members using inelastic earthquake response analysis <i>K. Izuno & T. Ohkawa</i>	5221
Cyclic loading tests of reinforced concrete column strengthened with steel tube <i>T. Fuse, K. Okuta, K. Hiramatsu, T. Ozawa & N. Hara</i>	5227
Rehabilitation of RC frame connections using jacketing <i>S.M. Alcocer</i>	5235
Post-installed anchor bolts subjected to tension <i>Y. Hosokawa</i>	5241
Fastening systems under seismic loading conditions <i>W.J. Ammann</i>	5247
A study on shear capacity of post-installed bonded anchors <i>T. Akiyama, M. Hirose, K. Imai, Y. Yamamoto & Y. Matsuzaki</i>	5253
Behaviour of RC frame models strengthened with walls <i>H. Ramirez-de-Alba, E. Martinez-Rueda & J. De la Colina-Martinez</i>	5257
Managing seismic risk: A case history of seismic retrofit for a non-ductile reinforced concrete frame high rise office building <i>W.E. Gates, M.R. Nester & T.R. Whitby</i>	5261
12.3 Bridges	
Retrofitting of an earthquake damaged reinforced concrete bridge <i>A.S. Arya, S.K. Thakkar & S.M. Bakir</i>	5269
Effect of second coming earthquake's waveform on dynamic behavior of repaired reinforced concrete bridge piers <i>K. Yokoi, H. Mizuguchi, H. Shima & R. Aki</i>	5275
Seismic inspection and seismic strengthening method of reinforced concrete bridge piers <i>S. Unjoh & K. Kawashima</i>	5279
Seismic retrofit of bridge columns using steel jackets <i>M.J.N. Priestley, F. Seible & Y.H. Chai</i>	5285
Behavior and retrofit of bridge outrigger beams <i>C.R. Thewalt & B.I. Stojadinović</i>	5291

12.4 Historical buildings and monuments

- Modelling of repair and retrofit of historical buildings in the Balkan region 5299
P.Velkov
- Seismic retrofit of historical buildings 5305
D.Pezzullo, F.Cavuoto, M.De Cunzo, M.Del Giudice & R.Sparacio
- Guidelines for decisions concerning monuments in Italy 5307
A.Corsanego & S.D'Agostino
- Seismic protection of monumental buildings in Italy 5311
R.Ballardini & C.Gavarini
- Control works on the tottering walls of the northern side of Calitri castle, Southern Italy 5317
E.Scire, V.De Nicola, M.Candela, G.Urciuoli, F.Rozza & E.Del Guercio
- The effect of interventions in the floor structural system on the seismic resistance of historic stone-masonry buildings: An experimental study 5321
M.Tomažević, T.Velechovsky & P.Weiss
- The analysis of the behaviour of some historical consolidated buildings made of brick masonry to repeated earthquakes 5327
S.D.Nour, M.Bărbuță & A.Mihul
- Ten years of cultural monuments rehabilitation in Dubrovnik 5333
D.Anicic
- The performance of San Francisco's earthquake-resistant city halls: The old city hall in the earthquake of 1906 and the new city hall in the earthquake of 1989 5337
S.Tobriner
- The repair and strengthening of the historic Stanford Memorial Church 5341
C.D.Poland & E.M.Reis
- Retrofit through base-isolation: S. Pietro-Frigento 5347
R.Sparacio, F.Cavuoto, I.Vanzi & G.Zampino
- ## 12.5 Special techniques of retrofitting
- Experimental analysis of a discontinuous wall-to-floor connection 5355
R.Antonucci & R.Giacchetti
- Seismic retrofit of liquid storage tanks 5361
G.Bureau & P.Kokkas
- Seismic pounding retrofits for closely spaced buildings 5367
F.M.Lavelle & R.H.Sues
- The design inquiry of liquefaction prevention of foundation using macadam wells of pressure-release and water-removal 5373
H.Yu
- Nonstructural approaches developed after the Loma Prieta earthquake 5377
R.Reitherman
- Criteria of seismic strengthening of equipment of a hospital in Italy 5383
T.Sano', G.Di Pasquale, G.Manieri & R.Sacchetti

Techniques used to repair seismic-resistant masonry walls <i>N.G.Maldonado & L.A.Olivencia</i>	5389
CenterCore seismic hazard reduction system for URM buildings <i>D.C.Breiholz</i>	5395
Observed effectiveness of minimal seismic strengthening of unreinforced masonry buildings <i>D.R.Bonneville & D.W.Cocke</i>	5401

