<b>Chapter 1</b>	<b>Introduction</b>	1
<b>Chapter 2</b>	<b>Pipe Joint Selection</b>	5
2.1	General principles	5
2.2	Pressure–temperature limits	6
2.3	Material compatibility	7
2.4	External loading	7
2.5	Operability, maintainability, and reliability	8
2.6	Long-term effects	10
2.7	Cost	11
2.8	Concluding remarks	13
<b>Chapter 3</b>	<b>Metallic flanged joints with gaskets</b>	15
3.1	Introduction	15
3.2	Flange faces	17
3.2.1	Full-face and raised-face flanges	17
3.2.2	Tongue and groove flange	19
3.2.3	Spigot and recess flange	20
3.2.4	Ring-type joint	21
3.2.5	Lens-ring joint	21
3.3	Flange–pipe attachment	21
3.3.1	Slip-on flange	21
3.3.2	Weld neck flanges	23
3.3.3	Socket-welded flange	24
3.3.4	Hubbed threaded flange	24
3.3.5	Loose ring flange (loose backing flange)	25
3.3.6	Lapped joint flange	26
3.4	Bolts	27
3.5	Bolt loading	29
3.5.1	Introduction	29
3.5.2	BS 5500 calculation method	29
3.5.3	Calculation of design bolt torque (T)	35
3.5.4	Crushing strength of gaskets	35
3.6	Standards and pipe flange selection	35
3.7	Welding of flanges to pipes	41
3.7.1	Introduction	41
3.7.2	Types of weld	42
3.7.3	Dimensional accuracy	44
3.8	Pressure testing and leak detection	44
3.9	Making and breaking flanges	45

	3.9.1 Gasket	45
	3.9.2 Flange/gasket interface	46
	3.9.3 Jointing compounds	46
<b>Chapter 4</b>	<b>Gaskets</b>	<b>47</b>
4.1	Introduction	47
4.2	Non-metallic gasket materials	48
	4.2.1 Paper	48
	4.2.2 Cork	48
	4.2.3 Rubber	49
	4.2.4 Beater addition jointing	51
	4.2.5 Proofed woven fibre jointing	52
	4.2.6 Compressed asbestos fibre jointing	52
	4.2.7 Asbestos-free compressed fibre	53
	4.2.8 Exfoliated graphite (graphite foil)	53
	4.2.9 PTFE	57
4.3	Seem-metallic gasket materials	59
	4.3.1 Introduction	59
	4.3.2 Metal-clad gaskets	60
	4.3.3 Spiral-wound gaskets	60
	4.3.4 Kamprofile gaskets	65
	4.3.5 Type 108 – rigid laminated graphite gasket	67
4.4	Metallic gasket materials	68
	4.4.1 Solid flat metal gaskets	68
	4.4.2 Metal ring gaskets	68
4.5	Selection of gasket material	70
	4.5.1 Fugitive emissions	70
	4.5.2 Compatibility with the process fluid	71
	4.5.3 Temperature	71
	4.5.4 Internal pressure	72
	4.5.5 Special considerations	72
	4.5.6 Gaskets for lined pipework	73
	4.5.7 Flange surface finish	74
4.6	Gasket dimensions	74
	4.6.1 General principles	74
	4.6.2 Gasket thickness calculation	76
	4.6.3 Gasket sizes and shapes	77
4.7	Storage of gaskets	77
	4.7.1 General principles	77
	4.7.2 Gaskets containing polymer binders	77
	4.7.3 Graphite laminate gaskets	79
<b>Chapter 5</b>	<b>Flanged Joints without Gaskets</b>	<b>81</b>
5.1	Introduction	81
5.2	Design principles	81

5.2.1	Forces on the flange	81
5.2.2	Flange diameter	83
5.2.3	Bolt size	83
5.2.4	Leak tightness	83
5.3	Applications	84
<b>Chapter 6</b>	<b>Malleable Iron Pipe Fittings (Screwed Fittings)</b>	<b>85</b>
6.1	Introduction	85
6.2	Malleable cast iron	87
6.3	Corrosion protection	87
6.4	Pressure–temperature range	90
6.5	Size designation	91
6.5.1	Pipes	91
6.5.2	Fittings and threads	91
6.6	Union fittings	91
6.6.1	Function and installation	91
6.6.2	Types of union	92
6.6.3	Interchangeability	96
6.6.4	Tightening torque	96
6.7	Types of screw thread	96
6.8	Design and function of jointing threads	97
6.8.1	Terms relating to pipe threads	97
6.8.2	Taper external threads R	98
6.8.3	Internal threads, $R_p$ or $R_c$	99
6.8.4	Thread engagement	99
6.8.5	Thread cutting	99
6.8.6	Assembly method	100
6.8.7	Notes on taper/parallel threaded joints	100
6.9	Thread joining and sealing	101
6.9.1	Principles	101
6.9.2	Types of jointing compound	103
6.9.3	Selection of a thread sealant	103
6.9.4	Method of application	104
	References	105
<b>Chapter 7</b>	<b>Couplings</b>	<b>107</b>
7.1	Introduction	107
7.2	Viking Johnson	108
7.3	Grooved pipe system	109
7.4	Varivent	111
7.5	Kamlok	113
7.6	Quick-release hose couplings	115
7.7	Compression fittings	117
7.8	Screwed fittings	119
7.9	Hygienic fittings	121

