CONTENTS

PREFACE

SECTION 1 SOFTWARE FOR HYDRAULICS Page

New Applications of Boundary Element Software in Hydraulics 3
C.A. Brebbia

Contributions of Expert Systems to the Quality Assurance of Numerical Models 15
M.B. Abbott

Iterative Solvers for Wave Problems 19
M. Pastor, P. Ortiz and J.M. Santamaria

SECTION 2 OPEN CHANNEL FLOW, FLOOD PLAINS AND ROUTING

NUFLOW – A Program to Analyse Non-Uniform Flows in Channels and Pipelines 33
B.R. Poole

Complex Hydrosystems and Engineering Software 41
C. Popovska

Free-Surface Flows with Large Displacements by Finite Elements 51
P. Gendre, M. Hittinger and P. Ravier

Variable Time-Step Nonlinear Flood Routing 61
E.M. Laurenson

Comparison of Hydraulic and Hydrologic Routing Methods for Channel Flow 73
T.V. Hromadka II, J.D. DeVries and A.J. Nestlinger

Comparisons of Hydraulic Routing Methods for One-Dimensional Channel Routing Problems 85
T.V. Hromadka II, A.J. Nestlinger and J.D. DeVries

SECTION 3 TIDAL FLOW AND CIRCULATION PROBLEMS

The Control and Monitoring of a Tidal Model of the Exe Estuary 101
G.A. Walters

Numerical Simulation of Fine Sediment Motion in Estuaries 111
P.D. Scarlatos, E.M. Partheniades

Mathematical Simulation of Two-Dimensional Lake Circulation 125
R. Rajar, M. Cetina

Predictive Ability of Two-Dimensional Models for Mixing in Estuaries 135
A. Langerak, J.J. Leendertse

Sea State Synthesis Using a Microcomputer 155
C.D. Christian

Calculation of Flow Around Several Ship Hulls by a Rankine Source Method 165
G. Delhommeau, J.J. Maisonneuve

Depth-Average Model with Body Fitted Co-ordinates for the Calculation of Strongly Curved Elliptic Flows 179
M. Djurić, R. Kapor and R.N. Pavlović

Mathematical Modelling of Alluvial River-Bed Phenomena 193
E. Mohamed-Abdalla, J.P. Chollet and M. Bouvard

Large Eddy Simulation of a Shear Driven Flow in a Test Reservoir 209
M. Ivetic, Y. Iwasa and K. Inoue

SECTION 4 HYDRAULIC STRUCTURES

Engineering Software for Frequency Analysis of Flow-Induced Vibrations in Hydraulic Systems 221
A. Bergant

The Use of Microcomputers for the Hydraulic Design of Highway Culverts in Scotland 231
C. Jefferies, R.M. Ashley and N.D. Butter

Vectorized Finite Element Model for Time-History Analysis of Old Masonry Dams 241
A. Peters, W. Pelka and M. Vogt

SECTION 5 COMPUTER AIDED EXPERIMENTING AND CONTROL

High Resolution Time-Space Investigations of Rainfall Events Through Timevariable Data Recording 257
H. Bergmann, T. Zeyringer

Sampling of Spatial Functions: The Aliasing Problem and Statistical Errors 267
A. Mueller

Concurrent LDA Data Acquisition and Analysis 279
P. Steffler, R. Gitzel and A.W. Peterson

Software for a Fast Minicomputer Based Data Acquisition System 289
B. Cuche

SECTION 6 GROUNDWATER FLOW

A Simulation Model of the Global Use of Surface Water and Groundwater 301
A. Iglesias, M.P. Perez and R. Medina

Estimation of Hydraulic Conductivity and the Flow Types in the Rock by Using a Model Simulation and Hydraulic Test Results 311
A. Ylinen

Branched Irrigation System Network Optimization with More Than One State of Operation. Software for Microprocessors 321
L.S. Vamvakeridou-Lyroudia

SECTION 7 HYDRAULIC SOFTWARE CODES

Computerised Forecasting System: A General Software Product for Interactive Management of Hydrology Data Banks and Real-Time River Discharge Forecasting 333
M. Erlich, P. Sauvaget

International Database on Urban Drainage Modelling and its Application 357
M. Radojkovic, C. Maksimovic

Role of Simplified Micro-Computer Models as Parts of Multilevel Hydrological Packages 371
P. Wisner, D. Consuegra, J.F. Sabourin and A. Lam

Applications of a Two-Dimensional Diffusion Hydrodynamic Model 393
J.D. DeVries, T.V. Hromadka and A.J. Nestlinger

Maximization of Firm Energy Production of Hydroelectric Systems 413
H.D. Altinbilek, E. Aygün

Automatic Optimization of Irregular Triangular Meshes for Natural Flow Computations 423
I.J. Westwood, K.-P. Holz

Hydrodynamics of Axisymmetric Bodies at Finite Water Depth 437
S.M. Calisal, J.L.K. Chan

SECTION 8 WATER SUPPLY AND SEWER NETWORKS

FSEWER – A Program for the Design of Foul Sewerage Systems 461
B.R. Poole

Microcomputer Modelling of Flow Conditions in Pipe Distribution Systems 471
A.R.D. Thorley, D.J. Wood

Velocity, Pressure and Pressure-Velocity-Correlation Measurements in Submerged Gate Flows 487
M.F. Barros, G. Dimaczek and F. Durst

Computer Simulation of Flows in a Pipe Network Using a Database of Component and Fitting Losses 497
K. Ahmad

Sanitary Sewer, Storm Sewer and Drainage System Optimization Software for Microprocessors 515
L.S. Vamvakeridou-Lyroudia
