

OUTCOME OF TC 29 (TECHNICAL COMMITTEE NO.29) OF ISSMGE (INTERNATIONAL SOCIETY FOR SOIL MECHANICS AND GEOTECHNICAL ENGINEERING) FROM 1994 TO 2001

Advanced Laboratory Stress-Strain Testing of Geomaterials

Edited by

F. Tatsuoka

University of Tokio, Chairman of TC29, ISSMGE

S. Shibuya

Hokkaido University, Secretary of TC29, ISSMGE

R. Kuwano

*University of Tokio, Member of JGS (Japanese Geotechnical Society)
Domestic Committee for TC29*

A.A.BALKEMA PUBLISHERS LISSE / ABINGDON / EXTON (PA) / TOKYO

Table of contents

| | |
|---|-----|
| Preface | VII |
| Recent advances in stress-strain testing of geomaterials in the laboratory; background and history of TC-29 for 1994 - 2001 <i>F.Tatsuoka, S.Shibuya & R.Kuwano</i> | 1 |
| <i>S-O-A Reports (National reports and international round-robin tests)</i> | |
| Report on the current situation of laboratory stress-strain testing of geomaterials in Italy and its use in practice <i>A.Cavallaro, V.Fioravante, G.Lanzo, D.C.F.Lo Presti, S.Rampello, A.d'Onofrio, F.Santucci de Magistris & F.Silvestri</i> | 15 |
| A review of laboratory equipments for stress-strain testing in Greece <i>V.N.Georgiannou</i> | 45 |
| Recent state of laboratory stress-strain tests on geomaterials in Japan <i>J.Kuwano & M.Katagiri</i> | 47 |
| A review of Japanese standards for laboratory shear tests <i>J.Kuwano, M.Katagiri, K.Kita, M.Nakano & R.Kuwano</i> | 53 |
| International round-robin test organized by TC-29 <i>S.Yamashita, Y.Kohata, T.Kawaguchi & S.Shibuya</i> | 65 |
| Report on applications of laboratory stress-strain test results of geomaterials to geotechnical practice in Japan <i>J.Koseki, F.Tatsuoka, M.Yoshimine, M.Hatanaka, K.Uchida, N.Yasufuku & I.Furuta</i> | 111 |
| <i>Individual papers</i> | |
| Viscous deformation in triaxial compression of a dense well-graded gravel and its model simulation <i>L.Q.AnhDan, J.Koseki & F.Tatsuoka</i> | 187 |
| Modelling of stress and strain relationship of dense gravel under large cyclic loading <i>K.Balakrishnaiyer & J.Koseki</i> | 195 |
| Investigation of tied-back wall behavior and selection of geomechanical parameters for numerical analysis <i>M.M.Berilgen, I.K.Ozaidin, & O.Inan</i> | 203 |
| Small strain stiffness under different isotropic and anisotropic stress conditions of two granular granite materials <i>A.Correia, L.Q.AnhDan, J.Koseki, & F.Tatusoka</i> | 209 |
| Viscous and non viscous behaviour of sand obtained from hollow cylinder tests <i>H.Di Benedetto, H.Geffroy & C.Sauzeat</i> | 217 |

| | |
|--|-----|
| Micaceous sands: stress-strain behaviour and influence of initial fabric <i>V.N.Georgiannou</i> | 227 |
| Effect of ageing on stiffness of loose Fraser River sand <i>J.A.Howie, T.Shozen & Y.P.Vaid</i> | 235 |
| Deformation characteristics of recompressed volcanic cohesive soil <i>M.Katagiri & K.Saitoh</i> | 245 |
| Effects of ageing on stress-strain behaviour of cement-mixed sand <i>L.Kongsukprasert, R.Kuwano & F.Tatsuoka</i> | 251 |
| Dependency of horizontal and vertical sugrade reaction coefficients on loading width <i>J.Koseki, Y.Kurachi, & T.Ogata</i> | 259 |
| Low-strain stiffness and material damping ratio coupling in soils <i>C.G.Lai, O.Pallara, D.C.F.Lo Presti & E.Turco</i> | 265 |
| A solid cylinder torsional shear device <i>J.Manzanas & V.Cuellar</i> | 275 |
| Application of an elasto-viscous model to one-dimensional consolidation of clay under cyclic loading <i>T.Moriwaki, Y.E.Supranata, M.Sitoh & M.Hashinoki</i> | 279 |
| Effects of stress path on the flow rule of sand in triaxial compression <i>H.Nawir, R.Kuwano & F.Tatsuoka</i> | 287 |
| Simulation of viscous effects on the stress-strain behaviour of a dense silty sand <i>F.Santucci de Magistris, F.Tatsuoka & M.Ishihara</i> | 295 |
| Interrelationship between the metastability index and the undrained shear strength of six clays <i>S.Shibuya, T.Mitachi, M.Temma & T.Kawaguchi</i> | 303 |
| Case study on the practical use of elastic modulus in deformation analysis of soft clay ground <i>S.B.Tamrakar, S.Shibuya & T.Mitachi</i> | 309 |
| Effects of fabric anisotropy of a sand specimen on small strain stiffness measured by the bender element method <i>S.Yamashita & T.Suzuki</i> | 317 |
| Strength and deformation characteristics of artificially cemented clay with dispersion due to the mixing quality <i>N.Yasufuku, H.Ochiai, K.Omine & N.Iwamoto</i> | 323 |
| Author index | 329 |
