PROCEEDINGS

**SECOND
INTERNATIONAL
CONFERENCE
ON
SMALL HYDRO**

1 - 4 April 1986

Hangzhou

People's Republic of China

CONTENTS

SECTION I - ORAL PRESENTATIONS

SESSION I	Review and role of small hydropower	1
SESSION II	Feasibility studies, regional hydrological analysis and financial controls	25
SESSION III	Design of civil works	43
SESSION IV	Operation, including automation, SHP grids, frequency control	61
SESSION V	Construction in remote areas	69
SESSION VI	Machinery and the preparation of specifications	83
SESSION VII	Practical applications, problems and solutions	101
	INFORMAL WORKSHOP ON CIVIL WORKS AND HYDROLOGY	111
	SHORT PRESENTATIONS	125
	Submersible hydro-turbine-generators: a new approach to small-scale hydro <i>B Stjernström, Flygt AB, Sweden</i>	127
	Development of rim-drive turbine for low head applications <i>M Sundquist, STS Consultants, USA</i>	137
	Some aspects of the hydropneumatic approach to riverine applications <i>A M Gorlov, Northeastern University, USA</i>	145
	Suggestions for selection of the plant type for the utilization of low heads and the main features of the submersible power plant <i>E Fentzloff, Consulting Engineer, FRG</i>	163
	Rural development in the hilly regions of Nepal: Dissemination of water mills of the cross flow turbine type <i>G Dotti, IT Dello, and A Anglade, GRET, France</i>	174
	Application of a load conversion governor in New Zealand <i>B Leyland, Leyland, Watson & Noble, New Zealand</i>	191
	An approach to the systematic evaluation of residual resources for small hydro power in southern Italy <i>P Bertacchi, ENEL, Italy</i>	195
	Small hydro in Hungary <i>J Marialigeti, Ganz-Mavag Works, Hungary</i>	203
	An Indian experience and views on SHP <i>R N Kar, Flovel, India</i>	205

SECTION II - WRITTEN PAPERS

SESSION I Review and role of small hydropower

- State-of-the-art of small hydropower in Asia
Zhu Xiaozhang, HRC, China 207
- Outline of the development and prospects for small hydro
power in China
*Deng Bingli, Ministry of Water Resources and Electric Power,
China* 219
- Common flaws in small hydro plants
W I Pentin, Consulting Engineer, USA 224
- Survey of hydropower potential for large regions
H Hildebrand, K Kern, University of Karlsruhe, FRG 231

SESSION II Feasibility studies, regional hydrological analysis and financial controls

- Determining the mini-hydro potential at ungauged sites:
a case study of Kalimantan
J Fritz, National Academy of Sciences, USA 243
- SHP hydrological design for areas short of data in China
Lu Tianshou, HRC, China 270
- Systematic evaluation of small hydropower development
*T C Muir, Lahmeyer International GmbH, FRG, and
P Niyimbona, Ministry of Public Works, Burundi* 287
- Design practice and criteria for small hydropower in China
Zheng Naibo, HRC, China 308
- Hydrological aspects of mini hydropower plants in Tanzania
*Z Skoklevski, University of Dar es Salaam, and C Masawe,
Tanzania Electric Supply Company, Tanzania* 321

SESSION III Design of civil works

- The role of small hydropower
E Gosschalk, Halcrow Water, UK 331
- Measures to reduce the civil engineering costs of SHP
stations in China
Ding Huishen and Lu Jinrun, HRC, China 343
- Flushing of sediments at small hydro power plants
*E Tesaker and K Tvinnereim, Norwegian Hydrotechnical
Laboratory, Norway* 365
- Civil design for small hydro in Peru
*P Pascall, M Ibbit, G Birch, and G Sims, Balfour Beatty
Engineering Ltd, UK* 371

Design and construction of civil structures for remote small hydro schemes <i>J M Duder, Tonkin & Taylor, New Zealand</i>	396
SESSION IV Operation, including automation, SHP grids, frequency control	
Operation and management of small hydropower stations <i>Zhang Jiqian, Ministry of Water Resources and Electric Power, China</i>	407
Remote control and data acquisition system by telemetry and the use of GRP high pressure pipe for a small hydro-electric station <i>E McKeogh, University College Cork, C Lacey, Process Control and Automation Systems Ltd, D Nightingale, Hydesign Hydraulic Consultants Ltd, Republic of Ireland</i>	417
Optimum operation of small hydro power systems <i>Jiang Denian, Wanxian Prefectural Electrical Corporation, China</i>	434
Centralized control of multiple automated hydroelectric sites <i>J Cross, STS Consultants, USA</i>	439
SESSION V Construction in remote areas	
Aspects of small-scale hydropower development in remote areas <i>K Goldsmith, United Nations, UK</i>	455
Concrete work and its quality control in remote areas <i>Xie Shuan, Water Resources Bureau of Hunan Province, China</i>	468
A small hydro power scheme in Zaire <i>B Aspen, T Jensen, Norwegian Water Resources and Electricity Board, Norway</i>	474
Principles and methods of rural electrification in SHP areas <i>Bai Lin, Ministry of Water Resources and Electric Power, China</i>	491
Case studies on the electrification in remote areas by means of small hydropower plants <i>E Hauck, IWB GmbH, FRG</i>	502
SHP and rural economic development <i>Zhao Zengguang, Ministry of Water Resources and Electric Power, China</i>	528

SESSION VI Machinery and the preparation of specifications

- Standardization of small hydraulic turbines in China
Lian Jiakai, Tianjin Design & Research Institute of Electric Drive, China 532
- The splitflow turbine: crossflow development results in a new design
A Arter, Balaju Yantra Shala (P) Ltd, Nepal 536
- The splitflow turbine: initial development test results
M Pomfret and K Lam, Hong Kong Polytechnic, Hong Kong 551
- The design of micro packaged hydraulic generating sets
N P Koh, Tianjin Design & Research Institute of Electric Drive, China 565
- Equipment specifications for SHP stations
B Leyland, Leyland Watson & Noble, New Zealand 572
- A vertical-shaft axial-field generator for small hydro
C T Choy, University of Hong Kong, Hong Kong 587
- The Salford transverse oscillator - a new machine for low-head hydropower
E M Wilson, AUR Hydropower, UK 604

SESSION VII Practical applications, problems and solutions

- The turbine pump: a specific solution to a general problem
Shen Lunzhang, HRC, China 610
- Exploitation of irrigation systems for mini hydel development
Sirwar, Ganekal and Kalmala mini hydel schemes
S Veeranna and H B Satish M Kumar, Karnataka Power Corporation, Ltd, India 627
- Development of small hydel power generation in the north eastern region of India
T K Modak, Jyoti Ltd, and D Kedia, Industrial Consultants, India 650
- Inter-basin transfer for high head development
Ye Yiqi, Water Resources Bureau, Zhejiang Province, China 667
- Construction and commissioning of the Mae Ngat power project in Thailand
R M Seoni, Acres International Ltd, Canada, and O Chanpayom, Electricity Generating Authority of Thailand, Thailand 679
- Small hydro power stations at irrigation reservoirs
Xing Zhaishen, Water Resources Bureau, Hebei Province, China 699
