Contents

Preface

vii

1 Introduction

1

- 1.1 Water and Life 1
- 1.2 Water Systems Engineering 4
- 1.3 Scope and Approach 7

2 Issues and the Systems Planning Approach

10

- 2.1 Water System Dynamics 11
- 2.2 Environment and Resource 24
- 2.3 Water Resources Developmental Issues 26
- 2.4 Planning Morphology 28
- 2.5 Planning Approach 29
- 2.6 Constraints on System Studies 33
- 2.7 Water Resources Development Alternatives 36
- 2.8 Trends in Water Resources Development 40
- 2.9 Water Resources Project—A Case Study 45

3 Objectives and Evaluation Criteria

53

- 3.1 Technological Objectives 54
- 3.2 Socio-Economic Objectives 56
- 3.3 Social Benefit-Cost Analysis 58
- 3.4 Practical Project Appraisal 68
- 3.5 Environmental-Ecological Objectives and Evaluation Criteria 74
- 3.6 Multiobjective Analysis 78

4 Hydrologic Input Analysis

95

- 4.1 Surface Subsystem (Watershed) Functional Analysis 97
- 4.2 Computer Simulation of a Basin 111
- 4.3 Soil Subsystem Analysis 119
- 4.4 Groundwater Subsystem 119
- 4.5 Stream Flow Generation 119

5	Demand Analysis	126
5.1	Categories of Demand	127
5.2	Demand Projections and Policy Formulation	129
5.3	Water Demand for Human Settlements	129
5.4	Industrial Demand	133
5.5	Electric Power Demand	135
5.6	Agricultural Demand	137
5.7	Navigation, Waterways and Recreation	167
	Appendix 5.1 International Standards for Drinking Water	172
	Appendix 5.2 Some Empirical Formulae for Estimating Potential Water Use	174
6	System Elements and Subsystem Planning—Deterministic	178
6.1	Water Conveyance and Distribution Systems	179
6.2	Reservoir System	184
6.3	Conjunctive Surface and Groundwater Development	204
7	System Elements and Subsystems—Stochastic Planning and Management	215
7.1	Decision-Making Under Uncertainty	216
7.2	The Design and Management Issue	222
7.3	Simulation and Stochastic Optimization	223
7.4	Stochastic Design and Operational Policy Models	227
7.5	Linear Operating Rules and Chance-Constrained Programming	244
7.6	Randomized Release Rules and Reliability-Constrained Dynamic Programming	250
7.7	Multiobjective Risks Analysis in Stochastic Planning	255
8	Large-Scale System Analysis	259
8.1	Principle of Decomposition	260
8.2	System Planning and Analysis Morphology	271
8.3	California Water Resources System Analysis	275
8.4	The Ganga System	293
8.5	Punjab Water Resources System	323
8.6	Simulation of Large-Scale Systems	334
8.7	Project Scheduling and Capacity Expansion	338
9	Groundwater System Planning	348
9.1	Characteristics and Management Issues	349
9.2	Groundwater Dynamics and Numerical Methods of Solution	352
9.3	Case Study	373
9.4	Multiple Cell Models	381
9.5	Identification of Aquifer Parameters	384
9.6	Management Problems and Algebraic Technological Functions	392

9.7	Conjunctive Surface and Groundwater Development—Hierarchical Approach	396	
9.8	Safe Yield and Optimal Mining Policy	401	
10	Water Quality Management Planning		415
10.1	Nature of the Problem	416	
10.2	Management Issues	419	
10.3	Water Quality Dynamics	421	
10.4	Water Quality Description	429	
10.5	Regional Water Quality Screening Model	437	
10.6	Quality Management by Treatment	443	
10.7	Quality Management by Treatment—An Alternative Approach	452	
10.8	Flow Augmentation	455	
10.9	Wastewater Transport	455	
10.10	Artificial Aeration Methods	458	
10.11	Irrigation Related Salinity Management	459	
10.12	Management of River Basin Water Quality	469	
11	Multipurpose Developmental Issues		481
11.1	Flood Management	482	
11.2	Conjunctive Flood Mitigation and Water Resources Enhancement	488	
11.3	Hydro-electric Development and the Power Sector	494	
11.4	Inland Water Transportation	501	
11.5	Micro Level Planning	502	
11.6	Erosion and Sedimentation	507	
11.7	Watershed Management	509	
12	Regional Planning		516
12.1	Regional and Interregional Planning	518	
12.2	Regional Water Resources Evaluation	529	
12.3	Regional Multiobjective Planning	535	
12.4	International/Interstate Planning and Conflict Resolution	553	
13	Policy Issues		563
13.1	Systems Planning Policy Issues	563	
13.2	Technological Policy Issues	567	
13.3	Water and Agricultural Policy Issues—Regional and National Level	574	
13.4	Agricultural Irrigation Policy Issues—Micro Level	580	
13.5	Policy Issues in Water Quality Management	583	
13.6	Cost Allocation Policy	590	
	<i>Subject Index</i>		597
	<i>Author Index</i>		600
