PREFACE vii

PART I

URBAN DRAINAGE

1. FUNDAMENTALS OF URBAN DRAINAGE 3

1.1 Introduction, 3

Urban Drainage Systems, 3

1.2 Sewer Systems, 5

Sewer Types and Selection Parameters, 6

Sewer Appurtenances, 10

Simple Computation of Combined Sewer Overflows, 14

References, 18

2. CALCULATION OF DRAINAGE SYSTEMS 20

2.1 Flow Volumes, 20

Stormwater Flows, 22

Hydrologic Computer Models, 34

2.2 Determination of Cross Sections, 35

2.3 Computation of Safety of Sewer Pipes against Break or Rupture, 46

References, 49

3. URBAN STORMWATER AND COMBINED SEWER OVERFLOW MANAGEMENT 50

3.1 Pollution by Runoff and Combined Sewer Overflows, 50

3.2 Practices for Controlling Urban Runoff, 52

Reduction of Peak Flow Rates and Volumes of Storm and Combined Sewer Overflows into Receiving Waters, 53

Stormwater Retention Basins, 53

*In-Line and Off-Line Storage of Combined Sewer
Overflows, 58*
Source Control Measures and Hydrologic Modifications, 60
References, 61
Additional Bibliography for Part I, 63

■ PART II

SEWAGE AND WASTEWATER TREATMENT

4. GENERAL CONSIDERATIONS

67

- 4.1 Overview of the Problem, 67
- 4.2 Methods of Sewage Treatment, 68
 - Treatment Processes, 68*
 - Biological Treatment, 69*
- 4.3 Waste Treatment Processes and Their Efficiency, 72
- 4.4 Natural or Artificial Processes?, 74
- 4.5 Utilization of Wastewater, 75
- 4.6 Cost of Waste Treatment, 76
- 4.7 Solid Wastes, Refuse, 78
- 4.8 Emissions, 80
 - Odor Control, 80*
 - Noise Control, 83*
 - Aerosol Emissions, 85*

References, 86

5. WASTEWATER CHARACTERIZATION

88

- 5.1 Quantity and Quality, 88
- 5.2 Wastewater Characterization, 91
 - Sampling and Monitoring, 91*
 - Chemical Analyses, 92*
 - The Biochemical Oxygen Demand, 95*
 - Other Measurements of Organic Content of
Wastewater, 100*
 - Biological and Microbiological Investigations, 102*

References, 105

6. MECHANICAL AND CHEMICAL TREATMENT UNITS

107

- 6.1 Screening and Pretreatment, 107
 - Preaeration, 110*
- 6.2 Skimming and Flotation, 111
- 6.3 Sedimentation, 113
 - Particle Settleability and Type of Settling, 113*
 - Settling Velocity, 116*

- Grit Chambers, 117*
- Flocculent Settling, 121*
- Clarifier Operation, Malfunctions, and Remedial Measures, 121*
- Design and Selection of Settling Tanks, 122*
- 6.4 Coagulation and Flocculation, 128
- 6.5 Use of Chlorine, 132
- References, 135

7. BIOLOGICAL TREATMENT UNITS 136

- 7.1 Basic Principles, 136
 - Selection of the System, 137*
 - System Configuration, 138*
- 7.2 Land Disposal of Wastewater, 140
 - Description of the Systems, 141*
 - Treatment Performance, 144*
 - Use of Natural or Man-Made Wetlands, 146*
- 7.3 Attached Growth Media Biological Processes (Filters), 146
 - Trickling Filters, 147*
 - Contact Aerated Beds, 158*
 - Rotating Biological Contactors, 158*
- 7.4 Suspended Growth Biological Treatment Processes, 160
 - Activated Sludge Process, 160*
 - Types of Activated Sludge Systems, 161*
 - Activated Sludge Process Characteristics, 168*
 - Sludge Separation, 176*
 - Operation and Maintenance of Activated Sludge Plants, 181*
 - The Two-Stage Activated Sludge Process, 182*
 - Sequencing Batch Reactors (SBR), 183*
- 7.5 Lagoons and Ponds, 184
- 7.6 Anaerobic Treatment, 187
- References, 188

