1989

## CONTENTS

Preface .....	v
List of Contributors.....	ix
(1) Characterization of fine powders in the emulsion phase of fluidized beds — Structural model H.O. Kono .....	1
(2) Fluidized bed behaviour at high temperatures and pressures J.S.M. Botterill.....	33
(3) Heat transfer in dispersed media N.V. Antonishin and V.V. Lushchikov .....	71
(4) Advances in gas—liquid—solid fluidization: Fundamentals and applications L.S. Fan, B.E. Kreischer and K. Tsuchiya .....	105
(5) Hydrodynamics and mass transfer in mobile bed contacting C. Ercan, A.R.P. van Heiningen and W.J.M. Douglas .....	171
(6) High velocity fluidization K. Yoshida and H. Mineo .....	241
(7) The measurement, prediction and correlation of the minimum spouting velocity, pressure drop, maximum spoutable height and spout diameter in spouted beds of coarse particles. H. Littman and M.H. Morgan III.....	287
(8) Transport processes in vibro-fluidized beds K. Erdesz, D. Ringer and A.S. Mujumdar .....	317
(9) Magneto-fluidized beds R.L. Sonolikar .....	359
(10) Fluidized bed reactors for noncatalytic gas—solid reactions: A commentary A.N. Gokarn, B.D. Kulkarni and L.K. Doraiswamy .....	423
(11) Heat and chemical heat treatment of metals in fluidized and vibro-fluidized beds A.P. Baskakov .....	457
(12) Fluidized bed cleaning of exhausts from diesel engines L. Massimilla, S. Vaccaro and A. Ciajolo.....	487
Author Index.....	519
Subject Index.....	543
