OPTIMIZING RESERVOIR RESOURCES

Including a New Model for Reservoir Reliability

INTRODUCTION xiii

PART I DETERMINISTIC MODELS FOR THE OPERATION AND DESIGN OF RESERVOIRS 1

1 THE WATER SUPPLY FUNCTION: SINGLE RESERVOIR 3

Water Supply with Constant Release / 3
Evaporation Accounting Added to the Basic Model / 8
Water Supply and Flood Control / 11
Water Supply with Monthly Varying Release / 12
Water Supply Operating Rules and Simulation / 14

2 THE WATER SUPPLY FUNCTION: MULTIPLE RESERVOIRS 22

Introduction / 22
Maximizing Yield with Reservoirs in Place / 23
Monthly Contributions Do Not Vary Year to Year / 24
Monthly Contributions Vary Year to Year / 26

Cost Minimization Given a System Yield Requirement / 38
Reservoirs Operated Independently of One Another / 38
Reservoirs Operated in Concert / 39

Conclusion / 42

3 THE HYDROPOWER FUNCTION **45**

Achieving a Firm Energy Supply: Single Reservoir / 45
The Storage-Energy Curve / 51

Maximizing Annual Production or Revenues: Single Reservoir / 55
Variably Priced Energy Output: Single Reservoir / 59
Hydropower Production in Multiple Reservoirs / 61

4 COST ALLOCATION AND STAGING/SEQUENCING **66**

Cost Allocation in Water Supply / 66
Cost Allocation in Multiple-Purpose Reservoirs / 74
Time Staging of Water Supply Alternatives / 75
A Zero-One Programming Formulation / 76
An Exact Algorithm for Staging Under Linear Growth / 80

Time Staging and Cost Allocation / 83

5 INTEGRATING RESERVOIR SERVICES **85**

Modeling the Multipurpose Reservoir / 86
The Irrigation Objective / 88
The Recreation Objective / 91

PART II RESERVOIR ALLOCATION AND REALLOCATION INCLUDING THE NEW MODEL FOR RESERVOIR RELIABILITY 97

6 ALLOCATING RESERVOIR SERVICES AMONG WATER SUPPLY, FLOOD CONTROL, AND HYDROPOWER: THE DETERMINISTIC FLOW ENVIRONMENT **99**

Introduction / 99
Allocation between Water Supply and Flood Control / 100
Model 6-a: Flood Pool Volume Constant and Water Requirement Constant Through the Year / 101

Model 6-b: Flood Pool Volume Constant and Water Requirement Varies by Month Through the Year / 105
Model 6-c: Flood Pool Volume Differs by Month and Water Requirement Constant / 106
Model 6-d: Water Demand Is Assumed to Vary by Month and Flood Pool Differs by Month / 107
Allocation Extended to Water Supply, Flood Control, and Hydropower / 109
Excess Energy Adds Negligible Value / 109
Excess Energy Has Value / 111
Excess Energy Valued and a Rule Curve Determined / 112

7 ACHIEVING A RELIABLE WATER SUPPLY WITH CHANCE-CONSTRAINED PROGRAMMING AND EVENT RESPONSIVE DENSITY ADJUSTMENT 116

Introduction / 116
Problem Settings for the Reliability Constrained Models / 118
Problem Ia: Maximizing the Firm Release from a Single Reservoir / 119
Problem IIa:Maximizing the Annual Yield from a Single Reservoir with Water Requirements by Month / 125
Problem III:Maximizing the Firm Joint Yield From Parallel Reservoirs / 126
Problem IV: Maximizing the Joint Annual Yield from Parallel Reservoirs with Water Requirements by Month / 128
Comparison of this Approach to Design Using Synthetic Hydrology / 129
The Duration of a Drought / 136
Computational Experience / 140
Storage-Yield Curves / 140
Yield-Reliability Curves / 147
Summary / 153
Acknowledgment / 155
Appendix: Derivation of the Variance of Random Shock / 155

8 REVISITING ALLOCATION WITH THE NEW MODEL ENFORCING A RELIABILITY REQUIREMENT 158

Introduction / 158
Reliability-Constrained Models for Allocating Water Supply and Flood Storage / 159

Model 8-a: Constant Release and Constant Flood Pool / 159
Model 8-b: Differing Monthly Releases and Constant Flood Pool / 160
Model 8-c: Constant Monthly Release and Variable Flood Pool / 161
Discussion / 162

Water Supply, Flood Control, and Hydropower / 163

9 THE REALLOCATION OF RESERVOIR SERVICES USING THE RELIABILITY-CONSTRAINED RESERVOIR MODEL 166

Introduction / 166
Reliability-Constrained Models for Reallocating Water Supply Storage and Flood Storage / 167
Model 9-a: Constant Release and Constant Flood Pool / 167
Model 9-b: Differing Monthly Releases and Constant Flood Pool / 169
Mode 9-c: Constant Monthly Release and Variable Flood Pool / 170

Reallocation of Water Supply, Flood Control, and Hydropower Services Using the Reliability-Constrained Model / 171
Flood Control Reliability / 172