7.10	Transgrip	121
7.11	Bolted flange attachments for polyethylene pipe	124
	7.11.1 Pecat <sup>®</sup> flange adapter	124
	7.11.2 Aquatrip <sup>®</sup> coupling	124
7.12	'V' clamps	126
7.13	Push-fit connections	127
<b>Chapter 8</b>	<b>Welded Metallic Joints</b>	<b>133</b>
8.1	Design and construction of pipework	133
8.2	Selection of materials	133
8.3	Weld procedure and welder approval	134
8.4	Welded joints	135
	8.4.1 Butt welds	135
	8.4.2 Socket joint	136
8.5	Welding techniques	139
	8.5.1 Welding processes	139
	8.5.2 Metal arc welding	139
	8.5.3 Oxy-acetylene welding	140
	8.5.4 Tungsten inert gas (TIG) welding	141
	8.5.5 Flux-cored and gas-shielded flux-cored arc welding	141
	8.5.6 MIG welding	141
	8.5.7 Friction welding	142
8.6	Heat treatment	142
	8.6.1 Pre-heat	142
	8.6.2 Post-weld heat treatment	142
8.7	Examination and testing of welds	142
	8.7.1 General	142
	8.7.2 Non-destructive testing	143
	8.7.3 Destructive testing	148
8.8	Pressure testing	150
<b>Chapter 9</b>	<b>Plastic Piping</b>	<b>151</b>
9.1	Design aspects of plastic piping	151
	9.1.1 Materials	151
	9.1.2 Design codes	152
	9.1.3 Safety and reliability considerations	152
	9.1.4 Cost	153
	9.1.5 Pressure-temperature ratings: thermoplastics	154
	9.1.6 Pressure-temperature ratings: thermosets	158
	9.1.7 GRP to BS 7159	158
	9.1.8 Thermoplastic lined GRP to BS 7159	162
9.2	Fusion welding	162
	9.2.1 General	162
	9.2.2 Socket fusion welding	163
	9.2.3 Electrofusion welding	164

	9.2.4	Butt fusion welding	165
	9.2.5	Quality control	165
9.3		Solvent cement jointing processes	167
	9.3.1	General	167
	9.3.2	Jointing process and components	167
	9.3.3	Quality control	168
9.4		Other thermoplastic pipe jointing processes	168
	9.4.1	Hot gas welding	168
	9.4.2	Extrusion welding	169
	9.4.3	Quality control	169
9.5		Permanent joints in GRP, other fibre-reinforced thermosets, and thermoplastic lined GRP piping	169
	9.5.1	General	169
	9.5.2	GRP butt joint	170
	9.5.3	Lined GRP butt joint	171
	9.5.4	Spigot and socket joint in GRP pipe	172
	9.5.5	Spigot and socket joints in lined GRP pipe	172
	9.5.6	Spigot and socket joint in other fibre-reinforced thermoset pipes	173
9.6		Thermoplastic flanged joints	174
	9.6.1	General	174
	9.6.2	Thermoplastic flange fittings	174
	9.6.3	Flange components	175
9.7		Metallic flange adapters for thermoplastic pipe	176
9.8		Flanged joints in GRP and lined GRP piping	176
9.9		Flanged joints in other fibre reinforced thermosets	179
9.10		Pressure testing	180
<b>Chapter 10</b>		<b>Joints in Glass Piping</b>	183
	10.1	Pressure-temperature ratings	183
	10.2	Jointing systems	184
		10.2.1 Buttress ends	184
		10.2.2 Beaded ends	185
	10.3	Joint components	186
	10.4	Make-up joints	187
	10.5	Connection to other materials	187
		10.5.1 General considerations	187
		10.5.2 Direct connection	188
		10.5.3 Direct connection using bellows	188
		10.5.4 Indirect connection	189
	10.6	Protected glass systems	189
<b>Chapter 11</b>		<b>Joints in Lined Metallic Piping</b>	191
	11.1	Materials	191
	11.2	Design codes	191

11.3	Design considerations	193
11.4	Joints	195
11.5	High-integrity joints	196
11.6	Pressure testing	197
<b>Chapter 12</b>	<b>Reliability</b>	199
12.1	Introduction	199
12.2	Definitions	199
12.3	Quantitative calculations	200
	12.3.1 Basic principles	200
12.4	Component reliability and failure rate	203
12.5	System reliability calculations	204
	12.5.1 Series systems	204
	12.5.2 Active parallel systems	205
	12.5.3 Example calculation	206
12.6	Comparative reliability assessment and the influence of plant maintainability criteria	207
	12.6.1 Introduction	207
	12.6.2 Description of pipe joints	208
	12.6.3 Assessment method	208
	12.6.4 Summary	213
	References	214
<b>Appendices</b>		
Appendix I	Flange standards	215
Appendix II	Dimensions of Flange to BS 4504	219
Appendix III	Units and conversion factors	223
Appendix IV	Corrosion charts	229
<b>Bibliography</b>		249
<b>Index</b>		251