13 Lifeline systems

13.1 Deterministic analysis

Behavior of buried pipelines subject to permanent ground deformation <i>M.O'Rourke & C.Nordberg</i>	5411
Stiffening effect of anti-liquefaction techniques for buried pipes <i>T.Akiyoshi, K.Fuchida, S.Shirinashihama & T.Tsutsumi</i>	5417
Tension/bending behaviour of buried pipelines subject to fault movements in earthquakes <i>T.Ariman & B.-J.Lee</i>	5423
Experimental and numerical studies on dynamic earth pressure acting on side walls of underground conduit <i>H.Watanabe & T.Suehiro</i>	5427
Simulation of effect of large movement of ground on underground pipe <i>M.Hakuno & T.Yamamoto</i>	5433
3-D responses of buried pipeline systems under earthquake wave propagation <i>Y.-A.He & J.-W.Liang</i>	5437
Large deformation analysis of buried pipelines <i>T.Koike, T.Imai & T.Kaneko</i>	5443
Performance of buried pipelines, subjected to fault movement <i>E.A.Vougioukas & P.G.Carydis</i>	5449
Interpretation of high pressure pipeline damage by liquefaction-induced ground movements <i>F.Miura, T.D.O'Rourke & M.Hamada</i>	5453
Earthquake response analysis of above-ground pipelines <i>P.Banerji & A.Ghosh</i>	5459
Seismic analysis and design consideration of an aqueduct on alluvial soil <i>R.Dubey & N.C.Singhal</i>	5465
Development of differential response spectra from spatial variability models <i>A.Zerva</i>	5469
Lifeline interaction and post-earthquake urban system reconstruction <i>R.H.Zhang</i>	5475
Seismic reliability assessment of power transmission networks by simulation technique <i>M.Ciampoli, R.Giannini & T.Pagnoni</i>	5481

Seismic response analysis for jointed buried pipeline by using shell FEM model <i>S.Takada & S.Higashi</i>	5487
The problem of transportation system reliable operation in seismic regions <i>G.S.Pereselenkov</i>	5493
 13.2 <i>Earthquake damage and measurements</i>	
On-line damage estimation for lifeline systems during earthquakes <i>L.Cret & T.Katayama</i>	5501
Earthquake damage analysis to telecommunication conduit in liquefied area <i>K.Yagi, T.Hashizume, S.Mataki & N.Suzuki</i>	5505
Experimental study on underground pipeline stabilizing techniques and their effectiveness during liquefaction <i>K.Sekiguchi & H.Oishi</i>	5511
Analysis of seismic ground and pipe strains observed in Chiba, Japan <i>C.A.Villacís & T.Katayama</i>	5517
Seismic performance investigation of a section of Bay Area Rapid Transit elevated structure during the 1989 Loma Prieta earthquake <i>W.S.Tseng & M.S.Yang</i>	5523
Buried pipeline system in a liquefaction environment <i>L.R.L.Wang & H.Zhang</i>	5529
Restoration work control system for earthquake damaged city gas pipelines <i>H.Kano, Y.Uragami & T.Iwata</i>	5535
Optimal strategy by use of tree structure for post-earthquake restoration of lifeline network systems <i>N.Nojima & H.Kameda</i>	5541
Dynamic behaviors of an earthquake-damaged viaduct before and after being mended <i>S.Komaki, H.Tanshou & H.Egami</i>	5547
Behavior of lifeline systems during Manjil-Iran earthquake of June 20, 1990 <i>S.Eshghi</i>	5553
New earthquake-induced ground motion severity sensing apparatus for reliable system shutdown <i>H.Nakane, E.Kodama & I.Yokoi</i>	5559
Seismic observation of a pipeline buried at the heterogenous ground <i>H.Ando, S.Sato & N.Takagi</i>	5563
An estimating method of predicted seismic ground motions and an arrangement of remote monitoring seismographs for early detection of earthquake-damages <i>T.Takatani, S.Takada, T.Fuke & S.Fukui</i>	5569
Observation on behaviors of buried pipelines and ground strain during earthquakes <i>T.Iwamoto, H.Inada & Y.Nemoto</i>	5575

13.3 Probabilistic design: Risk assessment

Seismic probabilistic reliability assessment of electric power transmission systems <i>A.H.-S.Ang, I.Yoshida, J.Pires, R.Villaverde, R.Schinzinger & I.Katayama</i>	5583
Seismic reliability analyses of large scale lifeline networks taking into account the failure probability of the components <i>T.Sato & K.Toki</i>	5591
Earthquake physical damage and serviceability of lifeline networks <i>H.Kawakami</i>	5597
Analysis of piping systems for non-stationary support excitation <i>H.O.Soliman & T.K.Datta</i>	5603
Evaluation of seismic risk on water supply pipelines <i>R.E.Torres-Cabrejos & C.E.Huaman-Egoavil</i>	5609
Author index for Volume 9	5613
