

# SURFACE IRRIGATION systems and practice

Melvyn Kay

BSc, MSc, CEng, MICE

**Cranfield Press**

Cranfield Institute of Technology  
Cranfield Bedford MK43 0AL England UK

# CONTENTS

<b>Foreword</b>	(vii)	3.9	Leaching	37
<b>Preface</b>	(viii)	3.10	Drainage	37
<b>Acknowledgment</b>	(ix)	3.11	Common faults	37
		3.12	Efficiency	39
<b>1 INTRODUCTION</b>		<b>4 BORDER IRRIGATION</b>		
1.1	Irrigation methods	4.1	Introduction	40
1.2	Irrigation units	4.2	Size and shape	41
1.3	Irrigation system	4.3	Slope	44
1.4	Drainage system		<b>WATER MANAGEMENT</b>	
1.5	Access	4.4	Irrigating borders	45
1.6	Operation and maintenance	4.5	Common faults	47
1.7	Health	4.6	Efficiency	49
<b>2 HYDRAULICS</b>		<b>5 FURROW IRRIGATION</b>		
2.1	Objectives	5.1	Introduction	50
2.2	SI units	5.2	Shape	51
2.3	Land slope	5.3	Spacing	52
	<b>FLOW IN CHANNELS</b>	5.4	Length	54
2.4	Discharge	5.5	Slope	55
2.5	Discharge measurement	5.6	Crops	57
2.6	Factors affecting flow		<b>WATER MANAGEMENT</b>	
2.7	Siphons	5.7	Irrigating furrows	57
2.8	Spiles	5.8	Alternate furrow irrigation	60
	<b>SURFACE IRRIGATION</b>	5.9	Common faults	61
2.9	Soil reservoir	5.10	Efficiency	63
2.10	Infiltration	<b>6 CHOOSING AN IRRIGATION</b>		
2.11	Water movement in the soil		<b>METHOD</b>	
2.12	Useful formula	6.1	Introduction	64
2.13	Efficiency	6.2	Land topography	64
2.14	Clay soils	6.3	Soils	64
2.15	Salinity	6.4	Field shape	64
<b>3 BASIN IRRIGATION</b>		6.5	Crops	64
3.1	Introduction	6.6	Labour	65
3.2	Size	<b>7 LAND PREPARATION</b>		
3.3	Shape	7.1	Introduction	66
3.4	Crops	7.2	Factors affecting land preparation	66
3.5	Earth bunds	7.3	Levelling rice basins	71
	<b>WATER MANAGEMENT</b>	7.4	Equipment	71
3.6	Irrigating basins	7.5	Common problems	77
3.7	Methods of supplying water			
3.8	Soil erosion			

CONTENTS continued

8	<b>OPEN CHANNELS</b>	
8.1	Introduction	78
	<b>CANALS</b>	
8.2	Main, branch and distributary canals	80
8.3	Water courses and farm channels	84
8.4	Command	85
8.5	Seepage	86
9	<b>STRUCTURES</b>	
9.1	Introduction	90
9.2	Head regulators	90
9.3	Cross regulators	91
9.4	Components of a typical regulator	93
9.5	Fall structures	93
9.6	Tail escapes	93
9.7	Canal outlets	95
9.8	Unit structures	97
9.9	River off-take problem	100
10	<b>PIPE LINES</b>	
10.1	Introduction	103
10.2	Types of system	103
	<b>SYSTEM COMPONENTS</b>	
10.3	Mainlines and laterals	106
10.4	Pipe outlets	107
10.5	Hydrants	109
10.6	Valves	109
10.7	Vents	110
11	<b>OPERATION</b>	
11.1	Introduction	111
11.2	Water demand	111
11.3	Water supply	112
11.4	Matching supply and demand	112
11.5	Methods of organising water distribution	112
11.6	Common problems	115
11.7	Manpower	117
	<b>EVALUATION</b>	
11.8	Irrigation system	119
11.9	Irrigation method	121
12	<b>MAINTENANCE</b>	
12.1	Introduction	124
	<b>CHANNELS</b>	
12.2	Unlined canals	124
12.3	Lined canals	127
12.4	Drains	127
12.5	Breaches	129
	<b>STRUCTURES</b>	
12.6	Water control gates	130
12.7	Concrete, blockwork and stone	130
12.8	Protection	130
	<b>ORGANISING MAINTENANCE</b>	
12.9	Types of maintenance	130
12.10	Manpower and equipment	131
13	<b>HEALTH AND IRRIGATION</b>	
13.1	Introduction	133
	<b>THE DISEASES</b>	
13.2	Schistosomiasis	134
13.3	Malaria	134
	<b>METHODS OF CONTROL</b>	
13.4	Medical treatment	137
13.5	Getting rid of the vectors	137
13.6	Separating people from water	138
13.7	Combined approach	138
	<b>Index</b>	140
