To my daughter Karen

REINFORCED CONCRETE FOUNDATIONS

BRIAN J. BELL

M.Phil., C.Eng., M.I.C.E., F.I.Struct.E., F.S.E.
*Senior Lecturer at the Polytechnic
of the South Bank*

Foreword by

M. J. SMITH

M.Sc., C. Eng., M.I.C.E., M.I.Struct.E.

Second Edition

GEORGE GODWIN LIMITED

The book publishing subsidiary
of The Builder Group

CONTENTS

FOREWORD BY M. J. SMITH	v
PREFACE TO THE SECOND EDITION	vii
INTRODUCTION TO LIMIT STATE DESIGN (CP 110)	xi
1. AN INTRODUCTION TO FOUNDATIONS	1
Types of foundation and their specific uses	1
Depth of foundations	12
Soils and bearing capacity	12
Settlement problems	16
2. ISOLATED COLUMN BASE UNDER AXIAL LOADING	22
Determination of base size	22
Bending and shear conditions	22
Bases on mass concrete sub-base	28
3. ISOLATED FOUNDATION TRANSMITTING BENDING MOMENT FROM ANY DIRECTION	35
Soil pressure conditions	35
Bending moment equation	36
4. FOUNDATIONS WITH BENDING IN ONE PARTICULAR PLANE	45
Compatibility equations for eccentricity	45
Retaining walls	48
Factors causing failure of a retaining wall	50
Basic dimensions for cantilever retaining walls	52
Design features for various types of retaining wall	56
Design procedure and requirements for a cantilever retaining wall	57
Counterforted and buttressed walls	58
5. THE STRIP FOOTING	92
Footing under continuous loading	95
Continuous footing for equally spaced columns, rectangular section	101
Equally spaced columns with "T" beam footings	108
Footing for two columns only	113
6. COMBINED TRAPEZOIDAL FOUNDATIONS	129
Slab base with longitudinal spine beam	130
Continuous slab base over transverse beam supports	143

7. BALANCED FOOTINGS	157
Balanced footing using adjacent column	160
Balanced footing using a mass concrete counterweight	173
Columns connected by stiffening beam on a fulcrum base	181
8. THE RAFT FOUNDATION	187
Flat slab construction (3.6, CP 110)	188
Continuous frame analysis (3.6.5, CP 110)	202
Beam and slab construction	207
Design conditions for a deep cellular raft construction	227
Non-symmetrical loading arrangement	232
9. PILED FOUNDATIONS	236
Orthodox piling: precast driven piles	238
Orthodox piling: <i>in-situ</i> piles	245
Large diameter piles	249
The stability of pile groups	251
Pile cap loading and pile capacity	255
Design of pile caps	256
Eccentrically loaded pile groups	263
Raking pile systems	283
APPENDIX: Design tables	303
INDEX	311
