

PROCEEDINGS

of the

TENTH

WORLD

CONFERENCE

on

EARTHQUAKE

ENGINEERING

10

19-24 July 1992

Madrid

Spain

Organized by

Asociación Española de Ingeniería Sísmica

Sponsored by

International Association for Earthquake Engineering

Published by

A.A.Balkema / Rotterdam / Brookfield / 1992

Contents of Volume 10

14 Seismic codes and standards

14.1 *Seismic design methodology*

- | | |
|---|------|
| AIJ seismic design guidelines for RC buildings – Design of beam-column joints
<i>O.Joh, Y.Goto & T.Shibata</i> | 5617 |
| Outline of AIJ design guidelines for RC buildings
<i>S.Otani, T.Okada, T.Kubo & S.Nomura</i> | 5623 |
| On the draft of antiseismic construction standards in the Republic of Armenia
<i>E.E.Khachian</i> | 5629 |
| Frequency bandwidth of Vrancea earthquakes and the 1991 edition of seismic Code of Romania
<i>D.Lungu, T.Cornea & S.Demetriu</i> | 5633 |
| Fundamentals of the seismic design code of bridges in Venezuela
<i>W.Lobo-Quintero</i> | 5639 |
| A new foundation factor for the Canadian code
<i>A.C.Heidebrecht & N.Naumoski</i> | 5645 |
| Proposal for harmonized rules for the determination of seismic input data according to Eurocode 8
<i>J.Eibl & E.Keintzel</i> | 5649 |
| A new approach of the Romanian seismic code for buildings
<i>L.Crainic, C.Dalban, T.Postelnicu, H.Sandi & T.Teretean</i> | 5655 |
| Meaning and evolution of building codes: Eurocode 8 and reinforced concrete constructions in seismic zones
<i>G.Sara' & R.Nudo</i> | 5661 |

14.2 *Assessment and comparison of code provisions*

- | | |
|--|------|
| Assessment of earthquake forces in low-rise structures from lateral and torsional coupling
<i>K.M.Houghton & S.L.McCabe</i> | 5669 |
| Lessons learned from the March 3, 1985 Chile earthquake and related research
<i>J.H.Cassis & P.Bonelli</i> | 5675 |

Influence of irregularity on the q factor of RC frames <i>C.A.Zeris, T.P.Tassios, Y.Lu & G.F.Zhang</i>	5681
Seismic design of R/C frames – A Canadian code perspective <i>K.A.Hamdy, W.K.Tso & A.Ghobarah</i>	5687
Evaluation of seismic design criteria for asymmetric buildings <i>A.G.Ayala, O.García & J.A.Escobar</i>	5693
Experimental study on seismic performance of precast reinforced-concrete shear walls <i>M.Inukai, Y.Miura, Y.Yasuda, T.Kaminosono & S.Nakata</i>	5699
US-Japan Cooperative Research Program (Phase 4): Research project activity of precast seismic structural system (PRESS) from Japan side <i>N.Shinsuke & K.Yoshikazu</i>	5703
Evaluation of seismic reliability of steel buildings designed according to current code procedures <i>Y.K.Wen, D.A.Foutch, D.Eliopoulos & C.-Y.Yu</i>	5707
Comparative analysis of R/C building structures (frame and shear wall) designed according to EC8 <i>A.V.Pinto, P.Negro & P.M.Jones</i>	5713
Analysis of damages and its relations with seismic intensity <i>S.B.Aladro, C.A.Monguilner & J.Herrera Cano</i>	5719
Assessment of UBC seismic design provisions using recorded building motions <i>A.Nisar, S.D.Werner & J.L.Beck</i>	5723
Base shear provisions for soil-structure systems <i>S.Hosni & A.C.Heidebrecht</i>	5729
Evaluation of seismic code provisions for asymmetric-plan systems <i>R.K.Goel & A.K.Chopra</i>	5735
A comparison of analysis provisions in seismic codes <i>P.A.Hidalgo, A.Arias & E.F.Cruz</i>	5741
Comparison of codal provisions suggested by various countries <i>P.R.Bose, R.Dubey & M.A.Yazdi</i>	5747
Nonlinear seismic behaviour of code-designed eccentric systems <i>A.Rutenberg, A.Benbenishti & O.A.Pekau</i>	5751
The collapse of the Struve Slough Bridge during the 1989 Loma Prieta earthquake in different seismic code perspectives <i>A.M.Jablonski, K.T.Law, D.T.Lau & J.-R.Pierre</i>	5757
Seismic hazard uncertainties in rational building code decisions <i>M.E.Paté-Cornell</i>	5763
14.3 Characterization of seismic action	
Variable safety factors for seismic design of RC <i>M.N.Fardis & S.N.Economou</i>	5771
Earthquake hazard mapping for seismic design codes: A new approach <i>J.Grases, G.Cascante & E.Gajardo</i>	5777