8. ADVANCED (TERTIARY) WASTEWATER TREATMENT 193

- References, 201

9. SLUDGE HANDLING 202

- 9.1 Sludge Characteristics, 202
- 9.2 Sludge Volumes, 206
- 9.3 Thickening, 208
 - Gravity Thickening, 208*
 - Flotation Thickening, 210*

- 9.4 Digestion, 210
 - Aerobic Stabilization, 210*
 - Anaerobic Digestion, 211*
 - Type of Digesters, 216*
 - Dimensioning of the Digester Volume, 222*
- 9.5 Gas Handling and Sludge Heating, 223
 - Use of the Gas, 224*
- 9.6 Sludge Dewatering, 229
 - Drying Beds, 229*
 - Sludge Lagoons, 231*
 - Sludge Conditioning, 232*
 - Mechanical Dewatering, 233*
- 9.7 Incineration, 237
 - Types of Incineration, 237*
 - Air Pollution Control, 241*
- 9.8 Final Disposal of Sludges, 241
 - Land Disposal of Wet or Dewatered Sludge, 242*
 - Landfill Disposal, 245*
- References, 246

10. INDUSTRIAL WASTEWATER TREATMENT AND PRETREATMENT

249

- 10.1 General Considerations, 249
 - Types of Industrial Wastewater Streams, 249*
- 10.2 Joint Disposal and Treatment with Municipal Wastewater, 250
 - Phenolic Compounds, 253*
 - Biological Treatment of Industrial Wastewater, 254*
- 10.3 Wastewater Loads, 255
- 10.4 Individual Industrial Wastewaters and Their Treatment, 256
- References, 269

11. DISPOSAL OF HOUSEHOLD WASTES FROM UNSEWERED AREAS

272

- 11.1 On-Site Disposal, 272
 - Privies, 272*
- 11.2 Septic Systems and Soil Disposal, 274
- 11.3 Small Treatment Plants, 278
- 11.4 Design Examples of Small Wastewater Disposal Systems, 279
- References, 281

12. PLANNING AND DESIGN OF TREATMENT PLANTS

283

- 12.1 System Features and Layout, 283
- 12.2 Design Examples of Wastewater Treatment Facilities, 286
- Bibliography for Part II, 294

PART III

PROTECTION OF RECEIVING WATERS

13. DISCHARGE OF WASTEWATER INTO SURFACE WATERS	299
13.1 Use of Surface Waters, 299	
<i>Effect of Wastewater Discharges, 299</i>	
<i>Water Quality Standards, 301</i>	
13.2 Types of Sewage Outfalls and Water Intakes, 305	
13.3 In-Stream Water Quality Management Alternatives, 306	
13.4 Water Reuse (Water-Sewage-Water Cycle), 310	
<i>Principles of Wastewater Reuse and Reclamation, 310</i>	
References, 313	
14. SELF-PURIFICATION OF SURFACE WATERS	316
14.1 Mechanisms of Pollution Degradation in Receiving Waters, 316	
14.2 Dissolved Oxygen Balance, 317	
<i>Oxygen Sinks, 318</i>	
<i>Oxygen Sources, 326</i>	
14.3 Computation of the Oxygen Concentration, 329	
14.4 Waste Assimilative Capacity for Nutrients, 348	
14.5 Use of the Models, 353	
References, 354	
Bibliography for Part III, 357	
15. CONVERSION OF SI UNITS TO U.S. (ENGLISH) CUSTOMARY UNITS	358
16. INFORMATION RETRIEVAL	360
16.1 Reports and Technical Journals, 360	
16.2 Computerized Information Retrieval, 361	
APPENDIX. NOMOGRAPHS FOR HYDRAULIC COMPUTATIONS	363
INDEX	369