Code-prescribed seismic actions and performance of buildings <i>R.Meli</i>	5783
Harmonization of codes with respect to seismic hazard and seismic action for structures of different risk potential <i>J.Schwarz & G.Grünthal</i>	5789
Seismic hazard and structural safety in Mexico City <i>M.Chavez</i>	5797
Recommendations on seismic actions on port structures <i>J.Llorca, C.Huerta, J.J.Lopez-Cela, E.Laso & E.Alarcón</i>	5803
Recommendations on seismic actions on bridges <i>R.Cuvillo, C.Huerta, J.J.Lopez Cela & E.Alarcón</i>	5809
14.4 <i>Earthquake design spectra</i>	
Should peak accelerations be used to scale design spectrum amplitudes? <i>M.D.Trifunac</i>	5817
The use of interplate derived spectra in intraplate seismic regions <i>A.M.Chandler, G.L.Hutchinson & J.L.Wilson</i>	5823
Evaluation of displacement design spectra for base isolated systems <i>A.De Luca & G.Serino</i>	5829
Nonlinear response spectra for earthquake resistant design <i>E.Miranda</i>	5835
Effects of soft soils on design spectra <i>H.Krawinkler & M.Rahnama</i>	5841
Non linear responses of simulated accelerograms <i>R.Radichia, A.D'Ambrisi & M.Mezzi</i>	5847
Construction of a design response spectrum from evolutionary spectra of seismogram <i>R.Y.Tan & Y.T.Chao</i>	5853
14.5 <i>Recent developments and future orientations</i>	
Seismic design based on strength and ductility demands <i>A.A.Nassar, H.Krawinkler & J.D.Osteraas</i>	5861
New French seismic code orientations <i>W.Jalil</i>	5867
Seismic force reduction and displacement amplification factors <i>C.M.Uang</i>	5875
New design guidelines for medium rise reinforced masonry buildings in Japan <i>T.Kaminosono, Y.Yamazaki, M.Teshigawara & S.Okamoto</i>	5881
Input energy based seismic design code <i>A.Surahman & W.Merati</i>	5887
Acceptable earthquake damage or desired performance <i>R.L.Sharpe</i>	5891

A new proposal for a structural reduction factor formulation <i>B.Palazzo & F.Siano</i>	5897
The separation to avoid seismic pounding <i>V.Jeng, K.Kasai & A.Jagiassi</i>	5903

15 Seismic risk mitigation and socio-economic issues

15.1 Earthquake risk damage mitigation programs

Earthquake disaster mitigation program for urban industries in Japan <i>K.Suzuki & T.Mitsumori</i>	5913
Problems and solutions in emergency planning for Western Venezuela oilfields <i>J.Murria & J.A.Saab</i>	5917
Basic study on the computer-aided mapping system for earthquake disaster mitigation <i>S.Murakami & S.Sadohara</i>	5923
Disaster mitigation planning for the Grau Region, Peru <i>J.M.Sato, J.Kuroiwa & Y.Kumagai</i>	5927
US Postal Service seismic program (ATC-26 Project) <i>C.Rojahn, D.W.Evick, J.P.Nicoletti & T.A.Sabol</i>	5931
Comprehensive defence is a basic way of earthquake disaster reduction <i>Y.Xing</i>	5937
Resistant earthquake building and city aseismic measures of Tangshan <i>W.Yang & M.Wang</i>	5941
An emergency energy supplying center project in urban area (I) <i>S.Sadohara & S.Murakami</i>	5947
A seismic risk reduction program for Mendoza City, Argentina <i>J.C.Castano & J.L.Zamarbide</i>	5953
Development of elevator-use, popular-type seismic-wave-energy-sensing earthquake detector <i>Y.Onoda, M.Nakazato, T.Nara & I.Yokoi</i>	5959
Development of database system supporting earthquake disaster mitigation programs for urban areas <i>H.Matsuzawa, M.Sugimura & H.Taniguchi</i>	5963
A simulation model to estimate human loss for occupants of collapsed buildings in an earthquake <i>H.O.Murakami</i>	5969

15.2 Damage assessment and modelling

Study on seismic losses distribution in Romania and Japan <i>E.S.Georgescu & E.Kuribayashi</i>	5977
Analysis of post-earthquake fire hazard <i>J.Mohammadi, D.N.Bak & S.Alyasin</i>	5983

Factors determining human casualty levels in earthquakes: Mortality prediction in building collapse <i>A.W.Coburn, R.J.S.Spence & A.Pomonis</i>	5989
Mitigation of seismic risk for museum contents: An introductory investigation <i>G.Augusti, M.Ciampoli & L.Airoldi</i>	5995
Building specific damage estimation <i>S.K.V.Gunturi & H.C.Shah</i>	6001
Resource allocation in seismic risk mitigation <i>H.C.Shah, M.F.Bendimerad & P.Stojanovski</i>	6007
Development of earthquake damage scenarios using a comprehensive analytical method <i>A.J.Kappos, K.C.Stylianidis, C.N.Michailidis & C.J.Athanassiadou</i>	6013
A research on the simulating control model of earthquake disaster field <i>J.Li</i>	6019
Urban earthquake evacuation risk evaluation: An example <i>M.Yasui, T.Niuro, E.Kuribayashi, T.Jiang & K.Iiyoshi</i>	6025
Seismic hazard analysis in the Philippines using earthquake occurrence data <i>G.L.Molas, F.Yamazaki & Y.Tomatsu</i>	6031
Indoor-zoning map on dwelling space safety during an earthquake <i>S.Okada</i>	6037
Modeling of search-and-rescue activity in an earthquake <i>K.Shiono, F.Krimgold & Y.Ohta</i>	6043
San Francisco's response to Loma Prieta earthquake damage <i>D.W.Cocke & D.R.Bonneville</i>	6049
Urban seismic vulnerability analysis: The case of Algeria <i>F.N.Haddar</i>	6053
15.3 Social, economic and educational aspects of earthquake risk mitigation	
The Romanian Program for public earthquake preparedness <i>O.Vataman & E.S.Georgescu</i>	6065
Seismic danger and the people's education programme in Bulgaria <i>B.K.Rangelov</i>	6069
Investigating teacher knowledge of earthquakes <i>K.E.K.Ross & A.Dargush</i>	6073
Disaster management education on earthquakes <i>M.Erdik</i>	6079
Classification and analysis of occupant behavior during earthquake shaking <i>M.Rahimi</i>	6085
A maze experiment on human behavior during evacuation <i>H.Yokoyama & S.Nagata</i>	6091
Loss-reduction measures in federal earthquake insurance initiatives <i>C.E.Taylor & W.J.Petak</i>	6097

Earthquake insurance: Seismic exposure and portfolio dispersal – Their influence on the probable maximum loss <i>E. Rauch & A. Smolka</i>	6101
Estimation on how much anxiety people feel in underground urban space during earthquakes <i>E. Saito, H. Ikemi, H. Nakano & M. Nakamura</i>	6105
Disaster medicine center to a big earthquake in TMA – Construction engineering to provide disaster medicine <i>A. Teramura & K. Yomaru</i>	6111
Lessons learned in the post-earthquake investigation process <i>S. K. Tubbesing</i>	6117
Provision of earthquake engineering information in the US <i>P. A. Coty & D. Tao</i>	6121
16 Urban planning: Microzonation	
16.1 <i>Microzoning techniques</i>	
Method for estimating areal seismic risk potential <i>M. Miyano, H. J. Lu & T. Mochizuki</i>	6129
Mapping liquefaction potential based on SPT and SWV data <i>T. S. Wang</i>	6133
Estimation on the distribution of seismic intensity expected by ground condition for the seismic microzoning <i>T. Enomoto, T. Kunii & M. Fujimoto</i>	6139
Toward worldwide seismic zonation in the 21st century <i>W. W. Hays & B. Rouhban</i>	6145
Development of probability bases of strong ground motion duration in the seismic microzonation <i>Z. Zhang & N. Tao</i>	6149
An investigation of recent earthquake disasters from a viewpoint of urban engineering <i>H. Hokugo & S. Ichihashi</i>	6155
Developing a rational seismic safety policy for urban areas with ‘fuzzy’ seismicity <i>A. E. Aktan</i>	6161
Response surface models for local site response <i>A. Del Grosso & S. Lagomarsino</i>	6167
16.2 <i>Application to urban planning and design</i>	
Influence of the dynamic properties on the characteristics of seismic amplification in the city of Concepción <i>A. Gutiérrez</i>	6175
Geotechnical aspects for the microzonation of Acapulco <i>E. Ovando & M. P. Romo</i>	6179

Ground motion parameters for building aseismic design of Nanjing City in China <i>X.-Y. Yan & D.-K. Shen</i>	6187
Seismic risk in town and planning seismic codes of Yugoslavia <i>D. Sunarić, S. Nedeljković & M. Lojpur</i>	6193
Global earthquake and seismic index maps and catalogue <i>H. Tiedemann</i>	6195
The estimation of the urban damage based on the systematical reliability <i>D. Wang, D. Huo, D. Li & G. Li</i>	6199
Peru's national program for disaster mitigation <i>J. Kuroiwa, J. Sato & Y. Kumagai</i>	6203
Seismic microzonation of the city of Popayan, Colombia <i>P. Mouroux, A. Sarria, A. Espinosa, Ph. Masure & A. Stamatopoulos</i>	6209
Seismic zonation of Mexico City <i>J. Iglesias & A. Gómez-Bernal</i>	6215
Assessment of site effects on seismic input motions in the Sapporo urban region, northern Japan, utilizing long-period microtremors <i>H. Kagami, S. Okada, H. O. Murakami & S. Sakai</i>	6221
Evaluation of earthquake motion in Muroran and Tomakomai areas <i>S. Hattori</i>	6227
Microzonation of Perth, Australia, using microtremors <i>B. A. Gaull, H. Taniguchi & H. Kagami</i>	6235
A pilot seismic microzonation study for Istanbul <i>A. Barka & M. Erdik</i>	6241
Some seismic microzoning aspects in protection against earthquakes – Yugoslav experience <i>V. Mihailov</i>	6247
A case-control study of the casualties associated with the Loma Prieta earthquake: County of Santa Cruz <i>N. P. Jones, R. Wagner, G. S. Smith & F. Krimgold</i>	6253
Seismic microzonation of Torrevieja (Southwest of Spain) <i>J. J. Giner, C. L. Casado, J. A. Peláez, M. A. Peinado, J. Delgado & J. Chacón</i>	6259
 17 Expert systems applications	
Knowledge engineering approaches to processing earthquake engineering knowledge <i>H. Adeli, S. L. Hung & T. T. Shwe</i>	6267
Aseismic structural planning system by fuzzy network <i>H. Kawamura, A. Tani & H. Kambara</i>	6271
An expert system for the earthquake-resistant design of buildings <i>C. A. Syrmakizis & G. K. Mikroudīs</i>	6277
Exploiting expertise in monumental building diagnosis <i>F. Casciati & L. Faravelli</i>	6283

Qualitative reasoning about seismic behavior of buildings <i>L.M.Bozzo & G.L.Fenves</i>	6291
Toward the systematic use of expert systems in seismic risk reduction <i>C.Gavarini</i>	6297
Prediction of seismic damage patterns of buildings <i>Y.Sato, Y.Tatsumi & M.Naganoh</i>	6303
An expert evaluation system for earthquake damage <i>Yucheng Yang, Z.Wang, Yaling Yang & L.Yang</i>	6307
A mobile laboratory with an expert system for seismic assessment of buildings <i>M.Cadei, P.Panzeri, A.Peano & P.Salvaneschi</i>	6311
SISA: A KBS for seismic risk assessment <i>N.Nistico' & T.Pagnoni</i>	6317
Author index for Volume 10	6323
Author index for Volumes 1-10	6325
